PROCEEDINGS AND DEBATES OF THE 86th CONGRESS, SECOND SESSION

SENATE

TUESDAY, JUNE 14, 1960

The Senate met at 12 o'clock meridian, and was called to order by Senator GEORGE D. AIKEN, of Vermont.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Father of all mercies, with the unsatisfied desires of our yearning hearts, we turn unfilled to Thee.

Like the flowers in June gardens uplifted to the sun, like still waters that mirror the eternal stars, so we would lift our needy souls to Thee, our light and our life. Without Thee, our science but whets the sword to a sharper edge, and would destroy us with our own wheels and wings.

Without Thee, even learning cannot redeem us, for we know now that the mere sharpening of the intellect, the massing and mastery of facts and figures, may but fit men to be tenfold more masterful in the awful art of slaughter.

And so we pray that Thou wilt shatter our delusions, shine through our blindness, and shame our pride, that in folly we stray not away from Thee and the things that belong to our peace.

We ask it in the name of the Prince of Peace. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., June 14, 1960.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. GEORGE D. AIKEN, a Senator from the State of Vermont, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. AIKEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Monday, June 13, 1960, was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 10021. An act providing a uniform law for the transfer of securities to and by fiduciaries in the District of Columbia;

H.R. 10921. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia;

H.R. 10952. An act to authorize the National Society Daughters of the American Colonists to use certain real property in the District of Columbia as the national headquarters of that society;

H.R. 11931. An act to amend the act of March 3, 1901, with respect to the time within which a caveat to a will must be filed in the District of Columbia;

H.R. 12055. An act to incorporate the Metropolitan Police Relief Association of the District of Columbia;

H.R. 12520. An act to amend the act of August 11, 1939, so as to authorize Group Hospitalization, Inc., to enter into contracts with certain dental hospitals for the care and treatment of individuals, and for other purposes;

H.R. 12584. An act to amend the Uniform Narcotic Drug Act for the District of Columbia; and

H.R. 12597. An act to amend the District of Columbia Motor Vehicle Parking Facility Act of 1942.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred to the Committee on the District of Columbia:

H.R. 10021. An act providing a uniform law for the transfer of securities to and by fiduciaries in the District of Columbia;

H.R. 10921. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia;

H.R. 10952. An act to authorize the National Society Daughters of the American Colonists to use certain real property in the District of Columbia as the national headquarters of that society;

H.R. 11931. An act to amend the act of March 3, 1901, with respect to the time within which a caveat to a will must be filed in the District of Columbia;

H.R. 12055. An act to incorporate the Metropolitan Police Relief Association of the District of Columbia;

H.R. 12520. An act to amend the act of August 11, 1939, so as to authorize Group Hospitalization, Inc., to enter into contracts with certain dental hospitals for the care and treatment of individuals, and for other purposes;

H.R. 12584. An act to amend the Uniform Narcotic Drug Act for the District of Columbia; and

H.R. 12597. An act to amend the District of Columbia Motor Vehicle Parking Facility Act of 1942.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Foreign Relations Committee and the National Policy Machinery Subcommittee of the Committee on Government Operations were authorized to meet during the session of the Senate today.

On request of Mr. MANSFIELD, and by unanimous consent, the Roads Subcommittee of the Public Works Committee, the Finance Committee, and the Antitrust Subcommittee of the Committee on the Judiciary were authorized to meet during the session of the Senate today.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to consider executive business, to consider the nominations on the Executive Calendar, beginning with the nominations of U.S. marshals.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORT OF A COMMITTEE

The following favorable report of a nomination was submitted:

By Mr. MURRAY, from the Committee on Interior and Insular Affairs:

T. Harold Scott, of Colorado, to be an Associate Commissioner of the Indian Claims Commission, vice Arthur V. Watkins.

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Executive E, 86th Congress, 2d session. A Treaty of Mutual Cooperation and Security Between the United States of America and Japan, signed at Washington on January 19, 1960 (Ex. Rept. No. 8).

The ACTING PRESIDENT pro tempore. If there be no further reports of committees, the nominations on the calendar, beginning with the U.S. marshal nominations, will be stated.

U.S. MARSHALS

The Chief Clerk proceeded to read sundry nominations of U.S. marshals.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that these nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the U.S. marshal nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

DISTRICT OF COLUMBIA UNCLAIMED FUNDS ACT FOR LIFE INSURANCE COMPANIES

A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation to provide for the administration of unclaimed funds held and owing by life insurance companies in the District of Columbia (with an accompanying paper); to the Committee on the District of Columbia.

AMENDMENT OF THE DISTRICT OF COLUMBIA REDEVELOPMENT ACT OF 1945

A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Redevelopment Act of 1945, as amended, and the act approved December 20, 1944, as amended, and for other purposes (with an accompanying paper); to the Committee on the District of Columbia.

AMENDMENT OF SECTION 960, TITLE 18, UNITED STATES CODE

A letter from the Secretary of State transmitting a draft of proposed legislation to amend section 960 of title 18 of the United States Code (with accompanying papers); to the Committee on the Judiciary.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a report of the Archivist of the United States on a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The ACTING PRESIDENT pro tempore appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the committee on the part of the Senate.

RESOLUTION OF WEST CENTRAL TELEPHONE ASSOCIATION OF WADENA, MINN.

Mr. HUMPHREY. Mr. President, members of the West Central Telephone Association of Wadena, Minn., have unanimously approved a resolution calling for elimination of the Federal excise tax on telephone service. I ask unanimous consent that this resolution, approved at the association's annual meeting on June 6, 1960, be printed in the RECORD and appropriately referred.

There being no objection, the resolution was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

Whereas the 10-percent wartime Federal excise tax was imposed as a temporary measure; and

Whereas that, unlike jewelry, furs, and liquor, the telephone is not a luxury item, but is an everyday necessity, and, therefore, should be classified as an essential service along with other utilities such as water, gas, and electricity; and

Whereas Congress voted last year to drop the Federal excise tax on local telephone service June 30, 1960: Now, therefore, be it

Resolved, That the Congress be asked not to rescind the repeal action of last year and the Federal tax on local service be eliminated.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MURRAY, from the Committee on Interior and Insular Affairs, without amendment:

S. Res. 329. Resolution to provide additional funds for the Committee on Interior and Insular Affairs; referred to the Committee on Rules and Administration.

By Mr. LONG of Hawaii, from the Committee on Interior and Insular Affairs, without amendment:

S. Res. 330. Resolution to study the conditions in American Samoa; referred to the Committee on Rules and Administration.

By Mr. KUCHEL, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 11706. An act to authorize an extension of time for final proof under the desert-land laws under certain conditions (Rept. No. 1568).

By Mr. CHURCH, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 6456. An act concerning payment of debts out of compensation for trust land on the Lower Brule Sioux Reservation taken by the United States (Rept. No. 1578);

H.R. 6498. An act concerning payment of debts out of compensation for trust land on the Standing Rock Sioux Reservation taken by the United States (Rept. No. 1579);

H.R. 6529. An act concerning payment of debts out of compensation for trust land on the Crow Creek Sioux Reservation taken by the United States (Rept. No. 1580);

H.R. 9028. An act to provide that certain funds shall be paid to the Kickapoo Tribal Council of Oklahoma (Rept. No. 1581); and

H.R. 10639. An act to amend section 3(b) of the act of May 9, 1958 (72 Stat. 105), relating to the preparation of a roll of the members of the Otoe and Missouria Tribe and to per capita distribution of judgment funds (Rept. No. 1582).

By Mr. ANDERSON, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 11161. An act to donate to the pueblos of Zia and Jemez a tract of land in the Ojo del Espiritu Santo grant, New Mexico (Rept. No. 1577).

By Mr. McCLELLAN, from the Committee on Government Operations, without amendment:

S. 3319. A bill to authorize the Administrator of General Services to release the recapture provisions contained in the conveyance of certain real property to the city of Little Rock, Ark., and for other purposes (Rept. No. 1569); and

S. 3486. A bill to authorize Government agencies to provide quarters, household furniture, and equipment, utilities, subsistence, and laundry service to civilian officers and employees of the United States, and for other purposes (Rept. No. 1570).

By Mr. ROBERTSON, from the Committee on Banking and Currency, without amendment:

S. 3439. A bill authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet (Rept. No. 1572).

By Mr. FREAR, from the Committee on Banking and Currency, without amendment:

S. 3158. A bill to exempt State controlled banks belonging to the Federal Reserve System from the statutory limits on the number of their directors (Rept. No. 1571).

By Mr. DOUGLAS, from the Committee on Banking and Currency, with an amendment:

H.R. 12052. An act to extend the Defense Production Act of 1950, as amended, for an additional 2 years (Rept. No. 1573).

By Mr. TALMADGE, from the Committee on Finance, with amendments:

S. 3549. A bill to amend the act of September 14, 1959, with respect to sales and use taxes imposed by States on sales and other business activities in interstate commerce, and authorizing studies by congressional committees of this type of taxation (Rept. No. 1574).

By Mr. HILL, from the Committee on Appropriations, with amendments:

H.R. 11390. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 1576).

HOUSING ACT OF 1960

Mr. SPARKMAN, from the Committee on Banking and Currency, reported an original bill (S. 3670) to extend and amend laws relating to the provision and improvement of housing and the renewal of urban communities, and for other purposes, and submitted a report (No. 1575) thereon, which was read twice by its title and placed on the calendar.

ADDITIONAL COPIES OF REPORT ENTITLED "DOCUMENTATION, INDEXING, AND RETRIEVAL OF SCIENTIFIC INFORMATION"

Mr. McCLELLAN, from the Committee on Government Operations, reported an original resolution (S. Res. 333) to print additional copies of the report entitled "Documentation, Indexing, and Retrieval of Scientific Information," which was referred to the Committee on Rules and Administration, as follows:

Resolved, That the report entitled "Documentation, Indexing, and Retrieval of Scientific Information", prepared by the staff of

the Committee on Government Operations, be printed with illustrations as a Senate document, and that four thousand three hundred additional copies be printed for the use of that committee.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. YOUNG of Ohio:

S. 3668. A bill relating to the gift and estate tax treatment of the relinquishment of certain powers in the case of reciprocal and other trusts; to the Committee on Finance.

By Mr. HILL:

S. 3669. A bill to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health; to the Committee on Labor and Public Welfare.

By Mr. SPARKMAN:

S. 3670. A bill to extend and amend laws relating to the provision and improvement of housing and the renewal of urban communities, and for other purposes; placed on the calendar.

(See reference to above bill when reported by Mr. SPARKMAN, which appears under the heading "Reports of Committees.")

CONCURRENT RESOLUTION

WAGE DIFFERENTIALS: THE NEED FOR FAIR COMPETITION IN INTERNATIONAL TRADE

Mr. BUSH submitted a concurrent resolution (S. Con. Res. 110) relative to consideration of certain tariff reductions and wage differentials at the coming GATT Conference, which was referred to the Committee on Finance.

(See the above concurrent resolution printed in full when submitted by Mr. BUSH, which appears under a separate heading.)

RESOLUTION

Mr. McCLELLAN, from the Committee on Government Operations, reported an original resolution (S. Res. 333) to print additional copies of the report entitled "Documentation, Indexing, and Retrieval of Scientific Information," which was referred to the Committee on Rules and Administration.

(See the above resolution printed in full when reported by Mr. McCLELLAN, which appears under the heading "Reports of Committees.")

WAGE DIFFERENTIALS: THE NEED FOR FAIR COMPETITION IN INTERNATIONAL TRADE

Mr. BUSH. Mr. President, I submit, for appropriate reference, a concurrent resolution to express the sense of the Congress that the representatives of the United States to the forthcoming tariff negotiations under the auspices of the General Agreement on Tariffs and Trade must not only put into effect the President's recommendation to withhold reductions on tariffs on products made by workers receiving wages which are substandard in the exporting country, but should also consider wage differentials, in order to protect American labor and industry, and work for the development of fair labor standards in exporting countries in the interests of fair competition in international trade.

Mr. President, the concurrent resolution gives Congress the opportunity to express itself concerning the growing problem created by imports from foreign countries in which wages and labor standards are far below those prevailing in the United States.

I am glad that this problem is now being recognized by the labor unions in my own State of Connecticut. The third constitutional convention of the Connecticut State Labor Council, AFL–CIO, in September 1959, adopted a resolution on international trade policy which calls attention to the unfair competition from foreign imports based on unduly low wages and labor standards in exporting countries.

Mr. President, I ask unanimous consent that the concurrent resolution, a letter I addressed to Mr. Joseph M. Rourke, secretary-treasurer of the council, in response to his request for my comments upon the council's resolution, and that resolution, may be printed in the RECORD following these remarks.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be received and appropriately referred; and, without objection, the concurrent resolution, letter, and resolution will be printed in the RECORD.

The concurrent resolution (S. Con. Res. 110), submitted by Mr. BUSH, was referred to the Committee on Finance, as follows:

Whereas the preservation of existing jobs in American industry is vital to the national economy, and the expanding population of the United States requires the constant creation of new employment opportunities; and

Whereas the general levels of wages paid to industrial workers in foreign countries are substantially below levels prevailing in the United States, thus increasing the competitive standing of foreign producers in international trade; and

Whereas foreign labor unions generally have weaker bargaining powers than those of this country, which makes closing of the wage cost differential between foreign and domestic producers a difficult and slow process; and

Whereas the Eighty-fifth Congress passed the Trade Agreements Extension Act in August 1958, authorizing the President within the four-year period ending June 30, 1962, to reduce existing customs duties in stages by any one of three alternative methods as follows:

1. Reducing the rate existing on July 1, 1958, by not more than 20 per centum, provided that no more than a 10 per centum reduction may be made effective in any one year;

2. Reducing the rate existing on July 1, 1958, by not more than 2 per centum ad valorem (or the ad valorem equivalent, in the case of a specific rate or a combination of ad valorem and specific rates), provided that no more than a 1 per centum reduction may be made effective in any one year;

3. Reducing to 50 per centum ad valorem or its equivalent a rate which is in excess of that level, provided that no more than one-third of the total reduction may be made effective in any one year;

Whereas an international conference held under the auspices of the General Agreement on Tariffs and Trade will be convened in Geneva, Switzerland, in September 1960, and continue into 1961; and

Whereas the Interdepartmental Trade Agreements Organization, consisting of the Departments of State, Treasury, Defense, Agriculture, Commerce, Labor, and Interior, the United States Tariff Commission, and the International Cooperation Administration, has published a Notice of United States Intention to Negotiate and a List of Products to be Considered for Possible United States Concession, subject to modifications following a "peril point" investigation by the United States Tariff Commission; and

Whereas the President has recommended that the United States "withhold reductions in tariffs on products made by workers receiving wages which are substandard in the exporting country" and that the United States seek to raise labor standards in foreign countries "through consultative procedures and cooperation in international conferences such as those sponsored by the International Labor Organization": Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that the representatives of the United States to the forthcoming tariff negotiations under the auspices of the General Agreement on Tariffs and Trade must not only put into effect the President's recommendation to withhold reductions in tariffs on products made by workers receiving wages which are substandard in the exporting country, but should also consider wage differentials, in order to protect American labor and industry, and work for the development of fair labor standards in exporting countries in the interests of fair competition in international trade.

The letter and resolution presented by Mr. BUSH are as follows:

U.S. SENATE,
COMMITTEE ON ARMED FORCES,
February 25, 1960.

Mr. JOSEPH M. ROURKE,
Secretary-Treasurer, Connecticut State Labor Council, AFL–CIO, Hamden, Conn.

DEAR JOE: When I dictated my letter to you yesterday concerning the Connecticut State Labor Council's resolutions on post office workers, I was not aware that your letter to me also enclosed a resolution on international trade policy and did not see the latter resolution until my reply was placed before me for signature.

I am glad, indeed, to comment on the resolution on international trade policy, which I thoroughly approve. I must confess that I read it with a smile, for I recall very vividly the days in 1953 when, as a newly appointed member of the Randall Commission, I vainly sought advice from the Connecticut AFL and CIO, then separate organizations, as to their positions on the issues the Commission was facing. I was told, as I recall, that the opinion of your membership was so divided on these controversial questions that an official expression of views could not be made. I might say that I got the same reaction from the Connecticut Association of Manufacturers, and the Connecticut Chamber of Commerce.

So, as a member of the Randall Commission, I had to face the issues without guidance from the groups in our State most immediately affected—the labor unions, and the manufacturers and businessmen. I went ahead on my own, and, at the risk of appearing immodest, I believe that my persuasion, at least in part, led to the Commission's recommendation to retain the "peril point" and "escape clause" safeguards in the Trade Agreements Act, and to the paragraph in the Commission's report which is quoted in

the Connecticut State Labor Council's resolution. I refer to the paragraph urging that in tariff negotiations, representatives of the United States "should simply make clear that no tariff concessions will be granted on products made by workers receiving wages that are substandard in the exporting country."

Indeed, former Congressman John Vorys, of Ohio, and I went further in a concurring statement. We took the view that our negotiators should consider not only substandard and depressed wage levels in the exporting country, but also wage differentials, as between American and foreign industries, in order to protect American labor. You will find our statement on page 63 of the Commission's formal report.

As I interpret paragraphs on the second page of your Council's resolution, it appears that your Council is now very nearly in accord with the views expressed 6 years ago by Mr. Vorys and myself. I refer to the paragraph pointing to the danger of "unfair competition from foreign imports based on unduly low wages and labor standards in the exporting country" and the following paragraph urging that "where it is clearly demonstrated that jobs are being lost by American workers as a result of such imports, consideration be given to the placing of adequate protective tariffs and quotas on typewriters and other products that are affected by foreign imports which now enter this country free and clear of any import duties."

I think it should be pointed out, however, that a foreign industry's wage rate may be standard, or even above standard, in its own country, and yet be far below the wage rate paid by a competing industry in this country. In such cases, I believe it is proper to consider the imposition of tariffs and quotas to protect American labor producing the goods affected, whether or not the competing imports are now entering duty-free.

I agree, of course, with your council's view that wage differentials cannot be controlling, but I believe this is a factor which should always be considered, especially in cases involving American industries particularly vulnerable to imports from countries with very low prevailing wage rates.

Finally, Joe, I hope that you will give this letter wide circulation among the members of the constituent unions of your council. As one who has often been marked "wrong" on Cope's voting scoreboards—on the basis, in my opinion, of politically slanted choices of issues—I'd like Connecticut union workers to know that on this issue—and a very important one for the protection of their jobs and wage standards—I was "right."

With kindest personal regards, I am,

Sincerely yours,

PRESCOTT BUSH.

RESOLUTION ON INTERNATIONAL TRADE POLICY

(Resolution adopted by the third constitutional convention of the Connecticut State Labor Council, AFL–CIO, September 10, 11, 12, 1959)

The past several years have seen the economic recovery of many industrial nations of the non-Communist world, in many cases greatly aided by U.S. help in the form of Marshall plan aid, and other forms of economic assistance. As these countries reentered the world market, they have sent more and more products to the U.S. market in direct competition with manufactured goods produced by domestic industries.

In Connecticut the competition offered by many of these products has had an adverse effect on the total business of Connecticut firms, because of the lower prices of the imported products; and some manufacturers have urged unions representing their employees to seek the imposition of higher tariffs or import quotas to limit the amount of competing goods which could be sold in U.S. markets. Among the Connecticut industries which have felt the effects of this import competition are the textile, hat, apparel, flatware, typewriter, sewing machine, brass fabricating, and rubber footwear.

The policy of high protective tariffs has previously been tried and found ineffectual, as late as the 1930's, when the Smoot-Hawley tariff measure succeeded in reducing the volume of imports but also resulted in reciprocal high tariffs in foreign countries. This cut down our substantial export trade to a fraction of its previous volume, thus eliminating additional industry and jobs in this country. The high protective tariff policy was abandoned after the great depression and was followed by the reciprocal trade agreements program.

1. AFL–CIO POLICY

The American labor movement has vigorously supported the reciprocal trade agreements program from its very inception more than two decades ago. This traditional support was reemphasized in the resolution unanimously adopted at the 1957 convention of the AFL–CIO. The resolution urged extension of the Reciprocal Trade Agreements Act for a period of at least 5 years with reenforcement of "the basic goal of the Reciprocal trade program, the gradual reduction of barriers to trade without undue hardship to American industries or American workers. The achievement of this goal must be sought, however, in the light of present-day conditions in our own Nation and in the nations allied with us in the common struggle for the preservation of freedom and democracy."

2. FAIR LABOR STANDARDS

The labor movement has also long advocated the principle that fair competition in international trade requires fair labor standards in exporting industries. This principle has been given at least some official recognition in recent years.

In its January 1954 report, the President's Commission on Foreign Economic Policy (Randall Commission) stated: "The clearest case of unfair competition is one in which the workers on a particular commodity are paid wages well below accepted standards in the exporting country. In such cases, our negotiators should simply make clear that no tariff concessions will be granted on products made by workers receiving wages which are substandard in the exporting country."

If this is the objective we are seeking, then our course should be to determine tariff policy in accordance with a liberal trade policy, but for those items made in industries where there are unfair labor standards in the exporting countries, existing concessions should be conditional upon sincere efforts in the exporting country to eliminate unfair labor standards. Failure of the exporting country to take steps to eliminate unfair labor standards should be grounds for withdrawal of the concession.

As a first step, U.S. representatives to the General Agreement on Tariffs and Trade Agency (GATT) should urge acceptance of a clause on fair labor standards in international trade similar to the one proposed in 1953. Toward this end, and in preparation for the multilateral tariff negotiations to take place in 1960, U.S. representatives should ascertain the facts regarding wage levels and working conditions in industries in exporting countries. In such negotiations, specific recognition should be given to the level of labor standards in such industries in any tariff concessions the United States may be prepared to offer.

In making these recommendations, we are fully aware that it is neither desirable nor feasible that wage levels be equalized in all countries. We recognize that the stage of development of a country's economy and the productivity of its industries may limit the level of wages that can be paid. Therefore, it is to be expected that wage differentials will continue to exist, and such disparities should not impede international trade. But we insist that wages and working conditions in exporting industries fully reflect the productivity and technological advance of the industry and the national economy. Substandard wage levels or working conditions are clear evidence of the existence of unfair competition in international trade and should be eliminated as rapidly as possible.

Development of a fair labor standard in international trade will benefit workers and employers in the United States because it will assure them that they will not be faced by unfair competition from foreign imports based on unduly low wages and labor standards in the exporting country. In the exporting countries themselves, promotion of fair labor standards will contribute significantly to advancement of living standards and economic growth. The people of those countries will find, as we have found in America, that decent wages and decent working conditions promote domestic purchasing power, industrial productivity and sound economic growth.

We also urge that where it is clearly demonstrated that jobs are being lost by American workers as a result of such imports, consideration be given to the placing of adequate protective tariffs and quotas on typewriters and other products that are affected by foreign imports which now enter this country free and clear of any import duties.

This third constitutional convention of the Connecticut State Labor Council, AFL–CIO, therefore goes on record as urging our representatives in Congress to support most actively the adoption of the policy set forth in this resolution.

DESIGNATION OF DOUGLAS McKAY DAM AND RESERVOIR, OREG.—AMENDMENT

Mr. LUSK. Mr. President, I submit for appropriate reference an amendment to H.R. 7634, to name the Detroit Dam and Reservoir on the North Santiam River, Oreg., after Oregon's late Governor and former Secretary of the Interior, Douglas McKay.

The Senate, on August 19, 1959, passed S. 2440, providing that the Green Peter Dam and Reservoir be named the Douglas McKay Dam and Reservoir. In the House, however, an amendment was adopted which provided that the Detroit Dam and Reservoir be named after Douglas McKay. A further amendment was adopted which has nothing to do with the naming of any Oregon dam. That amendment seems to be controversial and has resulted in no final action being taken on the proposal to name the dam after the late Douglas McKay.

I ask unanimous consent that a portion of the printed House committee report on S. 2440, prepared and submitted by the Interior Committee appear in the RECORD at this point in my remarks.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

DOUGLAS M'KAY DAM AND RESERVOIR

The Detroit Dam is located on North Santiam River 60 miles above its confluence with South Santiam River. The North and South Santiam Rivers unite to form Santiam River, which 10 miles downstream enters the Willamette River. The main Detroit Dam is a concrete gravity structure about 454 feet high and 1,522 feet long. The reservoir has a usable storage capacity of 340,000 acre-feet. The project also provides for a reregulating structure 3 miles downstream at the Big

Cliff site. This structure, also concrete gravity type, is approximately 172 feet high and has a usable storage capacity of 2,430 acre-feet. The power-generating facilities at the main site include two units of 50,000 kilowatts each. The reregulating structure has a power installation of 18,000 kilowatts.

The project was selected for construction under the authorization contained in the Flood Control Act of June 28, 1938. The Flood Control Acts of December 22, 1944, and July 24, 1946, modified the project to provide for recreational facilities, and the Flood Control Act of June 30, 1948, authorized installation of power facilities including construction of the reregulating structure. The cost of the completed project was $62,730,000.

Douglas McKay was born in Portland, Oreg., in 1893. He served as mayor of Salem, Oreg., served several terms in the Oregon State Senate, and as Governor of Oregon from 1949 to 1953. He was appointed Secretary of the Interior on January 21, 1953, and resigned from that position in May 1956. He was appointed as Chairman, International Joint Commission, in August 1957, and served until his death on July 22, 1959.

Mr. McKay was a distinguished political leader of Oregon for more than a quarter of a century. He was always interested in the development of the natural resources of the Nation, particularly the water resources. He was Governor of Oregon during the time the major projects in the Columbia River Basin were authorized. In his capacity as Chairman of the International Joint Commission, he served with distinction, and deserves much of the credit for the progress which has been made in reaching an understanding with Canada with respect to the use of the Columbia River waters.

The committee believes it fitting that the Detroit Dam and Reservoir be named for Mr. McKay in recognition of his long and outstanding service to the State of Oregon, the Pacific Northwest, and to the Nation.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and lie on the table.

AMENDMENT OF INTERNAL REVENUE CODE OF 1954, RELATING TO EXEMPTION FROM INCOME TAX FOR SUPPLEMENTAL UNEMPLOYMENT BENEFIT TRUSTS—AMENDMENT

Mr. CASE of New Jersey submitted an amendment, intended to be proposed by him, to the bill (H.R. 8229) to amend the Internal Revenue Code of 1954 to provide an exemption from income tax for supplemental unemployment benefit trusts, which was ordered to lie on the table and to be printed.

NOTICES OF MOTIONS TO SUSPEND THE RULE—AMENDMENTS TO DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE AND RELATED AGENCIES APPROPRIATION BILL

Mr. FONG submitted the following notice in writing:

In accordance with rule XL, of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 11390) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, the following amendment, namely: Page 19, line 2, after the word "titles:", insert the following: *"Provided further,* That, notwithstanding any other provision of law, allotments under title III of said Act for grants to States and loans to nonprofit private schools for science, mathematics, or modern foreign language equipment and minor remodeling of facilities and for grants to States for supervisory and other services, shall be made in such manner as to extend the benefits thereof to the State of Hawaii on the basis of equality with the other States."

Mr. FONG also submitted an amendment, intended to be proposed by him, to the bill (H.R. 11390) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, which was ordered to lie on the table and to be printed.

(For text of amendment referred to, see the foregoing notice.)

Mr. FONG also submitted the following notice in writing:

In accordance with rule XL of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 11390) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, the following amendment, namely: Page 21, line 19, after the word "year:", insert the following: *"Provided further,* That, notwithstanding any other provision of law, allotments under section 2 of the said Act shall be made in such manner as to extend the benefits of such section to the State of Hawaii on the basis of equality with other States."

Mr. FONG also submitted an amendment, intended to be proposed by him, to the bill (H.R. 11390) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, which was ordered to lie on the table and to be printed.

(For text of amendment referred to, see the foregoing notice.)

Mr. FONG also submitted the following notice in writing:

In accordance with rule XL, of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 11390) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, the following amendment; namely, page 28, line 15, after the word "herein", insert the following: *"Provided further,* That, notwithstanding any other provision of law, allotments under such parts C and G shall be made in such manner as to extend the benefits of such parts to the State of Hawaii on the basis of equality with the other States."

Mr. FONG also submitted an amendment, intended to be proposed by him, to the bill (H.R. 11390) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, which was ordered to lie on the table and to be printed.

(For text of amendment referred to, see the foregoing notice.)

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE APPROPRIATIONS, 1961—AMENDMENT

Mr. KERR. Mr. President, I submit an amendmnet to H.R. 11390, the appropriations bill for the Department of Health, Education, and Welfare.

The amendment provides $7,362,000 for payment to school districts for fiscal year 1959. This is the amount of the entitlement of the school districts of the United States which was unappropriated and unpaid under Public Law 874.

I shall ask unanimous consent to have printed in the RECORD at the end of my remarks a tabulation showing the loss of funds, under Public Law 874, resulting from the 5-percent deficit for the fiscal year 1959. The tabulation shows, by States, the total number of applicants and the total entitlement remaining unpaid at this time. It also lists the school districts having a loss of over $10,000 in each State.

I am happy to be joined by 38 Senators as cosponsors, and I have the assurance of many more of their support of this amendment.

Mr. President, if we are not to appropriate the full amount of the entitlement to the school districts who have made application under existing law, then we should amend the law to provide that they are not entitled to the full amount which they have been told they would receive on the basis of the Federal impact upon their school districts.

This appropriation, in my estimation, must be passed, if we are to keep faith with the districts which had every reason to believe that they are entitled to these funds, and who were paid only 95 percent of that to which they are entitled under the law enacted by this Congress and signed by the President of the United States.

I urge support of the amendment.

Mr. President, I ask unanimous consent that the amendment may lie on the desk until the opening of the Senate tomorrow, to enable other Senators to become cosponsors, if they see fit.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KERR. Mr. President, I ask unanimous consent, also, to have printed as a part of my remarks a tabulation entitled "Loss of Funds Under Public Law 874 Resulting From 5-Percent Deficit for Fiscal 1959." That is the deficit which this amendment is calculated to reimburse.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and will lie on the table; and, without objection, the tabulation will be printed in the RECORD.

The amendment, submitted by Mr. KERR (for himself, and Senators MONRONEY, JOHNSTON of South Carolina, YARBOROUGH, COOPER, ENGLE, GREEN, TALMADGE, BEALL, MCNAMARA, HART, PASTORE, RANDOLPH, CASE of South Dakota, YOUNG of North Dakota, CHURCH, MORSE, GRUENING, MCGEE, MUNDT, CHAVEZ, SCOTT, LONG of Hawaii, FULBRIGHT, ERVIN, FONG, SYMINGTON, BENNETT, MANSFIELD, SCHOEPPEL, KEFAUVER, CARROLL,

ANDERSON, BARTLETT, HARTKE, CANNON, MOSS, HENNINGS, MURRAY, and KUCHEL), was ordered to lie on the table, as follows:

For an additional amount for "Payments to school districts," fiscal year 1959, $7,362,000.

The tabulation presented by Mr. KERR is as follows:

LOSS OF FUNDS UNDER PUBLIC LAW 874 RESULTING FROM 5-PERCENT DEFICIT FOR FISCAL 1959

School districts having a loss of over $10,000 are listed individually.

AMENDMENT OF NATIONAL LABOR RELATIONS ACT, RELATING TO FEDERAL-STATE JURISDICTION—ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of June 7, 1960, the name of Senator MCNAMARA was added as an additional cosponsor of the bill (S. 3633) to amend section 14(c) of the National Labor Relations Act relating to Federal-State jurisdiction, introduced by Mr. DOUGLAS on June 7, 1960.

FOREIGN COMPETITION WITH AMERICAN INDUSTRY—ADDITIONAL COSPONSORS OF JOINT RESOLUTION

Under authority of the order of the Senate of June 13, 1960, the names of Senators HICKENLOOPER, WILEY, HRUSKA, COTTON, DWORSHAK, BUSH, KEATING, AIKEN, JAVITS, PROUTY, BENNETT, SCOTT, BRIDGES, SALTONSTALL, SCHOEPPEL, SMITH, CASE of New Jersey, and CARLSON were added as additional cosponsors of the joint resolution (S.J. Res. 208) to provide for a commission to study and report on the influence of foreign trade upon business and industrial expansion in the United States, introduced by Mr. DIRKSEN on June 13, 1960.

Mr. JAVITS. Mr. President, it gives me great pleasure to join in cosponsorship of the joint resolution introduced by the Senator from Illinois [Mr. DIRKSEN] to create a Commission on International Trade which would be designed to study the influence of foreign trade upon the U.S. economy.

I stress these thoughts at this time, however. I hope the Commission will not only take into consideration the domestic and foreign-policy implications to the United States in terms of its economics, but also in terms of its peace leadership, for the political and diplomatic implications of the U.S. trade policy in our struggle to cope with the massive and many-faceted Communist challenge, in my opinion, is at least equal to those in their importance.

This must be emphasized because, in foreign trade as in so many other aspects of our national life, we are going to have to make some sacrifices in order to keep the world free.

Furthermore, I know such a Commission will avail itself of the manifold resources and talent available in such agencies of the U.S. Government as the Bureau of Foreign Commerce of the Department of Commerce, the Department of State, the Department of Agriculture, the Tariff Commission, and other agencies of government, as well as private agencies. The experience and the information that has been accumulated in these organs of government will, I am sure, provide invaluable assistance to the work of the Commission.

A TOAST TO THE FLAG

Mr. BYRD of West Virginia. Mr. President, this being Flag Day, it is well that we recall the story of how our flag got its nickname, Old Glory.

One bitterly cold day in 1830, the *Charles Dagett* stood ready to set sail in Salem Harbor. The captain, William Driver, was about to begin the ceremonies for the embarkation.

A sailor passed to him the flag folded in the form of a triangle, and said:

Sir, in the days gone by, it was the custom of sailors embarking on a journey to dedicate the flag to the Trinity—God, the Father; God, the Son; and God, the Holy Ghost. Then, after benediction, the flag was unfurled and raised, and the sailors would shout "Glory, glory, glory."

As Captain Driver looked up at the flag being hoisted, he cried out:

To thee, let me call thee "Old Glory."

Thirty years later, during the Civil War, the city of Nashville, Tenn., fell to soldiers of the North. Ceremonies were planned to fly the Stars and Stripes, but the flag in use for the occasion was too small.

Captain Driver, still in possession of "Old Glory," was there. He offered the flag for the ceremony. A cry went up from the crowd. Someone shouted "Old Glory"; and the famous nickname stuck. It has been the popular name for the American flag ever since.

Mr. President, today being Flag Day, I wish to quote the words from "A Toast to the Flag," by John Daly:

Here's to the red of it.
There's not a thread of it,
No, nor a shred of it,
In all the spread of it
From foot to head,
But heroes bled for it,
Faced steel and lead for it,
Precious blood shed for it,
Bathing it red.

Here's to the white of it.
Thrilled by the sight of it,
Who knows the right of it,
But feels the might of it,
Through day and night.
Womanhood's care of it
Made manhood's dare for it;
Purity's prayer for it
Keeps it so white.

Here's to the blue of it.
Heavenly view of it,
Star-spangled hue of it,
Honesty's due of it,
Constant and true.
Here's to the whole of it,
Stars, stripes, and pole of it,
Here's to the soul of it,
Red, white, and blue.

ONE HUNDRED AND EIGHTY-FIFTH ANNIVERSARY OF ESTABLISHMENT OF U.S. ARMY

Mr. GREEN. Mr. President, today, June 14, commemorates the 185th anniversary of the establishment of the U.S. Army by authority of the Continental Congress. From the date of its establishment in 1775 through the years, the relationship which has existed between the legislative branch of the Government and the Army has been a close one. The action of the Continental Congress in 1775 enabled the freedom-loving people of the Thirteen Original Colonies to wage war successfully for their independence and to set an example for the entire world.

The action of the Congress in strongly supporting our Army is the symbol of its high respect for the Army and the fine job it has done over the years and is doing now. It must be comforting to the citizens of the United States and of the free world to know that Congress realizes the great importance of a strong Army.

As capable as our Army is today, the Congress must be always on guard to see that it is maintained modern, efficient, and ready to strike rapidly in event of aggression.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, I should like to query the acting majority leader about the calendar and the business for today, and for tomorrow, if possible.

Mr. MANSFIELD. Mr. President, I am delighted to respond to the query of the distinguished minority leader and state that, contrary to what I said yesterday, Calendar No. 1586, H.R. 7634, the public works authorization bill, will not be brought up today, but will be brought up later in the week, possibly on Thursday, although I cannot make a definite commitment in that respect.

It is contemplated that, at the conclusion of the morning business, the Senate will turn to the consideration of Calendar No. 1374, Senate Resolution 279, to authorize additional expenditures by the Committee on Government Operations; Calendar No. 1375, Senate Resolution 310, to increase the limit of expenditures for hearings before the Committee on Armed Services; Calendar No. 1376, Senate Resolution 305, to provide for a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

Those three resolutions are from the Committee on Rules and Administration, to repeat what I said on yesterday, in which the distinguished senior Senator from Louisiana [Mr. ELLENDER]—who, incidentally, I learn, has no opposition this year—is interested.

At the conclusion of the consideration of those measures, we will turn to Calendar No. 1163, Senate Joint Resolution 170, a joint resolution to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations, to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such conventions, and for other purposes.

Then it is quite possible that, at the conclusion of the consideration of that measure, if there is time, we shall turn to the consideration of Calendar No. 1411, S. 2929, a bill to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief.

It is anticipated that tomorrow the Senate will turn to the consideration of the Defense appropriation bill, Calendar No. 1614, H.R. 11998.

Mr. DIRKSEN. May I ask the acting majority leader whether these measures will be called up in the order of the

calendar numbers given; namely, 1374, 1375, 1376, 1163, and 1411?

Mr. MANSFIELD. That is the anticipation, and that is what will be done, if it meets with the approval of the minority leader.

Mr. DIRKSEN. Very well.

RELATIONS WITH CUBA

Mr. YOUNG of North Dakota. Mr. President, there has always been the warmest feeling on the part of the people of the United States toward Cuba and its people. As a result of close association and the confidence the people have for each other, Americans have invested billions of dollars in Cuba. Because of this, Cuba enjoys a standard of living higher than that of any other Latin American country.

Much of this feeling of friendship, as well as investments by citizens of the United States in Cuba, has been jeopardized since Fidel Castro rose to power in Cuba and launched his hate-monger campaign against the United States. His actions have caused people in this country to give a great deal of thought as to what to do about sugar legislation and the favorable position Cuba enjoys under this program. Recently Castro has adopted an even more vicious anti-American attitude and has been tying Cuba ever closer to Communist Russia.

Mr. President, I doubt if any country in the history of the world has ever been more tolerant of criticism than we have been of the Castro regime. This cannot go on forever. The attitude of Premier Castro indicates a complete lack of gratitude for the invaluable assistance his country receives from the United States through the sugar program. It is imperative that the Congress schedule legislation extending the Sugar Act for early action and also that additional consideration be given to greater quotas for farmers of the United States who are plagued with surpluses of virtually every crop they raise and need alternative crops.

Mr. President, I ask unanimous consent to have printed in the RECORD, as a part of my remarks, an article entitled "Communists Take Over 90 Miles From United States," which appears in the June 20, 1960, issue of U.S. News & World Report, including the brief biographical sketches of Premier Castro's chief advisers. I wish to commend the editors of the U.S. News & World Report for another outstanding article. This is one of the most sensible discussions of the Cuban situation I have ever read. It points up very graphically the impossible situation in which we find ourselves as concerns Cuba and our aid to this country through our sugar program. I hope, Mr. President, that the article will be widely read.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMUNISTS TAKE OVER 90 MILES FROM UNITED STATES—HOW THEY DID IT—WHAT IT MEANS

(Castro's Cuba is now exposed in its true role—a Communist satellite offshore from the United States.

(After months of careful preparation Red dictatorship is in full control, backed and guided by Moscow. It is cut to the classic pattern: "politburo" in charge, filling jails with all who resist; press leashed to the Communist line; plots against neighbors; collective farms; an end to private property.

(All this is causing official U.S. concern at last. Communists, with Cuba nailed down, are branching out, spreading "hate America" through the hemisphere, eyeing military sites that can be converted into Red bases.)

Communists now have taken full control in Cuba—an island located strategically only 90 miles from the United States.

The Communist takeover—long discounted by the U.S. State Department—is beginning now to be recognized and admitted.

A dictatorship of the proletariat is firmly fixed. This dictatorship looks to Soviet Russia and to Communist China for political guidance and for support.

All opposition to the Communist dictatorship, where it rises, is suppressed. Secret police spy on the people, spreading fear. Thousands of political prisoners crowd jails.

The last of Cuba's independent newspapers have been taken over or suppressed. The government controls all broadcasting. It now is a crime to make any statement unfavorable to communism or to the government.

Private property, more than $300 million worth of it American owned, has been seized by the government without tangible compensation. Large amounts of property remain to be seized.

Only one political party, the Popular Socialist—Communist—Party, is permitted to exist.

VISITORS FROM MOSCOW

It is against this background that Nikita Khrushchev, Soviet dictator, has agreed to visit Cuba. Anastas Mikoyan, Soviet No. 2 man, already has visited the island to do business. Both the Soviet Union and Czechoslovakia are opening large embassies in Havana. A mutual defense treaty is being mentioned.

Cuba's rulers intend soon to recognize Communist China. They plan to ask Chou En-lai, Red China's Premier, to visit the island. Chinese Communists are increasingly active in Cuba.

The communization of Cuba is being pushed in all fields.

The New York Times, which has been friendly to the Castro government, reported in a dispatch from Havana dated June 6:

"The Castro regime is bending every effort to capture the minds of youth.

"The pattern of training is similar to that used by many totalitarian governments. It includes indoctrination in schools, on radio and television, and in the press; military training from 7 years of age; a hate campaign, this time directed against the United States; the organization of work brigades of boys from 14 to 18; and meetings and fiestas, all with a political purpose.

"The Government feels that, once the youth of Cuba is indoctrinated with hatred toward United States, the relations between the two countries will be permanently damaged."

The Associated Press, in a dispatch from New York City dated June 7, said:

"Three exiled Cuban newspaper publishers declared today that the Fidel Castro government is a puppet regime of the Soviet Union. * * * The three publishers, now living in the United States, all expressed agreement when asked if they considered the Castro regime a puppet of the Soviet Union."

The AP, in an article from Caracas, Venezuela, dated June 7, said:

"Enthusiastic demonstrations greeted Dorticós (Cuban President Osvaldo Dorticós) last night on his arrvial at Maiquetia Airport from Lima, Peru, and in the working-class sections of Caracas."

Dorticós has been on a tour of six Latin American nations, selling anti-Americanism to workers, students, and peasants.

HEMISPHERIC BASE

Use of Cuba as the base for Communist operations in the Western Hemisphere is beginning to be recognized by the U.S. Government as of great and growing importance to the Soviet Union.

Communists, earlier, had gained control in two countries of this hemisphere—Guatemala and British Guiana. The British Government in 1953 threw out a Communist administration in British Guiana. In 1954, a revolution in Guatemala drove out the pro-Communist regime. Communists are looking for a comeback in British Guiana once independence is given to that British outpost.

The Soviet base in Cuba is described as of vastly greater importance than earlier bases.

Here, on the doorstep of the United States, is an island country 780 miles long, offering potentials for military operations as well as for propaganda offensives directed at a whole continent.

Military possibilities, related to Communist purposes, are no longer being discounted.

The U.S. naval base at Guantánamo Bay, important to defense of the Caribbean area in time of war, is being harassed. Its removal is an objective of the Communist rulers of Cuba.

The Panama Canal already is in the line of political fire. There, too, Communists are active from their base in Cuba. Cubans staged an abortive invasion of Panama in 1959. Political means are expected to be employed from now on to try to force the United States to give up rights in this vital area.

In Cuba itself, Soviet "geologists" are making a complete survey of the island.

Important U.S. military officials believe that these "geologists" are studying possibilities for submarine and missile bases in this strategic area—up against the so-called soft underbelly of the United States. Officials are convinced that, as of the present, Soviet submarines are not being supplied from Cuba, although they are operating in Cuban waters.

In recent months, Cuba's Communist Government, already heavily armed, has invested up to 100 million more dollars in new weapons.

INVASION STRATEGY

Haiti, only 45 miles away, lives in constant fear of invasion. The Government of Guatemala charges that the Cuban Government is training forces that will try to put Communists back in power in that country. Reliable sources report that Cuba is training troops in the Sierra Maestra for a landing in the Dominican Republic.

The plan is said to be this: Before the end of 1960, an internal uprising or military coup will be staged against Generalissimo Rafael Trujillo. When this happens, Castro will announce that the help of Cuba has been asked, and will move in on the Dominican Republic to establish a Communist Government.

Cuba alone, U.S. officials realize, is not the final objective of the Kremlin.

It is through Cuba that the Soviet Union expects to create trouble and to outflank the United States in the Western Hemisphere. Soviet Russia, highly sensitive to U.S. bases on its own periphery, is greatly interested in finding a way to show the United States what it feels like to have a potentially hostile military base next door.

THE FINANCIERS

How much money the Soviet Union and Communist China are prepared to invest in their Cuban satellite remains a question.

To date, Russia has accomplished her objectives at no cost. Instead, the Soviet

Union has saved some money by purchasing a substantial amount of Cuban sugar at below the world price. Russia then sold this sugar to her people at a profit.

Castro's Communist Government is paying the Soviet Union and Red China a high price for the technicians, "geologists," and others who are moving in to remake Cuba into a Socialist state.

Means to finance the communization of Cuba actually are being provided on a large scale by the United States.

U.S. consumers in 1960 will contribute $128 million to Cuba as a subsidized price for sugar. That total may rise to $140 million through diversion of unfilled portions of sugar quotas to Cuba. In addition, American companies have contributed goods and services amounting to between $100 million and $150 million for which they have not been paid.

In 1 year, official observers point out, the United States is putting up about a quarter of a billion dollars to finance a regime that is openly hostile.

On top of that, the Communists in Cuba have confiscated more than $300 million worth of American property. An additional $500 million worth of American property is in danger of being taken over. The fiction of payment is created by offering some Americans bonds of the National Institute of Agrarian Reform in amounts far less than the real value of the properties. Bankers describe these bonds as having little value.

Communists are pictured in Havana as enjoying the spectacle of the United States financing a Communist revolution—while under violent attack by the Communist rulers it is helping.

The U.S. Congress has balked at a recommendation from President Eisenhower that he be given authority to reduce the subsidy to Cuba.

Resources from the United States are helping a government that is actively engaged in promoting the success of Communist movements throughout Latin America.

AGITATION TARGETS

In the field of agitation and subversion, Cuban agents are highly active. Labor unions, student groups, journalists, professors, landless peasants and nationalist movements of all kinds are primary objectives of Communist penetration from Havana.

In Venezuela, Cuba's leaders are striving to gain hold of the powerful Oil Workers Union. Labor unions of Cuba have been taken over by the government. Their leadership is in Communist hands. The Reds have had some success in breaking the influence of more-conservative labor organizations in a number of South American countries. Chile, in the same way as Venezuela, is a major target for Communist penetration of unions.

All through Latin America, Cuban embassies are centers of Communist activity. American officials describe these embassies as areas of infection from which Communist doctrine and activity are spread.

In private conversations, officials show growing concern. One pointed out that Chile's big Communist Party is now 100 percent for Castro. Said the defense chief of another Latin-American country: "Castro is sending agents all over South America. He is backed, and presumably financed, by Russia. He's being taken as a serious threat."

The Federation of University Students of the University of Havana is active among student groups in many Latin-American countries. Students, in turn, are leaders in the attacks upon the United States and in supporting Communist causes. Financing of this activity that had come almost entirely from the Soviet Union now is supplemented by support from Cuba.

In the field of propaganda, Cuba's activity is even more intense.

Attacks upon the United States and glowing accounts of the socialization of Cuba are beamed by powerful radio stations out of Havana to listeners throughout South and Central America. These stations are Government operated. Their No. 1 product is anti-American propaganda.

A Cuban news service, Presna Latina—staffed largely by Communists—is furnished free to newspapers of Latin America. This is a full-fledged press service—costly to produce and transmit. Part of the bill is picked up by the Castro Government in Cuba and, it is understood, part by Moscow.

Cuban officials are constantly on the move in the hemisphere. Their attention is directed not at the governments of Latin-American countries increasingly hostile to the Cuban revolution, but to disgruntled groups within nations where political stability is rare.

THE LAND REFORM

Socialization of Cuba itself is proceeding at a rapid rate.

Basically, Cuba is an agricultural country. Its socialization is being carried out under INRA—the National Institute of Agrarian Reform. INRA has become a superstate. It holds more than 4 million acres of land—about half of it taken from American owners and the other half from Cubans. It holds feed mills, packing plants, the entire fishing industry, many factories, about 600,000 cattle. INRA has seized or established more than 2,000 rural stores, now called "stores of the people."

Plans call for INRA to take over all privately owned sugar mills, including American ones. The agency already holds about a fourth of the country's mills. INRA's plans also call for creation of a government-owned iron and steel complex, with plants to be supplied by the Soviet Union.

At first the talk was of "land reform." Peasants were to be given the land of big landowners—many from the United States. This idea drew widespread support from commentators in the United States.

Actually, INRA is creating giant cooperative farms—along Soviet lines. Instead of owning land, most peasants are ending up as wage earners, in the same or a less desirable state than before the theft of what had been privately owned land.

INRA's executive director, Antonio Nuñez Jiménez, on a recent trip to Moscow, arranged for Soviet experts in large numbers to carry forward his program, now in a disorganized state.

Under socialism, as brought to Cuba by Castro and his Communist aids, the people are not faring too well. The loyalty of the peasants and of many workers, however, is being held by promises of many good things to come.

Pay of workers, in fact, has been reduced by "voluntary contributions" to revolutionary activity. Inflation is beginning now to eat into standards of living as wages are controlled and prices move higher. Goods of many kinds are beginning to run short. Replacement of these goods is more difficult as American suppliers begin to balk at making gifts of their products.

In the middle class and among some groups of wage earners, including construction workers, there is growing dissatisfaction and alarm. Here, methods taught by the Soviet Union are applied to keep people in line.

BRIMMING JAILS

Spies and informers are on every side. Waiters in cafes and bars, barbers, beauty-shop operators, store clerks, taxi drivers, bellhops and servants report any criticism of the regime to intelligence agents. Children in the juvenile patrols—which the Government organized to replace boy and girl scouts—are instructed to inform on their parents and neighbors.

Arrest swiftly follows these denunciations. Cuban prisons are jammed with political prisoners. The largest prison, on the Isle of Pines, holds about 5,000 with two prisoners in cells intended for one. Food is bad, sanitary facilities worse. Reading is prohibited. Common criminals are given better treatment than political prisoners.

Communist techniques are applied in all fields to try to socialize Cuba.

There are growing doubts whether a Communist Cuba can be made to work. These doubts would increase further, some officials believe, if the United States should decide not to subsidize the venture into communism taking place next door. It now is doubted that American businessmen will continue to supply goods to Cuba without certainty of payment.

The question being raised is whether Soviet Russia, guiding Cuba to communism, will come forward with the volume of aid that would be required to prevent an outbreak of violence among the people. American officials say that the Soviet Union never has been noted for making outright grants of aid on a large scale.

Russia obviously is playing for bigger stakes than Cuba. Through a communized Cuba, the Soviet rulers are described as aiming to penetrate and to get a firm foothold in the larger nations of South America. Once they are in the Americas on a firm footing, trouble confronting the United States could be immense.

IS THE MONROE DOCTRINE DEAD?

What the Monroe Doctrine is: A warning to the rest of the world to keep its hands off the Western Hemisphere. Issued in 1823 by President James Monroe—partly to stop Russian moves of that day in the Americas.

What the Monroe Doctrine says: The American continents "are henceforth not to be considered as subjects for future colonization by any European powers."

Also—

The United States would consider "any attempt" by European powers "to extend their system to any portion of this hemisphere as dangerous to our peace and safety."

The question now raised: Does the Monroe Doctrine apply to the Communist takeover in Cuba? Or is this 137-year-old policy dead, in practical terms?

A proposed "New Monroe Doctrine": Historian Samuel Flagg Bemis has urged that Congress add to the Monroe Doctrine a resolution declaring the United States would be "justified * * * in taking steps to forestall intervention, domination, control, and colonization by international communism in the New World." The Bemis resolution has been introduced in Congress, but no hearings have been held, because of State Department opposition. The State Department argues that Latin Americans might resent a U.S. declaration of intent to "intervene" in a Latin country, and that Communist penetration has to be handled by joint efforts of the American nations.

THE "POLITBURO" NOW RULING CUBA

Fidel Castro: Rabble-rouser, influenced by other members of "politburo." Like them all, a bitter hater of United States. Out to communize Cuba, spread communism through Latin America with Soviet help.

Raúl Castro: Fidel's younger brother, first in line of succession. Communist trained and married to a Communist. Once kidnaped U.S. marines and got away with it. Shrewd and devious.

Ernesto (Ché) Guevara: President, National Bank. Known as agent of international communism. Goes armed to bank meetings. Holds dictatorial power over national finances.

Antonio Núñez Jiménez: Economic dictator, as head of INRA (National Institute of Agrarian Reform). Known as a Communist. Importing Soviet experts to try to make socialized industries work. Seizing private property on vast scale.

Osvaldo Dorticós: President. Former private secretary to Communist Party chief. Heads anti-U.S. propaganda mission through Latin America. Is consulted on important decisions.

Augusto Martínez Sánchez: Labor czar. Far to left, with Red connections. Runs government-controlled unions with power over hiring, firing, wages. Has power to seize businesses involved in real or trumped-up labor troubles.

Juan Marinello: Veteran head of Popular Socialist (Communist) Party. Stays out of limelight, but is a powerful influence on ruling "politburo" of Cuban Government.

Carlos Rafael Rodríguez: Dedicated Communist, editor of Communist paper "Hoy." Close adviser to Fidel Castro. Helps to shape anti-U.S. line of propaganda for radio station and press service directed to all of Latin America.

MEDICAL AID WILL SAVE SENIOR CITIZENS FROM CONSTANT FEAR

Mr. PROXMIRE. Mr. President, how much longer can we, as a nation, permit a situation to exist where millions upon millions of our senior citizens live with the cost of medical assistance that can bring life and health beyond their reach?

No problem of old age is as great as that of health. Illness is the focal point of fear among our older people. As their health declines, their insurance rates climb. Forced by low fixed incomes to adhere to rigid budgets that do not and cannot provide for any emergency, these people know that any serious illness can wipe out what little security they have.

The U.S. Senate is under extreme moral obligation to recognize this grave situation and to cope with it through effective legislation just as quickly as possible.

I have here a letter, typical of hundreds I have received, which tells in simple and thoughtful language the plight of our senior citizens. I ask unanimous consent, Mr. President, that it be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR SENATOR: It is indeed frightening when one attempts to visualize the future where earning ability has ceased and the needs of life must be met with a very meager income. Where a person's humble security can be changed to a condition of want by one short period of illness and exorbitant medical and doctor bills. Too few persons are fortunate enough to earn sufficient income to provide assurance against such an uncertain future and a way must be provided now so that all can systematically build a fund for what lies ahead.

There are millions in this same predicament. The proposed Forand bill is the first step to provide assurance of care when we are unable to bear the burden.

We sincerely urge your support of this legislation which will assist those unable to assist themselves when it becomes needed most.

With best wishes, I remain,

Yours respectfully,

——— ———.

REVISED DEFENSE MANPOWER POLICY NO. 4

Mr. PROUTY. Mr. President, along with the distinguished senior Senator from Kentucky [Mr. COOPER] and the distinguished junior Senator from Pennsylvania [Mr. SCOTT], I filed a minority report in the volume which contains the report of the Special Committee on Unemployment Problems.

The minority made a number of recommendations to aid the unemployed, particularly the unemployed in distressed areas. On page 183 of its report, the minority recommended, that—

The Federal Government direct all Federal agencies, defense and nondefense, to give preferential treatment to areas of substantial labor surplus in their purchasing and contracting.

The minority also recommended, that—

All Government agencies, both defense and nondefense be directed to give special consideration to placing new installations in areas of substantial labor surplus when locating or expanding outside of Washington.

Mr. President, I am pleased to say that on June 7 the Director of Civil and Defense Mobilization announced the issuance of a revised policy dealing with the placement of Government contracts and Government-financed facilities in areas of high unemployment.

The majority report contained no recommendation of this nature.

So that all Senators will be familiar with the character of the Revised Defense Manpower Policy No. 4, I ask unanimous consent that a press release which explains the policy revision be inserted at this point in the RECORD:

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF CIVIL AND
DEFENSE MOBILIZATION,
Washington, D.C.

Director of Civil and Defense Mobilization Leo A. Hoegh announced today the issuance of a revised Defense Manpower Policy No. 4, dealing with the placement of Government contracts and Government-financed facilities in areas of high unemployment.

The revised policy provides that the preference given to surplus labor areas under DMP No. 4 for purposes of Government procurement and facilities construction or expansion will be offered first to areas of persistent high unemployment levels. The Department of Labor will classify these persistent surplus labor areas separately from other areas with substantial current unemployment levels.

Another policy revision encourages prime contractors to award subcontracts to firms which will perform a substantial portion of the production involved in the persistent surplus labor localities. A change in certification procedures provides that the national office of the Labor Department will issue certificates of eligibility to firms in localities too small to be regularly classified as to unemployment status. These certificates are now being issued by State employment security offices.

In announcing the revision, Mr. Hoegh stated that the action was taken to improve the policy as a device to maintain skills important to defense industry in areas of substantial unemployment. He said that every effort will be made by Federal procurement agencies to assist such areas, but the effect is likely to be limited by the lack of appropriate plant facilities in many such areas.

The full text of the policy will appear shortly in the Federal Register. It becomes effective on July 6. Defense Manpower Policy No. 4 was one of a number of manpower measures instituted during the Korean mobilization period.

CONSTRUCTION AID TO COLLEGES

Mr. PROUTY. Mr. President, I was delighted to have an opportunity to read, a short time ago, an article by the distinguished junior Senator from New York [Mr. KEATING] which appeared in the Albany Times Union. The article deals with the all important problem of making room in our Nation's colleges and universities for the many young people who wish to pursue studies in institutions of higher learning.

This article merits the attention of all Senators, and for this reason I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KEATING URGES UNITED STATES STEP UP CONSTRUCTION AID TO COLLEGES

(By KENNETH B. KEATING)

We must face the growing crisis in American higher education, brought on by dramatic increases in the number of young people seeking admission to college and compounded by the financial pressures which beset the Nation's colleges and universities. Colleges and universities have existed in the United States for more than three centuries, and have flourished in a situation in which funds for their support have been derived principally from private, philanthropic sources and local and State governments. The question that now faces us is, essentially, can these traditional sources of support be relied upon to sustain American higher education in its hour of crisis?

I think it is generally agreed that we would all like to see our rich pattern of higher education maintained in this great tradition of autonomy and independence, just so long as it is humanly possible to do so. And I have great confidence in the willingness and ability of traditional patrons of higher education to rise to the present challenge.

There is, on the other hand, a belated but growing recognition that there is a profound national interest in American higher education. No longer can we afford to overlook the fact that what goes on in our colleges and universities—or more importantly, what does not go on in our colleges and universities—has profound implications for the national welfare, and more specifically, for the national defense. It was largely because of this important link between a vigorous system of higher education and the national defense that an impressive majority of Members of Congress voted to enact the National Defense Education Act of 1958.

MOST VITAL IN CENTURY

In the field of higher education, this act directs its attention to certain imbalances which are the particular concern of those whose responsibility is to carry on the affairs of the Nation. It seeks to avoid the loss of able manpower in our educational system by providing financial assistance to deserving students at both the undergraduate and graduate levels, and it seeks to reestablish

the study of modern foreign languages in our total educational system, recognizing that Uncle Sam, in order to conduct effectively his international affairs, must have "more than one tongue in his cheek."

This legislation has been described as the most important single Federal action in higher education since the passage of the so-called "Land-Grant Act" in 1862, which brought into being those vigorous colleges of agriculture and mechanic arts which now contribute so substantially to the breadth and quality of our higher educational system. I was pleased, as a Member of the House of Representatives, to lend my support to the passage of the National Defense Education Act, because the legislation as adopted embodied the important principle of Federal stimulation and leadership, without Federal control. The scope of the act is limited to areas in which the Federal Government has a legitimate concern, and is so written that it will not weaken the basic fabric of support upon which our colleges and universities have so long been dependent.

While the National Defense Education Act, through its graduate fellowship program, addresses itself to one of the most pressing problems facing the Nation's colleges and universities today—the need to recruit and train sufficient faculty of high quality—much more needs to be done to make it possible to retain such individuals. Moreover, the need to provide the physical facilities in which collegiate instruction is to take place remains to be met effectively. The question is basically the degree to which the Federal Government should participate in the effort to meet these two most pressing needs.

I must express at the outset my grave concern regarding the prospect of having the Federal Government participate in the payment of teachers' salaries. I regard the tradition of autonomy and independence among our colleges so highly that I would view with alarm any tendency to have this spirit undermined by a sense of dependency upon a Federal agency.

SEES GREATER DANGER

I do not say that Federal control would follow automatically upon the payment of instructional salaries, or payment of other current operating expenses, but I do not hesitate to say that the danger is greater in this area than it is in others. If it is true that "he who pays the piper calls the tune," it would be easy for some to argue that since the Federal Government was paying the salaries of college teachers, it should have some say as to what they teach. Nothing could be more destructive of the spirit of our educational enterprise, and nothing could be more destructive of the essential strength of our Nation.

I see as a much more likely prospect, and as a much safer prospect, the participation by the Federal Government in a program to assist colleges and universities in providing the physical facilities that surely are to be needed in the years to come. The "bricks and mortar" concept of Federal aid is by far the sounder concept. This avenue of potential Federal assistance seems to me both safer and more promising.

There is an old adage, to which I happen to subscribe, to the effect that it is important not only to do the right thing, but to do it the right way. I think it is of importance, therefore, that in our common desire to have the Federal Government assist our colleges and universities in meeting the profound challenge that now confronts them we do all in our power to see to it that what the Government does it does in the right way. We must not be so carried away by an emotional desire to do good that we surrender some of the most precious values we have in our higher educational system.

DEBT SERVICE GRANTS

For these reasons, I am much interested in the proposal submitted to the Congress by President Eisenhower which would authorize the Federal Government to make grants for debt service retirement to colleges and universities, both public and private, for the construction of residential and related facilities and academic facilities, where there existed a true need for such facilities, and where it is necessary to borrow funds for the purpose. Under this program, the Federal Government would make annual grants (representing 25 percent of principal) to participating institutions in equal installments over a period of 20 years, to assist them in the retirement of long-term construction obligations. In addition, under the proposal of the President, a Federal guarantee of non-tax-exempt bonds would be offered to colleges and universities.

I believe that the President has succeeded in pointing out to the American people and to their Congress ways in which the Federal Government can be lastingly and soundly helpful to the cause of improved education. I am extremely hopeful Congress will take action on this proposal, and that it will also devote considerable study to other pressing needs of our institutions of higher learning. I am personally very interested in the problem of insuring reimbursement to colleges and universities of an amount more nearly approaching the actual indirect costs involved in Government-supported research and training programs.

TAX LAW REVISION

I am also studying means for revising our tax laws in order to provide greater incentives for private individuals, organizations, and businesses to contribute to higher educational institutions. It strikes me that by careful changes in the present laws, perhaps in the form of special tax credits, we can stimulate the flow of voluntary funds which are essential if our colleges and universities are to live up to their grave responsibilities in our democratic society.

These, then, are some of the things the Federal Government can and should do for American higher education. There is no task to which Congress and the American people can devote themselves which will, in the long run, pay greater dividends for our country and the free world.

AWARD TO SENATOR MARGARET CHASE SMITH BY GENERAL FEDERATION OF WOMEN'S CLUBS

Mr. AIKEN. Mr. President, last evening the General Federation of Women's Clubs gave awards to seven outstanding American women for their work in various fields. The Senate was signally honored by the selection of Senator MARGARET CHASE SMITH, of Maine, to receive one of these awards in the legislative field.

Mr. President, I first became acquainted with MARGARET SMITH during the days of World War II, when, as a Member of the House from Maine, she was fighting vigorously and successfully to secure dairy feed for the farmers of her State. From that time to this day the farmers of Maine have had a consistent champion in Senator MARGARET CHASE SMITH, who has supported beneficial and sound agricultural legislation. However, Mr. President, it is not the farmers alone who owe a debt of gratitude to MARGARET CHASE SMITH. As we all know, she is one of the most effective legislators in this body. She has been particularly effective in the fields of education and national defense, and her work on the Committee on Appropriations over the past few years has been outstanding.

The favorable publicity which MARGARET SMITH has brought to the State of Maine probably could not be purchased for a million dollars a year. I think she has not only reflected great credit upon her State but also upon the Senate. For that reason I am paying tribute to her today.

SOUTH DAKOTA HIGH SCHOOL EDITORS SPEAK OUT AGAINST OBSCENE LITERATURE RACKET

Mr. MUNDT. Mr. President, the traffic in mailing and distribution of obscene literature is of growing concern to Americans in every walk of life with the exception of those who are wallowing in the works of filth which they are disseminating throughout the country.

The perpetrators of this despicable practice of printing and circulating illicit literature have been and are violating the decency and morality of the youth of our land. There is no question in my mind that the unconscionable creatures who carry on this gutter operation long ago abdicated both the responsibilities and the privileges of a citizenship which is predicated on a freedom which has made this Nation one in which the greatest of liberties are enjoyed.

The children of America comprise the foremost target of the peddlers of pornography and obscene literature. Therefore, I think it is highly significant that among the voices rising up in protest against these vile practices are those of responsible young people who are fully aware of the dangers confronting our country if the obscenity racket is not halted.

Mr. President, I deem it both a pleasure and high privilege to be able to bring to the attention of the Senate today the viewpoints of several young Americans who have given this matter their earnest consideration and have taken the time to write statements on this problem.

A number of high school newspaper editors in South Dakota have written editorials, and I request that these outstanding articles be printed in the RECORD.

Before placing the editorials in the RECORD, Mr. President, I should like to add a few words of commendation to these youngsters for what I think are excellent contributions to assist in our consideration of the problems of the smut racket. I certainly feel that a salute is in order for each of the editors for bringing this subject to the attention of not only their classmates but to parents and others in their home communities.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

THE GROWING MENACE OF MAIL ORDER OBSCENITY

(By Winifred Joann Harris, editor, Aga Times, St. Agatha High School, Howard, S. Dak.)

Today, approximately 1 out of every 35 students in grade and high school is the object of a deadly "game" through which he

receives unordered lewd and obscene literature. His silent "playmate" is an emotionally insecure and mentally incompetent person who deals in the worst possible kind of filth. But, the game is not for innocent recreation and does not provide the recipient of this material with educational or enjoyable reading. The smut merchant is hardly the kind of person parents wish their children to have any dealings with, yet the Post Office Department predicts that that number could be 1 out of every 18 within a few years unless action is taken.

These vile racketeers have hidden behind postal laws made for the protection of the common people and the sanctity of first-class mail. This illegal function which deals in obscenity and pornography by mail is doing business at an estimated half billion dollars a year. According to estimates by the Post Office Department, these extensive operations will double within the next 4 years.

The far-reaching effect of this underworld activity is becoming increasingly evident. By contacting children at such an impressionable age, they are slowly but efficiently deteriorating the moral fiber of a whole Nation. Sadistic material has been a prevalent cause of juvenile delinquency and crime in the United States as has been observed by noted authorities.

That a function of the Federal Government should, knowingly or unknowingly, willingly or unwillingly, be a party to such corrupt activity, is a constant source of shame and embarrassment to decent-minded citizens. But, this function can be only what the citizens make it. Adult America owes their children a life free from the threat of horror and filth. Today, the victim is the child next door; tomorrow, another "innocent" will be seized in its ruthless grasp. A matter of such consequence as this deserves the attention of every person who wishes to maintain the moral strength of our Nation and preserve the standards upon which democracy is based.

WE ARE THE PRINCIPAL TARGETS

(By Margaret Devitt, coeditor, Maroon and Gold, Harrisburg High School, Harrisburg, S. Dak.)

Senator MUNDT recently called to the attention of Congress a serious moral problem facing our Nation today, the mail order obscenity racket. He has introduced a bill in the Senate which would do much to curb the peddling of obscene and indecent literature.

Although Senator MUNDT stressed the fact that parents and other community organizations should be alerted to the dangers of this menace, it is actually we teenagers and young people who are the principal targets of these smut merchants. The racket, which has reached a sales level of over a half billion dollars, openly solicits anyone whose name they can obtain through "fake" business fronts, purchase of mail, or any other deceitful manner.

We, who are most affected by this, must become aware of the dangers of this vile racket and do everything in our power to do away with this threat.

These racketeers, who use the defense of "freedom of the press" in conducting the sale of obscene literature are misinterpreting this freedom as a part of our democracy. Such use of this basic American right will be a destroyer of democracy itself by weakening the morals of the people, making them more susceptible to the threats which could overtake our Nation.

We, as American youth, who will be the adults of tomorrow, will characterize the moral fiber of the Nation in years to come by our own moral standards which we build today.

JOIN FIGHT AGAINST OBSCENE LITERATURE

(By Loretta Mohr, feature editor, the Beaver Chatter, Alexandria High School, Alexandria, S. Dak.)

In compliance with a request received from KARL MUNDT urging active participation in the matter of salacious literature and pictures coming through U.S. mail the Beaver Chatter is printing this editorial to tell parents more about this situation and how they can help stop it.

Until August, 1958, obscenity laws kept the Government tied by permitting it to prosecute the guilty persons only at the mail's point of origin. In August, 1958, an amendment was enacted and was signed by President Eisenhower allowing prosecutions to take place where the obscene material was received.

One out of every 35 grade and high school students receives this mail whether interested or not. The racketeers mail material to every name they can obtain, even names answering advertisements to innocent items such as baseball bats or toy automobiles, or they obtain names of students joining youth clubs or social groups.

It is estimated that 700,000 to 1 million American children will receive unsolicited obscene and pornographic literature through the mails this year. In a raid by postal inspectors in New York City, 17 tons of printed and filmed materials were found. Mailing lists of thousands of high school graduates whose names were obtained from yearbooks were also found.

Investigation of armed robbery, extortion, embezzlement and forgery show that those guilty of the crimes usually have been exposed to this material.

If obscene material is mailed to your home, you are urged to turn it in. All you have to do is save all materials received, including the envelope and all exposures and give the materials to the local postmaster, either in person or by mail.

Postmaster General Summerfield said, "We are, in effect, declaring war on these purveyors of filth, big and little, high and low. We are launching an intense and unrelenting effort to stop this monstrous assault on the Nation's children in every way possible. And we are confident that, with adequate public and legislative support this job can be done."

Let's join the fight against obscene material. By giving the postmaster all materials you receive you can do your part to stop the mailing of this material and thus help to end this racket. Help make America's teenagers clean-minded teenagers; help stop obscene mail.

HELP WIPE OUT DELINQUENCY

(By Esther Brown, editor, the Cardinal and Black, Arlington High School, Arlington, S. Dak.)

Juvenile delinquency is often blamed on the child's environment or on his parent's negligence. This may sometimes be true, but there are likely to be several other factors that have led the individual into delinquency.

One of these seeds of evil is obscene literature that is sent through the mail to unsuspecting adolescents. If the companies who print such trash can interest young people in reading it, they have started a very profitable racket at the expense of the youth of today.

Circulation of this literature sheds a rather dim light on the future of America. If the leaders of tomorrow are exposed to and learn to enjoy such filth, America can look forward to a very insecure future.

It is the responsibility of alert parents to make sure their child doesn't read such material. Every adolescent should be acquainted with the dangers of reading obscene magazines; and if the material comes into the home, the parents should see to it that proper authorities are notified.

If you receive any of this literature in the mail, save it, including the wrapper it came in, and give it to your postmaster. If everyone will cooperate in the drive that is now being promoted by Postmaster General Arthur E. Summerfield we can stop the "smut racket" and rid our great Nation of this threat to decency.

FULL SCALE WAR

(By Johannas Asmussen, editor, the Scribbler, Agar High School, Agar, S. Dak.)

Parents, if your child received obscene or pornographic material, would you know it? What would you do about it if you did? Hide it? Throw it away? Report it?

Children, if you received obscene or pornographic material would you hide it? Throw it away? Read it and send for more? Show it to your parents?

Are you now saying to yourself, "These questions are not for me?" Just hear me out and you may change your mind.

The racket in vile material has reached an estimated sales level of more than half a billion dollars a year. The smut merchants prey on the young of the Nation, corrupting the very core and future of our United States, for that is what the Nation's youth is. Every youth who has had his name in a school year book, answered an ad for free or reduced merchandise, or done numerous other things, things that are normal and right, may be sent this type of literature. You need not ask for it, if the smut merchants have your name and address you may receive their merchandise.

The Post Office Department cannot begin to stop this racket because one of our unalienable rights is the privacy of the mails and to stop this racket they would have to infringe upon this right. Rather than do this we must fight on another front, the home front. The Post Office Department is launching a full-scale war against smut on the home front, but to launch a war they must have men and equipment to fight the battle. The Post Office Department cannot use conscription, it must rely on volunteers. Parents can and must explain to their children in simple but direct language what the material is and what to do with it if they should receive it and why. The why is a big factor; don't overlook it. Work with your civic groups to help educate everyone and defeat this enemy.

If you think that these peddlers of smut can do no lasting harm, hear what Postmaster General Summerfield said and I quote: "Unquestionably, these large, defiant barons of obscenity are contributing to the alarming increase in juvenile delinquency, as many noted authorities have publicly observed on repeated occasions." Senator KARL E. MUNDT also stated, "Repeatedly, in the investigations of armed robbery, extortion, embezzlement and forgery, authorities find that those guilty of the crimes were early collectors of obscene pictures and films. Authorities also point out that sex criminals and sex murders almost always prove to have a long record of addiction to pornographic and sadistic material."

How did you answer the questions asked? I hope the answers went something like this. Parents, if your child received obscene or pornographic material would you know it? Yes. What would you do about it if you did? Report the matter immediately to the local postmaster, and turn in all the material received, including the envelope, and all enclosures. Also explain to your child the reason for material being unfit. Don't

frighten your child by cross-examining him or making him feel he has done something wrong. Making an issue out of it will raise its value and importance in his eyes.

Children, if you receive obscene or pornographic material would you hide it? No, it is nothing to be ashamed of or feared, but it is disgusting. Throw it away? This would be good if only you were involved but the Post Office Department needs it as evidence. Would you read it and send for more? No. Show it to your parents? Yes.

It is the parents, the citizens of the community, who will benefit from a "full-scale war" on the smut material and its peddlers.

Join the forces and help make war on smut merchants. Directly or indirectly their corruption is felt in all our lives.

CONSIDER THE COST TO YOUR CHILD

(By Judy Anderson, assistant editor, Viking Voice, Midland High School, Midland, S. Dak.)

If an official public estimate was made proving that milk served at school lunchrooms and cafeterias would expose 1 out of every 18 children to a crippling disease, you would be very concerned.

You should also be concerned by the fact that if the present trend is not checked, 1 out of 18 children will be receiving some form of indecent literature or film which will cripple his mind.

To stop this trend, you as parents should save all such material and immediately turn it in to your local postmaster. Without this action the senders and publishers cannot be traced.

This type of reading matter is very harmful to a child. Repeatedly, in investigations of armed robbery, extortion, forgery, and sex crimes, the criminals and murderers have been proven to have a record of addiction to a pornographic and sadistic material.

Join the Post Office Department and your Congressmen in their war against these purveyors of filth, which can harm your child as much as a crippling disease.

THE MENACE OF THE OBSCENE

(By Gerald Lee Kotas, editor, the Tripp Wildcat, Tripp High School, Tripp, S. Dak.)

Recently, a syndicated column in one of the leading Midwest newspapers carried the story of a 17-year-old boy, of average circumstances, who received through the mail several packets of obscene literature and perfumed love letters in response to his answering an ad for stamp collectors. His immediate reaction, due to his Christian upbringing, was to burn this trash and forget the incident. However right his reaction may have appeared, he could still have served better purpose; possibly even an obligation; merely by saving the material, including the enclosures, and turning the same over to his local postmaster.

Although most of us rather conform to the wrong than to fight it, this is one duty that we as Americans and recipients of pornographic writings must not pass by lightly. For every day hundreds of innocent children as well as teen-agers are the victims of the merchants of filth as they are preyed upon through the media of the mails. It is not common for 8 or 9 year olds to be the recipients of trash, dirt, and filth such as is delivered to those 18 or 19 year olds. And the smut racket is growing, growing, growing, fattening itself on the pennies, nickles, and dimes of children. The kids in the neighborhood; the ones next door; the ones right at home.

The dealers of pornographic material have many ways of obtaining your child's address, none of them highly secretive. High school yearbooks, newspaper stories, replies to ads offering anything from stamps to free toys are all good sources for compiling a mailing list. And from there it's anyone's guess as to how much smut the dealer will peddle until he is reported, tracked down, and arrested, an increasingly complicated job. But with the help and cooperation of the parents of America the dirt and smut delivered to your door via the mailbox can be stopped.

Resistance to obscene materials can best be obtained by watching your children's mail. If anything curiously different appears, check it. Or, since your child or teenager may already be receiving pornographic literature, watch their reactions, for you as their mother or father can tell if they might be concealing such items.

Upon finding or receiving obscene literature, remember the following:

First, save all the items enclosed; books, letters, envelopes, and papers as well as the original wrapper. Then turn those materials in to your local postmaster immediately, either in person, or by mail. It is important that you cooperate fully with the postmaster, even so far as to write come on letters to further lure the racketeer from seclusion or as evidence for prosecution.

Besides that, we can all help by informing friends, neighbors, and relatives of the methods of detecting obnoxious materials and of keeping on the alert. Tell them that a poisoned mind is worse than a poisoned body.

If you want to keep America strong and right, this is your chance to play an important part in the future of our country. Most obscene literature is received by those persons who are someday going to be the citizens of America. Do you want this country run by sex maniacs, racketeers, and buyers and sellers of filth?

HELP TODAY'S YOUNG PEOPLE

(By Ruth Anne Moller, editor, the Westonian, Wessington High School, Wessington, S. Dak.)

Recently I received a letter from Senator KARL MUNDT, Republican of South Dakota, asking if I would write an editorial on the terrible racket that affects one out of every 35 children—the sending of obscene literature through the mail. Because it is sent first class, nothing can be done about inspection. Young people do not have to show any interest in the writings and pictures to receive it, for names can be obtained from many innocent things, such as membership records and advertisements.

Many young people are impressionable, and sometimes go to any lengths to continue receiving the pornography if once subjected to it—even going so far as selling it to others.

Why do the people distribute this? They purposely want to give America's young people a bad name for such reasons as communistic motives and to promote juvenile delinquency.

What can be done to get rid of this type of writings and pictures? First, I think young people should be told of this type of thing. If any such material is received it should be turned over at once to the post office.

In a few years one out of every 18 young people could be on the mailing list. The racket must be stopped. It is important all civic organizations work against it to help today's young people grow up in a better way.

STOP IT BEFORE IT'S TOO LATE

(By Arlene Fritz, co-editor, the Pep-A-Graph, Lennox High School, Lennox, S. Dak.)

Have you been a recipient of the obscene literature which has been frequenting the mail the last few years? This question must be given very thoughtful consideration, for this problem has been growing and will continue to increase unless it is stopped. Too easily we may say, "Why should I worry? I'll never receive any of this pornography unless I submit my name to a mailing list or send in for it outright." But this is a mistaken impression too many people have gained. Agents who spread the filth on our mail today obtain names from yearbooks, newspaper articles, enrollments of youth organizations and countless other ways. Younger children may be put on a mailing list when they send for a toy or a doll collection from a magazine advertisement.

We remember the fuss made over cranberries last fall. Everyone hesitated to eat them, fearing they would be poisoned. Is not a poisoning of the mind and morals as horrifying as a poisoning of the body? Yet, we do not give it the attention which it deserves.

The destruction of the ideals and morale of the American youth is a very important step in the spread of communism. Obscene literature is doing the job for them. Juvenile delinquency and crime in later life very often stem from a childhood with exposure to this filthy material. Like a narcotic, it seems with some teenagers that once they have sampled the material, they become addicted to it and will do almost anything to obtain more of it.

Parents play a significant role in stamping out this dreadful racket. They are asked to keep any such material which enters their homes and report it to their local postmaster, turning the material over to him.

This is a problem of the people of our Nation and therefore must be handled by them. The Post Office Department has done much to stamp out this racket, but privacy of mail is an American right which they respect and so must depend on reports from the receivers of this obscene material. Educational leaders, parent-teacher organizations, extension clubs and religious leaders are performing magnificent works to end the threat to the Nation. Congress has passed an act to combat the sending of this material, but they cannot perform the job alone. We are an important instrument in the battle against this literature. Through our efforts, only, will the spreading smut racket be obliterated. Are we, as American teenagers, going to remain exposed to this public enemy of our Nation?

FLAG DAY

Mr. MUNDT. Mr. President, I am delighted to call attention to the fact that this is the 183d anniversary of our flag's adoption by the Continental Congress on June 14, 1777.

On this Flag Day we mark another significant transition, for in our homage to our national emblem we mark another firm step in national progress in officially flying our 49-star flag for the last time. In less than a month, on Independence Day, to be precise, we shall raise to the top of the mast the brilliant colors of this great Republic containing 50 stars.

So I think it is appropriate on this Flag Day that we not only pay tribute to our colors, but also that we add a salute to those newest of States, Alaska and Hawaii.

These are proud days for our new sister States. And they are proud days for the Republic. Flying high over the Nation is the emblem which has for 183 years symbolized the foresight, the dedication, the independence, and the God-fearing spirit of our forefathers, who in

their determination and zeal gave to this land a form of government which brought to us the greatest freedoms ever enjoyed by a civilized society.

On this day as we pay homage to our flag, let us not forget that in our remembrance we also must render tributes of the highest order to those who have fought and shed their blood so dearly in defense of the colors.

I think perhaps one of the most heroic of all deeds which brighten the illustrious pages of American history occurred on that little far-off island in the Pacific during World War II.

To me, the flag raising at Iwo Jima by a handful of U.S. Marines, captured in the never-to-be-forgotten photograph of Joe Rosenthal, of the Associated Press, and permanently enshrined as one of our most beautiful monuments across the Potomac from the Nation's Capitol, stands as one of those moments in history when the true spirit of man dedicated to preservation of our ideals reached full bloom.

As Adm. Chester Nimitz said, in speaking of the gallant action of the Marines, "Uncommon valor was a common virtue."

Our history is filled with similar stories of such dedication by Americans. So today our tributes are more than a salute to our national emblem, we also pay homage to those of the past who have made it possible for us to sit in this Chamber today beneath the fluttering of the Stars and Stripes, truly the flag of freedom.

I would be remiss, Mr. President, if in my brief remarks, I did not extend my personal commendation to those patriotic and loyal organizations which today are joining in commemoration of Flag Day.

In my home State of South Dakota, and I am sure throughout the land, three such organizations are holding special commemorative services. These are the Elks lodge and the various American Legion and Veterans of Foreign Wars posts.

Mr. President, I believe it is most fitting to extend our congratulations today to these organizations on the important part they are playing in leading the Nation in ceremonies paying proper respect and tribute to our colors, which are symbolized most effectively in the Elks' theme of the observance to demonstrate to the world that in our land there is "unity in the face of international tension."

Mr. CASE of New Jersey. Mr. President, today is the 183d birthday of our American flag. The flag itself has changed in its design over the years—and will again change this year with the addition of a 50th star for the admission of Hawaii to statehood—but the flag itself has remained constant as the emblem of our thought, our purpose, our unity, and our power as a Nation.

The United States Flag Foundation has long worked hard to foster the proper display of our flag. Mr. President, on this anniversary of the American flag I ask unanimous consent to have printed in the RECORD the following article about the United States Flag Foundation which appeared in the Plainfield Courier-News on Thursday, April 9, 1959.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

The United States Flag Foundation of New Jersey, a nonprofit society to further the work of the late Gridley Adams, of Weehawken, has been incorporated with Harry E. Foster, of 161 Somerset Street, listed as trustee-director.

The foundation's incorporation has been recorded in Somerset County. Its purpose is one of advancing education about the U.S. flag, what it symbolizes and how it should be displayed and used.

Foster was associated for several years with Adams before Adams' death June 23, 1958, at the age of 90. Adams was author of the booklet, "So Proudly We Hail." He devoted many years of research to authenticity of flag traditions and procedures and was chairman in 1922 of the national flag code committee, representing 112 patriotic and fraternal societies.

He was instrumental in securing revision by the 77th Congress of laws relating to the flag.

Foster was left all of Adams' material at the time of the older man's death. He said today that the booklet Adams wrote would continue to be available to the public and that it was his desire to advance the newly incorporated foundation to a national level.

Copies of "So Proudly We Hail" have been sent to every State, to South America, several European countries and to the Vatican, Foster said.

Adams had been in the process of incorporating the foundation in New Jersey at the time of his death. He was then its director general.

REVIEW OF UNITED STATES-JAPANESE RELATIONS

Mr. WILEY. Mr. President, President Eisenhower has now embarked on a Far Eastern tour to bring messages of friendship and pledges of cooperation by the United States to the people in the Orient. With him go the best wishes and blessings of the American people.

For the most part, I am deeply confident that—as evidenced by previous trips—this tour of the Far East will help to further improve U.S. relations in that area of the globe. The tremendous reception which President Eisenhower is receiving in the Philippine Islands again symbolizes the warm affection for our President and great respect for our country inherent in people all over the globe.

Unfortunately, however, the flareup in Japan reflecting anti-U.S. sentiment, creates a serious situation. We recognize, of course, that the riots are prodded, agitated, and directed by leftwingers and Communists. Too, there may be internal factors—including political crosswinds—affecting the situation.

However, the big question confronting the Japanese people is: Will they allow a rabble-rousing minority to jeopardize United States-Japanese relations and determine criteria for national conduct for the Japanese people—in effect, present their "face" to the world.

As a national policy, we do not interfere with the internal affairs of other nations. However, we have a great stake in Japan—one of ideals, and one written in the blood of over a million wounded and dead in World War II.

The reestablishment of good relations between the two nations—in the aftermath of an all-out conflict—is, of course, a sensitive, difficult task.

Realistically there may be scars of the Second World War that have not healed and vanished. No doubt, the agitators are playing on any "under the surface" feelings that still exist. Nor can it be forgotten that we, as a nation, also have scars.

In the postwar era, however, we have been willing to demonstrate—as a people—a new kind of conduct in international affairs. Following World War II, the United States adopted a policy—unique in world history—not of pillaging, raping, and grinding "under its heels" the vanquished; to the contrary, we attempted to reconstruct Japan, promote a climate of respect for its people, and enable it, as a nation, to assume a significant role in world affairs.

Realistically speaking, this was not altogether altruistic. By experience, we have learned that if there is to be permanent peace, then all people must be accorded respect for their national integrity and opportunity, as nations, to play proportionate roles in world affairs.

Fundamentally, however, it must be recognized that that the U.S. policy evolved out of a traditional humanitarian "will of its people," as well as the nonaggressive, nonexpansive policy—symbolized by the fact that, despite a major role in two World Wars, have not taken for ourselves one foot of new territory.

A big question arises: Will history record U.S. postwar policy as an error? I sincerely hope and pray that it will not.

During the days ahead, we will be closely watching developments in Japan. The security of our esteemed, beloved President—the future of United States-Japanese relations—the stability of economic and military conditions in the Far East—all of these depend to a degree upon the conduct of the Japanese people and their Government in the days ahead.

The vast majority of the people—who, I feel, do not support the current anti-U.S. demonstrations—ultimately must make their voices heard for the reestablishment of peace and order within that country.

Unless this is done, however, the United States will need to take a new look at its overall policies in relation to Japan, on the edge of the Communist orbit, and the Far East generally.

The free world now looks to the Japanese people for signs and action to reaffirm our confidence in their dedication to peace, to preserving a free democracy, and to demonstrate their capability to maintain internal order in the face of Communist pressures.

MEMORIAL DAY FLAG DISPLAY

Mr. DIRKSEN. Mr. President, I have in my hand a copy of the Southtown Economist of Sunday, June 5, 1960, published in Chicago, Ill., and I draw attention to a picture of a row of American flags flying from the residences in

the 2800 block of West 102d Street in commemoration of Memorial Day this year. I should like to draw this to the attention of my colleagues because I find that in our Nation's Capital this last Memorial Day there was a disheartening, if not disgraceful, lack of recognition of the honors so much deserved by our valiant war dead. There were endless blocks in which not one flag was flown and hardly enough in the entire District of Columbia to indicate this day was different from any other holiday.

Memorial Day was established, as everyone knows, pursuant to a military order by a great Illinois general, John A. Logan, and it is one day when the reverent spirit should rise in souls everywhere in the country, and the day should be fittingly observed.

I should like to ask unanimous consent for the article to appear in the RECORD—and I express my regret that the picture cannot be reproduced—so that other people may know that there is at least one community in this country, and I am proud that it is in Chicago, where the citizens have a plan for showing their pride in the country and their respect for its soldier dead, not just on Memorial Day, but on Flag Day, June 14, and Independence Day, July 4.

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). Without objection, it is so ordered.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"ALL AMERICAN" BLOCK

Desire of residents of West 102d place, from South California to South Francisco Avenues, to fly the American flag more frequently than has been the custom in recent years has received an assist from the Economist newspapers.

An Economist employee who lives in the area told them of the Economist flag offer and through his cooperation almost all of the residents obtained flags which they flew in front of their homes over the Memorial Day weekend.

The photograph shows the attractive picture the flag display made in the neighborhood.

Residents said they plan to fly their flags again on Flag Day, June 14, and on July 4.

The Economist newspapers' offer, of which they took advantage, is still in effect. Flags shown in the photograph are 5 feet by 3 feet, with 13 stripes. They can be bought for only $3, with an Economist newsboy's subscription receipt, and represent a $2 savings.

A second flag for display in windows at home or in a car can be bought for only $2 and an Economist subscription receipt.

The flags can be bought at any of the three Economist offices, which are located at 728 West 65th Street, at 9444 South Western Avenue, and at 1716 East 79th Street. The offices are open week days from 9 a.m. to 5 p.m., and on Saturdays from 9 a.m. to noon.

THE 21ST ECUMENICAL COUNCIL, AND PROMINENT CROATS AT PREVIOUS COUNCILS

Mr. DIRKSEN. Mr. President, I have an old, long-time, durable friend in Chicago, an attorney, by the name of Vincent L. Knaus. He is a former president, I believe, of the South Chicago Bar Association. Last year he was very active on the Ecumenical Council Committee of the Illinois Knights of Columbus. He is a past grand knight of the Santa Maria Council No. 1511 of the Knights of Columbus. He is of Croatian descent. The interest he has manifested in community affairs and in the security of his country is one of those things that warms the heart.

Recently he wrote an article for the issue of the Junior Magazine of the Croatian Fraternal Union of America, entitled "Forthcoming XXI Ecumenical Council, Standout Croats at Previous Councils." I am very happy that Vincent Knaus gives so freely of his time to this great work, and I ask unanimous consent that the article may appear in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FORTHCOMING XXI ECUMENICAL COUNCIL, STANDOUT CROATS AT PREVIOUS CONCLAVES

(EDITOR'S NOTE.—As the whole world, Christian and non-Christian, knows by now, Pope John XXIII has called the 21st Ecumenical Council for 1961–62. The preparations for this great gathering are many, worldwide, and monumental. Our own CFU member, the prominent Chicago attorney, Vincent L. Knaus, has been signally honored by being named as the Illinois State Director of the Ecumenical Council Committee of the Illinois Knights of Columbus. Brother Knaus was good enough to prepare the following treatise for your Junior Magazine.)

CROATS AND THE COUNCILS OF THE CHURCH

Records show that the first Ecumenical Council in which Croats participated was the XV at Vienne, France, in 1311–12 under Pope Clement V. It condemned crimes and errors imputed to Knights Templars, Franticelli, Beghards, and Beguines; declared soul to be substantial form of the body; issued decrees for reformation of clergy and teaching of oriental languages.

The Croatian participant was blessed Augustine Kazotic O. P. bishop of Zagreb and Lucera, Italy.

John Cardinal Stojkovich, O. P. 1390–1443, participated in the XVII council—Basle-Ferrara-Florence, 1431–45, during the reign of Pope Eugene IV. This council effected a short-lived reunion with Greeks; dealt with extirpation of heresy, peace of Christendom, and reform of the church.

Ivan Stojkovich of Dubrovnik was the first Croat to be elevated to that exalted post—to become a Prince of the Church—Cardinal. He was the Procurator General of the Dominicans and was created a Cardinal in 1440 by Eugenius IV. He presided at some of the sessions of the Council in Basel in 1431. He was particularly effective in crushing the Hussite heresy. For eight mornings he spoke against its doctrines and finally defeated all that was reprehensible in it.

The third Croat prominent in an Ecumenical Council was George Dragisic. He was active in the Lateran Council of 1512–17 during the reigns of Pope Julius II and Leo X. This conclave enacted reform decrees; defended immortality and individuality of the soul; denied that philosophical truth is independent of revealed dogma.

Page 66 of "Znameniti Hrvati" tells us that he was tutor to the sons of Lorenzo de Medici. He was also minister of the Tuscan Province of the Franciscan Order. In 1497 he returned to Dubrovnik and subsequently to Rome where he became first, a bishop and then an archbishop.

Another participant of Croatian extraction or nationality was Simon Kozicic-Begna, 1460–1536. He spoke on the reforms of the church and on the Turkish occupation of his own country.

At the XIX Ecumenical Council held 1545–63 at Trent under the reigning Popes, Paul III, Julius III and Pius IV the errors of Luther were condemned as were other Heresiarchs. The council also issued many important doctrinal and disciplinary decrees. The noted Croat, George Cardinal Draskovic was present and active at this council. For his conspicuous part in this conclave's meetings he received the Cardinal's hat.

Cardinal Juraj Draskovic was a nephew of Cardinal Juraj Utjesinovic. He became bishop of Zagreb and Ban (governor-viceroy) of Croatia. At the Council of Trent he distinguished himself as an orator and signed the official documents of the council in 1562 with the name: "Ego Georgius Draskovitius Croata." He was created a Cardinal by the Croatian Pope, Sixtus V in 1585 (p. 60, A Review of Croatian History).

The fifth standout Croatian at an Ecumenical Council was that illustrious clergyman, statesman and patriot—Josip Juraj Strossmayer. He participated in the XX such conclave in the Vatican 1869–70 during the reign of Pope Pius IX. This council issued decrees on divine revelation and relationship of faith and reason; defined Papal infallibility.

Page 63 of "A Review of Croatian History" has this to say about this great Croat: "A great champion of church unity. * * * The famous Croat churchman of the last century was Bishop Josip Juray Strossmayer, one of the greatest Latin orators and a great advocate of the union of Orthodox churches with the Catholic Church. He built, at Djakovo, a magnificent cathedral which is the most beautiful church in southeastern Europe. He is immortal in Croatian history for his patriotic and educational endeavors. He led the group of bishops and prepared the arguments against papal infallibility and delivered the papers in Latin. He became world famous and was considered the greatest Latin scholar and orator of the 19th century.

The Zagreb University, the oldest and most renowned university in southeastern Europe, opened in 1874, chiefly because of the endeavors of Josip Juraj Strossmayer.

At the Vatican Council he was one of the most notable opponents of papal infallibility and distinguished himself as a speaker. The Pope himself praised Strossmayer's "remarkably good Latin."

After the council Strossmayer maintained his opposition longer than all the other bishops. On December 26, 1872, however, he yielded and published the decrees of the council in his official paper. At a later date he repeatedly proclaimed his submission to the Pope, as in his pastoral letter of February 28, 1881, on Sts. Cyril and Methodius expressing his devotion to the Holy See, at times, in extravagant language.

In politics he was an active supporter of the Croatian National Party and Pan-Slavism.

The theme of the coming XXI Council is Reunion of the Churches and so we may mention George Krizanic and what page 62 of "A Review of Croatian History" has to say about him: "For the Conversion of Russia"—"The Croat Jesuit Juraj Krizanic (1618–1683) was obsessed by a desire to win to the church the Orthodox Russians. He went to Moscow to persuade the Russian Czar to become a Catholic. Shortly after his arrival in Moscow he was exiled to Siberia, where he spent 16 years. When he was freed, he joined the Dominicans in Lithuania and as chaplain joined the army of King John Sobieski to fight the Turks at Vienna, where he was killed in 1683.

THE ARMY BIRTHDAY

Mr. MARTIN. Mr. President, in an era of rapidly changing technology and with the development of weapons of war that stagger the imagination, too often we tend to forget the men who comprise our U.S. Army and the vital role that they are playing in maintaining peace throughout the world.

Today, June 14, 1960, marks the anniversary of the establishment of the U.S. Army. For 185 years this Army has maintained a continuous record of contribution to our Nation's security, welfare, and growth. The 145 battle streamers that fly from the Army flag are evidence of the devoted service and selfless duty that have been so characteristic of the U.S. Army during our wars. The navigable rivers and harbors of our Nation are evidence of the continued service of our Army Engineers. The relief to millions of sufferers during periods of disaster are evidence of the Army's close association with the citizens of our Nation.

In war and in peace the Army serves with distinction and pride and, in wishing them well on this 185th birthday, I am sure that I am echoing the sentiments of a grateful Nation.

ORDER OF BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL EXPENDITURES BY THE COMMITTEE ON GOVERNMENT OPERATIONS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed to the consideration of Calendar No. 1374, Senate Resolution 279.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 279) authorizing additional expenditures by the Committee on Government Operations.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the resolution.

FOREIGN AGRICULTURAL SERVICE

Mr. AIKEN. Mr. President, I believe in giving credit where credit is due.

Many of the truly remarkable accomplishments of the executive branch of our Government come from relatively small agencies.

These agencies perform their work year after year with such competence and so little fanfare that sometimes we forget that they exist.

One of these smaller agencies which merits our appreciation and support is the Foreign Agricultural Service of the Department of Agriculture.

It was 30 years ago that the Foreign Agricultural Service was established.

This agency is the foreign arm of agriculture.

And as such it develops foreign outlets for U.S. agricultural products; it administers export programs such as Public Law 480 and our food-for-peace programs; it represents the Department of Agriculture at international conferences, such as the Food and Agriculture Organization, and General Agreement on Tariffs and Trade; it analyzes foreign agricultural trade; and it does many other important tasks which I would like to touch on today.

Initially and through most of its life, FAS operated primarily as a fact-gathering and reporting agency. However, in 1954 it broadened its scope and became a dynamic action agency.

The year 1954 is a key date for this agency because of two events. First, the Agricultural Attaché Service was put back into the Department of Agriculture and placed in the Foreign Agricultural Service. Second, Public Law 480 was enacted.

Because Public Law 480 has been well administered it is now considered one of the more successful of the U.S. action programs.

THE AGRICULTURAL ATTACHÉ

When responsibility for the Agricultural Attaché Service was transferred back to the Department of Agriculture in 1954, President Eisenhower said that the purpose of the transfer was "to sharpen the effort to find new world markets for our agricultural products" thereby establishing a new role for the agricultural attaché. This activity has received major emphasis since that time.

The agricultural attaché is often referred to as the "eyes, ears, and voice" of U.S. agriculture abroad. Some people call him "the good right arm" of U.S. agriculture abroad. However you describe him, much of what the Foreign Agricultural Service accomplishes depends upon the agricultural attaché.

One of his prime responsibilities is to report on important developments in foreign agriculture which might affect the U.S. farmer and the U.S. agricultural trade. This is "agricultural intelligence."

He reports on the production and consumption of agricultural products, and significant changes that are developing or are in the making; he reports on the agricultural policies of the country, and generally keeps alert for particular trends which the U.S. farmer and the U.S. agricultural trade need to know. He develops his information through a variety of sources.

Few countries maintain crop reporting services of the kind available in the United States. Therefore experience, knowledge, and considerable ingenuity are required if the attaché is to accurately reflect the agricultural situation in the country to which he is assigned.

He must be alert and travel extensively to check crop conditions and marketing movements, and maintain close contact with buyers and sellers of agricultural products within his areas. This firsthand observation of crops and trade situations is vital to the accuracy and timeliness of his information.

The agricultural attaché has the important responsibility of promoting markets for U.S. agricultural products.

This becomes more and more important because of the ability of U.S. farmers to produce abundantly.

Those of us who travel abroad are aware of the many other tasks the attaché must perform. He represents the U.S. farmer and as such must achieve an understanding and acceptance of U.S. agricultural policy among our customers abroad. He arranges contacts and itineraries for businessmen.

He is a key figure in the U.S. Embassy in administering Public Law 480 functions abroad; he participates in the exhibition of commodities in trade fairs; and supervises market development projects which are conducted abroad to expand markets for U.S. products.

I shall elaborate on market development activities later.

We have 76 attachés in 52 posts. They prepare more than 1,000 so-called regular reports and 3,000 voluntary reports annually.

The regular report is one which fits into scheduled official publications on foreign crops and markets.

The voluntary report is one the attaché makes when there are significant developments such as drought, flood, disease outbreaks, or possible government action which will result in a substantial change in the outlook for foreign trade. Time is of the greatest importance on reports such as these, frequently demanding on-the-spot evaluation and use of cable and telephone communication.

The agricultural attachés are not only performing essential work under the wing of the Department of Agriculture where they belong but they also serve as good-will ambassadors abroad. They mingle with people in all walks of life and generally enjoy the confidence of the citizens of their assigned countries.

PUBLIC LAW 480

In 1954, Public Law 480 was enacted as a comprehensive and yet an experimental approach to the use of agricultural surpluses. In almost 6 years of operation, the program has emerged as a major U.S. agricultural program to utilize our agricultural abundance to help the free world. It is among the most successful U.S. programs. The Foreign Agricultural Service has been the key agency in its administration.

The program has moved more than $6 billion worth of commodities at world market prices. In terms of price support costs, this would amount to about $9 billion. We have to convert these dollar amounts into quantities in order to appreciate the magnitude of the program.

One-and-a-half billion bushels of wheat have been exported under Public Law 480. This is about 1½ times our average annual production. It is about

three times the quantity of wheat the American people use every year as food.

Another 630 million bushels of corn, barley, grain sorghums, and oats have been exported; 3 billion pounds of nonfat dry milk and the same quantity of vegetable oil; 50 million bags of rice; and more than 6 million bales of cotton. These are figures to stagger the imagination.

Most of these quantities have been moved under title I of Public Law 480, which authorizes the sale of surpluses for foreign currencies. Foreign currency sales are made largely to friendly developing countries or to countries in poor financial condition and as such have become a vital foreign policy instrument.

In the case of Formosa and Korea, for example, title I sales directly augment the mutual security program. Commodities are moved to these countries to support their economies and most of the currencies generated are used for military assistance.

Title I of Public Law 480 probably has been the major factor in U.S. support to Turkey, one of our strongest allies. The furnishing of wheat particularly has enabled that country to stand firm at the doorstep of the U.S.S.R.

The title I currencies are contributing to the economic development of many South American countries. They are being used to improve highways and ports in Chile, for electric power and steel-manufacturing in Brazil, and for irrigation and land development in Peru.

The classic example of how title I of Public Law 480 works and the greatest demonstration of the use of food for peaceful purposes will be found in India.

The title I agreement negotiated last month with India involves the shipment of 17 million tons of wheat and rice to India over a 4-year period. It means nearly 600 million bushels of wheat and 22 million bags of rice. This is more than the quantity of wheat and rice the United States consumes as food annually. Stated in another way, it means that an average of more than one shipload of 11,000 tons of grain will leave the ports of the United States for the ports of India every day for the next 4 years.

The agreement means more than that, however. It is designed to help this large key country in the struggle between the free world and communism by establishing substantial food reserves.

One-quarter of the wheat and all the rice will be stockpiled in India to help meet any emergency that might arise there—be it a crop shortage or an emergency from drought, food, or other natural disaster.

Also, a large part of the rupees that will be paid to the United States for these commodities will be loaned or granted to the Government of India for economic development purposes to finance essential projects such as power development, irrigation, and industrial works.

It means large direct support to India's third 5-year plan which will begin in March 1961.

Rupees generated under previous title I transactions with India are now being used on a loan basis to expand their economy.

A typical example of this rupee use is the building of a 250,000 kilowatt-hour thermoelectric plant near Calcutta. It will be the largest of its type in India.

Currencies are also being used to help meet construction costs for the Utter Pradesh Agricultural University, a new State agricultural school patterned after U.S. land-grant colleges and universities. It is scheduled to open in July, near Rudrapur.

And Public Law 480 currencies are assisting in the eradication of malaria in India.

Currencies are also being loaned to private business firms, to expand their plants.

Loans to the Indian affiliates of the Goodyear and Firestone tire and rubber companies will give employment to about 1,500 workers. The Goodyear plant will produce about half of India's present requirements for rubber.

Another loan is helping to finance the Hindustan aluminum reduction plant. The capacity of the plant will be 20,000 tons per year which will increase India's aluminum production capacity by two-thirds.

The initial press reaction in India to the new agreement demonstrates the foreign policy aspect of title I agreements.

In the Bombay area, for example, the Bangalore Prajavani stated:

> Present agreement is memorable event in history of Indo-United States friendly relations.

The Times of India said:

> No Government has ever been more generous in dealing with an underdeveloped country than the U.S. administration in negotiating this agreement.

The Industan said:

> In other words, this agreement is a living example of mutual help and cooperation between the two free, democratic, and progressive nations of the world.

Even Communist-oriented local language newspapers concede the tremendous impact of the agreement.

MARKET DEVELOPMENT

I was pleased with the President's message of March 17, 1960, concerning the program being developed by the administration to promote the growth of U.S. export trade.

The President said:

> Expanded exports can add substantially to the millions of jobs already generated for our people by export trade.

He cautioned that world markets now are highly competitive, and a more vigorous effort is required by both government and business to expand exports under these circumstances.

The President specifically directed the expansion of the agricultural trade promotion activities of the Department of Agriculture.

The Secretary of Agriculture on April 12 announced that the Department was conducting an overall review of current export policies, programs, and activities, in efforts to further expand the agricultural trade promotion activities. At that time he pointed out that much already had been done in the agricultural sector in this respect.

Much of what has been done has been accomplished through the Foreign Agricultural Service. The FAS has been promoting agricultural trade for several years through market development projects financed by title I, Public Law 480 currencies and market analyses made by its commodity specialists. The FAS has pioneered this activity in the agricultural field. It was undertaken in cooperation with U.S. trade and farm groups, in recognition of the fact that responsibility for market promotion rests with these groups.

Since 1955, it has developed 370 such cooperative projects in 40 countries. The equivalent of $29 million is being spent under these projects in cooperation with 60 U.S. trade and farm groups.

The Foreign Agricultural Service has made $22 million available in Public Law 480 currencies, and $7 million has been made available by trade groups as matching funds.

This involves a substantial trade promotion effort.

However, I am convinced that Agriculture should use a greater share of the Public Law 480 currencies in this connection, because one of the primary objectives of the act is to promote U.S. agriculture exports. The Congress emphasized this in the extension of Public Law 480 last year, by inserting a provision that not less than 5 percent of title I sales proceeds and loan repayments should be made available for agricultural market development work. This should assure that the FAS can use increased amounts in its program of cooperation with trade groups to expand markets.

Market development projects involve various promotional techniques—surveys and studies of market potential and needs, advertising campaigns, translation and distribution of promotional and educational leaflets, studies of consumer demand, exchange visits of management and technical personnel of United States and foreign trade groups, and basic promotional techniques, such as contests and public appearances of our dairy "maids" and cotton "queens."

An especially dynamic trade fair program has been developed.

So far, FAS has put on about 50 fairs, reaching 25 million people.

To cite a few, commodities were exhibited at the Fine Foods Fair in Cologne, Germany, to acquaint European buyers and the public with the quality and availability of U.S. agricultural products.

Successful exhibit of the use of U.S. feed grains has been made in several locations in Italy and in Greece.

Exhibits have been held in the Spanish Agricultural Fair in Madrid, showing U.S. soybean products, frozen poultry and tobacco, and included a full-scale recombining plant, making samples of milk and ice cream available to the public.

These projects and trade fairs have made foreign buyers conscious of the quality of U.S. farm products; and the response to these efforts is heartening. Let us look at some results.

One of the most dramatic stories in market development concerns the strides

which have been made in the export of U.S. frozen poultry.

A few years ago exports of U.S. poultry were extremely small. Now the United States is the world's leading exporter of poultry meat.

In Switzerland, for example, exports of poultry rose from virtually nothing in 1955, to more than 20 million pounds last year, with a further increase expected this year. This resulted simply and purely by having the FAS convince Swiss grocery cooperatives to make trial orders of broiler chickens. When Swiss food chains saw how the product was purchased by the Swiss people, orders for frozen poultry grew at a fantastic rate.

The same story was true in West Germany, where again poultry exports rose from nothing prior to 1955 to 50 million pounds in 1959.

Market development projects helped raise exports of soybeans to Italy from a half million bushels in 1954–55 to about 5½ million bushels during the current marketing year.

Market promotion, along with improved processing practices in the United States, has helped maintain tallow exports to Japan at more than 200 million pounds annually.

Tobacco exports have increased to Thailand, through the same type of market promotion.

Similar results are being achieved for other commodities and other markets.

The Foreign Agricultural Service, with the help of the agricultural attachés and U.S. traders and farm organizations, has sales promotion projects for dairy products; breeding stock, including beef and dairy cattle, swine, and sheep; wheat; cotton; soybeans; and the whole gamut of farm products.

The total agricultural export picture reflects the vigor and success of promotion activities put on by the Foreign Agricultural Service. During the 2 years prior to 1954, total agricultural exports fell short of $3 billion each year. The return of the agricultural attachés, aggressive promotion work, and special export programs resulted in rapidly increasing exports.

Agricultural exports have averaged more than $4 billion during each of the past 3 fiscal years.

In the fiscal year which ends June 30, the value of U.S. agricultural exports will total about $4.5 billion.

Of this $4.5 billion, about $3.3 billion is expected to be straight commercial dollar sales which would be close to the best year we've ever had in dollar sales.

From the standpoint of individual commodities, the export situation is bright.

Exports of wheat have been extremely heavy this spring, and will approach 500 million bushels for the marketing year or nearly half the 1959 crop.

Cotton exports should total about six and a half million bales, again nearly half of the 1959 crop.

Exports of soybeans again will set a new record, running at least 20 million bushels ahead of last year when 103 million bushels were moved.

Feed grain exports will also set a new record of about 13 million tons.

Fruit and vegetable exports and most animal products movements are above those of last year.

PUBLICATIONS AND REPORTS

A special word needs to be said about the publications and reports that come out of the Foreign Agricultural Service.

Based on the agricultural attaché reports I discussed earlier, and on visits of marketing specialists, FAS publishes timely and well-written reports and publications dealing with an extremely wide range of subjects.

A typical example is a recent report on the market in Japan for U.S. livestock and meat products.

Another type of report is a competition study made of Russian cotton production, consumption, and trade.

The report shows that these aspects of Russian cotton have increased steadily in postwar years, placing that country second only to the United States in all three categories prior to 1958, when Communist China probably moved into second place.

Along the same line, a study was made of Communist China cotton textile exports indicating that it has made a concerted effort to reenter and expand trade with free world countries.

And with cotton textiles an important item in this trade drive, the volume of Communist China's cotton textile exports has adversely affected U.S. exports of raw cotton to some of our most important customers.

A study was made of Brazil's wheat expansion program to determine prospects for continued expansion and production and other developments likely to affect the future competitive status of U.S. wheat and flour in that market.

Although Brazil increased production sevenfold in the last 20 years, and this is an outstanding accomplishment, the increase was outdistanced by population growth and increased consumer demand.

It is estimated that, at current consumption levels, Brazil will need 4 million tons of wheat annually by 1970.

Other reports include a study of foreign government wheat production and trade policies, the competitive position of U.S. hides in world markets, the position of U.S. hops in world markets.

The mention of some titles illustrates the variety of subjects looked into—"The Greek Raisin Industry," "The Role of Farm Products in U.S. Aid to Spain," "West Africa's Fats and Oils Industry," "The Agriculture of Ceylon."

CONCLUSION

The virtue of the Foreign Agricultural Service that impresses me is the manner in which it operates with its limited amount of personnel and budget expense.

It has about 800 employees, of which about 135 are foreign nationals working with agricultural attachés overseas, and a current budget of about $7 million.

What with the Public Law 480 programs, market development obligations, reporting responsibilities, and many other functions spread out all over the world, it is indeed gratifying that this agency is performing so effectively and efficiently.

While its programs have grown large, Foreign Agricultural Service has made only modest increases in staff, whereas many agencies would mushroom under similar circumstances.

In the brief rundown I have made of this efficient agency, I have not touched on some of its important activities—seeking trade liberalization is one of them.

The agency is hitting hard on the further removal of restrictions against U.S. agricultural exports.

It is studying the Common Market as it relates to farm trade.

In short, it is studying, analyzing, watching all aspects of foreign trade that affect the American farmer and trader.

The Foreign Agricultural Service deserves a vote of thanks from the American people and the Congress.

ENFORCE ECONOMY IN GOVERNMENT—PLUG TAX LOOPHOLES—REPEAL OPPRESSIVE EXCISE TAXES

Mr. YOUNG of Ohio. Mr. President, American people very properly resent paying each month a 10-percent excise tax as telephone users.

This outrageous 10-percent tax has been added to the telephone service charge and to all charges for local and long-distance telephone calls since 1941.

Nearly 20 years ago, while I was serving in the House of Representatives, this tax was introduced and passed as a wartime measure to raise additional revenue to meet the threat of aggression from Adolf Hitler's Germany.

During the last session of the Congress, this unjust tax on telephone use and on local telephone tolls was extended to June 30 of this year. It is my hope that this atrocious tax will be permitted to expire.

I assert, Mr. President, that this 10-percent tax, which, of course, is passed on to telephone users, should not be permitted the sort of permanency that it has. It is a burdensome tax and, in fact, lays the heaviest burden upon people in modest circumstances or persons engaged in business who must necessarily make regular use of telephone service.

An excise tax is, of course, a sales tax. Sales taxes invariably tax those who have the least.

Unfortunately, Eisenhower administration officials have recommended that the tax on local telephone calls be extended for another year. By reason of this recommendation, the Committee on Ways and Means of the House of Representatives has reported to that body a bill continuing this tax for an additional year.

Mr. President, I contend there will never be a better time for the lawmaking body of this country to act in a forthright manner and end this abominable tax, than right now.

I use the word "abominable" advisedly for the reason I feel there are so many other ways in which our Government could obtain more feathers with less squawking than by imposing this sort of a tax which burdens those in modest circumstances.

Mr. President, I have always been opposed to this excise, or sales, tax, which places a heavy burden on persons making telephone calls. Telephone service is certainly a household, as well as a business, necessity.

This sort of excise, or sales, tax is discriminatory. It was imposed on the American people at the same time taxes on luxury items, such as nightclub entertainment, jewelry, expensive furs, and liquor, were imposed. I assert taxing telephone users in the home, factories, and offices is not in the same category as taxing these luxury items. I assert this is an atrocious tax.

Furthermore, admittedly, telephone service is a public utility service. Yet, do other public utilities—water, electricity, and gas—suffer by the imposition of such a discriminatory tax?

The Ohio Bell Telephone Co. and other telephone companies are, in reality, not the actual sufferers from the imposition of this discriminatory tax. The sufferers are the citizens who use telephones. This sort of sales tax, or excise tax, violates every sound principle of just taxation. It is regressive. It burdens most those who have least. It is not in accord with that sound principle of just taxation that taxes should be levied by our Government upon its people based upon their ability to pay.

Mr. President, the urgency of bringing this matter to the attention of the public is heightened and increased by this new proposal to extend this sales, or excise, tax, and by the likelihood of its becoming a permanent burden on those who use telephones.

Here is highlighted one great problem presented whenever the Congress is called on to levy new taxes. Despite statements that such Federal sales, or excise, taxes are only temporary in character to meet a certain emergency, the merciless facts are that once a tax is promulgated and enforced, despite statements to the contrary, it is usually continued on the statute books and remains there as a permanent form of taxation.

As Ohio Congressman-at-large, I voted against the imposition of a sales tax upon purchases made in the District of Columbia. That was many years ago. It was then stated that there was a necessity for a 2 percent sales tax to meet a temporary emergency, and that when the emergency came to an end, the tax would be repealed. The cruel facts are, this sales tax in the District of Columbia—the same as the 3 percent sales tax in Ohio—has become a permanent form of taxation.

Persons who are poor, or in moderate circumstances, spend all of their incomes for living purposes, and they bear a greater burden than do those persons who receive high incomes and save a substantial portion of their earnings.

It is later than we think.

Now is the time to end this unfair, detestable, burdensome, and discriminatory excise tax. If we fail to do this now, it will burden our people for many years to come. In fact, it will, without doubt, burden them permanently.

Furthermore, Mr. President, at this time I give notice that I am unalterably opposed to the imposition of any general Federal sales tax, as has been advocated constantly by the National Association of Manufacturers and by the U.S. Chamber of Commerce.

Mr. President, let us enforce economy in Government. Economy in Government, like economy in an individual, I apprehend, means going without some of the things we would like to have but do not absolutely need.

The duplication and waste in our Defense Establishment is appalling. This is without doubt the most wasteful branch of Government. It is estimated that $5 billion has been squandered each year during the Eisenhower administration partly because of lack of unification of our Armed Forces.

Only yesterday the distinguished senior Senator from Illinois [Mr. DOUGLAS] illustrated this point by showing, among other things, that the Navy Department paid $21.10 each for thousands of small lamp sockets which he purchased for 25 cents each in a retail store. He displayed a set of wrenches which cost the Army $29 each and which he purchased for $3.89.

Senator DOUGLAS displayed and discussed numerous other examples of inexcusable waste and inefficiency in the procurement practices of the Armed Forces. For example, a headset cable for which the Air Force paid nearly $11 each and which he purchased at a local electric store for $1.50; an electric delay line purchased in quantity by the Air Force at $250 each which was offered him at $25; a small blower for which the Air Force paid $50 and which was quoted to him at $3.66 each if bought in quantity; an electric plug for which the Air Force paid $11 each and which was appraised at from 25 to 50 cents; and metal gage plugs for which taxpayers, via the Air Force, paid $10 each and which are offered at a Washington machine shop for 50 cents each.

It is evident that the Pentagon procurement system is so wasteful that billions of taxpayers' dollars have been squandered unnecessarily each year during the Eisenhower administration.

The law is clear that negotiated contracts should be utilized only in emergencies and limited circumstances, but this law has been violated and the Air Force, Army, and Navy have in many instances been paying from 6 to 100 times the retail value of many products.

Each branch of the armed services acts as if it alone were the sole savior of the country. Each bids against the other. As a result, contractors benefit and taxpayers suffer.

Here is a place where we can really save taxpayers' money. This administration and any future one would do better to direct its efforts toward accomplishing real unification of the Armed Forces rather than imposing discriminatory excise taxes on the American people.

Mr. President, instead of continuing the telephone excise tax, we should make every effort to utilize to the fullest our present revenue producing laws—in other words, to plug the loopholes in our present tax structure.

Taxpayers who, at present, are struggling under our loophole-riddled tax laws, are entitled to a break.

It is estimated that an additional $1 billion per year could be produced in income taxes by spending a modest amount for more Internal Revenue Service investigators. Slower service to taxpayers entitled to refunds and much lower income tax payments result from present inadequate examination and scrutiny of income tax returns.

Too many recipients of large incomes deduct too much for expenses or "swindle sheets." Deductions for members of the family on so-called business trips, transportation to conventions held in convenient locations abroad, company cars, airplanes, yachts, vacation and hunting lodges in Canada, Florida, and California, and lavish expense accounts at plush nightclubs and theaters are just a few of today's permissible tax dodges.

More investigators and revenue agents will result in bringing in more income taxes, more fair dealing to all taxpayers, and quicker refunds. For each additional $1,000 spent on their salaries, our good Uncle can look forward to receiving $30,000 in increased revenue.

Mr. President, since 1926 oil and gas producers have been permitted to deduct 27½ percent annually as a depletion allowance regardless of the actual depletion involved. There is no loophole in the tax laws so inequitable as the excessive depletion exemptions now enjoyed by oil and gas corporate interests.

If this depletion allowance were reduced from 27½ percent to 15 percent, $500 million would be added to our annual revenue, and in my judgment, no corporation would be dealt with unjustly.

Mr. President, these are just a few of the more flagrant loopholes in our income tax laws. Others could be mentioned, including preferred treatment for dividend income, capital gains formula, loss carryovers, and the withholding of income tax on dividends at the source.

The average hard working citizen should not be burdened with excise taxes on his necessities, including local and long-distance telephone calls. Nor should other taxpayers, individual or corporate, be permitted to make millions through tax loopholes.

Let us plug loopholes in our present revenue laws so as to channel additional taxpayments into the Federal Treasury, At the same time, let us eliminate unfair, unsound, and atrocious excise taxes which tax most those who have least.

Mr. MORSE. Mr. President, will the Senator yield for a question or two?

Mr. YOUNG of Ohio. I gladly yield to the distinguished senior Senator from Oregon.

Mr. MORSE. I wish to commend the Senator from Ohio for the speech he has just delivered in the Senate. It is a speech that is sorely needed.

Referring to the Senator's comment on excise taxes, is the Senator aware of the fact that as early as 1947 the Committee for Economic Development, at that time headed by Paul Hoffman, a great industrialist, made the first in a series of recommendations that it has since made

proposing the elimination of a good many of our excise taxes and a substantial reduction in most of the others? Is the Senator aware of that position taken by the Committee for Economic Development?

Mr. YOUNG of Ohio. I do recall that position, but I did not realize that, unfortunately for the American people, 13 long years have elapsed since that time.

Mr. MORSE. It was that year, 1947, that the senior Senator from Oregon introduced the first of his bills to reduce excise taxes and the elimination of many of them. My bill merely proposed to put in black and white the recommendation of these very outstanding representatives of business in this country.

That report of 1947 asserted—and the observation has been repeated in subsequent reports—that when excise taxes were levied during the war, Congress pledged that when the war was over it would remove the excise taxes because they were levied for two purposes. One purpose was to discourage civilian production and, of course, excise taxes do so. They discourage production not only in time of war, but also in time of peace.

Discouragement of civilian production has been one of the results of the levying of the excise taxes. Of course, during the war we did not want civilian production. We wanted a minimum of civilian production; we wanted a maximum of war production. They were levied for that purpose.

There were levied for a second purpose, which was to raise some emergency funds based not upon the principle of ability to pay but convenience of collection. Convenience of collection is the best argument that can be made for an excise tax. It is easy to collect, but it is not collected on a fair basis because it does not tax those who have the greatest ability to pay. I know of no tax that is more unfair to the general consumer of the country than an excise tax.

Since 1947 I have sought to get the Senate to act in this field at least seven or eight times, as year after year I offered a series of amendments.

I welcome the help of the Senator from Ohio. I am delighted to associate myself with his remarks today in the Senate. I ask him, in view of the fact that certain politicians made these pledges to which I have referred during the war, if he disagrees with me when I make the observation that politicians ought to keep their pledges, too.

Mr. YOUNG of Ohio. In answer to the question of the distinguished Senator from Oregon, who is a great Senator, and who certainly manifested splendid leadership in 1947 and has continued to do so in urging the repeal of these abominable taxes, I say that politicians should comply with the pledges they make and should absolutely adhere to them.

May I add that I am very happy to follow, as a humble private in the ranks, the great leadership of the Senator from Oregon on this subject. In the short time that I have been a Member of the Senate I have found that the judgment of the senior Senator from Oregon is usually excellent.

Mr. MORSE. Mr. President, will the Senator yield briefly further?

Mr. YOUNG of Ohio. Yes.

Mr. MORSE. I appreciate the very kind remarks of the Senator from Ohio. I always have great respect for political courage. The Senator from Ohio has demonstrated such courage time and time again since he came to the Senate, and he demonstrated it again today.

Great courage is required to stand up against the powerful oil and gas combine of this country, which exercises such a powerful influence in the Halls of Congress that it is able to continue to steal from the American people on a political basis—and that is what it amounts to—the shocking amount of a depletion allowance of 27½ percent.

I hope that the American people will wake up finally. I do not know what more we can do but to point out to the American people how the oil and gas industry robs them year after year. The industry is supported by Members of Congress who do not represent the people of this country, but who really represent the gas and oil interests. It is about time that the people call for an accounting from these politicians who are selling them out by robbing the people with this kind of handout to the gas and oil industry.

As a member of the Foreign Relations Committee of the Senate I say, too, that the oil and gas interests of America are exercising an undue influence upon the foreign policy of this Republic, and it is about time that we had an accounting from the oil and gas interests, both in regard to their escapism in avoiding the taxes they ought to pay, and in regard to the undue influence they are exercising in American foreign policy.

Here is one U.S. Senator who would rather leave the Senate than to sit here as a representative of the oil and gas interests of America.

Mr. YOUNG of Ohio. I thank the distinguished Senator from Oregon for his kind reference to me. Again I say that I agree with the views he has expressed on this vital public issue.

Mr. President, on this matter it is later than we think.

ADDITIONAL EXPENDITURES BY THE COMMITTEE ON GOVERNMENT OPERATIONS

The Senate resumed the consideration of the resolution (S. Res. 279) authorizing additional expenditures by the Committee on Government Operations.

Mr. YOUNG of Ohio. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for a quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The question is on agreeing to the resolution.

Mr. DIRKSEN. I understand that the distinguished Senator from Louisiana [Mr. ELLENDER] has some questions on the resolution, although no real objection to it.

Mr. ELLENDER. I do not have any objection to Calendar No. 1374, Senate Resolution 279, which I understand is a resolution to augment the regular appropriation of $10,000 made to the Committee on Government Operations. Each standing committee of the Senate is allowed $10,000 per year for its regular investigative operations. I understand that the Committee on Government Operations has expended its regular allowance for this work and wishes to augment that amount by $10,000.

Mr. MANSFIELD. That is correct.

Mr. ELLENDER. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to, as follows:

Resolved, That the Committee on Government Operations is hereby authorized to expend from the contingent fund of the Senate, during the Eighty-sixth Congress, $10,000, in addition to the amount, and for the same purposes specified in section 134(a) of the Legislative Reorganization Act, approved August 2, 1946.

INCREASE IN LIMIT OF EXPENDITURES FOR COMMITTEE ON ARMED SERVICES

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1375, Senate Resolution 310.

The PRESIDING OFFICER. The resolution will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A resolution (S. Res. 310) increasing the limit of expenditures for hearings before the Committee on Armed Services.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ELLENDER. I understand that the purpose of the resolution is merely to augment the regular appropriation to the Armed Services Committee for its operation by an additional $10,000. This money would be used to pay for the regular operations of the committee.

Mr. MANSFIELD. It is for routine purposes.

Mr. ELLENDER. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 310) was agreed to, as follows:

Resolved, That the Committee on Armed Services hereby is authorized to expend from the contingent fund of the Senate, during the Eighty-sixth Congress, $10,000 in addition to the amount, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act, approved August 2, 1946.

STUDY OF GOVERNMENT LICENSED MEDIA FOR THE DISSEMINATION OF POLITICAL OPINIONS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate

proceed to the consideration of Calendar No. 1376, Senate Resolution 305.

The PRESIDING OFFICER. The resolution will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A resolution (S. Res. 305) providing for a study of the uses of Government licensed media for the dissemination of political opinions, news, and so forth.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution, which had been reported from the Committee on Rules and Administration with an amendment on page 2, line 16, after the word "committee", to strike out "from February 1, 1960," and insert "from date of approval of this resolution", so as to make the resolution read:

Resolved, That the Committee on Interstate and Foreign Commerce, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—

(1) Federal policy on uses of Government licensed media for the dissemination of political opinions, news, and advertising, and the presentation of political candidates; and

(2) a review and examination of information and complaints concerning the dissemination of news by such media.

SEC. 2. For the purposes of this resolution the committee, from date of approval of this resolution to January 31, 1961, inclusive, is authorized (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis, technical, clerical, and other assistants and consultants: *Provided*, That the minority is authorized to select one person for appointment, and the person so selected shall be appointed and his compensation shall be so fixed that his gross rate shall not be less by more than $1,200 than the highest gross rate paid to any other employee; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1961.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $45,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. YARBOROUGH. Mr. President, in support of Senate Resolution 305, I point out that it provides a modest amount of money for the work of the so-called watchdog subcommittee of the Committee on Interstate and Foreign Commerce.

The fundamental objective of the Radio Act of 1927 was to require equality of treatment of political candidates by broadcasters. As a result of that act, certain limitations were placed upon broadcasting stations—in fact, strict limitations were placed upon them—which were applicable equally to TV stations. The requirement was that all candidates were entitled to equal time in the use of the airwaves.

The Lar Daly decision, emanating from Chicago, Ill., held that the equal time provision applied to comments made in radio news broadcasts. It provided that news broadcasting comments relating to one candidate should apply equally to other candidates.

As a result of that decision, Congress, at the last session, passed an act amendatory of section 315(a) of the Communications Act of 1934. It amended the equal-time provision, insofar as it applied to news broadcasters, as follows:

Appearance by a legally qualified candidate on any—

(1) bona fide newscast.

(2) bona fide news interview,

(3) bona fide news documentary (if the appearance of the candidate is incidental to the presentation of the subject or subjects covered by the news documentary), or

(4) on-the-spot coverage of bona fide news events (including but not limited to political conventions and activities incidental thereto),

shall not be deemed to be use of a broadcasting station within the meaning of this subsection

That was the equal-time subsection.

That relaxing of the requirement that candidates receive equal time was very sharply and bitterly debated in the Committee on Interstate and Foreign Commerce. There was a sharp discussion of the matter on the floor of the Senate.

At that time, the chairman of the Subcommittee on Communications, the distinguished Senator from Rhode Island [Mr. PASTORE], pointed out that there were two limitations in the bill. While S. 2424 provided for the relaxing of the equal-time amendment with reference to news broadcasts, the chairman of the Subcommittee on Communications had placed in the bill sections 2(a) and 2(b). Section 2(a) provided that at the end of a 3-year period following the effective date of the enactment of the act, which was 1959, the law would be reexamined by Congress. The declaration of intent in the law was to ascertain whether the remedy provided by such amendment had proved to be effective and practicable in getting to the people news of the candidates, but not to blackout the news in a race where there were 18 candidates. Knowing from every possible test that one candidate will receive very few votes, it would do away with the requirement that he be given equal time. If there are 18 candidates for office, and 2 candidates get 98 percent of the vote, and 10 get one-half of 1 percent of the vote, if we take the 10 candidates who receive one-half of 1 percent of the votes between them, and give them equal time with the 2 major candidates who are receiving 98 percent of the votes, we will virtually destroy comment about that race by the news broadcasters.

So the second safeguard in the act is a requirement that the Federal Communications Commission shall report to Congress within 15 days after the close of the year beginning on the date of the enactment of this act, and within 15 days after the close of each 2 following years. That is under the requirement of the law that Congress reexamine the amendment to section 315(a) after 3 years.

In a discussion on the floor last year between the chairman of the Committee on Interstate and Foreign Commerce, the distinguished Senator from Washington [Mr. MAGNUSON], and the distinguished Senator from Rhode Island [Mr. PASTORE], it was stated that a watchdog subcommittee would be created to observe the effect of the amendment to section 315(a) on a broader scale, and that the watchdog committee would also study the fairness of the dissemination of news by news medium.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. ELLENDER. As I recall, this matter was thoroughly discussed last year when we amended the Communications Act of 1934.

Mr. YARBOROUGH. That is correct.

Mr. ELLENDER. As the Senator from Texas stated, there was some objection in the committee itself as to who should police the whole matter. It is my recollection that it was understood that the industry itself would police the matter. Am I correct in that understanding?

Mr. YARBOROUGH. It was stated on the floor at that time, in a colloquy between the Senator from Washington and the Senator from Rhode Island, that perhaps a governmental watchdog agency might be created. Immediately following that, in September 1959, the chairman of the Committee on Interstate and Foreign Commerce created the so-called watchdog subcommittee. It had no money with which to operate. As a practical matter, we have been a "paper" subcommittee, having no funds, no staff, and no means with which to operate. We have been in existence, technically, since September 1959, but have not had any funds.

Mr. ELLENDER. It is an entirely new committee, is it not?

Mr. YARBOROUGH. It is a new subcommittee of the committee. It was created last September and then ratified by the unanimous vote of the full committee early this year.

Mr. ELLENDER. What does the Senator propose to do with the funds? What will be the duties of the new subcommittee?

Mr. YARBOROUGH. The duties of the subcommittee are set forth in the resolution.

It is resolved that it will be a subcommittee—

To examine, investigate, and make a complete study of any and all matters pertaining to

(1) Federal policy on uses of Government licensed media for the dissemination of political opinions, news, and advertising, and the presentation of political candidates; and

(2) A review and examination of information and complaints concerning the dissemination of news by such media.

Mr. ELLENDER. Was not that very purpose carried out last year and the year before by the subcommittee headed by the Senator from Rhode Island [Mr. PASTORE]?

Mr. YARBOROUGH. The Senator from Rhode Island is chairman of the Subcommittee on Communications. The watchdog subcommittee is a subcommittee of the Subcommittee on Communications. There is no conflict between them. We operate under the Subcommittee on Communications and under the full committee.

Mr. ELLENDER. The Senator from Texas has indicated to us what the subcommittee proposes to do. My question is, Has not the same thing been done by the subcommittee headed by the distinguished Senator from Rhode Island?

Mr. PASTORE. Mr. President, will the Senator from Texas yield?

Mr. YARBOROUGH. I yield.

Mr. PASTORE. The answer is, No; not exactly so.

Mr. ELLENDER. How does it differ?

Mr. PASTORE. In this regard. The legislation which was passed a year ago came about as a result of a decision made by the Federal Communications Commission concerning a rule under section 315 of the law, which has to do with the allotment of equal time to opposing candidates.

A situation arose in Chicago, Ill., where the mayor was exposed on a newscast. At that time an individual named Lar Daly was an opponent of the mayor. He requested equal time, and he was granted equal time.

The minute that that flexibility was given to the interpretation of the law—that is, section 315—a serious question arose. It was felt that if that decision should persist, we would destroy the effectiveness of television and radio exposure of persons who are nominees or who are candidates for elective office. I thought at that time that the Federal Communications Commission was wrong in its interpretation of the law. Be that as it may, that was the interpretation for all intents and purposes, and it was final.

Therefore, in order to correct that interpretation, it became necessary to correct the law. That was done without prolonged hearings. As a matter of fact, I think the hearings took place over a period of a week or two. The committee proposed an amendment to the law. That amendment, in the form of a bill, was reported by the committee and adopted by the Senate.

There was apprehension on the part of many Members of the Senate. It was felt that the door might actually be opened too far; or, conversely, that the door might be closed so tight that equal opportunity for exposure on the part of the candidates of the various parties would be destroyed. Congress amended the law.

In order to give assurance to those who had apprehension concerning the matter, the suggestion was made at that time—it was not made by the junior Senator from Rhode Island—that there be a watchdog committee, whereupon the junior Senator from Rhode Island responded very, very quickly that we were not equipped to assume that responsibility because we had only one staff member; and the subcommittee is quite an involved one, and has an extremely large amount of work to do. The best evidence of that is to be found in the number of bills and other measures it has produced this year.

At that time I suggested that if the job of being a watchdog and checking effectiveness of the enforcement of this law was undertaken, we would have to have an assigned subcommittee set up to do it.

DEVELOPMENT OF WILDLIFE, FISH, AND GAME CONSERVATION

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The hour of 2 o'clock has arrived; and the Chair lays before the Senate the unfinished business, which will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations.

STUDY OF GOVERNMENT LICENSED MEDIA FOR THE DISSEMINATION OF POLITICAL OPINIONS

Mr. MANSFIELD. Mr. President, will the Senator from Texas yield, in order that I may propound a unanimous-consent request?

Mr. YARBOROUGH. I yield.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate resume the consideration of Senate Resolution 305.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate resumed the consideration of the resolution (S. Res. 305) providing for a study of the uses of Government licensed media for the dissemination of political opinions, news, and so forth.

Mr. PASTORE. Mr. President, if the Senator from Texas will yield to me——

Mr. YARBOROUGH. I yield.

Mr. PASTORE. Let me say that as a result of the suggestion of the junior Senator from Rhode Island, it was considered that possibly it would be best to initiate a distinct watchdog subcommittee.

I think the subcommittee has a very purposeful job to do. I believe the amount of money being sought at this time is a rather modest one. We do not now have the staff which must be enlisted if the task is to be done; there is much work to be done by the subcommittee.

In answer to the question the Senate has asked, let me say that last year we did not do this job. All we did was amend the equal-time law; and because it was amended, it was feared my some that we might have gone too far, and that we might have made it possible for the broadcasting companies to discriminate.

That is the genesis of this proposal, which calls for an entirely new task.

Mr. ELLENDER. But I understand that when the law was amended last year, there was an understanding that the policing was to be done by the industry itself.

Mr. PASTORE. No; the purpose of this subcommittee is to police the industry.

Mr. ELLENDER. My understanding was that the industry would police itself.

I wonder what two investigators would be able to do? I understand that it is proposed that two investigators be employed. According to the report, there would be one professional staff member for the majority, and one for the minority. One would be paid almost $15,000 a year. The other would pe paid a little more than $13,500 a year. What is it proposed that those two men do? What would be their function?

Mr. YARBOROUGH. First, in answer to the question of the Senator from Louisiana about having the industry police itself, let me say that would be like saying we will abolish the highway patrol, and will make all the automobile drivers police themselves, as regards observing the speed limit.

In the second place, the staff will be very small. It will be difficult to do the work with so small a staff. But it will be better to have a small staff than none. This subcommittee has been in existence since September, but has been hampered and hamstrung because of a lack of staff. The staff now proposed is the least the subcommittee should have—one for the majority, one for the minority, and a competent secretary. Of course the work will be done partially in connection with the complaints which are received.

I received a very bitter complaint from my State. A young man was elected to the legislature; and once he was elected, the television station began to use him as its "weatherman." On the television programs, he was called Mr. Weatherman. He obtained a great deal of publicity in that way. His opponent complained bitterly, and said the television station had not given fair treatment. The station replied that it had not mentioned the man by name, but had just referred to him as Mr. Weatherman. Nevertheless, in that way Mr. Weatherman received a great deal of publicity, and his opponent never received equal treatment. That case is an example of the complaints we have received.

I understand that in West Virginia a candidate for sheriff had a program on television, and there was complaint as to the time provided and to the lack of equal treatment. He had a weekly program. I think the result in that case was a different ruling, as compared with the ruling in the Mr. Weatherman case; and I think that resulted partly from the criticism in our committee and in the Senate about the Mr. Weatherman ruling, in which it was held that it was perfectly all right for the television station to permit the candidate to partic-

ipate in the broadcasts of the weather reports, in connection with which he was called Mr. Weatherman. But as a result of all the publicity he received in that way, he was reelected.

The purpose of this subcommittee work will be to deal with complaints of that kind.

Mr. ELLENDER. Has the committee received any complaints except those from the Senator's State?

Mr. YARBOROUGH. The subcommittee has not been able to function.

Mr. ELLENDER. But the subcommittee has been in existence; has it not?

Mr. YARBOROUGH. On paper only. After holding one or two meetings, we could not obtain a staff, and we were hamstrung, and could not do the job we should do. Either the subcommittee should be abolished or it should be given a proper staff. Without a proper staff, what can either committees or individual Senators do?

For instance, I should be at a committee meeting now. All of us need staff members, particularly this year, when we face a great national election. All of us need competent assistants. Certainly it would be a mistake to assume that broadcasters are less fallible than we are. We make mistakes, and so do the broadcasters.

The basic purpose of the subcommittee, in connection with its work, is to see that equal treatment is provided candidates who participate in radio and television broadcasts. All of us know that certain broadcasters have their preferences. Some broadcasters think one candidate is more colorful than the other, and thus they refer most often to the candidate they regard as the more colorful. They are not necessarily trying to elect that candidate, but they simply like his colorful manner, and so they mention him frequently, and neglect the other candidate.

Under section 315 there is a requirement, with respect to certain news broadcasts, that equal time be provided. That requirement no longer obtains, but the element of fairness must receive serious consideration.

Furthermore, we do not have sufficient funds to be able to do the work the Senator has mentioned. We have been seeking grants from foundations in order to do that work.

Mr. ELLENDER. Does the Senator want the subcommittee to act as a watchdog?

Mr. YARBOROUGH. Yes. The candidates' television programs should be monitored; and the only way to know whether equal treatment and fair treatment is given is to listen to the programs constantly.

After one complaint was made, it was found that although the television station said it did not favor a certain candidate, nevertheless, the station arranged to have that candidate appear on the television program immediately following a news broadcast in which the broadcaster had been placing great emphasis on the platform of one of the two political parties; and the platform the broadcaster had been emphasizing "just happened" to be the platform of the particular candidate who then appeared on the program.

In other words, the purpose of this subcommittee is to make sure that there is fairness in connection with the news media.

This resolution calls for a small, timid beginning; but certainly a small beginning is better than none, and certainly some beginning must be made.

It is a fallacy to have a so-called watchdog subcommittee, but not permit it to have any staff. The subcommittee must have a staff if it is to determine whether equal television or radio time is granted to the various candidates and parties.

Mr. ELLENDER. Of course the Senator knows the evil which would follow from the appointment of a watchdog committee to see to it that all the laws were strictly obeyed, and so forth. If we were to do that, we would have myriads of subcommittees. If fact, we have too many now.

As I understand, the subcommittee is to have until January 31, 1961, to do its work. Is that correct? That is in accordance with the wording of the resolution.

Mr. YARBOROUGH. That is the same base that the other committees have.

Mr. ELLENDER. Do I correctly understand that the work of the subcommittee can be completed by then?

Mr. YARBOROUGH. I do not think so; I think it will take longer.

Mr. ELLENDER. In other words, the subcommittee would be more or less a permanent one, would it?

Mr. YARBOROUGH. I do not think so. I think the crucial time for the subcommittee is this year, during the great national election.

Mr. ELLENDER. Is it the view of the Senator that after the coming national election there will be no need for the subcommittee?

Mr. YARBOROUGH. Well, in the bill the Congress passed last year, amending the Communications Act of 1934, Congress declared its intention to be to reexamine the amendment of section 315 (a) of the Communications Act of 1934, made by the first section of that act, at or before the end of the 3-year period beginning on the date of the enactment of that act. That was last year. So, at some time during the 3-year period, the Congress is to reexamine that question. One year has already passed; 2 years remain. I do not know whether the Congress will wish to wait until the end of the 2 remaining years before it reexamines that question. But certainly the Congress should not wait more than 2 years.

Certainly it would end before the end of the period in which the Congress of the United States has declared it will reexamine the question to see whether there is fairness of treatment in news commentaries, news documentation, on-the-spot coverage of news, or panel discussions.

Mr. DIRKSEN. Mr. President, I ask for recognition.

The PRESIDING OFFICER (Mr. Moss in the chair). The Senator from Illinois is recognized.

Mr. DIRKSEN. This is a very unusual resolution. I say that for a number of reasons. In the first place, the public law to deal with section 315, providing for equal-time facilities for candidates, actually became public law in September 1959. That was about 9 months ago. Insofar as I know, there were no elections in September of 1959. I know of no elections in October or November or December of that year, unless they were special elections.

Now a campaign is beginning, and, of course, it has got a rather ardent start—maybe it got an ardent start in 1959—but it is a little amazing, 9 months after this kind of legislation was put on the statute books, that the Senate would undertake to set up a special monitoring committee, with very broad powers, to have authority starting with the date of the approval of the resolution and ending on the last day of January 1961. That will be a period of about 7 months, and certainly it will embrace the period from now on that will be coextensive with the presidential, senatorial, and congressional campaigns.

As I read the language of the resolution, it provides for authority to examine, investigate, and make a complete study of all matters pertaining to Federal policy on uses of Government licensed media for the dissemination of political opinions, news, advertising, and the presentations of political candidates.

As I have pointed out, the law has been on the statute books only since September of last year. How many complaints could actually have arisen? And when will the complaints be made, unless they are made after the coming campaign is over? But are we going to have a Senate committee dipping right in the middle of a campaign to determine whether or not Republicans or Democrats were favorites with respect to the use of time on television or radio? Are we going to have a committee, even if it is a small committee, with a clerical staff of three, going around the country, poking into this matter, and, by the very existence of the committee, exercising an influence in the campaign itself? This is just as transparent as a plate glass window, in my book, and it is quite obvious that it has a very definite political purpose.

Somebody may object to that statement, but I let the language speak for itself, and I let the timing speak for itself. The committee is going to last only 7 months. If it were going to be a real oversight committee, it would, after the campaign was over, dispassionately and rather calmly make its finding on the basis of the abuses that may have been brought to light and the complaints that may have been filed.

It is rather interesting that the Federal Communications Commission, for the new budget year, asked for $300,000 for monitoring purposes. That means, of course, monitoring of radio and television. That is the regulatory agency which was created by the Congress for that purpose, and if there is anything wrong with it, then let Congress aim its guns at the regulatory agency, and not set up a political committee that will

have a life of 7 months and end in January, 9 or 10 or 11 days after the inauguration of the new President of the United States.

Mr. PASTORE. Mr. President, will the Senator yield for a moment?

Mr. DIRKSEN. I yield.

Mr. PASTORE. I think everything the Senator from Illinois is saying could truthfully be said about the resolution unless we tied it in or associated it with what transpired a year ago in our Senate history, when we amended section 315 of the Communications Act.

The monitoring the Senator is talking about, with reference to the appropriation, has particularly to do with deception in some of the commercialization in broadcasting that goes out over radio and television, and is not in connection with section 315 of the law, which has to do with equal time.

This resolution was not the idea of the junior Senator from Rhode Island.

Mr. DIRKSEN. I know it was not.

Mr. PASTORE. But let me say I think it is a good resolution in this respect: Unless we had initiated this sort of watchdog committee, I doubt very much we would have been able, in 1959, to amend section 315 of the Communications Act, as a result of the Lar Daly case, with which the Senator from Illinois is familiar.

Mr. DIRKSEN. Very familiar.

Mr. PASTORE. Many persons thought we could expect chaos in this particular field if Congress did not amend the law. I think the history of 1959 will bear me out in this statement. There are many present who were rather apprehensive and felt we should not amend the law. The broadcasters took the position that Congress should repeal section 315 entirely. Very frankly, I am inclined to lean that way. I think the broadcasting systems today have reached a position of integrity and good judgment so that they can very well parcel out time without the assistance of any law. But I think the resolution would lean in this direction. There is a question as to how far we should go and whether we have gone far enough. I do not think there is any ulterior motive involved in this proposal. I do not think it is connected with the campaign of 1960 and intended merely to spy on Republicans or Democrats. That was not the purpose of the proposal at all. There was confusion at the time we amended that law in 1959 as to whether or not we might be going in the right direction. The suggestion was made that we should have a watchdog committee. I stated at that time the junior Senator from Rhode Island was not equipped in the subcommittee to undertake that responsibility and do an adequate job. That is the genesis of this particular resolution.

A lot can be said on both sides of the question in connection with what we did in 1959. There is no ulterior motive involved here. There is no intention of spying. The resolution will serve a good purpose because it will clarify the whole question of equal time under section 315.

Mr. DIRKSEN. Mr. President, I do not know where we are going, if we amend the law as we did in respect to section 315 and then, within a few months, set up a watchdog committee, when there are not even any dogs to be watched as yet.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. PASTORE. With a watchdog committee, it is the dogs who do the watching and I know there are a lot of candidates to be watched.

I will say this: The complaints will come. I think this committee will serve a very useful purpose. We will know definitely, when we meet again in January, whether section 315 is necessary at all, whether we have gone too far or whether we have not gone far enough in amending the law. All of this was discussed at the time we amended the law last year.

I repeat: Had the promise not been made to watchdog this whole activity, I doubt very much that we would have pulled ourselves out of the dilemma which the Lar Daly decision put us in.

Mr. DIRKSEN. Mr. President, there were no printed hearings on this bill.

I do not know who appeared before the committee. I do not know if the committee heard the members of the Federal Communications Commission. I do not know if representatives of the industry were called in.

I know there are no printed hearings. I know there is no source to which we can go to find some background upon this thing.

I know that this is a request for an oversight committee, for a watchdog committee, to become effective from the day the resolution is approved, even if it is approved today, until the 31st of January, right in the middle of a presidential, a senatorial, and a congressional campaign.

Why should we not wait for the development of some background? Why should we not wait for some complaints? Why should we not wait for some abuses? Why should we not wait to see whether the FCC will do its job as a monitoring agency? Why should we not wait to see whether the industry will impartially, fairly, and equitably carry out the intent, the purpose, and the spirit of section 315, as it was amended?

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield to the distinguished Senator from Montana.

Mr. MANSFIELD. Mr. President, with the permission of the distinguished Senator from Illinois, I should like to ask two questions of the Senator from Rhode Island.

First, what is the expiration date of the resolution?

Mr. PASTORE. It is January 31, 1961.

Mr. MANSFIELD. The second question is: Does the Senator think the work contemplated by the so-called watchdog committee can be completed by January 31, 1961?

Mr. PASTORE. I know in saying this I am going to be disagreeing with my distinguished colleague from Texas, but I am inclined to think so. As a matter of fact, if there is anything left which spills over into 1961, I think it can be considered by the regular Subcommittee on Communications.

In answer to the observation made by the distinguished Senator from Illinois, I think the complaints will come during the progress of the campaign. That is the period when one hears from a host of candidates who feel they are not being given equal opportunities. Perhaps next year will be too late to consider the matter. That has been the trouble right along.

Section 315 has led us into an area of tremendous confusion. I think the confusion ought to be eliminated once and for all. I have every confidence that this action will help immensely to do that. I would not want to see the work continued beyond that time. That is my personal feeling. I know others feel differently, and that is their privilege.

Mr. DIRKSEN. Mr. President, I should like to ask the distinguished Senator from Colorado [Mr. ALLOTT], who is a member of the Committee on Appropriations, whether it is not correct that the Federal Communications Commission has asked for $300,000 for monitoring services?

Mr. ALLOTT. It is true that in the hearings about a week ago the Federal Communications Commission appeared before the committee and requested that $300,000 be restored of a $315,000 cut made by the House of Representatives, for the purpose of establishing an investigatory area or committee, for the purpose of watching and monitoring radio stations.

I have been waiting to answer the statement made by the Senator from Rhode Island. I would not want to say that this is exclusively for one purpose. I would not say this is exclusively for the purpose of political broadcasting, but it is for the specific purpose of monitoring TV and radio broadcasts, to see that the law in all respects—in all respects—is complied with.

Under the showing which was made before the committee, under the showing which was made to us, this type of action would come under the law, as well as all technical and other violations of the Federal Communications Act.

Mr. PASTORE. If the Senator will yield to me, I do not dispute that statement one single iota. I am more or less familiar with the activities of the FCC, as the Senator from Colorado well knows.

Mr. ALLOTT. I do well know it.

Mr. PASTORE. Let me state the reason behind the monitoring. This all comes about from the quandary of the quiz shows, which have been investigated, and the misleading advertising and deception of the public, which has come to light. These things have given the genesis for the appropriation. I do not think the appropriation is particularly connected with section 315.

Mr. ALLOTT. I do not say it is particularly connected with it, but it is not limited to the areas the Senator has indicated.

Mr. PASTORE. That is true.

Mr. ALLOTT. Under the showing made by the Federal Communications Commission, the authority would include

these actions as well as every other phase of violations of the Communications Act.

Mr. PASTORE. I agree with the Senator. I agree.

Mr. DIRKSEN. Mr. President, I point out that 26 years ago we created the Federal Communications Commission. I was a Member of the other body when that was done. From that day to this the law has been amended and has been amplified. The functions and responsibilities of the Commission have been expanded.

We created the Commission for the purpose of getting some order out of chaos in the whole communications field. Now do we wish to undertake, by means of a Senate committee, to displace the Federal Communications Commission and its responsibilities under the law which the Congress wrote? The Commission has monitoring responsibilities, and it can carry them out not only in the advertising field but also in this field as well, if the Congress will only supply the Commission with the necessary funds and the necessary personnel with which to do its job.

In addition, this is supposed to be an objective committee. Obviously, this work is going to have to be done in a political atmosphere. How can we escape that? Politics is in the air. It is going to be in the air from now until the last vote is cast and counted in November. We cannot get away from it. The political fever is with us. It breaks out all over the place, like bugs in June.

I simply do not want to see another instrumentality, another weapon to mar the quiet, tranquil political surface which has been maintained so felicitously so long.

I do not want to see this kind of instrumentality created, which is going to frighten the radio and TV people, and is going to make them pull in their horns, and put a micrometer upon the calendar and upon the clock, to see whether we get a little more or a little less time. That is going to be one of the inevitables which will go along with the solemn committee which will send its staff abroad and examine into complaints. Pretty soon it will begin to stir up a rather bitter partisan feud.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. DIRKSEN. This has all the earmarks of that kind of an instrument.

I yield with pleasure.

Mr. PASTORE. I do not wish to prolong this interchange unduly, but the distinguished Senator from Illinois knows pretty well that the last person in the world who would want to frighten or to upset anyone is the junior Senator from Rhode Island. That is not proposed at all.

It is true that all of this is born in the atmosphere of politics. That is all section 315 deals with—candidates for political office. Section 315 relates specifically to candidates for political office. I do not think we can separate ourselves from this whole atmosphere of politics, if we are talking about section 315, because that is just what it deals with. It relates to the granting of equal time to candidates for political office. Naturally it is shrouded in politics. We cannot escape it.

Mr. DIRKSEN. Exactly so.

What is the urgency of this matter? Who has come in with entreaties? Who has come in on bended knee to address supplications to the committee and say, "Please. This is a world-shaking matter, and we have to have it done now. The law must become effective from the day the Senate solemnly places its stamp of approval upon the resolution."

Who has been in to demand this, I want to know?

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. PASTORE. I repeat that all this information was given in September of last year when we amended the law. Senators, at that time, were quite apprehensive about amending the law, and possibly would not have done so unless a promise had been made that the whole matter would be supervised. Such action gave birth to the idea. I repeat that the resolution is not mine. If the Senator from Illinois is opposed to it, he ought to vote against it, but I have stated the reason for its presentation. We have tried to explain it as candidly as we can.

There is no world-shaking importance to this resolution. We say merely that, in view of the fact that section 315 has caused so much disturbance to so many, the resolution should be adopted. The junior Senator from Rhode Island has not been disturbed. I have never had any trouble with the newspapers; I have never had any trouble with broadcasters. They have always given me equal time. As a matter of fact, perhaps I have often received more than equal time. I am not disturbed about the situation at all. But there are many Senators who feel that whenever the names of their opponents are mentioned, their names should also be on the same line.

I believe to quiet this apprehension on the part of a few we made a promise in 1959 that the whole matter would be supervised. That is the reason for the resolution. That is why the resolution has been submitted. If Senators are in favor of its adoption, they should vote for it; if they are opposed to it, they should vote against it. There is nothing in the resolution which is going to change the destiny of mankind, whether it is adopted or not. But I think that if the resolution is adopted, it will make the junior Senator from Texas [Mr. YARBOROUGH] very happy.

Mr. DIRKSEN. I am sure it would. I ask my distinguished friend from Rhode Island to whom the assurance was given.

Mr. PASTORE. To the Senate at large.

Mr. DIRKSEN. I did not hear any assurance that would be supervision.

Mr. PASTORE. The Senator from Illinois was not here, but the statement appears in the RECORD.

Mr. DIRKSEN. The Senator from Illinois has been out of the Washington, D.C., area only 1 day since the present session of the Senate convened.

Mr. PASTORE. The Senator from Illinois was not here when we were talking about the promise. It is in the RECORD, and I suggest that if the Senator will look at the RECORD, he will find it.

Mr. DIRKSEN. I should like to see the statement.

Mr. PASTORE. All the Senator needs to do is to look it up.

Mr. SCOTT. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield to the Senator from Pennsylvania, without losing my right to the floor.

Mr. SCOTT. I have no interest in obtaining the floor permanently.

I rise not to make the junior Senator from Texas happy, although I should be delighted to see him of good cheer at all times. I rise as one who was originally against the resolution and now supports it.

I am not unaware of the political ins-and-outs as affected by the use of television and radio, and I am not unaware of the functions of the Federal Communications Commission and of the application of section 315 as amended.

I had many misgivings about the resolution and the freedom of information subcommittee, but as I am the only member of the minority party to serve on this subcommittee, I have had occasion to attend hearings and to learn of the reasons for the existence of the subcommttee and to keep myself informed as to whether or not this is a good proposal.

The Federal Communications Commission has many powers. The one under discussion I believe is one that it would be most hesitant to make use of, unless we have the benefit of the authority vested in this subcommittee of three. The purpose of the subcommittee is to make certain that equal time will be given to candidates for office this fall, for the office of President in particular, and while I think some of our friends on the other side of the aisle feel that they have at times less time than the Members on this side, in my opinion that is not the case. There is always the accusation that someone is "more equal" than someone else.

I think it is a good thing to monitor this campaign and satisfy everyone of the fairness and of the equal treatment to be accorded to rival candidates, but I changed my opinion with respect to this subcommittee at another time and for another reason, and that had to do with the auxiliary committees which appear frequently, well financed, for the purpose of advocating the election of one candidate or another to the Presidency. I have in mind citizens' committees, business advisory committees, committees of COPE, the agency of the AFL–CIO, and committees representing various other labor organizations.

There has been litigation on that question, notably in a famous case in Michigan, in which the Supreme Court to my mind came very close to deciding, and may yet decide, that under the first amendment to the U.S. Constitution there can be no limitation whatsoever on corporations or labor unions in the expenditure of money in behalf of the election of candidates.

I think perhaps that might be an unfortunate extension of the freedom of speech provisions of article I, but the

Supreme Court has certainly given indications that it is at least leaning in that direction, in view of the obiter dicta which occurred in the opinions of certain of the justices. Therefore, I am anxious to see that none of the auxiliary organizations which I mentioned advocating any particular candidate for the Presidency gains an unfair advantage over the other political party and its auxiliaries.

In other words, when a group appears on television and says, "We advocate the election of So and So," the time ought to be charged to that presidential candidate, whether it be used by a business group or a labor group. When they say, "We advocate the election of the other fellow," the argument equally applies. With great deference to my leader—and he knows I rarely disagree with him, and that I appreciate his reasoning and particularly enjoy his humor and his oratory—I hope he will forgive me for my deviation. But I did want to make the statement that I hope the resolution will pass. I thank the Senator for yielding.

Mr. DIRKSEN. Mr. President, my heart is suffused with nothing but charitable impulses as I see my friend persist in a pathway of error.

Mr. SCOTT. I shall return to the good sheep in due time.

Mr. DIRKSEN. I do not wish to disturb the tranquillity of a presidential campaign. I do not wish the caliper to be used to measure the time that may have been given to the President of the United States since the first of January to see if paragraph 9 on page 4 had any political implications, and whether, perhaps, some time ought to be given to the other side.

If, as my friend indicates, all manner of broadcasting is to be investigated, even when it is done by a labor organization or some other organization that has a preference for a candidate, I can see nothing but disturbance and difficulty before we get through.

So I hope that the Senate in its wisdom will not give its approval to a watchdog committee until there is some "doggery" to be watched. I leave the subject at that point. I have spoken my piece.

Mr. SCOTT. Mr. President, will the Senator yield to me briefly?

Mr. DIRKSEN. I yield with pleasure.

Mr. SCOTT. My concern is there may be some "sleeping doggery" around which ought to be observed.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. ELLENDER. Mr. President, I offer the amendment which I send to the desk.

On page 3, line 10, I propose to change the figure of $45,000 to $28,000.

It is apparent from what the distinguished Senator from Rhode Island stated that this subcommittee will probably be able to complete its work by January 31, 1961. Since there are 7 months remaining for the committee to do its work, and since the budgeted expenditures are a little under $4,000 a month, I believe that the sum of $28,000 would be sufficient.

I invite the attention of the Senate to the fact that it is proposed to hire only three persons: One professional staff member for the Democrats, one professional staff member for the Republicans, and a clerical assistant at a salary of under $5,000. There being only 7 months remaining, it strikes me that the sum of $28,000, or perhaps $30,000 to get an even figure, would be sufficient.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. YARBOROUGH. Will the Senator make the amount $35,000?

Mr. ELLENDER. Perhaps $30,000 would be sufficient.

Mr. YARBOROUGH. I am thinking of the expenses that will be involved.

Mr. ELLENDER. Mr. President, I modify my amendment to provide for $35,000.

The PRESIDING OFFICER. The Senator modifies his amendment accordingly.

Mr. YARBOROUGH. I will accept the amendment calling for $35,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, offered by the Senator from Louisiana.

The amendment, as modified, was agreed to.

The PRESIDING OFFICER. The resolution is open to further amendment.

Mr. ELLENDER. Mr. President, in connection with my remarks, I ask unanimous consent that the budget of the committee, appearing at page 3 of the report, be incorporated in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Budget of the Committee on Interstate and Foreign Commerce providing for a study of the uses of Government-licensed media for the dissemination of political opinions, news, etc., pursuant to S. Res. 305, for the period of Feb. 1, 1960, through Jan. 31, 1961

Position	Number	Base salary (per annum)	Gross salary (per annum)	Monthly salary (gross)	Total for period of budget (gross)
STAFF					
Professional staff member	1	$8,000	$14,979.45	$1,248.28	$14,979.45
Professional staff member (minority)	1	7,200	13,671.57	1,139.29	13,671.57
Clerical staff: Clerical assistant	1	2,040	4,499.50	374.95	4,499.50
Total	3				33,150.52
ADMINISTRATIVE					
Contribution to civil service retirement fund (6½ percent of total salaries)					2,154.78
Contribution to employees health benefit programs (Public Law 86-382, effective July 1, 1960)					121.68
Travel (inclusive of field investigations)					3,000.00
Hearings (inclusive of reporters' fees)					3,000.00
Stationery, office supplies					300.00
Communications (telephone, telegraph, and postage)					1,200.00
Newspapers, magazines, and documents					200.00
Contingent fund					1,873.02
Total					11,849.48
Grand total, S. Res. 305					45,000.00

The PRESIDING OFFICER. The question is on agreeing to the resolution, as amended.

The resolution, as amended, was agreed to.

The preamble was agreed to.

PARTICIPATION IN AN INTERNATIONAL CONVENTION OF CITIZENS FROM THE NORTH ATLANTIC TREATY NATIONS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1163, Senate Joint Resolution 170.

The PRESIDING OFFICER. The joint resolution will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A joint resolution (S.J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such conventions, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum, without losing my right to the floor.

Mr. ALLOTT. Mr. President, will the Senator withhold that request for 2 minutes?

Mr. MANSFIELD. I withhold it.

A TIME OF DECISION

Mr. KENNEDY obtained the floor.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, with the understanding that the Senator from Massachusetts does not lose his right to the floor.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, May 17, 1960, marked the end of an era—an era of illusion, the illusion that personal good will is a substitute for hard, carefully prepared bargaining on concrete issues, the illusion that good intentions and pious principles are a substitute for strong creative leadership.

For on May 17, 1960, the long-awaited, highly publicized summit conference collapsed. That collapse was the direct result of Soviet determination to destroy the talks. The insults and distortions of Mr. Khrushchev and the violence of his attacks shocked all Americans, and united the country in admiration for the dignity and self-control of President Eisenhower. Regardless of party, all of us deeply resented Russian abuse of this Nation and its President, and all of us shared a common disappointment at the failure of the conference. Nevertheless, it is imperative that we, as a nation, rise above our resentment and frustration to a critical reexamination of the events at Paris and their meaning for America.

I do not now intend to rehash the sorry story of the U–2 incident. The Senate Foreign Relations Committee has raised, in a constructive manner, the questions which must be raised, if we are to profit from that unfortunate experience. Nor do I wish to exaggerate the long-range importance of the U–2 incident or the Khrushchev attacks in Paris.

For the harsh facts of the matter are that the effort to eliminate world tensions and end the cold war through a summit meeting—necessary as such an effort was to demonstrate America's willingness to seek peaceful solutions—was doomed to failure long before the U–2 ever fell on Soviet soil. This effort was doomed to failure because we have failed for the past 8 years to build the positions of long-term strength essential to successful negotiation. It was doomed because we were unprepared with new policies or new programs for the settlement of outstanding substantive issues. It was doomed because the Soviet Union knew it had more to gain from the increasing deterioration of America's world position than from any concessions that might be made in Paris. Only Mr. Khrushchev's intransigence and violent temper saved the United States from an embarrassing exposure of our inability to make the summit meaningful.

Trunkloads of papers, I am told, were sent to Paris, but no new plans or positions were included. Our unwillingness to go to the summit had changed, but the steady decrease in our relative strength had not changed. Our allies and our own people had been misled into believing that there was some point to holding a summit conference, that we were prepared to say more than what changes in the status quo we would not accept, that by a miracle of personal charm and public relations the Russians could be cajoled into yielding some of their hard-won positions of strength, that we had some conception of alternative settlements that were both acceptable to us and possibly acceptable to the Soviets.

But the truth of the matter is that we were not prepared for any such negotiations and that there was no real success which the summit could have achieved, for words and discussions are not a substitute for strength—they are an instrument for the translation of strength into survival and peace.

We are, in short, in a sense, fortunate that the violent manner in which the Soviets carried out their determination to wreck the summit made it clear to the world that the blame for the collapse of the conference rests on Mr. Khrushchev. And we shall also be fortunate if the violence of the Paris encounters shocks American leaders and the American people into a renewed awareness of the perils we face, the sacrifices we must make, and the urgency of our need for leadership.

This is the real issue of American foreign policy today, not the ill-considered timing of the U–2 or the inconsistent statements of our Government. The real issue—and the real lesson of Paris—is the lack of long-range preparation, the lack of policy planning, the lack of a coherent and purposeful national strategy backed by strength.

This is an issue worthy of a great debate, a debate by the American people through the media of their political parties—and that debate must not be stifled or degraded by empty appeals to national unity, false cries of appeasement, or deceptive slogans about "standing up to Khrushchev." For the issue is not who can best "stand up to Khrushchev" or who can best swap threats and insults. The real issue is who can stand up and summon America's vast resources to the defense of freedom against the most dangerous enemy it has ever faced.

If the 1960 campaign should degenerate into a contest of who can talk toughest to Khrushchev, or which party is the "party of war" or the "party of appeasement," or which candidate can tell the American voters what they want to hear, rather than what they need to hear, or who is soft on communism, or who can be hardest on foreign aid, then, in my opinion, it makes very little difference who the winners are in July and in November, the American people and the whole free world will be the losers.

For the next President of the United States, whoever he may be, will find he has considerably more to do than "stand up to Khrushchev," balance the budget, and mouth popular slogans, if he is to restore our Nation's relative strength and leadership. For he will find himself with far-flung commitments without the strength to meet them or to back them up. He will inherit policies formed largely as reactions to Soviet action, their limits set by budgeteers without regard to world conditions or America's needs, their effectiveness often undercut by overlapping or competing agencies. He will inherit membership in alliances of uncertain stability and in international organizations of obsolete structure. He will inherit programs which have been frequently administered by shortsighted, unsympathetic men opposed to the very programs they are administering, awaiting their own return to private industry, and so lacking in compassion for our domestic needs as to be incapable of compassion for the desperate needs of the world's peoples. He will face a world of revolution and turmoil armed with policies which seek only to freeze the status quo and turn back the inevitable tides of change.

To be sure, we have, in 1960, most of the formal tools of foreign policy: We have a Defense Establishment, a foreign-aid program, a Western alliance, a Disarmament Committee, an information service, an intelligence operation, and a National Security Council. But, except for the brilliant legislative inquiry being conducted by the subcommittee of the Senator from Washington [Mr. JACKSON] we have failed to appraise and reevaluate these tools in the light of our changing world position. We have failed to adapt these tools to the formulation of a long-range, coordinated strategy to meet the determined Soviet program for world domination—a program which skillfully blends the weapons of military might, political subversion, economic penetration, and ideological conquest. We are forced to rely upon piecemeal programs, obsolete policies, and meaningless slogans. We have no fresh ideas with which to break the stalemate in Germany, the stalemate over arms control, the stalemate in Berlin, and all the rest. We have as our grand strategy only the arms race and the cold war.

Our conferees have consistently gone to the international bargaining table ill staffed, ill prepared, and ill advised. Coordinated efforts—with all agencies and all allies—have faltered without strong direction from the top; and strong direction from the top has often faltered because the President was not kept fully informed. The fact of the matter is that long-range problems in foreign affairs cannot be faced effectively by a party which is unwilling to face long-range problems at home. The destinies of a fast-changing world cannot be shaped effectively by a party traditionally opposed to change and progress. Coherent direction and purpose for the free world cannot be provided effectively by a party which does not provide them for our own people.

As a substitute for policy, President Eisenhower has tried smiling at the Russians; our State Department has tried frowning at them; and Mr. NIXON has tried both. None have succeeded. For we cannot conceal or overcome our lack of purpose and our failure of planning, by talking tough; nor can we compensate for our weaknesses by talking smoothly and by assuming that the righteousness of our principles will ensure their victory. For just as we know that might never makes right, we must also remember that right, unfortunately, never makes might.

Thus, neither our smiles nor our frowns have ever altered Mr. Khrushchev's course, however he may alter his expression. His real goals have remained unmoved, his interests unchanged, his determination unending. And so long as Mr. Khrushchev is convinced that the balance of world power is shifting his way, no amount of either smiles or toughness, neither Camp David

talks nor kitchen debates, can compel him to enter fruitful negotiations.

So let us abandon the useless discussion of who can best "stand up to Khrushchev," or whether a hard or soft line is preferable. Our task is to rebuild our strength and the strength of the free world—to prove to the Soviets that time and the course of history are not on their side, that the balance of world power is not shifting their way—and that, therefore, peaceful settlement is essential to mutual survival. Our task is to devise a national strategy—based not on the 11th-hour responses to Soviet created crises—but a comprehensive set of carefully prepared, long-term policies designed to increase the strength of the non-Communist world. Until this task is accomplished, there is no point in returning to the summit—for no President of the United States must ever again be put in the position of traveling across the seas, armed only with vague, speculative hopes, in order to provide an occasion for public humiliation. And unless this task is accomplished as we move into the most critical period since the founding of our Nation, our national security and our survival itself will be in peril.

The hour is late, but the agenda is long.

First. We must make invulnerable a nuclear retaliatory power second to none—by making possible now a stopgap air alert and base-dispersal program—and by stepping up our development and production of the ultimate missiles that can close the gap and will not be wiped out in a surprise attack—Polaris, Minuteman, and long-range air-to-ground missiles—meanwhile increasing our production of Atlas missiles, hardening our bases, and improving our continental defense and warning systems. As a power which will never strike first, we require a retaliatory capacity based on hidden, moving, or invulnerable weapons in such force as to deter any aggressor from threatening an attack which he knows could not destroy enough of our force to prevent his own destruction. And we must also critically reexamine the farflung oversea base structure on which much of our present retaliatory strength is based. We must contribute to the political and economic stability of the nations in which our vital bases are located—and develop alternative plans for positions which may become untenable.

Second. We must regain the ability to intervene effectively and swiftly in any limited war anywhere in the world, augmenting, modernizing, and providing increased mobility and versatility for the conventional forces and weapons of our Army and Marine Corps. So long as those forces lack the necessary airlift and sealift capacity and versatility of firepower, we cannot protect our commitments around the globe—resist nonnuclear aggressions or be certain of having enough time to decide on the use of our nuclear power.

Third. We must rebuild NATO into a viable and consolidated military force capable of deterring any kind of attack, unified in weaponry and responsibility. Aiming beyond a narrow military alliance united only by mutual fears, a return to mutual consultation and respect—and a determined American effort to create a free world economy—can help overcome schismatic economic rivalries between the Continent and Britain, and the Common Market and the Outer Seven, as well as other Western differences in military and political policy. We need a common effort to protect vital international reserves, to adopt more consistent tariff policies on both sides of the Atlantic, and—perhaps most important—to merge Western contributions to the underdeveloped areas.

Fourth. We must, in collaboration with Western Europe and Japan, greatly increase the flow of capital to the underdeveloped areas of Asia, Africa, the Middle East, and Latin America—frustrating the Communist hopes for chaos in those nations—enabling emerging nations to achieve economic as well as political independence and closing the dangerous gap that is now widening between our living standards and theirs. Above all, it is vital that we aid India to make a success of her new 5-year program—a success that will enable her to compete with Red China for economic leadership of all Asia. And we must undertake this effort in a spirit of generosity motivated by a desire to help our fellow citizens of the world, not as narrow bankers or self-seeking politicians. Our present foreign aid programs have neglected the great, visionary, partnership principles of the Marshall plan and point 4—they have been subordinated to narrow, expedient, and temporary ends. Money has been poured into military assistance programs, and in many cases has been wasted, at the expense of vitally necessary economic development. The next President will have to devise an entirely revamped foreign aid program which will make the long-term commitments essential to successful planning—a program whose administration will not be hampered by waste and mismanagement or by unsympathetic and unqualified administrators. And part of this program must be a new and expanded effort to use our food surpluses to feed the world's hungry, storing these surpluses in "food banks" abroad.

Fifth. We must reconstruct our relations with the Latin American democracies, bringing them into full Western partnership; working through a strengthened Organization of American States, increasing the flow of technical assistance, development capital, private investment, exchange students, and agricultural surpluses, perhaps through the large-scale "operation Pan-America," which has been proposed by the President of Brazil, and pursuing practical agreements for stabilizing commodity prices, trade routes, and currency convertibility. A return to the good neighbor policy is not enough. Dollar diplomacy is not enough. A patronizing attitude, taking for granted their dedication to an anti-Communist crusade, is not enough. We will need a whole new set of attitudes and emphasis to make the nations of Latin America full partners in the rapid development of the Western Hemisphere.

Sixth. We must formulate, with both imagination and restraint, a new approach to the Middle East—not pressing our case so hard that the Arabs feel their neutrality and nationalism are threatened, but accepting those forces and seeking to help channel them along constructive lines, while at the same time trying to hasten the inevitable Arab acceptance of the permanence of Israel. We must give our support to programs to help people instead of regimes—to work in terms of their problems, as well as ours, and seek permanent settlement among Arabs and Israelis based not on an armed truce but on mutual self-interest. Guns and anti-Communist pacts and propaganda and the traditional piecemeal approach to the Middle East are not enough—refugee resettlement and a regional resources development fund in full partnership with the Middle Eastern nations, are all parts of a long-range strategy which is both practical and in the best interests of all concerned.

Seventh. We must greatly increase our efforts to encourage the newly emerging nations of the vast continent of Africa.

And, as chairman of the Subcommittee on African Affairs of the Committee on Foreign Relations, let me remind the Senate that in a few years, the countries of Africa will control one-quarter of all the votes in the General Assembly of the United Nations. We must greatly increase our efforts to persuade them that they do not have to turn to Moscow for the guidance and friendship they so desperately need—to help them achieve the economic progress on which the welfare of their people and their ability to resist Communist subversion depends. We can no longer afford policies which refuse to accept the inevitable triumph of nationalism in Africa, the inevitable end of colonialism, and, fortunately, colonialism will end, not only in Africa, but, in the long run resistance to colonialism and the rise of nationalism will be the basic influence which will undermine the great Communist colonial empire. Nor can we afford policies which refuse to accept the unyielding determination of the new African states to lift their people from their age-old poverty and hunger and ignorance. The case history of the newly formed country of Guinea is a warning of what can happen to other countries of Africa if the United States remains indifferent to their pressing needs. We must answer the critical African need for educated men to build the factories, run the schools, and staff the governments, by sending a growing stream of technical experts and educators to Africa—and by bringing far greater numbers of African students—future African leaders—to our own universities for training.

Agricultural experts must be sent into areas where the land is unproductive and where modern methods of agriculture are unknown in order to raise subsistence levels of farming and insure adequate supplies of food—and while this is being done we must use our own food surpluses to prevent hunger. We must establish a multination economic development loan fund—a full working partnership between the nations of the

West and the nations of Africa—to provide the capital necessary to start African economic growth on its way.

And finally, if our policies toward Africa are to be effective, we must extend this aid in terms of America's desire to bring freedom and prosperity to Africa—not in terms of a narrow self-interest which seeks only to use African nations as pawns in the cold war.

Eighth. We must plan a long-range solution to the problems of Berlin. We must show no uncertainty over our determination to defend Berlin and meet our commitments—but we must realize that a solution to the problems of that beleagured city is only possible, in the long run, in the context of a solution of the problems of Germany and, indeed, the problems of all Europe. We must look forward to a free Berlin, in a united Germany in a Europe where tensions and armaments have been reduced—where perhaps the suggestions of General de Gaulle and Premier Adenauer requiring Soviet withdrawal behind the Urals can be accepted. Such a solution is far from a reality today—but both our good faith and our will to resist are dependent on our willingness to face the total problem of tension and conflict in this section of Europe. We must remain precise in our determination to meet our commitments until a change in Soviet policy permits a constructive solution. In the meantime, we should explore how the moral authority of the U.N. could be used to strengthen the security presently provided to the people of West Berlin.

Ninth. We must prepare and hold in readiness more flexible and realistic tools for use in Eastern Europe.

Such tools are contained in the legislation sponsored by the Senator from Vermont and myself which the Senate passed last summer, and which would provide the President with discretion to give economic aid to disaffected Iron Curtain countries. The policy of liberation, proudly proclaimed 8 years ago, has proved to be a snare and a delusion. The tragic uprising in East Germany, in Poland, and in Hungary demonstrated clearly that we had neither the intention or the capacity to liberate Eastern Europe and the false hopes raised by our promises were cruelly crushed. We must now begin to work slowly and carefully toward programs designed to encourage discontented Iron Curtain countries to permit the spread of what Thomas Jefferson called the disease of liberty—to nourish the seeds of liberty in any cracks appearing in the Iron Curtain by reducing economic and ideological dependence on Russia.

There are already opportunities in Poland for greater American initiative, aid, trade, tourism, information services, student and teacher exchanges, and the use of our capital and technology to advance the standard of living of the Polish people. Closer relationships can in time be offered in other so-called captive nations as well—showing a creative interest, not a closed mind, by the nation that represents their one great hope for freedom.

Why should we permit the Soviet Union to work, night and day, to subvert the determination of the people of Africa to remain free, while at the same time our policies make it impossible for us to carry out any effective relationships with the countries of Eastern Europe—the most vulnerable part of the Soviet Empire? To give Soviet Russia a free hand in her vulnerable areas, while Russia is permitted to move unhampered in Africa, Asia, and South America, both is shortsighted and unwise.

Tenth. We must reassess a China policy which has failed dismally to move toward its principal objective of weakening Communist rule in the mainland—a policy which has failed to prevent a steady growth in Communist strength—and a policy which offers no real solution to the problems of a militant China. We need to formulate proposals for a reduction of tension in the Formosa Straits—at the same time making clear our determination to defend that island and to meet our treaty commitment. We must act through an Asian regional development organization to stabilize the nations of non-Communist Asia both politically and economically, so as to strengthen their resistance to Communist pressures. And, although we should not now recognize Red China or agree to its admission to the United Nations without a genuine change in her belligerent attitude toward her Asian neighbors and the world—and regrettably there is evidence that her belligerence is rising rather than receding—we must nevertheless work to improve at least our communications with mainland China. Perhaps a way could be found to bring the Chinese into the nuclear test ban talks at Geneva, for if we reached an agreement which did not bind Red China, then atomic tests could be continued on the mainland of China without inspection—and Red Chinese possession of atomic weapons could drastically alter the balance of power. If that contact proves fruitful, further cultural and economic contact could be tried. For only in this way can we inform ourselves of Communist activities, attempt to restore our historic friendship with the Chinese people, and—perhaps most important—make sure that we are not plunged into war by a Chinese miscalculation of our determination to defend all of free Asia. Today we have no affirmative policies—only an attitude of negative resistance in the face of a growing danger of hostile action resulting from mutual miscalculation. This cannot last in a world where the Red Chinese are increasingly important, increasingly menacing, and increasingly impossible to omit from effective international agreements on subjects such as arms control.

Eleventh. We must begin to develop new, workable programs for peace and the control of arms. We have been unwilling to plan for disarmament.

We have had less than 100 people working in the entire administration on the subject of disarmament, and we have always left the initiative in the hands of the Russians. An Arms Control Research Institute—or a Peace Institute, as suggested by the Senator from Minnesota [Mr. HUMPHREY] could undertake the technical studies needed before we can detect and monitor the vast and complex weapons systems of modern warfare. The entire world hopes that the collapse at the summit has not destroyed man's hope for a nuclear test ban. But if such a ban is achieved, it must only be the first step toward halting the spiraling arms race which burdens the entire world with a fantastic financial drain, excessive military establishments, and the chance of an accidental or irrational triggering of a worldwide holocaust. At the same time, we must move toward the eventual rule of international law by working to strengthen the United Nations and to increase its role in resolving international conflicts and planning for international scientific and economic development.

Twelfth, and finally, we must work to build the stronger America on which our ultimate ability to defend ourselves and the free world depends. We must increase our own scientific effort—not only by strengthening and revamping existing research programs in all fields, including the exploration of space—but by building an educational system which can produce the talent and skill on which our future strength and progress depends. We must work to create an America with an expanding economy, where growth is not dissipated in inflation, and consumer luxuries are not confused with national strength—an economy capable of supporting our massive needs and our new programs. And we must also work to create an America of equal opportunity and economic justice for all men of all ages, races, and creeds—an America which will be, as this country was intended by the Founding Fathers to be, a living example of freedom to the world.

This is a large agenda—a challenging agenda—and yet I do not pretend that it is, in any sense, complete. For if there is one certain thing in a world of change, it is that the coming years will bring new problems, undreamed-of challenges, unanticipated opportunities.

The next President will confront a task of unparalleled dimensions. But this task will not be his alone. For just as he must offer leadership and demand sacrifices, the American people must be willing to respond to these demands.

I realize also that the length of this agenda is in sharp contrast with the rosy reassurances of the administration. "America is today," the Vice President told his national committee Saturday, summarizing our position in the world, "the strongest country militarily, the strongest country economically, with the best educational system and the finest scientists in the world, over all." To feed that kind of diet to the American people during the coming months—to confine our national posture to one of talking louder and louder while carrying a smaller and smaller stick—is to trade the long-range needs of the Nation and the free world for the short-term appearance of security.

For all America—its President, and its people—the coming years will be a time of decision. We must decide whether we have reached our limit—whether our greatness is past—whether we can go no further—or whether, in the words of

Thomas Wolfe, "the true discovery of America is before us—the true fulfillment of our mighty and immortal land is yet to come."

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield to the Senator from Montana.

Mr. MANSFIELD. Mr. President, I wish to commend the distinguished Senator from Massachusetts for the maturity and courage he has shown in his speech today, a maturity and courage which he has also consistently shown in the field of domestic policy as well.

I think the Senator is to be commended also for the realism and the honesty with which he has addressed the Senate on this occasion, pointing out the fact that for years to come, if not for decades, we face a period of extreme tension.

I am glad also that the Senator brought to light once again the use of terms in this country of ours—such terms as "the party of war," "the party of appeasement," and so forth and so on. I will say that neither party is the party of war, and neither party is the party of appeasement.

The Senator has also pointed out that the inheritance of the next President, to use the Senator's words in that respect, is going to be a difficult one indeed, and that the sooner we as a Nation and as a people face up to the difficulties the better off we are going to be. It will take sacrifices. It may require more in the way of taxes. It may result in fewer radios, TV sets, and automobiles. However, I think we ought to face up to the realities of what the world really is, and not look back to the kind of world we wish it were.

I will say also that, wide ranging as was the Senator's speech, it left much ground, as the Senator recognized, still uncovered.

I compliment and commend the Senator from Massachusetts for taking the floor this afternoon, and I also wish to compliment the Senate for giving him its sober attention on this occasion.

Mr. KENNEDY. I thank the Senator from Montana. As the Senator suggests, the dialogue in the coming debate, if it is going to serve a useful national purpose, should be concerned with how we can develop sufficient national strength to meet our goals and to protect our security. It should not be confined to heaping invective upon either party.

As the Senator has said, neither party is the party of war or appeasement. No Member on this side of the aisle, when the President invited Mr. Khrushchev to meet with him at Camp David or when he agreed to attend a summit meeting, made charges that the Republican administration or the President was soft on communism or that the Republican Party was the party of appeasement. We applauded the President's effort to work out a solution to the very difficult problems which mark the relationship between the Soviet Union and the United States.

It seems to me that the debate of this campaign should relate to how we can strengthen our country. We should not attempt to mislead the American people by suggesting that any party or any group of Americans is less determined to protect our security and to meet our commitments than any other party or group.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield to the Senator from Minnesota.

Mr. HUMPHREY. I wish to say to the Senator from Massachusetts that the address he has delivered represents the kind of comprehensive, integrated thinking on foreign policy and national security policy which is required for a nation with our responsibilities.

I have heard the Senator from Massachusetts address himself to these topics individually and sometimes in groupings on many occasions, and the points which were outlined by him, without necessary detail, but in their broad scope, represent the kind of totality of thinking that is necessary for the formulation of overall national strength. I compliment the Senator.

I believe, as the Senator from Montana has said, that the greatest compliment the Senator from Massachusetts has had today is the attention of Senators on both sides of the aisle and the fact that the galleries are filled with people who are interested not only in the Senator from Massachusetts, but in his message.

I believe the Senator will agree with me that the one subject which commands the attention of the American people, regardless of political party, regardless of geographical location, and regardless of cultural or ethnic background, is the subject of our national security, the subject of our national policy, and the Senator from Massachusetts [Mr. KENNEDY] in characteristic fashion—and I say that because of the speeches he has made on such controversial subjects as Algeria, for example—has again pointed out some of the leads we need to follow. We need a reexamination of our China policy, for example.

There is also the question of Berlin and its relationship to central Europe. His speech outlined long-range American policy. It was a good speech, a thoughtful one, and it is surely one which I can embrace and find very reassuring, and, at this moment of our history, very helpful.

Mr. KENNEDY. I thank the Senator from Minnesota very much for his generous statement, which is the kind of statement he always makes.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. LONG of Louisiana. The Senator has spoken of the flow of American investments to underdeveloped countries. I believe the Senator knows that the administration made proposals to encourage the flow of capital into such areas as early as 1953, but failed to fight for them. At the present time, there is before the Senate Finance Committee a bill passed by the House, the so-called Boggs bill, which would seek to take a stride in that direction. Support of that measure, however, has been so ineffectual, and there has been such lack of faith in the measure, that it appears the bill will hardly move at all.

Mr. KENNEDY. I do not believe that we should make direct foreign investments in the extracting industries, such as oil and minerals. Second, we should not encourage American capital investment abroad merely as a device to avoid labor costs at home.

This kind of investment is not productive of the kind of development which is needed. And private investment is needed because, regardless of the size of the Development Loan Fund, it could not provide enough capital to the underdeveloped portions of the world to meet all their needs.

Mr. GORE. Mr. President, I congratulate the Senator upon his thoughtful address. In the concluding paragraph of his speech the Senator said that we must decide whether we have reached our limit and whether our greatness is past. The able Senator has addressed most of his remarks to international relations. Unquestionably those dangers are acute. Unquestionably those problems are pressing. But if the question is to be answered as to whether our greatness is past, and if it is measured in comparative terms, does not the Senator think equal emphasis must be placed upon education, the rate of economic growth, and the fruition of freedom in the United States?

Mr. KENNEDY. Definitely. As I said, in my address:

> We must work to build the stronger America on which our ultimate ability to defend the free world depends.

Obviously, unless our economy achieves a greater rate of growth—so we can afford to do the things which need to be done to build our strength abroad and meet our needs at home—then quite obviously we are going to fall behind in the 1960's.

I believe that last year our economic growth was lower than the rate of growth of any other major industrialized society in the world. I believe that is one of the facts which greatly influences the countries to the south of us, and the countries of Africa and Asia, which are attempting to determine whether a free society is an effective way of mobilizing their resources, and developing their economy.

The reason for Franklin Roosevelt's great success in foreign policy, was the domestic policy which he carried out—a policy which gave the impression of a vital society in the United States and which served as a magnet to the people around the world who were attempting to decide what road they should travel. If we are not vital at home, we give the impression that the future belongs to the Communist world rather than to the free world.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. KENNEDY. I yield.

Mr. GORE. Freedom itself is one of the most revolutionary political concepts that has come to mankind. I agree with the Senator from Massachusetts that if its vitality and fruition can be demonstrated, its appeal will be made stronger.

I wish to ask the Senator from Massachusetts a question relating to the question and the remarks of the able junior Senator from Louisiana [Mr. LONG]. Does not the Senator from Massachusetts think that the next administration, whatever its identity, will early in its term of office face the vital and pressing necessity of a reassessment of foreign economic policy—including tax incentives which may or may not serve the foreign policy objectives or economic interests of the United States, international trade, foreign aid, military policy, and, indeed, the whole complex of economic relationships between the United States and the nations of the world, including the balance of payments?

Mr. KENNEDY. The Senator is correct. Economic policies everywhere are interrelated. For example, there is strong evidence that the major effect of the Common Market in Western Europe is going to be felt not in the United States but in Latin America. There may be an increasing shift in western European purchases from Latin America to Africa because of the Common Market policies aspect of Europe. Such a shift will greatly increase the problems facing the United States in maintaining vital economies in Latin America.

The Senator is correct in saying that the problems he mentioned will be at the top of the agenda of the next President. They concern many matters of domestic policy in which the Senator from Tennessee has been particularly interested—the problem of balance of payments, the whole question of interest rates, and all the rest.

Mr. GRUENING. I should like to express my enthusiasm for the masterful and comprehensive presentation of this tremendous subject by the able Senator from Massachusetts, and its proper placing in focus of the failures and errors that have characterized our foreign policy in recent years. I note particularly with approval his statement that the next President will have to devise an entirely new approach to the foreign aid program.

I believe that much opposition to foreign aid stems from the poor way it has been administered and the lack of true consultation and cooperation with the Congress. It has been too much of an executive proposition, without collaboration with the legislative branch of Government that really has the constitutional authority to provide the funds for that purpose. Traditionally, in foreign affairs, the Senate merely advises and consents, and that has been a more or less perfunctory performance, of giving approval to treaties and approval to foreign service and State Department appointments. However we have in recent years witnessed an entirely new instrument of foreign policy, the using of tremendous sums of money. That never occurred before the initiation of the foreign aid program.

There is the place where I believe Congress has fallen short of its duty and to which the next President as well as the Congress will have to give their fullest consideration. I share the views which the distinguished Senator from Massachusetts has expressed in his colloquy with the Senator from Tennessee [Mr. GORE], that the great success of President Franklin Delano Roosevelt's foreign policy was that he set an example with his domestic policy. He did not insist that the one was sacrosanct and that the other for our own resource development was wasteful and unnecessary.

I believe that the 12th and last proposal of the Senator from Massachusetts, that we must build a stronger America and must develop our own natural resources, points to one of the great failures of the Eisenhower-Nixon administration. It is naturally difficult to convince the American people that Federal aid to education, that legislation to remove the pollution of our rivers, for adequate housing, and our natural resource conservation and development programs, are inflationary, extravagant, wasteful, and unnecessary and will unbalance the budget, as the administration contends, whereas identical projects in foreign countries it proclaims are absolutely essential. That is applying a double standard. The same standard should at the very least be applied to both the foreign aid program and the domestic programs for our own people.

This is why I congratulate the distinguished Senator from Massachusetts on his excellent presentation, which I believe sets a new high standard for the debate that is bound to come in the coming months.

Mr. KENNEDY. I thank the Senator.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. CHURCH. I, too, wish to join my colleagues in the Senate in commending the Senator from Massachusetts for the excellent address he has made on the floor of the Senate this afternoon. The Senator has very well documented the proposition that American power has been suffering a serious decline. That is not a partisan proposition. An eminent Republican, the Governor of New York, Mr. Rockefeller, said as much only a few days ago.

I wonder if the Senator would not agree with me that in addition to the question of American power there is also at stake the question of American prestige in the world. We live in a time when the world is not only in upheaval, but is increasingly polarized about two gigantic adversaries, the United States and the Soviet Union. If it is true that the Soviet Union is communism on exhibit, is it not also true that the United States is necessarily the showcase of democracy?

This is an age of science, where men tend to equate national excellence with scientific achievement.

It is ironic that the United States, which has been unquestionably the most highly industrialized and technologically advanced country in history, could ever lose out in a competition that was based upon technological achievement. Yet does it not have to be admitted that in the past 8 years this is precisely what has happened to us? Somehow we have lost and have never recaptured the Russian lead in the conquest of space. The Russians were the first to launch a satellite. They were the first to strike and photograph the backside of the moon. They were the first to orbit the sun.

I believe that we underestimate the impact of these triumphs at our own peril. Public opinion pollsters in our own newspapers, having taken the necessary surveys abroad, state that the average man on the streets of Paris, Cairo, Bombay, or Tokyo is of the opinion today that the Soviet Union has become the leading scientific country of the world. In the primitive and underdeveloped countries of Africa and Asia, where men's hopes for a better life depend solely upon the promise of modern science, what could constitute a more grievous blow to American prestige? Therefore, I should like to ask the Senator, in view of this, how can the American people possibly conclude that those who have been most closely associated, during the past 8 years, with what has become a growing debacle, could be best fitted to direct American affairs in the coming 4 years?

Mr. KENNEDY. I will let the Senator from Idaho answer that question.

Mr. CHURCH. My answer is the same as that of the Senator from Massachusetts. The American people will not accept that argument, and that is the reason why I believe they are going to elect a Democrat at the next presidential election.

Mr. KENNEDY. I may say to the Senator that the points he makes are excellent indeed. The Senator will recall that Mr. Khrushchev's description of the United States, which he gave at his meeting with members of the Committee on Foreign Relations—and which he repeated later on his visit to China—was that the United States was a sick, dying, faltering horse, and was about to collapse.

Therefore, I would say that what we do in the United States—the national vitality which we demonstrate—is really the best answer to Russian insults and propaganda.

In concluding my remarks, I would say that, as the Senator from Montana [Mr. MANSFIELD] has said, there are many other areas of our foreign policy which could profitably be discussed in the coming months. There are other subjects which might hold our attention. The Senator from Alaska [Mr. GRUENING] is about to speak on the Middle East and suggest policy changes there. It is my hope that we may devote our energies to these vital questions, so that whoever is successful in the election in November will be equipped as President, to invoke a new policy for the preservation of freedom and maintenance of peace. And I hope that neither party will engage in invective and personal abuse of one kind or another, which will not advance either the political interests of a party, or the interests of the American people.

The suggestions which I have made may be wrong, and I would be delighted to hear alternate suggestions put forward by Members from the other side of the aisle. But I would be reluctant and most dismayed if their responses were—

as they have been on recent occasions—in the form of charges that one Member or another is not as interested as they are defending American commitments and strengthening the security of the United States. This debate should be on the basis of how we can advance the security of our country, make our country stronger, and bring peace to the world. We will not solve that problem by questioning the loyalty of any Member of the Senate.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield for a question.

Mr. CAPEHART. Yes. Is it not a fact that practically all the problems that have been confronting this administration for the last 8 years, such as the Berlin situation, the East German situation, the cold war, and all the problems that the able Senator from Massachusetts has discussed in his speech were inherited by the present administration, which has been endeavoring to solve the problems which existed 8 years ago?

Mr. KENNEDY. Yes, I agree that the problem of Berlin was inherited. I would also agree that nothing has been changed, except a diminishing of the ability to bring about any difference in the status of Berlin and to insure greater security to the people.

My basic criticism of the administration's policy is that the real power and strength of the United States, militarily, scientifically, and in terms of economic production, has declined in relation to the Sino-Soviet bloc. Therefore, our ability to enforce agreements and to meet our commitments has been impaired during the past 8 years.

Mr. CAPEHART. Mr. President, I do not find, anywhere in the able Senator's speech, where he said he would correct that. Was he not merely calling the attention of the American people and the Senate to that which they already knew?

Mr. KENNEDY. The Senator from Indiana and I have been around and around in this situation. I recall when the Senator from Indiana requested that the Senate galleries be cleared when I suggested that the United States might move into a period of a missile gap from 1961 to 1963. The Senator from Indiana said that I revealed information beneficial to the Soviets. As a matter of fact, what I said was information which had already been revealed in General Gavin's book, which had been published a week or two before, and which had appeared in Life magazine.

I know that it struck the Senator from Indiana with the force of a thunderbolt; but the information had been public information for many months and had been the subject of many investigations.

I may say to the Senator from Indiana that the dialog in the coming debate should be a discussion between the two parties as to how we can strengthen the United States. I have suggested certain policies designed to strengthen the nation. That was the purpose of the speech. If the Senator from Indiana will read the speech with care, I am confident that he will see that some situations have changed in the past 8 years.

Mr. CAPEHART. I am one who for many years has felt that we pay entirely too much attention to Russia. We put information into Russia's hands with which she propagandizes us and hits us over the head. That is why I have objected to the speeches to which the Senator referred a moment ago. I have objected also to things which the administration has done in that respect.

I do not find anything in the Senator's speech which is particularly new. I do not particularly find anything which he said that was not a problem 8 years ago, following the recognition of Russia in 1933, the conferences which were held at Tehran and Yalta, and the concept of an administration which created the situation in which Berlin now is. Part of the control of Berlin was given to the Communists, and the entire city of Berlin was surrounded by East Germany, which is controlled by the Communists.

Those are things which were accomplished by former administrations. The present administration has tried to do something about them for 8 years. Frankly, I will admit that the efforts of this administration have not been very successful.

Mr. KENNEDY. That is correct.

Mr. CAPEHART. I do not know of anyone at the moment who has any idea how to handle them.

I cannot quite compliment the Senator from Massachusetts, as some Senators did, upon his speech. I think he covered the entire waterfront. I think he promised something to everybody in the world. He covered the entire field.

I do not know where we would get enough money to do the things he talks about. I do not know how we could do them. Frankly, I believe that kind of speech leaves false hopes in the minds of the world. I think that is what has got us into trouble today. We have made so many, many promises and speeches of this kind that the people of the world have listened to and read about that now they are disappointed because we do not have the resources and the ability to follow through and keep the many promises which have been made. Therein lies one of our great weaknesses.

In my opinion, we ought to quit promising a world with a fence around it to the people of the globe. I do not believe we have the resources to do that. We do not have the money or the resources.

If I understood the Senator's speech correctly, he was promising everything to Latin America, to Africa, to India, and to nations all over the world. He was going to solve the problems of those people. I think that leaves false hopes. It does more harm than good.

Mr. KENNEDY. I understand. In fact, I am complimented by the fact that the Senator from Indiana has not complimented my speech. [Laughter.]

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. LONG of Louisiana. I congratulate the Senator from Massachusetts upon what I believe to be a forthright declaration. The Senator has taken a position on a great number of issues and has made direct recommendations concerning what he proposes to do about them.

I hope the Senator's program would not involve an increase in budgetary spending, so far as the balancing of income and payments is concerned, because there are certain areas in which a great amount of effectiveness can be achieved without additional spending.

One item of that kind relates to the fantastic amount of duplication and triplication and interservice rivalry which exists among the Army, Navy, and Air Force. Also, even now, in the Space Agency, certainly fantastic amounts could be saved if we could ever achieve what has been declared to be the purpose of the Government for a great many years, namely, the true unification of all the services which relate to defense.

Mr. KENNEDY. The Senator from Louisiana is quite correct. So far as additional expenditures are concerned, I think a greater effort should be made in the missile field. The Senator from Arkansas, the Senator from Minnesota, and I, 2 years ago sponsored an amendment which we hoped would strengthen the Development Loan Fund, which we hoped would become the major agency of the Government for the administration of foreign aid on a loan basis.

A third point was that I hoped the Western European countries themselves would play the role which we have a right to expect them to play in assisting the underdeveloped countries with the solution of their urgent economic problems. These countries have not yet met this responsibility.

The Senator from Indiana said that I promised the world everything. If the Senator from Indiana will reread my speech with the attention that we have come to expect from him, he would see that that is not my intention. My promise, in a sense, is a promise to the entire free world, and the burdens of maintaining our freedom are mutual.

Mr. LONG of Louisiana. As an example of things that can be done, we have three ranges for firing missiles. The expense of maintaining them is tremendous. The ranges have to be many thousands of miles in length. In matters of that kind, we are trying to eliminate overlapping functions, particularly in the Defense Establishment, where the Army wants one, the Navy wants one, and so does the Air Force. In matters of that kind, tremendous savings could be achieved.

Mr. KENNEDY. I thank the Senator from Louisiana for his contribution to the discussion.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. PROXMIRE. I have heard many speeches on the floor of the Senate, but this is one of the most constructive, positive, specific speeches I have heard. There was a series of 12 recommendations. In some cases they were fresh proposals. In all cases, they were carefully documented.

Contrary to the position expressed by the distinguished senior Senator from

Indiana [Mr. CAPEHART], I should say that the speech by the Senator from Massachusetts was unusually constructive. Not only did it call upon the American people for sacrifice, and point out that we cannot be providing the kind of America that the world must have, if we are to achieve peace, unless we are strong; but it seems to me that the speech delineated very precisely our goal when it emphasized, in point 11, that we must work and work much harder toward peace. The speech did not simply say that in general terms; it was precise.

The Senator from Massachusetts pointed out that we have less than 100 people now working on what is one of the most important and most troublesome problems in the world, the achievement of peace in a nuclear world. He proposed an arms control research institute. He pointed out that unless a test ban is achieved a holocaust of nuclear destruction is a terrible prospect for the world.

It seems to me that this is one of the most constructive and useful speeches I have heard in a long time. I am sure it will be widely read. I enthusiastically congratulate the Senator from Massachusetts upon having delivered it.

Mr. KENNEDY. I thank the Senator from Wisconsin.

Mr. GRUENING. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. GRUENING. I was wondering whether the distinguished Senator from Indiana [Mr. CAPEHART] in referring to promises, was not referring to the promises to liberate the enslaved satellites, to unleash Chiang Kai-shek, and to use massive retaliation. Those were pretty reckless promises. They were never fulfilled; but, as I recall, they were made by the Senator's own administration. If I am incorrect, I hope the Senator from Indiana will correct me.

Mr. KENNEDY. The journeys which the President has taken in the last year of his administration to India, Pakistan, Latin America, Africa, and Western Europe are trips which have raised the hopes of the people involved that American action will be more convincing. I wish those trips had been taken by the President earlier in his administration, so that they could be followed with action. Instead, only hopes have been raised. The same hopes which have been raised, fortunately, for more than 150 years. The United States has always represented the center of hope for the people of the world.

I do not share the view of the Senator from Indiana that by raising hopes we shall disillusion the people of the free world. We stimulate hope that they, too, can both be free and maintain a vital economy. Our function in the 1960's is to try, by cooperative effort, to make those hopes come true.

Mr. GORE. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. GORE. Unless the hopes of the uncommitted one-third of the world's humanity can be vested in the United States, what hope is there for maintaining American leadership?

Mr. KENNEDY. Exactly. I think the Senator is quite correct. I regard the statement by the Senator from Indiana as pointing out a very important point—perhaps by inadvertence—namely, that we do represent the hope of these people. Some people may say it is unfortunate that they have hope in us; others may say that is a source of strength for us. I hold the latter view. However, we often observe modern Americans are rarely quoted by the people of the emerging and developing nations; but they quote Jefferson, Woodrow Wilson, and Franklin Roosevelt. I hope in the future we shall once again provide the leadership and vision which will offer hope to the world.

Mr. GORE. Mr. President, will the Senator from Massachusetts yield further?

The PRESIDING OFFICER (Mr. MANSFIELD in the chair). Does the Senator from Massachusetts yield again to the Senator from Tennessee?

Mr. KENNEDY. I yield.

Mr. GORE. The able senior Senator from Indiana stated that the problems which the able junior Senator from Massachusetts has discussed today faced the country 8 years ago. Undoubtedly the threat of communism existed 8 years ago, and undoubtedly it exists today. But there is a difference between the approach which the junior Senator from Massachusetts has suggested and the record of the administration for the past 8 years.

There are some other differences. Eight years ago we had not embarked upon haphazard and dangerous personalized summitry; the world had not witnessed the worst diplomatic debacle which human experience affords; the credibility of the United States of America had not been held up to scorn by a whole series of official falsehoods; we had not fallen behind in the exploration of space, to which the junior Senator from Idaho has referred; the Soviet Union had not outstripped the United States for a period of years in economic growth; not to mention a number of other differences.

The Senator has stated that the next President will inherit problems of gigantic importance, some of which unfortunately have been the result of unplanned and unwise policies; other have resulted from lack of coordination and lack of realistic administration.

Mr. KENNEDY. The Senator from Tennessee is correct.

Mr. President, I yield the floor.

AUTHORIZATION FOR FOREIGN RELATIONS COMMITTEE TO FILE REPORT ON EXECUTIVE E, THE TREATY WITH JAPAN

Mr. MANSFIELD. Mr. President, I ask unanimous consent that notwithstanding the adjournment of the Senate following the session today, the Committee on Foreign Relations be given leave to file its report on Executive E, the treaty with Japan.

The PRESIDING OFFICER (Mr. PROXMIRE in the chair). Without objection, it is so ordered.

Subsequently, Mr. FULBRIGHT, from the Committee on Foreign Relations, submitted the following favorable report:

Executive E, 86th Congress, 2d session. A Treaty of Mutual Cooperation and Security between the United States of America and Japan, signed at Washington on January 19, 1960 (Ex. Rept. No. 8).

PARTICIPATION IN INTERNATIONAL CONVENTION OF CITIZENS FROM NORTH ATLANTIC TREATY NATIONS

The Senate resumed the consideration of the joint resolution (S.J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such conventions, and for other purposes.

Mr. CHURCH. Mr. President, it is my understanding that Senate Joint Resolution 170 is now the pending business.

The PRESIDING OFFICER. That is correct.

Mr. CHURCH. I ask unanimous consent that Mr. Ray Wolfinger, who has been associated with my office, and has worked closely in connection with the pending measure, may be permitted the privilege of the floor during this debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE ADMINISTRATION'S MIDDLE EAST POLICY: WORDS THAT ARE NULLIFIED BY ACTIONS

Mr. GRUENING. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I am very happy to yield to my good friend, the junior Senator from Alaska.

Mr. GRUENING. I thank the future Democratic keynoter, the distinguished junior Senator from Idaho.

Mr. President, one of the crucial areas of tension and turbulence which threaten the peace of the world lies in the Middle East. It arises wholly from the determination of the Arab countries to destroy Israel.

The fact is that little Israel is the one true democracy in the Middle East.

The fact is that it is a free country and its people are free people.

The fact is that it is an oasis of civilization in a desert of backwardness.

The fact is that it has established itself as such by qualities and actions that should have earned not only the admiration and respect of the free world, but also its active support, and especially that of the United States, whose basic professions and principles Israel embodies more than does any country outside of North America and Europe, for the enlightened philosophy and attitudes of Israel coincide with those of our own "land of the free and the home of the brave." And the Israelis, likewise, are not only free, but also brave. They have so demonstrated this by resisting successfully to date, with tremendous efforts, all-out sacrifices, and constant

vigilance, the lethal menace of hostile forces 20 times more numerous and occupying an area 50 times as large.

The Israelis further demonstrated their bravery and, indeed, their prowess in their brief, masterful, and victorious reprisal for Nasser's aggression and seizure of the Suez Canal—a triumph of arms unfortunately nullified by the action of the Eisenhower administration before the United Nations, which converted what had been a crushing defeat for Nasser into a victory for him, and thereby resurrecting his dictatorship. The least that could properly have been expected of U.S. action at that time—an action taken in great haste, not only against Israel, but also against our traditional and stanchest allies, Britain and France—would have been to insist, as a quid pro quo for our action and that of the United Nations, which followed, upon an unequivocal guarantee of freedom of passage through the Suez Canal for all nations. The United States did not effectively seek or secure such a guarantee. The result has been contained and mounting tension and a condition which the Arab dictators frankly declare to be a state of war between their countries and Israel.

The situation is thrown into relief at this moment by the publication of a letter, from Vice President NIXON, which has been made the subject of a press release from Washington, and therefore has become generally known. It was reported in the New York Times of June 13, under the heading: "NIXON Gives Aims of Mideast Policy," and with a subhead: "Says the United States Must Promote Arab-Israel Accord and Free Access to Suez."

Vice President NIXON's views on this important question were contained in a letter, dated June 7, to President Label A. Katz, of B'nai B'rith. In the course of this letter, the full text of which I shall ask to have printed at the conclusion of my remarks, the Vice President said:

> It is the policy of our Government to protest discriminatory acts in international trade which militate against American citizens and American shipping. With regard to the matter of the Suez Canal, the United States has unequivocally affirmed its support of the principle that there should be freedom of transit through the canal for all nations, including Israel. This policy has been enunciated publicly and repeatedly. I believe that we must continue to press for the effective implemention of the principle of freedom of the seas and free access to international waterways, and the protection of the interests of American seamen and shipping now being discriminated against by the Arab boycott and blacklisting policy.

Mr. President, no one can quarrel with the sentiments expressed in the Vice President's letter. The difficulty, it seems to me, is that here, as in so much else under this administration, there is a wide disparity between word and deed. These worthy utterances come from on high; but the actions taken by the same high administration officials, or the actions not taken, nullify the effectiveness of their spoken words.

Only a few months ago, the International Bank for Reconstruction and Development made a loan of $50 million to Nasser, for improvements on the Suez Canal. No words by any representative of the administration could begin to equal or even to approach in the way of policy this striking action. I made inquiry at the time about the justification for this action, so contrary even at that time to the administration's professions, and received from the Acting Assistant Secretary for Congressional Relations, of the Department of State, a letter which I shall also ask to have printed at the conclusion of my remarks.

The State Department admitted that the United States was not unmindful that restrictions placed on Israeli shipping in the Suez Canal might call into question the propriety of proceeding with the loan, and added:

> I can assure you this consideration was given full weight in the U.S. Government's decision to support favorable action on the loan. We have consistently upheld the principle of freedom of transit through the Suez for all nations, and the Secretary of State reiterated this support at the United Nations General Assembly on September 17.

Here, Mr. President, we have, in two successive sentences, a perfect illustration of the administration's double standard. Here, we have a typical example of action negating words. We have, says our Government, consistently upheld the principle of freedom of transit, but on the other hand it has turned over millions of American taxpayers' dollars to the man who is principally responsible for violating and nullifying that principle of freedom.

The International Bank for Reconstruction and Development is allegedly an international agency, but there can be little question that if the United States wished to exercise its influence in matters of high policy in regard to loans on which it felt keenly and involved a matter of high principle, its views would carry great weight and would no doubt be effective. We note that the president, the three vice presidents, and the treasurer of the Bank are all American citizens. But while decisions are made by a majority of the 18 executive directors and alternates, who represent a variety of countries, the fact is that the American representatives all voted for the loan. A simple word from the White House to the Bank's officialdom indicating that it was policy not to grant such a loan without a commitment on the part of the Egyptian Government to allow free passage to the ships of all nations, would have been accepted at least by the U.S. officials. Either the commitment to allow freedom of transit would have been made, or the loan would not have been made. Would there have been anything unreasonable or improper for the United States to make such a request and to take such a position? I cannot conceive such a request to have been other than reasonable, proper, and in accord with our declared purposes.

It is difficult to conclude that such a position would not only have been fair and reasonable, but would have furnished evidence to a listening world that the United States means what it says; that it tries to implement its words with actions; and that there is something more to its policies than, to quote the Vice President's words: "to unequivocally affirm its support of the principle that there should be freedom of transit through the canal for all nations, including Israel."

Moreover, when the Senate, with a worthy desire and purpose to implement such professions, inserted a moderate statement to that effect in the foreign aid authorization bill a few weeks ago, we in the Senate were informed, in no uncertain terms, that the administration violently opposed such a statement. What was this statement? I quote it:

> (f) It is the sense of the Congress that inasmuch as—
>
> (1) the United States favors freedom of navigation in international waterways and economic cooperation between nations; and
>
> (2) the purposes of this Act are negated and the peace of the world is endangered when nations which receive assistance under this Act wage economic warfare against other nations assisted under this Act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways;
>
> assistance under this Act and the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be administered to give effect to these principles, and, in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this Act or arising under the Agricultural Trade Development and Assistance Act of 1954, as amended, these principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application.

Fortunately, despite the administration's efforts to reverse this action, this expression of the sense of the Congress stayed in the Mutual Security Act. But let it be noted that it is not even binding on this administration, for its concluding sentence states:

> These principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. GRUENING. I yield with pleasure to the distinguished junior Senator from Louisiana.

Mr. LONG of Louisiana. What the Senator is describing is clearly what I believe to be a fair example of economic aggression, where there is an international waterway and a treaty commitment to make it available for use by the entire world. Is that not correct?

Mr. GRUENING. That is entirely correct.

Mr. LONG of Louisiana. So far as I know, the United States has no such commitment with regard to the Panama Canal, but we have followed the principle that any ship of any nation can go through the canal. Is that correct?

Mr. GRUENING. We do follow that principle.

Mr. LONG of Louisiana. Is not that policy completely at variance with what Communists and Communist sympathizers would call economic aggression in this hemisphere, when this Government possibly proposes to buy more sugar from nations that are more friendly to it than other nations are?

Mr. GRUENING. The Communists would call it economic aggression, but they would not label these acts of their Arab allies or sympathizers in the Middle East as aggression, nor their own acts in their satellite countries as aggression, although clearly those are aggressive acts.

Mr. LONG of Louisiana. The fact is that we have no treaty with regard to our purchase of sugar or coffee. We have complete freedom to buy sugar from whomever we might want to buy it. Yet Mr. Castro would have us believe it would be economic aggression if we, having no treaty obligation and no executive agreement, merely undertook to buy more sugar from our friends.

Mr. GRUENING. The Senator knows, of course, that not only are these acts against Israel acts of economic aggression, but that economic aggression reaches into our own country and tells us whom American companies doing business in the Middle East shall employ, carrying this dictation sometimes to the second and third degree. In addition, these Arab countries frankly declare that they are at war with Israel. Consequently, it seems to me the policy of the United States should be crystal clear and that these noble declarations of high principle should be buttressed by action, which we are capable of taking, due, in large part, to the right to spend or loan our American taxpayers' dollars where we wish. The President is given discretionary power to withhold such grants or loans. We can expect he will not heed the wishes of Congress; that we shall continue to hear high-sounding statements by the Vice President and other administration officials about principles, but we may fear that no action will be taken to carry out those principles.

Mr. LONG of Lousiana. As one Senator who previously voted against the amendment which stated it was the sense of the Senate that no loan should be made to Egypt so long as she denied the ships of any country free passage through the canal, I must say had the matter been pinpointed as clearly as the Senator from Alaska has done in his speech, I would have been compelled to vote the other way.

Mr. GRUENING. One is always grateful for a convert.

How simple, therefore, if the administration means what it says and the Vice President wishes to square actions with words to see that this policy is strictly carried out and that there be no aid to nations engaged in what they declare to be a war, an integral tactic of which is the denial of the use of the international waterway called the Suez Canal, to whose owners the United States recently helped give $50 million. I repeat that that action, authorized and sanctioned by the administration, speaks far louder than any words, no matter how often uttered or affirmed.

It should be noted also that in the mutual security appropriation bill—not the authorization bill passed by both Senate and House and signed by the President to which I have referred, but the mutual security appropriation bill—over in the House, dated June 13, section 113 says:

> It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this title these principles shall be applied as the President may determine.

It will be observed again that, as in the wording of the Senate authorization bill, the carrying out of this sense of the Congress is left to the determination of the President.

Mr. President, the United States is dedicated to peace. It has it within its power, by actions wholly consonant with our traditions, with our longstanding professions, with our oft declared purposes, to achieve peace with justice for the world, to put an end to this Middle East war, in which a number of nations have banded together to destroy one little people, in large part composed of refugees from persecution and even from extinction elsewhere, whose purpose, whose existence, and whose very life hang in the balance.

The two Houses of Congress have affirmed their views on the subject, at least as unequivocally as has the Vice President, but, in addition to affirming them, have indicated a policy which might make that affirmation a tangible reality. It will be interesting to see whether the Eisenhower-Nixon administration, which is making an all-out claim for a total appropriation of $4,150,000,000 for foreign aid, will carry out the declared mandate of the Congress, eliminate the wide disparity between words and action, and make the most important contribution to peace in an important and crucial section of the world than can possibly be made.

I ask unanimous consent that the article referred to, which appeared in the New York Times of June 13th; the letter of Vice President NIXON to Mr. Label Katz of B'nai B'rith; an article from the Reporter magazine, entitled "The Noose Around Israel," which deserves reading because it makes clear the far-reaching character of the attempt to strangle the Republic of Israel, and the extent to which this effort reaches into American lives and interferes with the normal functions of American business concerns, both at home and abroad; an editorial from the Christian Science Monitor entitled "The Clamp on Suez"; an editorial from the New Bedford Standard Times entitled "Money Without Morality"; an article from the San Francisco Chronicle, entitled: "Suez Breach of Faith"; an article from the Oakland Tribune by Raymond Lawrence, entitled: "Blockade of Suez Canal"; and the letter from the Department of State dated December 22, 1959, signed by the Acting Assistant Secretary for Congressional Relations, Mr. John S. Hoghland 2d, be printed in the RECORD at this point in my remarks.

There being no objection, the articles, letters, and editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times, June 13, 1960]

NIXON GIVES AIMS OF MIDEAST POLICY—SAYS THE UNITED STATES MUST PROMOTE ARAB-ISRAEL ACCORD AND FREE ACCESS TO SUEZ

WASHINGTON, June 12.—Vice President NIXON said in a letter made public today that the United States, while seeking to promote a mutually acceptable Arab-Israeli settlement, must keep on pressing to open the Suez Canal to Israeli shipping and to protect American interests from Arab boycott and blacklisting.

The Vice President also spoke of the need to attempt "with diligence and patience" to change the situation in Saudi Arabia, where American servicemen of Jewish background are excluded from the U.S. installations at Dhahran airfield.

The Vice President's letter, dated June 7, was to Label A. Katz of New Orleans, president of B'nai B'rith. Mr. Katz made it public in a speech at Chicago today before the annual convention of B'nai B'rith's District Two. The organization released it here also.

ANSWER TO LETTER

Mr. Katz had written the Vice President following a meeting he and Maurice Bisgyer, executive vice president of the Jewish service organization, had had with Mr. NIXON several months ago. They met again with Mr. NIXON last week.

Mr. NIXON reiterated U.S. policy, which, he said, recognizes "that the independence and integrity of Israel and the Arab countries of the area are of vital concern to the United States."

Mr. NIXON wrote:

"Our Government must continue to use every suitable occasion, both within and outside the United Nations, to facilitate progress toward a mutually acceptable solution of the Arab-Israeli conflict, based on amity and recognition of each other's existence and independence."

He said that the Government had "unequivocally affirmed," "publicly and repeatedly" its support of freedom on Suez Canal transit for all nations, including Israel.

CITES FREEDOM OF SEAS

"We must continue to press for the effective implementation of the principle of freedom of the seas and free access to international waterways, and the protection of the interests of American seamen and shipping now being discriminated against by the Arab boycott and blacklisting policy, he said.

This is a boycott at Arab ports of ships that have stopped or are bound for Israel ports.

"The United States," Mr. NIXON said, "neither recognizes nor condones the Arab boycott. Consistent with this policy, he said, "we must, by every available and effective instrument, continue to pursue every means to restore and protect completely private American interests in international commerce."

Mr. Katz, in his letter to the Vice President, contended that the Government had taken "no resistive action" to discriminatory practices imposed by Arab States on Americans of the Jewish faith.

"Moreover," Mr. Katz wrote, "there have been disclosures in recent months that agencies of the Federal Government had acceded to these discriminatory policies in an affirmative manner."

SEES CAPITULATION

The B'nai B'rith leader said there had been "persistent capitulations of the State and Defense Departments" in surrendering to Saudi Arabia's discriminatory demands in the Dhahran agreement.

The Vice President described the Dhahran airfield issue as "an unsatisfactory state of

affairs—one which we cannot merely accept as unavoidable, and one which we shall continue, with diligence and patience, to try to correct."

Although use of the airbase leased from Saudi Arabia is "vital from the standpoint of our national security," Mr. NIXON acknowledged "a serious drawback in the arrangements" in that American troops assigned to Dhahran require visas, which Saudi Arabia denies to Jewish servicemen.

Mr. Katz told the 900 delegates at Chicago that he "welcomed the Vice President's forthright expression of his views on these critical matters."

OFFICE OF THE VICE PRESIDENT,
Washington D.C., June 7, 1960.

Mr. LABEL A. KATZ,
President, B'nai B'rith,
Washington, D.C.

DEAR MR. KATZ: I very much appreciated the opportunity I had recently to visit so pleasantly and constructively with you, and it was very thoughtful of you to follow up our conversation with your candid letter setting forth your position in detail with respect to the matters we discussed.

As I indicated in our conversation, I share fully your firm conviction that any discriminatory practices on the grounds of race or religion are entirely inconsistent with the fundamental principles upon which our Nation was founded, and which represent in essence the greatness of America. When I visited Poland last year, I had occasion to lay a wreath at the memorial marking the remains of the Warsaw Ghetto. More than ever, on that occasion, I recognized that racial or religious discrimination ends in the destruction of human values by which our civilization must live if it is to endure. For this reason, I shall never be satisfied until peaceful and workable measures have been found and adopted to eliminate every trace of such practices against our citizens, and I shall continue to devote my efforts wholeheartedly toward that goal.

I think you will agree with me that the problems encountered in combating discrimination become even more difficult and complex when they present themselves in an international context. Our use of the Dhahran Airfield is a good case in point. Clearly the operational privileges we have there through an executive agreement are vital from the standpoint of our national security. We have to recognize however, that there is a serious drawback in the arrangements, arising from the fact that American servicemen assigned to the base must have valid Saudi Arabian visas. As a result, while nothing in the agreement excludes American servicemen of Jewish faith, in fact the Saudi Arabian Government has done so indirectly, in exercising its sovereign right to control internal matters, by refusing to issue them visas. This is admittedly an unsatisfactory state of affairs—one which we cannot merely accept as unavoidable, and one which we shall continue, with diligence and patience, to try to correct.

It is the policy of our Government to protest discriminatory acts in international trade which militate against American citizens and American shipping. Our Government's concern and good intentions in this area are demonstrated in the matter of the "Haifa Clause" which, until recently, the Navy included in its shipping contracts. The use of this clause, which was designed to assure the efficient operation of the fleet, was discontinued in February 1960, lest it be misconstrued as acquiescence in the Arab boycott.

Similarly, in the matter of transporting Public Law 480 cargoes, we note with approval that no agency of our Government is a party to such discriminatory contracts.

Consistent with the policy that the U.S. Government neither recognizes nor condones the Arab boycott, we must, by every available and effective instrument, continue to pursue every means to restore and protect completely private American interests in international commerce.

With regard to the matter of the Suez Canal, the U.S. Government has unequivocally affirmed its support of the principle that there should be freedom of transit through the canal for all nations, including Israel. This policy has been enunciated publicly and repeatedly. I believe that we must continue to press for the effective implementation of the principle of freedom of the seas and free access to international waterways, and the protection of the interests of American seamen and shipping now being discriminated against by the Arab boycott and blacklisting policy.

As I know you are aware, the U.S. Government has been most directly concerned with the problems of peace, security, and economic development in the Middle East. We have recognized that the independence and integrity of Israel, and the Arab countries of the area are of vital concern to the United States. I believe that our Government must continue to use every suitable occasion, both within and outside the United Nations, to facilitate progress toward a mutually acceptable solution of the Arab-Israeli conflict, based on amity and recognition of each other's existence and independence.

Again I want to tell you how much I enjoyed the welcome opportunity I had to talk over with you personally matters of mutual interest and concern, and to express my appreciation for the devoted efforts which you and the members of your organization are making to eliminate discriminatory practices against any group of Americans.

With kind regards.

Sincerely,

RICHARD NIXON.

THE NOOSE AROUND ISRAEL

(By William S. Ellis)

BEIRUT.—On a narrow, sun-washed street just off the Bay of St. George, in Beirut, a wealthy Palestinian refugee dismissed his chauffeur and climbed two flights of stairs in a dumpy, gray-white building. Entering the office from which he directs a successful retail furniture and household appliance business, he deposited a string of clear blue prayer beads on the desk and then adjusted a glass-framed sign on one of the walls.

Its single line of characters looked like an advanced mathematical formula, but in Arabic it expressed the Arab world's major weapon against Israel: "The noose gets tighter and tighter and tighter."

"I won't take that sign down until I am able to return to my home in Palestine," the furniture dealer said.

The strands of the hanging rope are clearly marked—Lebanon, Jordan, Saudi Arabia, the United Arab Republic, and Iraq; in short, the nations of the Arab Middle East. The noose has been tied by nations noted for their bickering. The long end of the rope is in the hands of the Arab League's Boycott Israel office, and there the standing order is "Pull, pull, pull." Israel admits that the rope is being drawn tighter day by day.

Flushed with success, the boycott office decided some time ago to widen its activities. It did so with ostentatious bluff and bluster, but the Arabs seemed to be making headway when the U.S. Navy began to penalize tankers under contract to supply it with fuel for any delays caused by their being held up by the Arabs for having called at Israeli ports—thus effectively discouraging such calls. Recently the Navy has rescinded this clause in its contracts.

As much as U.A.R. President Nasser likes to boast of the military strength of his forces in Egypt and the First Army in the Syrian region, he knows full well that intra-league rivalries tend to undermine it.

In any case, the economic blockade has done what two Arab armies failed to do: strike hard and effectively at small, enemy-locked Israel. It is not possible to gage the damage of the boycott to Israel's economic development, but a conservative estimate would be many million dollars.

From central headquarters in Damascus, Dr. Karim Aidi, general commissioner of the boycott, directs the operation. Driven by a dedication bordering on fanaticism, Dr. Aidi, considers everything from ships to movie stars fair game. He plays no favorites, and when it comes to tackling such giants as International Business Machines, he goes about his business unimpressed by the company's reputation in American financial pages.

IBM was, in fact, placed on the boycott list in February. That same day another American firm, Helena Rubinstein, was told that it also was banned from selling its products in Arab countries. The reason given for both actions: "Violating the Arab boycott-Israel regulations," which could mean anything from Thomas Watson, Jr., having lunch with Premier Ben-Gurion to a performer at an Israel bond rally wearing a certain type of lipstick.

PROFIT OR LOSS

The action, while seemingly harmful only to the companies, usually follows a course reserved for Arab winners in the race for influence between Zionism and Nasserism. IBM, it is figured, will have to look to its books and start tallying the figures. If more typewriters and calculating machines are sold in Israel than in the U.A.R., Lebanon, Jordan, Iraq, and Saudi Arabia combined, then the boycott might gather dust in the bluff and bluster file. But if the reverse is true—as it usually is—the company will either have to abide by the boycott rules or lose money. Arab officials like to believe that IBM is a concern more dedicated to sound business habits than to a national Jewish homeland.

France's Government-owned Renault automobile company turned to its books after the boycott struck and found that from an economic standpoint, it was better to mollify the Arab States. In 1955 Renault had signed a 3-year contract with the Kaiser-Frazer company for the assembly of its cars in Israel. Notice of cancellation of the pact was given in September 1958, according to Renault's president Pierre Dreyfus. Dreyfus said the decision to stop assembly operations in Haifa was strictly business. He added that the Arab boycott was a consideration. Renault agreed to abide by the boycott rules and the ban was lifted.

In Israel, meanwhile, Efraim Ilin, chairman of Israeli Kaiser-Frazer, was preparing to bring suit for $2 million against Renault, charging breach of contract. Even if judgment is awarded it may well be that Renault will still stand to gain, for the basic fact in the matter is this: In 4 years Renault sold fewer than 4,000 cars in Israel, while in Lebanon alone sales of cars just for private use average more than 300 a month. "The decision by Renault," said Nadim Hallak, chairman of the boycott office in Beirut, "represents a major victory for Arab countries and for the idea of the boycott."

The boycott covers the high seas, too. Hardly a day goes by when the Arab press fails to carry lists of freighters newly assigned to the fleet of the banned.

The classic case of shipping boycott is, of course, the *Inge Toft.* The Danish freighter has sailed now, but not before it lay moored in the inner basin of Port Said for 9 months. The vessel's cargo of potash, cement, and copper, which was taken aboard at Haifa last May, was unloaded. The boycott office again sounded its victory yell, and Egyptians,

watching the ship slip out of the basin, laughed and pointed at the seaweed and barnacles clinging to the hull.

Rules for getting on the shipping blacklist—and getting off it—have been drafted so as to give the captain or the ship's agent several choices of action. Full blacklist membership is available, along with half blacklist membership. Finally, there are the rules to be followed if a ship wishes to move from full blacklist to half blacklist, and from both to a ban-free status.

A vessel is placed on the blacklist if it:

Carries materials to be used to strengthen the "Israeli war effort."

Calls at an Israeli port and at an Arab port during the same voyage. This does not apply to ships carrying passengers only, in which case the vessel has to call at the Arab port first and furnish the regional boycott office a complete statement of arrival and departure times at the ports.

Is chartered by Israeli companies or organizations (this was the case with the *Inge Toft*).

Carries immigrants to Israeli.

Had originally been of Israeli nationality and was sold to another country (such a vessel has no hope of ever getting off the blacklist).

Carries Israeli industrial, agricultural, and commercial products.

Refuses to submit within 15 days the certificates and manifests requested in respect of previous voyages.

There is one other method of getting on the full blacklist, and that is by infringing the rules for the second time after removal from the list. There is no third chance.

To be placed on the half blacklist, it is necessary for the vessel's agent to submit a statement to the effect that infringement of the boycott rules will not occur again. Freedom from both lists comes when the agent promises the ship will never deal with Israel again.

Penalties for breaking the rules include depriving the ship from loading, discharging, and bunkering, and from taking on water supplies and other provisions. No member of the crew is allowed to disembark at any Arab port, and the vessel is not allowed to take on crew members at Arab ports. Ships on the half blacklist are given just enough provisions to allow them to continue to the next port of call.

With an average of 51 ships passing through the Suez Canal each day, the boycott office is aware that the vessel blacklist is the nuclear weapon in its anti-Israel economic arsenal. "No matter how hard Hammarsjkold tries to convince Nasser that the Suez Canal should be isolated from politics, the boycott will continue, and Israeli cargoes will not pass," a high-ranking official of the Lebanon Government said.

Nasser himself reconfirmed his stand on Suez during his visit to the Syrian region of the U.A.R. in mid-February. He asserted that not only would the ships be stopped but that the cargoes would be confiscated and donated to Palestinian refugees.

MISS MONROE IS TABOO

Back on land, Arabs, who like movies almost as much as they do soda pop, are finding one activity of the boycott office extremely annoying. More and more film stars are being placed on the blacklist, and as a result, theater owners are finding their choice of presentations being narrowed down to bad Egyptian films starring, more often than not, an ex-girl friend of Farouk, and productions from Russia that the Peking Government would call "films representing a step forward."

Elizabeth Taylor is banned, and the boycott office is not impressed by the fact that she has been named to star in "Cleopatra." Films featuring Danny Kaye can no longer be shown in Arab states. The list stretches on and on—Edward G. Robinson, Eddie Fisher, Marilyn Monroe (and she was a big favorite with the Arabs), Jerry Lewis.

Most of the stars were banned for participating in rallies for the sale of Israel bonds. In the case of Louis Armstrong, it was first reported that he had been banned because he was "a spy for Israel." When the absurdity of the allegations finally struck home, the reason was altered to read "aiding the cause of Zionism." What had actually happened was that Armstrong had simply performed in Israel.

"Ben Hur" will not be shown in Beirut or in any other Arab city. The reason: Haya Harareet, who once won the title of Miss Israel, has a role in the production.

When asked what he thought about the film ban, Spyros Skouras, president of 20th Century-Fox, who was in Beirut recently, said, "Well, I'm against mixing art and politics." The ironic thing is that the majority of Arabs, especially those living in Lebanon, agree with him.

Lebanon is regarded as the weak sister in the anti-Israel boycott campaign. The Government denies that, of course, but there were many red faces when Monaheem Saadi, a Beirut merchant, was arrested for importing a brand of watches made by a blacklisted factory. And then there was the time, late last year, when 256 Italian motor scooters made by a factory that deals with Israel were seized in Beirut.

When the ban against Danny Kaye was announced, a theater owned in Beirut, who was showing a Kaye film at the time, took the position that the ban doesn't become effective until our schedule calls for a change of films.

Beirut blushed again recently, but this time it was because of a bit of anti-Israel strategy seemingly calculated to evoke disgust. Even the boycott office forbore to take credit for the action. An apparatus for artificial breathing had been shipped from New York to Israel. Before it left New York, however, a Lebanese official in the United States (the government was careful not to reveal his name) somehow convinced the shippers that the apparatus was to be channeled through Beirut. When it got to the Lebanese capital it was, of course, confiscated.

Two young men who work as translators for a newspaper in Beirut were discussing the matter the day after the confiscation was announced. One, a Lebanese from a village near Tripoli, said, "We certainly have nothing to be proud of as far as this is concerned." The other translator is a Palestinian refugee. He said: "In war, everything is fair game."

The two remarks tell the whole story of the boycott simply and briefly.

[From the Christian Science Monitor, Apr. 23, 1960]

THE CLAMP ON SUEZ

The owner of an international waterway is under something of a public duty to keep it open to the commerce of the world at large. In the light of history this is especially true of the United Arab Republic and the Suez Canal.

When Secretary General Hammarskjold of the United Nations finds, as he recently has done, that an action of the Cairo government "goes against" the principles of the UN Charter, one may be sure he has ground for doing so. He had reference to the stopping of the Greek freighter Astypalea and the confiscation of a cargo of cement from Israel.

In view of the intensity of feeling behind the Arab boycott of Israel, it may be too much to expect that the U.A.R. should permit passage of Israeli ships through the canal. But it does seem that there should be, in Mr. Hammarskjold's phrase, "workable practices" to allow goods which are the property of non-Israelis to be shipped through the canal in vessels of other nations even though going to or from an Israeli port. It was assumed that such arrangements had been made when the Astypalea set out.

Through international agencies the United States assisted financially in reopening the Suez Canal to traffic. Various forms of American technical assistance are being extended in Egypt and Syria, with every desire to help the people of these areas. However, the House Committee on Foreign Affairs has proposed an amendment to the Mutual Security Act which would authorize the President to take into account the interests of economic cooperation and freedom of navigation in administering foreign aid. The United States can hardly afford to subsidize a restriction on international trade.

[From the New Bedford (Mass.) Standard-Times, May 5, 1960]

MONEY WITH MORALITY

The Eisenhower administration sustained what may prove to be an important defeat in connection with Senate passage of new foreign-aid spending authority. By a vote of 45–39, the Senators overrode State Department protests and approved an anti-Arab declaration in the bill's policy statement.

The disputed amendment gives the President discretionary authority to withhold mutual security assistance to the United Arab Republic if the UAR continues to boycott Israeli shipping in the Suez Canal.

In opposing this amendment, Senator FULBRIGHT, Democrat, of Arkansas, chairman of the Foreign Relations Committee, said it presented a test between "the best interests of the U.S. foreign policy and a pro-Israel pressure group."

Douglas Dillon, Acting Secretary of State, in a letter supporting FULBRIGHT's position, declared the declaration would be interpreted as "demonstrating favoritism for Israel, an attempt to tie strings to U.S. economic aid, and a threat to use aid as an instrument of political coercion."

Dillon added everybody already knew the United States favors free transit in the canal, and the amendment would not make the Arabs end their boycott against Israel anyway, but would just make Nasser angrier.

Why did the Senate approve the amendment in the face of these arguments?

Since 1957, Cairo has been under a pledge to the United Nations to permit free transit of the canal and to keep canal operations "insulated from politics." The United States is committed to seeing this policy enforced.

But Egypt has gone back on its promise. It denies use of the canal to Israeli shipping, in an action legally and morally indefensible and motivated by politics.

As Senator DOUGLAS, Democrat, of Illinois noted, "the State Department wrings its hands and says, 'Oh, yes, we stand for free access,' but it does nothing."

The United Nations, which has primary responsibility in this situation, also does nothing.

So the U.S. Senate did something, moved by DOUGLAS' plea, "Are we to go on with conversations, or are we to try to get some sense that there are moral laws in the world?"

It's a good question, and now that the Senate has established the fact that the United States does not have to give its taxpayers' hard-earned dollars to everybody who asks—saint or sinner, friend or enemy—a new era may have begun for foreign aid.

Perhaps from now on, American help will go exclusively to those nations that share with us a belief in the right to life, liberty, and the pursuit of happiness.

It may be that Congress is ready to take a more critical look at those countries opposed to everything American except U.S. handouts.

Surely it is better to "tie strings" to such aid than to subsidize tyranny, opportunism, and irresponsibility, to the detriment of those whom we profess to be helping.

[From the San Francisco Chronicle, April 14, 1960]

SUEZ BREACH OF FAITH

The repeated refusal of the Nasser government in the United Arab Republic to let Israeli ships use the Suez Canal is well known. Equally well known, we think, should be President Nasser's recent flouting of his own agreement for the passage of a Greek ship carrying a part-Israeli cargo. He had made this agreement with the Secretary General of the United Nations, Dag Hammarskjold, and his breach of it therefore is not a slap at just Israel but also at the world authority.

The Greek ship is the *Astypalea*. She sailed from Haifa last December with 400 tons of Israeli cement bound for Djibouti. This news was hushed by the Israelis to comply with the Hammarskjold understanding, but the *Astypalea* was nevertheless halted at Port Said by the Egyptians. In January, Hammarskjold went to Cairo to press for the release of the ship and her cargo, but without effect. Early this month the owners of the *Astypalea* gave up hope, and after unloading her cement cargo the ship turned about and sailed back toward Greece.

This development, Hammarskjold has observed, "goes against the principle upheld by the United Nations." It is another faithless act of the Nasser government in pursuit of its long and tedious legalistic controversy about the existence of a state of war with Israel.

[From the Oakland Tribune, Apr. 17, 1960]

FOREIGN AFFAIRS: BLOCKADE OF SUEZ CANAL

(By Raymond Lawrence)

The United Nations faces a challenge from Egypt on the Suez Canal that strikes at the Organization's authority and prestige.

Once more Egypt has refused permission for a ship bearing an Israeli cargo to travel through the canal.

The voyage of the Greek vessel which had loaded cement at Haifa was kept secret and the first news to the world at large came from Cairo when it was announced the *Astypalea* had been halted at Port Said and its cargo confiscated.

The United Nations is directly involved not only because of the original Suez convention, but because U.N. Secretary General Hammarskjold had made a special trip to Cairo to work out free passage arrangements with President Nasser of the United Arab Republic.

AGREEMENT VIOLATED

The Secretary General was given definite promises by Nasser that Israeli-originated cargo would be allowed passage. That agreement was reached on Mr. Hammarskjold's personal trip in January of this year. It has thus been flagrantly violated on Nasser's orders.

This is not the first time that Israeli cargoes have been stopped. The blockade was instituted at the beginning of 1959 after several years of partial stoppage.

The whole business is a violation of the Security Council's resolution adopted in 1951.

One of the recent ships was the Liberian freighter *Captain Manolis*. Its Israeli-originated cargo was confiscated by the Egyptian authorities.

Then in March 1959 the West German ship *Lealott* was held up at Port Said and the cargo confiscated. In May the Danish ship *Inge Toft* was detained and held up for 9 months because the captain refused to acquiesce in the demand of the Egyptian authorities that he should unload his cargo, which eventually was confiscated.

FREE PASSAGE PACT

Under both the international convention and the resolution of the U.N. Security Council, the United Arab Republic is required to allow Israeli ships to pass through the Suez Canal.

Also, under the United Nations action in respect to the Palestine war, Egypt is required to make peace with Israel. This has not been done, despite repeated peace gestures on the part of the Israeli Government.

This kind of calculated piracy ought to give pause to the Western governments that have since last December lent $56 million to the U.A.R.

ACTION BY CONGRESS

Reaction to the U.A.R. blockade of the canal was reflected in Congress when the House Committee on Foreign Affairs approved an amendment to the Mutual Security Act which opposes aid to nations that wage economic warfare such as boycotts, blockades, and restrictions on the use of international waterways.

This is not a categorical ban, since the amendment leaves it up to the President to decide whether we should subsidize the Suez blockade with millions in surplus foods and loans.

Congress thus has laid down a principle about which the President must report regarding its application.

It is one that should cause some serious thinking in Cairo about the need for intelligent and constructive efforts to settle the central problem of the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., December 22, 1959.

The Honorable ERNEST GRUENING,
U.S. Senate.

DEAR SENATOR GRUENING: Recalling your previous expressed interest in the question of a loan by the International Bank for Reconstruction and Development to the United Arab Republic for the purpose of effecting improvements on the Suez Canal, I should like in this letter to review considerations which led to our Government's support of this proposal when the matter was brought before the IBRD Board of Directors. The Bank acted favorably on the proposal on December 21, 1959.

The following factors prompted the U.S. Government's attitude toward the Suez Canal loan:

(a) The project is sound technically. It has been planned for a number of years. Studies undertaken by the International Bank confirm that, from an engineering standpoint, the proposals which envision the deepening and widening of the canal represent a sound and feasible program for improvement of the canal as an international waterway.

(b) It is a sound project economically. Canal receipts in foreign exchange are and will be more than adequate to service a loan. It is clearly a bankable development project of precisely the type for which the IBRD was established.

(c) The project has international benefit. The canal improvements will be of value to the world trading community, and in particular the Western European nations for whom the canal is almost an indispensable artery.

(d) The IBRD is an international lending agency whose loans are granted primarily on a basis of usefulness economically and soundness financially. The injection of noneconomic considerations into the Bank's assessment of the credit-worthiness of an application would, in our view, impair the Bank's integrity as an international financial institution, particularly in the eyes of the less fully developed nations of the world whose needs the Bank is primarily designed to serve. To maintain the IBRD's well-deserved international prestige it is, in our opinion, important to avoid circumstances which would expose the Bank to allegations that it is a political instrument rather than a bona fide international lending agency devoted to the promotion of economic development for the welfare of the peoples of the world.

(e) Sound economic development should be encouraged. The Suez Canal development project is regarded by the United Arab Republic as an important element of its total development program. It is clearly in the free world's interest to try to be helpful in such cases rather than, by default, to furnish an opportunity to be exploited by the free world's enemies.

In recognizing the merits of the foregoing considerations, the U.S. Government was not unmindful that restrictions placed on Israel's shipping in the Suez Canal might call into question the propriety of proceeding with the loan. I can assure you this consideration was given full weight in the U.S. Government's decision to support favorable action on the loan. We have consistently upheld the principle of freedom of transit through the Suez for all nations, and the Secretary of State reiterated this support at the United Nations General Assembly on September 17.

You may be sure that our Government will continue its efforts to do what it appropriately can to facilitate a solution to the problem which still confronts Israel vis-a-vis the Suez Canal. In this connection, we understand that the United Nations Secretary General has been closely following developments connected with the recent incident involving a Greek-flag vassel and is continuing his efforts to assist in bringing about a resolution of the transit problem. It remains our hope that the good offices of the United Nations, which are energetically being addressed to this problem, will bear fruit. The constructive action which the IBRD has taken with respect to the Suez loan may itself provide example and encouragement for progress toward ultimate solution of Near Eastern problems.

In view of your past inquiry regarding this question, I thought you might be interested in the foregoing outline of the attitude which our Government adopted. Having regard for all factors, we believe this attitude to be in the best interests, not only of our own Nation, but of the free world as a whole.

Sincerely yours,

JOHN S. HOGHLAND 2d,
Acting Assistant Secretary for Congressional Relations.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. GRUENING. I yield with pleasure to my able and distinguished friend from Minnesota.

Mr. HUMPHREY. I thank the Senator. First, I apologize to the Senator from Alaska for having to leave the Chamber a few moments during his speech. The Senator knows I asked that he send for me at the Committee on Foreign Relations meeting when he took the floor, since I wished to hear him speak, because I had received an advance copy of the Senator's statement. His office was very kind in making it available. I thank the Senator for that.

The Senator has made a cogent statement of a most difficult problem, and it is a sincere and honest statement of what ought to be an honest policy on the part of our Government, namely, the fulfill-

ment of commitments in terms of the free access to international waterways, including the use of the Suez Canal and, indeed, the necessity for the executive branch of our Government to acknowledge what has been the firm resolution of the Congress, as was pointed out by the Senator in his recitation of the action of the other body in respect to the mutual security appropriation bill, section 113, where the House of Representatives expressed the sense of the Congress relating to the protection of personal and commercial access and other rights of U.S. citizens. I shall not read the particular section, for it is in the RECORD.

I am sure the Senator knows that many of us in this Chamber for a long time have been deeply concerned over what appears to be a double standard in American policy.

Mr. GRUENING. That is quite true.

Mr. HUMPHREY. As the Senator so aptly describes it in his address today, on the one hand it is stated, as the Vice President stated in his letter of June 7 to the president of B'nai B'rith, Label A. Katz, concerning the policy of our Government to protest discriminatory acts in international trade which militate against American citizens and American shipping:

> With regard to the matter of the Suez Canal, the United States has unequivocally affirmed its support of the principle that there should be freedom of transit through the canal for all nations, including Israel.

After having made this rather pious pronouncement the follow-through on the part of the administration leads one to an interpretation of a contrary policy.

I have been one of those in the Senate who have felt and who have said repeatedly that the State of Israel is here to stay. It is a sovereign nation. It was established by the United Nations. It has been recognized by the United States and by a majority of the nations of the world. It has demonstrated its capacity for self-government. It has fulfilled many of the objectives we have laid down as the better characteristics of a nation; namely, a capacity to defend itself, a capacity and a willingness to improve the lot of its citizens, a willingness to enter into international responsibilities and negotiations and to fulfill those responsibilities, and a willingness to share in the responsibilities of international law and order.

Since Israel has that kind of a record, it seems to me the least our Government can do is to stand steadfast for the principles we believe to be sound and reasonable and to insist that these principles be applied.

I happen to believe that the executive branch of the Government in this matter has been weak, uncertain, and indefinite, and has not really exercised the influence and power of the United States of America. I have reason to believe that we have all too often been more concerned with some commercial interests in the Middle Eastern area than we have been concerned with sound international principles of law, of decency, and of justice.

The Senator from Alaska, with his characteristic candor and his personal and public integrity has again laid the issue on the line and has exposed for all to see what on the one hand is a fine, noble, high-sounding statement of principle and on the other hand is a weak, tired, vacillating policy which leads only to confusion and doubt among friends and foes alike. The Senator has done a good job for the country today. I commend him.

Mr. GRUENING. I greatly appreciate the kind remarks of my friend from Minnesota. I would say that if the administration wants to pursue the correct policy, instead of—perhaps "conniving" is too strong a word—not opposing these boycotting actions which aim at destroying a free people, it would say to these backward countries, "Why not emulate little Israel? Irrigate the deserts. Build up industries. Educate your people. Improve their condition. It is a wonderful example Israel is giving to the surrounding countries."

Instead of following that example set by Israel these nations wish to destroy Israel.

I agree with the Senator from Minnesota, it is distressing to hear the pious proclamations of high principle and to see the same administration following a course of action which is directly opposite in character.

I think when the history of this administration is truly written it will go down in history as the administration of piety, pollution, and payola.

Mr. HUMPHREY. Mr. President, I hesitate to ask the Senator to yield on the fine note which he has uttered, but another factor which has to be taken into consideration, I am sure the Senator would agree, is the fact that the Members of the Congress of the United States as representatives of the American people, have repeatedly expressed their will with respect to the policy which should be followed. For example, I remember the proposed amendment of the former U.S. Senator from New York, Mr. Lehman, to the Mutual Security Act, relating to discrimination which was being practiced by certain foreign nations against Americans of the Jewish faith. I remind Senators that those nations were not even permitting an American in the uniform of the U.S. Armed Forces to set foot in certain countries, even though we had diplomatic, military, and commercial relations with those countries.

We expressed the will of Congress. We said to the administration that it should do what the late William Howard Taft as President of the United States did. I would have the Senate remember that when Czarist Russia refused to grant certain privileges and rights to Americans of a particular faith under a treaty that had been signed between the two nations, the then President of the United States, Mr. Taft, abrogated the treaty and said that the treaty was null and void, taking the stand that American rights, which had been made a part of the treaty were to be recognized and respected.

Congress knows this. We on the Foreign Relations Committee have considered this subject a half dozen or more times, and we have tried to express the intent and the will of the representatives of the people. We have always been told by the State Department, however, that it cannot be done. I suggest that the State Department tell certain conferees that, "We are sorry, but though there are some things that we as diplomats might want to do, those fellows in Congress say, 'No.'" Congress has the right, the privilege, and the duty to express the conscience of the American people. That is what we are here for.

When we express our policy in a manner which is desirable, decent, and wholesome, the least that can be done, particularly when it is in the tradition of our country, is that those who are responsible for the execution of that policy or its administration should follow it.

But what happens? A press release and a pious pronouncement by letter follow, and then the diplomats who work overseas and those who are carrying out the day-to-day duties of Government say, "The administration has satisfied the Congress. We have written a letter to Mr. Katz; we have written a letter to Mr. Jones. We have issued a press release to the New York Times. We have taken care of everything." They then proceed as they did before.

What the Senator from Alaska has said is that we insist that those who are in Washington writing letters to American constituents should also write a letter to the State Department, or send it duplicate copies of letters, saying, "This is the policy to be followed."

Mr. GRUENING. Can the Senator from Minnesota imagine how differently a great Republican President, Theodore Roosevelt, would have handled this situation? The Senator will remember that in one of his statements to one of the Arab States which had kidnapped a naturalized citizen of Greek origin, Perdicaris, who had been kidnapped by a bandit named Raisuli, Theodore Roosevelt sent a curt ultimatum: "Perdicaris living or Raisuli dead." He got results.

Mr. HUMPHREY. Theodore Roosevelt was a great President. He spoke in a language the world understood. Americans understand, as the Senator from Massachusetts said today, that the administration talks loud. However, Theodore Roosevelt used to say, "Speak softly and carry a big stick." The administration now says, "Talk loudly and saw the stick off."

The Senator put his finger on the point again by alluding to Theodore Roosevelt, whose memory is celebrated, but whose policies, I regret to say, have been placed in cold storage.

Mr. GORE. Mr. President, will the Senator yield?

Mr. GRUENING. I yield with pleasure to my friend from Tennessee.

Mr. GORE. The able Senator from Alaska has merited the congratulations and appreciation of his colleagues for his able and thoughtful speech. Only about an hour ago I heard the Senator engage in colloquy with the junior Senator from Massachusetts [Mr. KENNEDY] on a different subject. During the forenoon I listened to the able junior Senator from

Alaska testify before the Senate Committee on Foreign Relations in an able, attention-gripping manner on a treaty relating to Antarctica. Because of these observations in 1 day of the activities of the junior Senator from Alaska I wish to compliment him upon his ebullience, upon his intellectual curiosity, his inquisitiveness, his concern for the many problems facing our people, and his willingness to contribute from the wisdom that he possesses, from his judgment, from his vast experience, and, most of all, from his mental capacity and scholarly attainments.

Mr. GRUENING. I certainly would be remiss if I did not express my appreciation for this very gracious and undeserved tribute. I am very grateful that the able Senator from Tennessee has these views and has been willing to express them. I thank him.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. GRUENING. I yield.

Mr. PROXMIRE. I certainly cannot top what the Senator from Tennessee has said, but I have tried again and again to convert the junior Senator from Louisiana [Mr. LONG] on one or two of the very few points upon which we differ, with no success. The Senator from Alaska has done a magnificent job of converting him, and I think that speaks volumes for his eloquence and the persuasiveness of his excellent speech this afternoon on this particular issue.

I should like to clarify one point in his speech which puzzled me. I thought it was a fine speech, and I approve of it wholeheartedly. The Senator from Alaska points out that in 1956, at the time of the Suez crisis when we entered the conflict to save Nasser, we failed to secure an unequivocal guarantee of passage through the Suez Canal. I wish to make sure that the Senator from Alaska is not implying that there was not an ample precedent in international law.

In fact, there was triple precedent in international law for freedom of passage. There was the 1888 Suez Convention; there was the 1951 decision of the Security Council; and there was the assurance of Nasser at the time of the nationalization of the canal that there would be freedom of passage. So we have ample basis for insisting on freedom of passage through the canal.

What we need is exactly what the Senator from Alaska is calling on us for, namely, action by our Government to make international law meaningful, and I think he made an exceedingly forceful, vigorous, and effective plea for that kind of action.

I wish to underline this point by saying that the Senator from Alaska is performing a real service in not letting this subject die. The Foreign Affairs Committee of the House, by an overwhelming vote, which I think was 19 to 3, voted for this kind of resolution. The Senate voted against the administration and against the chairman of the Foreign Relations Committee by a smashing majority in favor of the resolution, and it seems to me we should hammer it home over and over again that it is the position of the U.S. Senate, including an even greater majority, now that we have the junior Senator from Louisiana on our side, that international law should be lived up to, and that when we make a loan or a gift to a country, at the very least we should insist on compliance with international law and of fair dealing with another good friend and good ally of real democracy in this country in the Republic of Israel.

Mr. LONG of Louisiana. The Senator from Louisiana has been thinking over the designation of the Senator from Alaska of the situation as one of piety, pollution and, if I recall the third, payola. I know the Senator from Alaska wants to be fair. This administration did not create pollution; it merely refused to do anything about it and blocked all efforts to do something about it.

Mr. GRUENING. As in the case of the Suez Canal.

Mr. LONG of Louisiana. But it was not the administration which created the pollution. It found the condition that way and has tried its dead level and earnest best to keep it that way.

Mr. GRUENING. That is correct.

Mr. LONG of Louisiana. I ask the Senator from Alaska if pollution is the same problem in Alaska as it is in a State such as Louisiana, where we have a relatively larger population and vast streams flowing through our most populated areas.

It was my impression that pollution could not possibly be the problem in Alaska that it is in most other States of the Union, inasmuch as most areas in Alaska have not experienced the development and therefore have not experienced the pollution that exists in other parts of the Nation.

Mr. GRUENING. That is correct; we are a much less developed part of America and we are still a frontier. Our great rivers, like the Yukon, Kuskokwim, and Susitna do not run through industrial centers or urban communities where pollution originates and is carried downstream, as is the case with the Mississippi River which runs through the Louisiana Senator's State.

However, we are desirous that that situation should not come about in Alaska, and would like to have the administration cooperate with the States in eliminating pollution in other parts of the country. We do not have such a provincial or parochial feeling that we are not in favor of pollution control in other parts of our country because it is not a problem in Alaska. We believe that what is good for the whole Nation is good for Alaska, and vice versa.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. For the information of the Senate, if we complete consideration of the Defense appropriation bill tomorrow, it is anticipated that we will take up the mutual security treaty with Japan on Thursday.

THE RIGHT TO CRITICIZE

Mrs. SMITH. Mr. President, on May 23, 1960, there was read into the CONGRESSIONAL RECORD excerpts purporting to be documentation from the Maine grassroots on the attitude of the people of Maine toward the President of the United States. The following day I made a statement in the Senate challenging that claim and recording my disagreement with it. I stated that it was my opinion that the overwhelming majority of the people of Maine supported rather than condemned the President of the United States.

I want to report to the Senate the response made by the people of Maine to my speech of May 24, 1960, defending the President of the United States and expressing my belief that the overwhelming majority of the people of Maine support him. I do so by quoting from the letter which I wrote on June 10, 1960, in response to letters I received from Maine.

My mail is evidence of this. You will be interested in the following analysis of my mail. Prior to my speech of May 24, 1960, I had received 10 letters from Maine residents expressing themselves on the U–2 affair and the summit meeting. Of those letters, six were critical of the President and four were commendatory of him.

Subsequent to my May 24, 1960, speech defending the President of the United States against these slurs, I have received 78 letters. Of this number 76 praised the President of the United States and my defense of him against such slurs—and only 2 condemned the President and my defense of him. These letters came from 15 of Maine's 16 counties.

When the slurring expressions were inserted in the CONGRESSIONAL RECORD on May 23, 1960, at page 10794, they were represented and offered as documentation from the Maine grassroots as the Senator who placed them in the CONGRESSIONAL RECORD stated: "The documentation which I now offer the Senate is from the grassroots—from the Maine grassroots."

Subsequently, the newspapers reported that the office of the Senator making this representation stated that at the time he had received a total of four letters.

I would not presume the role of authoritative documentation "from the grassroots of Maine" even on the total of the 88 letters I have received. But I do believe that a total of 88 letters from 15 of Maine's 16 counties is somewhat more representative than a total of 4. And the division of the overall 88 letters I received shows an 80-to-8 margin in favor of the President. With such a 90 percent recorded approval of the President and recorded condemnation of slurs charging that he had disgraced the United States and reflecting upon his mentality, it is difficult to conclude that the claimed "documention * * * from the Maine grassroots" made on May 23, 1960, is a justified claim.

AUTHORITY FOR BANKING AND CURRENCY COMMITTEE TO FILE ITS REPORT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Banking and Currency may have until midnight to file its report on the housing bill.

The PRESIDING OFFICER (Mr. GORE in the chair). Without objection, it is so ordered.

Subsequently, Mr. SPARKMAN, from the Committee on Banking and Currency, reported an original bill (S. 3670) to extend and amend laws relating to the provision and improvement of housing and the renewal of urban communities, and for other purposes, and sub-

mitted a report (No. 1575) thereon; which bill was read twice by its title and placed on the calendar.

WHEAT LEGISLATION

Mr. BENNETT. Mr. President, during the debate on the wheat bill—S. 2759—last Thursday, I was unable to be present for a vote on one amendment and the vote on final passage of the bill. I should like to have the RECORD show that I would have voted "yea" on both of these rollcalls. The first vote was on the amendment identified as "6–8–60—H," submitted by the Senator from Louisiana [Mr. ELLENDER] and the Senator from Florida [Mr. HOLLAND]. The amendment provided that wheat price supports be reduced from the 80 percent called for in the bill to 75 percent over the next 3 years, as fixed by law; and in return the acreage be cut 20 percent. In addition, the farmer will receive 50 percent payments in kind for the wheat he would have produced on the 20 percent of acreage cut.

Mr. President, I would have preferred the adoption of the first price support Ellender amendment (No. "6–8–60—G"), which would have provided that the price support shall be 75 percent of parity for 1961, 70 percent of parity for 1962, 65 percent of parity for 1963, and all succeeding years. However, since this amendment was defeated, I then would have voted for the compromise approach represented by the second Ellender price support amendment.

I also wish to be recorded as favoring final passage of the bill. The bill is not all that I would have desired in the way of wheat legislation, but I think it represents the best bill we could hope to get from this Congress. I thus wish to be recorded as favoring final passage of S. 2759.

Mr. CHURCH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I yield.

COMPARISON OF SOVIET AND WESTERN DISARMAMENT PROPOSALS

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD a table which I have had prepared as chairman of the Subcommittee on Disarmament.

This table compares three comprehensive disarmament proposals: the Soviet proposal of September 17, 1959; the Soviet proposal of June 2, 1960, which modifies the September 17 proposal; and the Western proposal of March 15, 1960. The table describes the types of weapons, and the suggested reduction and control measures, which are contemplated in each proposal and in which of three stages the reduction and control would occur.

It is my understanding that neither the Western plan of March 15 nor the Soviet statement of June 2 has been offered on a take it or leave it basis. Both papers are presented as documents for negotiation.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DISARMAMENT PROPOSALS—COMPARISON OF SOVIET PROPOSALS SEPT. 17, 1959, AND JUNE 2, 1960; AND WESTERN PROPOSAL, MAR. 15, 1960

SOVIET PROPOSAL, SEPT. 17, 1959	SOVIET PROPOSAL, JUNE 2, 1960	WESTERN PROPOSAL, MAR. 15, 1960
1st stage	*1st stage*	*1st stage*
Armed forces reduction: To reduce under appropriate controls the strength of the armed forces of the U.S.S.R., United States, and Communist China to the level of 1,700,000, and 650,000 each for United Kingdom and France; to reduce the forces of other states to appropriate levels.	Armed forces reduction: (Removed to 2d stage and only U.S.S.R. and United States specifically mentioned.)	Armed forces reduction: Initial force-level ceilings to be 2,500,000 for United States and U.S.S.R. and agreed appropriate force levels for certain other states. Collection of information on present force levels.
Armaments reduction: To reduce armaments to the extent that the remaining quantity would correspond to the determined level of armed forces.	Armaments reduction: Joint study to effect cessation of production of chemical and bacteriological weapons and on destruction of stockpiles of such types of weapons.	Armaments reduction: Each state shall store in its own territory under international supervision agreed types and quantities of conventional armaments specified in the agreement.
Missiles and other delivery systems: (No mention.)	Missiles and other delivery systems: All means of delivering nuclear weapons to be destroyed and their manufacture stopped including: strategic and tactical missiles; pilotless planes of all types; all military aircraft capable of delivering nuclear weapons; surface warships capable of being used to carry nuclear weapons; submarines of all classes and types; all artillery systems and other means of carrying nuclear weapons. The penetration of warships beyond the limits of territorial waters and the flights beyond limits of their national territory of military aircraft capable of carrying weapons of mass destruction shall be prohibited.	Missiles and other delivery systems: Joint study to assure compliance with an agreement on prior notification of missile launchings. Joint study of measures to give participating states greater protection against surprise attack including aerial inspection, ground observers, overlapping radar, notification of aircraft flights.
Nuclear weapons: (No mention.)	Nuclear weapons: Joint study to effect cessation of production of nuclear weapons and on destruction of stockpiles of such weapons. States having nuclear weapons shall not transfer them or information necessary for their manufacture to states which do not possess such weapons. Nonnuclear powers shall refrain from manufacturing nuclear weapons.	Nuclear weapons: Joint study to effect cessation of production of fissionable material for weapons purposes under proper controls. Study of ways to effect transfer of fissionable material from weapons stockpiles to peaceful purposes.
Withdrawal of foreign troops, dismantling of bases: (No mention.)	Withdrawal of foreign troops, dismantling of bases: All foreign troops shall be withdrawn. Foreign bases and depots shall be abolished.	Withdrawal of foreign troops, dismantling of bases: (No mention.)
Outer space: (No mention.)	Outer space: Space vehicles shall be launched only for peaceful purposes in accordance with agreement on inspection of launching sites. Launching into orbit or placing in outer space of special devices shall be prohibited until after final destruction of all means of delivering nuclear weapons.	Outer space: Prior notification to IDO (International Disarmament Organization) of proposed launchings of space vehicles and the establishment of cooperative arrangements for communicating to the IDO data obtained from available tracking facilities. Joint study of measures to assure compliance with agreement that no nation shall place into orbit or station in outer space weapons of mass destruction.

DISARMAMENT PROPOSALS—COMPARISON OF SOVIET PROPOSALS SEPT. 17, 1959, AND JUNE 2, 1960; AND WESTERN PROPOSAL, MAR. 15, 1960—Con.

SOVIET PROPOSAL, SEPT. 17, 1959—CON.	SOVIET PROPOSAL, JUNE 2, 1960—CON.	WESTERN PROPOSAL, MAR. 15, 1960—CON.
1st stage	*1st stage*	*1st stage*
Control measures: (No mention.)	Control measures: International on the spot control shall be established over the destruction of missiles, military aircraft, surface warships, submarines and other devices which could be used to carry atomic and hydrogen weapons. International inspection teams to be sent to military bases and troops on foreign territories to supervise elimination of these bases and withdrawal of troops to within national boundaries. Destruction of missile launching sites except for peaceful purposes. Control also established at airports and harbors. Right of inspection of all plants, factories, and shipyards involved in military production. By mutual agreement, permanent control groups may be set up at certain plants and installations. Right of inspection teams to examine rocket devices being launched for peaceful purposes and to be present at time of launching. Inspectors shall communicate with control council through existing channels of communication.	Control measures: Joint studies on all aspects of control. Establish International Disarmament Organization (IDO).
Keeping the peace: (No mention.)	Keeping the peace: (No mention.)	Keeping the peace: Joint study of means of preventing aggression and preserving world peace and security, as national armaments are reduced, by an international organization, to be an organ of, or linked to, the United Nations.
2d stage	*2d stage*	*2d stage*
Armed forces reduction: Completion of the liquidation of armed forces retained by the states.	Armed forces reduction: Reduction of the armed forces of all states to agreed levels, United States and U.S.S.R. reduced to not more than 1,700,000.	Armed forces reduction: Force level ceilings for all military significant states and appropriate inspection and verification measures to go into effect simultaneously with the establishment of force level ceilings of 2,100,000 for the United States and U.S.S.R. Conference with other states to include their acceptance of force level reductions, etc.
Armaments reduction: (No mention.)	Armaments reduction: Conventional weapons released by force reduction to be destroyed or used for peaceful purposes and destruction of all stockpiles. Prohibition of chemical and biological weapons production.	Armaments reduction: Participating states shall agree to place in storage depots agreed types and quantities of arms in agreed relation to force level ceilings.
Missiles and other delivery systems: (No mention.)	Missiles and other delivery systems: (No mention in 2d stage.)	Missiles and other delivery systems: Prior notification to IDO of proposed launchings of missiles and declarations of locations of launching sites and places of missile manufacture. Establishment of measures to protect against surprise attack.
Nuclear weapons: (No mention.)	Nuclear weapons: Complete prohibition, cessation of production, and destruction of existing stockpiles of all nuclear weapons.	Nuclear weapons: Cessation of production of fissionable materials for weapons purposes immediately after establishment of control system. Agreed quantities of fissionable material from past production to be transferred under international supervision and control to nonweapons purposes.
Withdrawal of foreign troops and dismantling of bases: Liquidation of all military bases on foreign territories. Troops and military personnel to be withdrawn from foreign territories to their own territories and are to be disbanded.	Withdrawal of foreign troops and dismantling of bases: (No mention in 2d stage.)	Withdrawal of foreign troops and dismantling of bases: (No mention.)
Outer space: (No mention.)	Outer space: (No mention in 2d stage.)	Outer space: The prohibition against placing into orbit or stationing in outer space vehicles capable of mass destruction to be effective immediately after the installation of agreed control system.
Control measures: (No mention.)	Control measures: Inspectors shall verify destruction of existing stockpiles of nuclear, chemical, and bacteriological weapons. Rights to inspect all production of atomic materials or atomic energy. Inspection by military specialists of disbanding of troops. Control organization to have free access to all material on military budgets.	Control measures: Establishment of measures to verify budgetary information. Further progressive development of the IDO. Inspection and verification measures on force levels, nuclear weapons production and outer space launchings.
Keeping the peace: (No mention.)	Keeping the peace: Joint study on measures to insure compliance with the treaty on general and complete disarmament after all measures provided for in treaty have been completed. Joint study on measures to maintain peace and security in accordance with the U.N. Charter. Control organization to report on progress toward disarmament to U.N. Security Council and General Assembly.	Keeping the peace: Initial establishment of the international organization to preserve world peace.

DISARMAMENT PROPOSALS—COMPARISON OF SOVIET PROPOSALS SEPT. 17, 1959, AND JUNE 2, 1960; AND WESTERN PROPOSAL, MAR. 15, 1960—Con.

SOVIET PROPOSAL, SEPT. 17, 1959—con.	SOVIET PROPOSAL, JUNE 2, 1960—con.	WESTERN PROPOSAL, MAR. 15, 1960—con.
3d stage	*3d stage*	*3d stage*
Armed forces reduction: War ministries, general staffs, all military and paramilitary establishments and organizations shall be abolished. All military training terminated. Military education unlawful. All forms of military services abolished.	Armed forces reduction: completion of the disbandment of the armed forces of all states. States shall retain only agreed upon police (militias) with small arms for internal law and order.	Armed forces reduction: Reduction of national armed forces and armaments for progressive safeguarded steps to levels required for internal security for fulfillment of obligations under U.N. Charter to the end that no single nation or group of nations can effectively oppose enforcement of international law.
Armaments reduction: All stocks of chemical and bacteriological weapons in the possession of states shall be removed and destroyed under international control. Scientific research for war purposes and the development of weapons and war materials shall be prohibited.	Armaments reduction: All remaining conventional arms whether held by armed forces or in stockpiles shall be destroyed or used for peaceful purposes. Military production shall be wound up except for limited output of small arms to be retained by states after completion of program of general and complete disarmament.	Armaments reduction: Reduced to levels required by states for internal security and fulfillment of obligations of U.N. Charter. Prohibition of chemical and biological weapons production.
Missiles and other delivery systems: Liquidation of materiel of Air Force.	Missiles and other delivery systems: (No further mention.)	Missiles and other delivery systems: Control of the production of agreed categories of military missiles and existing national stocks and their final elimination.
Nuclear weapons: Destruction of all types of nuclear and rocket weapons.	Nuclear weapons: (No further mention.)	Nuclear weapons: Prohibition of production of nuclear weapons. Further reduction of existing stockpiles, further transfer for peaceful uses, further steps to achieve elimination of these weapons.
Withdrawal of foreign troops, dismantling of bases: (No mention.)	Withdrawal of foreign troops, dismantling of bases: (No further mention.)	Withdrawal of foreign troops, dismantling of bases: (No mention.)
Outer space: (No mention.)	Outer space: (No further mention.)	Outer space: Measures to insure the use of outer space for peaceful purposes only.
Control measures: To control the implementation of measures on general and complete disarmament, there shall be established an international control body. The scope of control and inspection shall correspond to the extent of the phased disarmament of states. Control organization may set up a system of aerial observation and aerial photography over territories of states. Upon the attainment of complete and general disarmament the international control body shall have full access to all objects under control.	Control measures: Control organization can send inspectors to verify abolition of military establishments. As necessary, institute a system of aerial observation and aerial photography over the territory of states. Shall have right to send mobile inspection teams to any point and to any facility in the territories of states.	Control measures: Control over production of all remaining types of armaments to insure production is limited to that required for internal policing and obligations under U.N. Charter. Control of missile production. Control over military budgets.
Keeping the peace: (No mention.)	Keeping the peace: Measures to maintain peace and security in accordance with the Charter of the U.N. shall be carried out. States shall undertake to place at the disposal of the Security Council, when necessary, formations from the contingents of police (militia) retained by them.	Keeping the peace: Completion of the establishment of international organizations and arrangements to preserve world peace.

THE PEOPLE'S STAKE IN CONSERVATION

Mr. HUMPHREY. Mr. President, America has had such an abundance of natural resources throughout our history that the possibility of exhausting these resources is really quite difficult for us to imagine. But water, energy, forests, and even the air we breathe can be either used up or polluted in such a brief time that our Nation could be one of the "have-not" nations within 50 years. This is the point of an excellent brief summary of our natural resources balance at the moment prepared by the Public Affairs Institute for its "Washington Window" column dated June 10, 1960.

Mr. President, I ask unanimous consent that "The People's Stake in Conservation," a survey of our present resources picture and recommendations for the future, be printed in the RECORD.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

THE PEOPLE'S STAKE IN CONSERVATION

It's one thing to know that we are using up our natural resources so fast that in many ways we will be a "have-not" Nation within 50 years. It's another thing to do something about it.

Only as we put conservation to work in specific projects can we make the future look right for the next generation. For the big squeeze is on between the demands of our rapidly growing population and dwindling natural resources, and conservation holds the key to our future.

Here are some of the main problems, and what we can do about them:

1. Water: We are now using over two-thirds of our available fresh water for drinking and domestic uses, and to meet the demands of agriculture and industry. The experts tell us that within 20 years the East and Midwest will be using all available water, and be forced to reuse it, too. Unless we find ways to increase the supply and control the use of fresh water, many millions of people will be forced to use, and even to drink, purified sewage water.

Practically everything that can be done to change this situation is in the hands of government—local, State, regional, or national. Here they are:

Develop new supplies of fresh water and bring it to the places needing it. This means laws, engineering projects, finance running into billions, determination of best uses between industry and agriculture, river basin compacts because natural boundaries don't fit neatly into man-made county and State lines.

It means a program to desalt sea water to meet the needs of coastal cities, getting the costs down to where this is practical. It means, too, a rapidly expanding program of pollution control. Now the Federal Government puts up $1 for every $5 the cities invest in sewage treatment plants, but this doesn't even allow making any serious inroads on the immensity of the pollution problem, and contamination of our rivers and lakes is gaining ground.

With local tax sources overburdened, despite the President's veto of the antipollution budget, more Federal money is needed badly now. All these matters not only concern all citizens, but they can do something about them in an election year when candidates have to state their position on such issues.

2. Recreation has become a No. 1 conservation problem. It is a multimillion-dollar business, too, as people find their leisure time hanging heavy on their hands and the great outdoors beckons. Boating, fishing, hunting, hiking, camping, bird watching, golfing, picnicking, horseback riding—the whole range of healthful outdoor recreation is vitally important not only to us but to the next generation to follow. It has to be planned for now.

Already overcrowded facilities and natural recreational sites giving way to industry make costs mount while raising the issue of providing more space and perserving more natural beauty for the enjoyment of all the

people regardless of their ability to own them individually. But with another 100 million people joining us in the next 40 years, the demands on our public outdoor recreational facilities will be staggering.

What is needed right now is a well coordinated and properly financed program to acquire local, State and national parks, to establish and operate more public picnic and camping facilities, to create wilderness areas where nature can have its way. An inventory of the sand dunes, forests, lakes, sea and river shores has been made. If the public does not acquire them now, commercialization and speculation in such properties will drive the price up high. Even a slowly conservative, step-by-step effort to buy these natural recreation sites has met with the stubborn and successful resistence of a budget-minded President. The U.S. Park Service wanted $86 million in 1960 to begin the program, but the administration cut the figure to $16 million even before allowing the proposal to go to Congress. Here again the voters can have their say in the election year 1960.

3. Forests are at the crossroads where sawtimber is fast becoming scarcer and costlier as demand increases and we pay the price of the cut-and-get-out policies of the past. It is only a matter of a few years now before the cost of constructing tens of millions of new homes leaps skyward just because of scarce lumber.

Right now we need a national program of constructing access roads through forests to get out the mature and down timber, and to protect new and standing growth from fires and other hazards. We need to get started planting the 50 million acres of forest land now carrying too few or inferior trees.

A system of arranging long-term, low-interest-bearing loans to forest farmers which will be paid back out of the increased trees production requires Federal legislation. Most of our remaining forest reserves are on farm lands, presently little or poorly managed. We need to give these farmers both the technical and financial assistance that will produce sound conservation practices which will keep the country green and help us keep our living costs down.

4. The air now becomes a problem of major concern. Air pollution by factories, refineries, auto exhausts, trash burning, furnace smoke, is proving harmful to humans and animals, to plants and trees. Its control reaches beyond local communities, on even to the Federal Government level. New laws and new enforcement procedures are required.

5. Energy sources are poorly distributed and increasing in cost. There is still four-fifths of the hydroelectric power potential of our falling waters needing development. Yet no new starts have been undertaken by this administration during its almost 8 years in office. And the development of our energy resources has been held back a full generation. The failures of the Federal Power Commission to act in behalf of the consumers in regulating natural gas and electricity can cost the consumers millions of dollars. Already the mayors and Governors have protested to the Congress that the only consumer-minded member of the FPC was refused reappointment by the President.

Here are five big areas of conservation, all needing the attention of the voters in this election year. Here are concrete, practical proposals requiring your attention.

HEALTH FOR PEACE

Mr. HUMPHREY. Mr. President, the House Committee on Interstate and Foreign Commerce has favorably reported House Joint Resolution 649, a modified version of Senate Joint Resolution 41, the health for peace bill, which this body approved in May 1959.

The New York Times, in an editorial entitled "Health for Peace," published on June 7, 1960, the day the House committee was to consider the bill, strongly urged its approval not only because of the need for a broadened world program of health and medical research but also because the area of health cooperation is "one of the few remaining areas of United States and Soviet agreement"—a communications link which should be maintained.

However, the Times failed to give proper credit for initiation and development of the health for peace idea to our great colleague, the senior Senator from Alabama [Mr. HILL]. Certainly more than any other person, LISTER HILL gave inspiration, purpose and finally a legislative framework to the idea of cooperative international research in health, medicine and rehabilitation. Admittedly, the administration has supported this idea, but the imagination and determination—the moving force—behind the plan were provided by our good and respected friend, LISTER HILL.

Mrs. Albert D. Lasker, a most outstanding leader in health research in our Nation, last week released a report pointing out that disease and disability take an annual toll of $35 billion which is 88 times the amount spent on medical research by the Federal Government. That means that we spend only pennies for prevention in contrast to the cost in dollars to American citizens who are ill and disabled.

Certainly, to achieve the great objectives of international cooperation and good will and the relief of human suffering, it is imperative that health for peace be made a national policy and program.

Mr. President, I ask unanimous consent that the New York Times editorial of June 7, 1960, entitled "Health for Peace," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HEALTH FOR PEACE

Today the House Committee on Interstate and Foreign Commerce is scheduled to vote on House Joint Resolution 649. This resolution would broaden U.S. support of international research in health, medicine, and rehabilitation. It is the House version of the Senate's health-for-peace bill, approved 63 to 17 in May 1959.

The bill's objections are to encourage and support research, the exchange of information on research, the training of research personnel, and the improvement of research facilities throughout the world. It has been enthusiastically endorsed by our Nation's top scientific leaders and by all voluntary health agencies. The Subcommittee on Health and Safety of the House committee approved it unanimously.

The health-for-peace bill is a direct outgrowth of President Eisenhower's proposals in his 1958 state of the Union message. His proposal was welcomed by Soviet Premier Khrushchev. Since the disastrous and short-lived summit meeting in Paris, the health-for-peace program is one of the few remaining areas in which there is United States and Soviet agreement. It is imperative that the House of Representatives committee take affirmative action today on this legislation and so maintain this link of communication.

ARMY ANNOUNCEMENT IMPLEMENTING HUMANE SLAUGHTER ACT

Mr. HUMPHREY. Mr. President, last Friday on the floor of the Senate I called attention to an announcement by the Military Subsistence Supply Agency that it would require certification of compliance with the provisions of the Humane Slaughter Act only in contracts exceeding $2,500.

As the sponsor of this legislation, I was disturbed to learn that the Army was attempting to exempt certain suppliers from the strict provisions of the act. I pointed out to the Senate that the act most explicitly provides that there are to be no exceptions or exemptions. All suppliers of livestock products to Federal agencies are required to certify that they are in accord with the law—subject to criminal penalty for making a false statement.

This morning, I am pleased to report I received a letter from the Assistant Secretary of the Army—Logistics—Courtney Johnson, informing me that the Army intends to comply with the act, and that the "Notice to the Trades" as published by the Military Subsistence Supply Agency was being amended so as to remove the exemption for contracts under 2,500.

I commend Mr. Johnson for his prompt action in correcting this notice once it was called to his attention. I ask unanimous consent that the original "Notice to the Trades" as issued by the Military Subsistence Supply Agency on June 1, together with the letter I received today from Mr. Johnson, be printed at this point in the RECORD.

There being no objection, they were ordered to be printed in the RECORD.

HEADQUARTERS,
MILITARY SUBSISTENCE SUPPLY AGENCY,
Chicago, Ill., June 1, 1960.

Headquarters Notice No. 20(60).
Subject: Humane methods of livestock slaughter.

NOTICE TO THE TRADE

GENTLEMEN:

1. All contracts after June 30, 1960, will be made under the provisions of the act entitled "Humane Methods of Livestock Slaughter," title 7, United States Code, sections 1901–1906. Section 1903 of said act concerns itself with Government contracts and is as follows:

"SEC. 1903. The public policy declared in this chapter shall be taken into consideration by all agencies of the Federal Government in connection with all procurement and price-support programs and operations, and after June 30, 1960, no agency or instrumentality of the United States shall contract for or procure any livestock products produced or processed by any slaughterer or processor which in any of its plants or in any plants of any slaughterer or processor with which it is affiliated slaughters or handles in connection with slaughter livestock by any methods other than methods designated and approved by the Secretary of Agriculture (hereinafter referred to as the Secretary) pursuant to section 1904 of this title: *Provided*, That during the period of any national emergency declared by the President or the Congress, the limitations on procurement required by this section may be modified by the President to the extent determined by him to be necessary to meet essential procurement needs during such emergency. For the purposes of this section a slaughterer or processor shall be deemed

to be affiliated with another slaughterer or processor if it controls, is controlled by, or is under common control with, such other slaughterer or processor. After June 30, 1960, each supplier from which any livestock products are procured by any agency of the Federal Government shall be required by such agency to make such statement of eligibility under this section to supply such livestock products as, if false, will subject the maker thereof to prosecution, section 287 of title 18."

2. In implementing the act, the Military Subsistence Supply Agency will include a new contract clause in all contracts for articles of food derived from livestock products. The clause is attached as exhibit 1. The clause will appear in all notices of intent to purchase scheduled for closing after June 30, 1960. Contractors are required to submit the signed statement, exhibit 2, to each regional headquarters with which it desires to contract, prior to June 30, 1960, in order to remain on the active mailing list of that headquarters as a source of supply. As contractors qualify by submitting a signed statement they will be placed on the mailing list.

The statements will be retained by each regional headquarters and it will be unnecessary to submit further statements for each contract. The contract clauses and the statement have been designed to make the statement applicable to each subsequent contract awarded and to claims presented thereunder. Invoices submitted are claims.

3. The act is broad in scope and many different situations may arise where interpretation is necessary. As a guide and until more authoritative interpretations are available the Military Subsistence Supply Agency intends to interpret the act as follows:

(a) The words "livestock products" are defined to mean any article of food, or any article intended for or capable of being used as food, for either humans or animals, which is derived or prepared in whole or in part, from any portion of any cattle, calf, swine, sheep, goat, horse, or mule. Supplies, the animal product portion of which is less than 5 percent by weight of the net unit weight, are not included in the above definition.

(b) The product delivered must under all conditions emanate from livestock which have been slaughtered by a complying slaughterer.

(c) A slaughterer complies only when it slaughters all species of livestock humanely in all of its plants and its affiliates do likewise.

(d) A multiplant slaughterer complies only if all of its plants slaughter all species humanely even though some of its plants are not under USDA jurisdiction or inspection, and are not concerned with production of the items to be delivered.

(e) A slaughterer-processor which slaughters in compliance with the act cannot deliver a product slaughtered by a slaughterer which does not comply.

(f) A slaughterer-processor which does not comply is not eligible even though it processes for delivery a product, the components of which were obtained from a complying slaughterer.

(g) A slaughterer-processor which slaughters all species humanely may process products from a nonhumane slaughterer, not an affiliate for non-Government business, and still comply, so long as these products are not furnished the Government.

(h) A nonslaughtering processor or other source of supply must deliver a product emanating from a complying slaughterer.

(i) A nonslaughtering processor may process products from a nonhumane slaughterer, not an affiliate, for non-Government business and still comply, so long as these products are not furnished the Government.

(j) The requirements of the act do not apply to livestock products emanating from livestock slaughtered outside the United States, its territories, possessions, and Puerto Rico.

(k) In determining whether a slaughterer complies with the act, only those slaughtering operations conducted by the slaughterer and its affiliates which take place within the United States, its territories, possessions, and Puerto Rico will be considered.

4. The Secretary of Agriculture has designated humane methods of slaughter. This designation is set out in part 180, title 9, Code of Federal Regulations. These regulations have been published in the Federal Register as follows: 24 F.R. 1549, March 3, 1959; 24 F.R. 4952, June 18, 1959; and 24 F.R. 6434, August 11, 1959.

5. Contractors are seriously warned to consider the full effect of signing the required statement. The act quoted above required that false statements be made subject to prosecution under section 287 of title 18, United States Code. The statement and contract clause have been prepared so as to provide for such prosecution. Section 287 of title 18 provides as follows:

"Whoever makes or presents to any person or officer in the civil, military, or naval service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent, shall be fined not more than $10,000 or imprisoned not more than five years, or both."

Statements should be signed by authorized persons only after careful consideration of the act and the particular circumstances of the signer's business.

6. Your cooperation is earnestly solicited so that there will be a minimum of interruption with this agency's supply mission. This agency will be pleased to answer any questions which you may have insofar as it is able. It must be recognized that in the absence of judicial interpretation there exists an area of uncertainty in interpretation.

Sincerely yours,

JOHN F. DILLON,
Lieutenant Colonel, QMC,
Chief, Purchasing Division.

CONTRACT CLAUSE

Humane methods of livestock slaughter (applicable to contracts in excess of $2,500):

(a) In compliance with the act entitled "Humane Methods of Livestock Slaughter," title 7, United States Code, section 1901–1906, no livestock products delivered in performance of this contract shall have been produced or processed by any slaughterer or processor which in any of its plants or in any plants or any slaughterer or processor with which it is affiliated, slaughters, or handles in connection with slaughter, livestock by any methods other than methods designated and approved by the Secretary of Agriculture pursuant to section 1904 of the said act.

(b) The contractor shall have furnished the Military Subsistence Supply Agency a statement of eligibility before award of this contract and such statement is hereby incorporated by reference. Such statement shall be considered in connection with, and as a part of, any and all claims by the contractor, under this contract, upon or against the United States or any department or agency thereof as required by section 1903 of said act.

(c) The words "livestock products" are defined to mean any article of food, or any article intended for or capable of being used as food, for either humans or animals, which is derived or prepared in whole or in part, from any portion of any cattle, calf, swine, sheep, goat, horse, or mule. Supplies, the animal product portion of which is less than 5 percent by weight of the net unit weight, are not included in the above definition.

(d) A slaughterer or processor shall be deemed to be affiliated with another slaughterer or processor if it controls, is controlled by, or is under common control with such other slaughterer or processor.

STATEMENT OF ELIGIBILITY

In accordance with the provision of the act entitled "Humane Methods of Livestock Slaughter," title 7 United States Code, section 1901–1906, and in particular with section 1903 thereof:

(Name of contractor)
of ---
(Address of contractor)

states that any livestock products delivered under contracts entered into after June 30, 1960, with the Military Subsistence Supply Agency, except contracts not in excess of $2,500, will not have been produced or processed by any slaughterer or processor, which in any of its plants, or in any plants of any slaughterer or processor with which it is affiliated, slaughters, or handles in connection with slaughter, livestock by any methods or other than methods designated and approved by the Secretary of Agriculture pursuant to section 1904 of said act.

--- hereby
(Name of contractor)

agrees that this statement is to be incorporated by reference in each of such contracts and agrees further that it is to be considered a part of each and every claim by ---
(Name of contractor)

upon or against the United States or any department or agency thereof arising under these contracts.

This statement is made with full knowledge that it will be relied upon by the Military Subsistence Supply Agency in entering into contracts for livestock products and in payment of claims thereunder.

(Name of contractor)
By ---

Title

Address
Witness: ---

(NOTE.—In case of corporation, witnesses not required but certificate below must be completed. Type or print names under all signatures.)

Warning: Section 1903, title 7, United States Code, expressly provides that statements of eligibility will be such that, if false, the maker will be subject to prosecution under section 287 of title 18, United States Code which provides as a penalty for false, fictitious, or fraudulent claims a fine of not more than $10,000 or imprisonment for not more than 5 years, or both.

CERTIFICATE

I, ---, certify that I am the --- of the corporation named as contractor herein; that --- who signed this statement on behalf of the contractor was then --- of said corporation; that said statement was duly signed for and in behalf of said corporation by authority of its governing body, and is within the scope of its corporate powers.

DEPARTMENT OF THE ARMY,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, D.C., June 13, 1960.

Hon. HUBERT H. HUMPHREY,
U.S. Senate.

DEAR SENATOR HUMPHREY: I have noted your comments regarding the Army implementation of the Humane Slaughter Act in the CONGRESSIONAL RECORD for June 10, 1960.

I assure you of our full cooperation in the implementation of this law. Consequently the Department of the Army circular which is being published implementing the law makes no provision for any exemption of purchases of livestock products under $2,500. Purchases of all dollar amounts, which are made in the United States and its possessions, are subject to this law insofar as the Department of the Army is concerned.

I have taken the necessary action to have the notice to the trade which was published by the Military Subsistence Supply Agency amended to comply with the policy I have stated above.

Sincerely yours,

COURTNEY JOHNSON,
Assistant Secretary of the Army (Logistics).

AWARD OF SCHOLARSHIP TO SHARON PAULSEN, HOOD RIVER, OREG.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an article published in the Oregon Legionnaire of June 1960, announcing the award of a scholarship to Miss Sharon Paulsen of Hood River, Oreg.

Miss Paulsen has received a $1,000 scholarship from the National American Legion Auxiliary and is the recipient of one of 10 such awards throughout the Nation. Miss Paulsen plans to attend Willamette University in Salem, and I am delighted to know that she hopes to becomes a schoolteacher.

As this story indicates, these scholarships are available only to daughters of deceased veterans.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOOD RIVER STUDENT WINS AUX NATIONAL SCHOLARSHIP

Sharon Paulsen of Hood River is the State winner of the National President's scholarship of $1,000 given by the National American Legion Auxiliary, Dorothy Oswald, education and scholarship chairman announced.

Miss Paulsen has been a top scholastic student in her 4 years at Wy'east High School in Hood River. She was chosen valedictorian of her class and has been in several activities in her school including vice president of the Honor Society, Latin Club, Girls League, president of the Future Teachers of America, German Club, and Student Council. She attends the Odell Methodist Church where she teaches Sunday school.

Miss Paulsen plans to go to Willamette University in Salem. She will major in English or history. Her desire is to become a schoolteacher.

Her application was submitted by the Department of Oregon of the Auxiliary to the Western vice president for judging. There are two $1,000 awards given to each of the five divisions in the Nation. This scholarship is open only to daughters of deceased veterans.

Virginia Whiting of Oregon City placed first in the Oregon contest and will receive $300. Second place winner is Miss Rosemary Suckow of Grant High School, Portland, and will receive $150.

Judges for the scholarship were five faculty members from Willamette University, with Mrs. Robert Ewalt, chairman. Character, Americanism, leadership, scholarship, and basis of need were the qualifications for the selection.

PURCHASE OF FURNITURE BY STATE DEPARTMENT

Mr. DIRKSEN. Mr. President, I should like to make some response to my very lovable friend, the distinguished junior Senator from Wisconsin [Mr. PROXMIRE], who on yesterday took umbrage and said some things about the Secretary of Commerce.

One point the Senator from Wisconsin made yesterday was that the Secretary of Commerce is one of seven members of the so-called Foreign Service Buildings Commission, which was established by act of Congress in 1926. However, the important thing he did not say—and I feel certain he did not know it—is that the Commission has not actually met in the last 10 years. So, notwithstanding the membership of the Secretary of Commerce on the Commission, it could have no effect if the Commission never met.

I point out also that the chairman and the ranking Republican member of the Senate Committee on Foreign Relations and the chairman and ranking Republican member of the House Committee on Foreign Affairs are members of the Commission.

Then I point out that by the President's Reorganization Plan No. II, effective July 1, 1939, all the functions of the Foreign Service Buildings Commission were transferred to the State Department, except advisory functions. But since the Commission has not met in 10 years, obviously it could have no influence; it could have no effect. That is the first item which deserves emphasis.

The second item in the statement made by my esteemed friend, the Senator from Wisconsin, is that the furniture for the American Embassy at Caracas was purchased without proper legal authorization. The Department of State possesses this authority, because in Public Law 547, 79th Congress, approved July 25, 1946, the pertinent language reads:

> Sums appropriated pursuant to this act shall be available for the purposes and subject to the conditions and limitations of the above acts, except that there shall be no limitation on the amount to be appropriated in any one year and that expenditures for furnishings shall not be subject to the provisions of section 3709 of the Revised Statutes.

That is the provision which calls for competitive bidding. But the Comptroller General evidently had reference to the 1926 act, not to the 1946 act.

As to the third item which was emphasized—namely, that competitive bids were not solicited in connection with the procurement of furniture for the Embassy, in violation of established practice and the law—the State Department points out that it first checked with four additional American firms, for prices on comparable items of basic office furniture, to establish that the prices quoted by the Mueller Metals Corp. were competitive. The Department of State says, further, that its records in this transaction indicate that this check was made during July 1959.

The fourth item which the distinguished Senator pointed out was that the Foreign Service Buildings Commission granted nine contracts to the Mueller Metals Corp. for furniture. The fact is that the Commission did not grant any contracts. The contracts were granted by the State Department; and it does confirm that nine such contracts were made, totaling $89,400, of which $60,000 was for the Embassy at Caracas.

The fifth item is that the operator of the company, Mr. Frederick Mueller, was flown to Caracas at Government expense. In part, that is true, in the sense that he flew the furniture on Flying Tigers Airline from Grand Rapids to Caracas, to assemble and to install the furniture. The Department of State did pay for the return trip by a commercial airline.

The sixth item is that the Department incurred excessive transportation costs on the furniture shipment to Caracas. The basic fact is that the new Embassy building was ready for occupancy on November 1, 1959. The Department was committed to pay $11,000 a month rental on the building, through the lease-option to purchase. Having concluded with the private owner the contract under which the building was constructed, and when faced with the necessity to transport, assemble, and install 35 tons of office furniture in Caracas, and with a longshoreman's strike in progress, these alternatives were presented to the State Department: First, wait out the strike, and run the risk of having a brand new building stand idle, at a cost of $11,000 a month, and continue to pay rent on the old properties at $3,796 a month; or, second, incur extra costs of shipment by air, in the amount of $7,785, and obtain full benefit of the new building at the earliest possible date.

The seventh item was that the furniture should have been acquired from Venezuelan firms. The fact of the matter is that we have no Venezuelan currency and no credits. Venezuelan money is hard money; as a matter of fact, it is at a premium, so far as I know, insofar as the American dollar is concerned. When the State Department is confronted with a situation of that sort, it likes to acquire furniture and furnishings from American firms, when prices and delivery schedules and other considerations are reasonable.

It is recognized that costs in Venezuela are among the highest in the world. And if the furniture had been bought there, its cost would have exceeded the $2.45 per square foot which my distinguished friend from Wisconsin mentioned with respect to furniture from Denmark and Sweden.

So, Mr. President, it is apparent that the junior Senator from Wisconsin was mistaken in his facts with regard to the transaction.

I think it behooves each Member of Congress to be meticulously careful in ascertaining all the facts, before making serious charges involving a member of the President's Cabinet, although I must say for the distinguished Senator from Wisconsin that he did say the Secretary of Commerce had no fiscal or other iden-

tity with the Mueller Metals Co. But I think a careful scrutiny of all the facts involved shows that the State Department did exercise good judgment in the matter, and that there is no apology to be made.

I emphasize this one very essential fact: The Secretary of Commerce has only nominal identity with the Foreign Service Buildings Commission, which has not met in 10 years; and I do not know why it exists, except in an advisory capacity. So obviously, there could be no connection between the Secretary of Commerce and the State Department's procurement of this furniture for the new Embassy in Caracas.

So that is the rest of the story, and I think it puts the matter in far better light.

I will not say that my friend is not meticulous, because he had his statement delivered to my office at exactly 11:51 a.m., yesterday; and I know that whoever brought it there asked that my office sign for it and indicate exactly the hour and minute when it was delivered; and that was 9 minutes before the session on yesterday convened. I do not quarrel about that; the Senator was under no obligation to send me the statement.

I have only one interest in the matter, and that is that the whole story be told.

Mr. PROXMIRE. Mr. President, will the Senator from Illinois yield?

The PRESIDING OFFICER (Mr. GORE in the chair). Does the Senator from Illinois yield to the Senator from Wisconsin?

Mr. DIRKSEN. I yield.

Mr. PROXMIRE. Mr. President, the Senator from Illinois has disputed me on seven specific points. I think I can show my statement yesterday was correct on every single one of them.

The first point was in regard to the membership of the Secretary of Commerce on the Foreign Service Buildings Commission. What I was insisting on—and I did so consistently—was that he was a member of the Commission, which still has the legal responsibility under the law for furnishing embassies. That has never been changed. It is true that the Commission has not met for a long time. But the point is that the Secretary of Commerce has been the number 1 hatchet man of the administration in attacking waste and spendthrifts. He has the responsibility and the authority by law to act in this particular field. I pointed out that when the State Department purchased furniture from his son's company and flew it to Venezuela, for $30,000—the furniture itself was worth $70,000—the Secretary of Commerce, who has been so much interested in economy, had an opportunity to show his interest in economy, and to show it responsibly, because he has this legal power.

Mr. DIRKSEN. The point is that the Commission has no power; it can act only in an advisory capacity. And it has not met for 10 years. So what can the Senator make out of all that?

Mr. PROXMIRE. I make out of it the fact that the Commission can meet and can exercise its functions. And certainly Mr. Mueller as a member of the Commission, and as Secretary of Commerce can protest and I am sure correct this extravagance so close to home, his home.

Mr. DIRKSEN. But the Commission has no power.

Mr. PROXMIRE. But the Commission can use the authority it has by law.

The next point of the minority leader was that my charge that competitive bids were not solicited in the procurement of the furniture for the Embassy at Caracas, was wrong; that the State Department was not in violation of established practice and the law, that the Comptroller General had overlooked the 1946 law passed by the 79th Congress, and had reference to the 1926 law.

The fact is that the Comptroller General in his letter to me specifically cited the law of 1946, when he wrote to me as follows:

> 5. The Department cites Public Law 547, 79th Congress, which amended the Foreign Service Buildings Act of May 7, 1926, as the authority of the Secretary of State to deviate from established rules of competitive bidding. As we stated in our letter of May 6, 1960, we find nothing in this act or in the pertinent appropriation act which would authorize the Department to negotiate contracts for the purchase of furniture; and we are not aware of any reason for the deviation by the Department in this case.

Mr. DIRKSEN. The Comptroller General should adjust his bifocals, because the language I read a moment ago, from the appropriation bill, is as clear as crystal that there is an exception to the basic statute 3709.

Mr. PROXMIRE. I am sure there may be an exception.

Mr. DIRKSEN. That is the point.

Mr. PROXMIRE. But the point of the Comptroller General—and it is a completely valid point—is that in this particular case that exception apparently did not apply; in this particular case there is no reason why the State Department should not have sought competitive bids. There are many hundreds of manufacturers of steel furniture in the United States, and there may be some in Venezuela; but no attempt was made to find whether they could supply this furniture to the Embassy.

Mr. DIRKSEN. But the Department checked with them.

Mr. PROXMIRE. The State Department and the Comptroller General tell me they did not check, and that there was no effort to check with firms in Venezuela.

The Senator knows that four additional United States firms were checked.

Mr. DIRKSEN. That is correct.

Mr. PROXMIRE. For I put that information into the RECORD.

The very interesting point is that they checked only on five or six items; and on most of them, the Mueller Co. was high, not low.

In connection with the State Department's selection of the four firms, the Department was able to find that on only two items the Mueller firm was low. It seems to me it is a very weak argument, on that basis, to say that competitive bids in this case were not necessary.

Mr. DIRKSEN. Let me ask my friend—and this question tends to put him on the spot a little—when we have no Venezuelan credits——

Mr. PROXMIRE. But the fact is that we do have Venezuelan credits. I have just checked with the State Department, and, as of May 31, 1960, they had $138,000 of Venezuelan bolivars under Public Law 480.

Mr. DIRKSEN. But are they not limited?

Mr. PROXMIRE. This was a transaction with Mexico.

Mr. DIRKSEN. I give the Senator their language:

> No Venezuelan currency or credits were available to the Department of State in Venezuela for the purchase of office furniture.

Mr. PROXMIRE. According to the Comptroller General, no attempt was made by the State Department even to determine whether they could purchase it there.

The fourth point made by the Senator from Illinois is that the Foreign Service Buildings Commission granted nine contracts. The fact is that the State Department granted them.

Mr. DIRKSEN. Certainly, it did.

Mr. PROXMIRE. The State Department granted nine contracts to Mueller Metals Corp.

Mr. DIRKSEN. The Foreign Service Buildings Commission has no jurisdiction or authority to grant contracts at all.

Mr. PROXMIRE. The State Department granted those contracts since Mr. Mueller came into the Government as a top official.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. HUMPHREY. What is the rationalization for the payment of $30,000 in air freight on $70,000 worth of furniture? I read in the press the Senator's remarks relating to this interesting instance of extravagance. I was visiting with a group of businessmen in my city of Minneapolis. When they learned that $30,000 was paid for air freight they were a little surprised. They wondered what was the rush for furniture to the point of shipping it by air freight, when there seem to be good ocean connections. There are many ships traveling from the United States to Venezuela. Will the Senator take time again to tell us a little about that?

Mr. PROXMIRE. The Department says the situation was that it had to get the furniture to Caracas as of November 1, because there was the threat of a longshoremen's strike. It said, because of that threat there might be some danger the furniture could not be transported there by ship. The fact is that the longshoremen's strike ended by October 9. The furniture did not have to be down there on November 1. It did not have to be down there until November 30. The fact is that the Department had a contract to continue to occupy

the old building until November. It did not have to be vacated until November 30. There was not a penny of saving by getting the furniture down there at the end of October. It could have gone down there by the end of November, there was no saving to the Federal Government not a nickel in getting the furniture down to Venezuela quickly.

Mr. HUMPHREY. Does the Senator know how long it takes to transport furniture by ocean freight from a port in the United States to Caracas?

Mr. PROXMIRE. It takes a matter of days, not a matter of months.

Mr. HUMPHREY. Could it be done in 2 weeks?

Mr. DIRKSEN. Does the Senator mean furniture can be gotten from Grand Rapids to Caracas in 2 weeks?

Mr. PROXMIRE. It was a matter of getting it there in 7 weeks.

Mr. DIRKSEN. More likely, it might have taken 2 months, but the State Department emphasizes the fact that the building was ready for occupancy on the first of November. There was a longshoremen's strike. To be sure, it was settled. But the Department could not wait until the last minute in order to make provision for the furniture. In the meantime, there was an empty building on which we were paying $11,000 a month, and $3,700 a month on the old building. Those were the alternatives.

Mr. PROXMIRE. Here are the facts. On October 9 the longshoremen's strike ended. The first batch of furniture was not put on the plane and flown to Caracas until October 15, and the second until October 22. What is the matter with the State Department on October 9 when the strike is over cancelling the air flight and sending by boat?

Mr. DIRKSEN. How could the Department tell when the strike was going to end?

Mr. PROXMIRE. After October 9 it had ample time in which to cancel the order. It is very easy. That happens all the time in business. Any business concern would make the saving. It is the efficient and obvious way to handle it.

Mr. HUMPHREY. What was the monthly charge on the old building?

Mr. DIRKSEN. Three thousand seven hundred dollars.

Mr. HUMPHREY. And on the new building?

Mr. DIRKSEN. Eleven thousand dollars a month.

Mr. HUMPHREY. So even if the Government had paid the rent for a month and left the furniture there, the rent would be less than the cost of the shipment of the furniture by air freight.

Mr. DIRKSEN. Several alternatives faced the Department. The question was what to do in order to get the quickest possible occupancy of the Embassy building with the longshoremen's strike in process at the time these arrangements were being made. It could not tell when the strike was going to end, but there was a building it could not occupy. It added up all of the considerations in terms of dollars and cents, convenience, and everything else, and said, "This is the proper thing to do."

Mr. PROXMIRE. There was not one single penny saved by flying the furniture down to Caracas. The fact is that the Department had to occupy the old building until the end of November. It was just as easy to occupy the old building until the furniture could come down by ship. Instead of that, the Department chose to fly the furniture down. It had ample time, after October 9, to cancel the flight by plane. It did not choose to do that. It incurred the additional cost of flying the furniture down.

Mr. DIRKSEN. Frankly, I talked with the public buildings official in the State Department and had him come to see me. He is a very reliable and honest sort of person. I think, faced with those alternatives, a perfectly proper judgment was made in the circumstances. So that is the whole story.

Mr. PROXMIRE. The Senator from Illinois has said that the son of the Secretary of Commerce was flown to Caracas, at Government expense. He went there to install the furniture.

Mr. DIRKSEN. Yes, he was flown there with the furniture. I flew with furniture once in Asia. I will never do it again as long as I live.

Mr. PROXMIRE. The final two points made by the Senator from Illinois, thanks to the Senator from Minnesota, have now been cleared up. The assertion was made that some $11,000 was saved by flying the furniture to Caracas. I should like to point out that not a penny was saved by flying the furniture there. The rent still had to be paid on the two buildings during all this time. The fact is that it was an excessive cost.

Mr. DIRKSEN. Mr. President, I think yesterday the Senator from Wisconsin did pretty well with an extremely weak case.

Mr. PROXMIRE. Let me say to the Senator from Illinois that I know of no man in the country who can do more with no case at all than can the distinguished minority leader. Anyone who could be minority leader of the Republican Party for the past 2 years, in view of the record of this administration, and do the magnificent job the Senator from Illinois has done deserves the profound thanks of the country, as well as of the Republican Party; it is an amazing performance.

Mr. DIRKSEN. I thank the Senator.

Mr. HUMPHREY. The Senator's case might have been more appealing yesterday, but when one takes the case he has made today and contrasts it with the evidence put forth by the Senator from Illinois as submitted by the State Department, the case of the Senator from Wisconsin looks like the Rock of Gibraltar—solid. It is like Prudential itself.

Mr. PROXMIRE. I thank the Senator from Minnesota.

Mr. President, as we conclude the discussion, let me point out there was no attempt to secure competitive bids; and, in the judgment of the Comptroller General, that is at variance with the law. This viewpoint may be disputed, but the fact is there were no competitive bids.

Second, the furniture was flown to Caracas unnecessarily and at highly excessive cost. As compared to the cost of similar furniture in similar Embassies, the cost of the furniture was much higher.

Third, the president of the furniture company which sold the furniture to the Government without competitive bidding is the son of a very high, very influential official of the Government, a powerful critic of Democratic waste.

THE U–2 INCIDENT AND SUMMIT FAILURE

Mr. MUSKIE. Mr. President, over the past few weeks, there have been several references in the RECORD relative to the reaction of my constituents to the U–2 incident and the summit failure. For that reason, I ask unanimous consent that there be printed at this point in the RECORD, my latest newsletter, which deals with this subject.

There being no objection, the news letter was ordered to be printed in the RECORD, as follows:

NEWSLETTER FROM THE OFFICE OF SENATOR EDMUND S. MUSKIE, JUNE 8, 1960

What consideration should a Senator give to letters which he reecives from constituents?

It has been my policy always to read them thoughtfully, whether or not they expressed points of view different than my own, whether or not they were critical of me in whatever degree, and whether or not the writers expressed themselves in ways pleasing to me.

This will continue to be my policy because I have found it to be a useful one. It has been useful for at least the following reasons:

1. Such letters have drawn my attention to points of view which might otherwise have escaped my attention.

2. They have shaped or influenced my judgment on pending legislation.

3. They have indicated the extent and depth of concern felt by Maine citizens on given public questions.

4. They have injected a healthy sense of humility in this Senator's views of his own actions and judgments.

I continually learn valuable lessons from these letters. An experience of the past 2 weeks is a case in point.

Following the failure of the summit meeting in Paris, the initial letters I received from Maine constituents were unanimously and rather harshly critical of the President's handling of our affairs before and after the U–2 incident.

I considered them carefully and, on what appeared to be an appropriate occasion, shared some of them with my colleagues in the Senate in order to indicate the depth of the concern felt by at least some of my constituents.

Subsequently I received other letters, at least equally harsh in their criticism of me for giving such attention to the first group, and quite vehement in their defense of the President.

Neither group of writers was large, and one or two in each group wrote with moderation; but the remainder in each group wrote in what could hardly be described as the language of restraint. Nevertheless, I felt that the writers, in both groups, were entitled to use language which, in their judgment, would adequately convey their feelings, even though I might prefer a more moderate approach.

Apparently they are not always inclined to be as tolerant of each other; and it is

not safe for a Senator to let one group know what the other group is saying to him.

Constituents ought to know and appreciate the fact that, however strongly they may hold a point of view on an issue, there are probably other constituents who are equally vehement on the other side of the issue, and that a Senator feels dutybound to listen to both.

Moreover, if a constituent writes to his or her Senator, I assume the intent is to influence, not only that Senator, but, through him, other Senators. More than once I have conveyed the views of constituents to other Senators, to Senate committees, and to executive agencies, at times at the explicit request of the constituent, and at other times because I felt the constituent made his own case best in his own words.

Returning, for a moment, to the U–2 incident, let me state my own views, lest they be confused with those of my correspondents.

First, some general comments:

1. Espionage, or intelligence, activities are a fact of modern national life which we have no choice but to accept. Maximum precautions in the interests of national security and survival require it. It is the grossest kind of cynicism for the Russians to pretend otherwise.

2. With respect to use of the "spy plane" as an instrument of such activities, the value of intelligence obtained by such means must be weighed against the risk that such a plane, appearing as an unidentified "blip" on a Soviet radar screen, might trigger Russian missiles and the start of that nuclear war which nobody can win. How would we want our continental defenses to react under similar circumstances? Have we, or the Russians, had an effective means of determining whether such an unidentified plane or planes are armed with nuclear weapons about to be fired in anger?

It should be noted that Malinovsky, Soviet Defense Minister, recently announced that he has ordered immediate rocket strikes at the takeoff base of any such spy plane. Fortunately, this policy does not appear to have been in effect over the past 4 years.

And, of course, the President has now ordered a discontinuance of such flights.

3. It is reasonable to conclude that the Russians were happy to have the U–2 incident as an excuse for wrecking the summit conference. It is not as easy to judge whether they would have found one as satisfactory as a coverup of Soviet intransigence if this incident had not occurred.

4. Khrushchev in Paris was crude, brutal, arrogant, and completely cynical because he thought the weight of world opinion would hold that he was justified in the light of the U–2 incident. Fortunately, from our point of view, he overplayed his hand and the effect was to solidify the Western Allies.

5. We should leave no doubt in the Soviet mind that Americans are united in the face of the Soviet threat, whatever form it may take.

6. The President is quite right in saying that, notwithstanding the recent setbacks, we must continue to seek ways to eliminate points of friction and to reduce tensions. Negotiations through traditional diplomatic channels are likely to be the principal instrument for this purpose through the foreseeable future. I sense that most Americans, including official Washington, share serious doubts that a trip to the summit should again be undertaken.

7. A rather grim sort of satisfaction to be drawn from the current state of affairs is that we need no longer debate whether Soviet smiles are sincere or not. There are no smiles. This is a harsh world, and perhaps a more realistic one than the one we knew during the "spirit of Camp David" period.

If the foregoing comments are valid, what remaining questions are there to be asked and answered? In order to maintain the national unity to which I have referred, we should ask and seek answers only to those questions which meet one of the following tests:

1. Does it touch upon a national policy which ought to be reviewed in the interests of national security?

2. Does it touch upon an organizational relationship which might need correction, possibly of a legislative nature, in the interests of national security?

3. Could the answer, without breaching the safeguards of classified information, contribute to increased public confidence in the management of our affairs?

The objectives suggested by these three questions are, in my judgment, highly appropriate and much to be desired. The following are illustrative of the questions which have been raised by people interested in these objectives:

1. At what level of Government was this specific U–2 flight authorized?

2. What was the nature of the intelligence (and this should be disclosed only with strict security precautions) which, on balance, justified this specific flight at such a sensitive time?

3. Was there any advance thinking or planning as to what our reaction should be in the event the plane should be brought down in the Soviet Union; if so, were such plans followed?

4. Why did we change our story? It does not seem reasonable to suppose that we planned in advance, under any circumstances, to publicly confess that we were spying. Were we, then, caught in a situation which we had not anticipated and, if so, were there no reasonable alternatives to the public confession?

5. Secretary Herter did not say the flights would continue but that implication was drawn from his statement. Did he intend that the implication should be drawn? If so, why? If not, why did he not correct it?

These and other questions can be asked in an objective and constructive way. They should be asked in no other way.

I know this to be the attitude of Senate committees now making inquiries, with the approval of the President and congressional committees on both sides of the political aisle, and including the Subcommittee on National Policy Machinery, of which I am a member. The initial, heated flurry of partisan controversy on both sides has subsided; and we can seek to benefit from a very difficult national experience in an atmosphere of relative restraint.

The days and weeks are slipping by rapidly here in Washington. It has been the hope of everyone concerned that we might clean up our work and adjourn the session by July 2. That is a little more than 4 weeks away; and I am afraid that there is a great deal of unfinished work yet to be completed.

My mail indicates the greatest concern with the following: (1) Medical care for the aged; (2) Federal aid for public schools; (3) amendments to the minimum wage law; and, (4) the mutual security program.

I will say further that my mail is basically favorable to action in each of these fields, although there are strong voices in opposition.

In addition, there are several major appropriations bills, the Omnibus Rivers and Harbors bill, the Housing bill and many others of varying importance yet to be considered. The Rivers and Harbors bill, incidentally, will include ten projects of importance to various Maine coastal communities.

If we do adjourn as planned, I expect to attend the Democratic National Convention on July 11 and then return to Maine the latter part of July for the rest of the summer. You cannot imagine how I look forward to the possibility of spending several weeks on China Lake, drinking deep of an incomparable Maine summer. You may recall that I missed it almost completely last year inasmuch as we did not adjourn until mid-September.

PARTICIPATION IN INTERNATIONAL CONVENTION OF CITIZENS FROM NORTH ATLANTIC TREATY NATIONS — UNANIMOUS-CONSENT AGREEMENT TO LIMIT DEBATE

Mr. MANSFIELD. Mr. President, in order to keep things from becoming too political, after having discussed the matter with the distinguished minority leader and with interested Members on this side of the aisle, I offer for consideration a unanimous-consent agreement.

The PRESIDING OFFICER (Mr. HART in the chair). The proposed unanimous-consent agreement will be read for the information of the Senate.

The Chief Clerk read the unanimous-consent agreement, as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Wednesday, June 15, 1960, at the conclusion of routine morning business, during the further consideration of the joint resolution (S.J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such conventions, and for other purposes, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to 1 hour, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further,* That no amendment that is not germane to the provisions of the said joint resolution shall be received.

Ordered further, That on the question of the final passage of the said joint resolution debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided,* That the said leaders, or either of them, may, from the time under their control on the passage of the said joint resolution, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

JUNE 14, 1960.

The PRESIDING OFFICER. Is there objection to the unanimous-consent agreement? The Chair hears none; and, without objection, the unanimous-consent agreement is agreed to.

ORDER FOR ADJOURNMENT

Mr. DIRKSEN. Mr. President, may I query the acting majority leader as to whether he has asked for an order to convene the Senate tomorrow?

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the

Senate concludes its business today it stand in adjournment until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDRESS BY THE SENATOR FROM MASSACHUSETTS

Mr. DIRKSEN. Mr. President, I thank the Senator from Idaho for being so gracious. I apologize to the Senator for invoking such a long and spirited colloquy on his time.

Mr. President, I listened, insofar as I could, with as much attention as possible, due to some interruptions, to the address by the distinguished Senator from Massachusetts [Mr. KENNEDY]. I thought the Senator displayed a little bad timing and a little bad judgment, because it sounded something like an attack on the President while the President is away from the country, particularly so when he is moving into a rather explosive area.

I thought the judgment was a little questionable also in heaping rather unkind terms on an absent President when he is abroad in behalf of his country.

I think at some subsequent time I shall certainly desire to address myself with some vigor and some care to the whole speech, for, as I envision it, I thought it was all-world inclusive and world embracing, and I could not see that a single thing was omitted from the speech.

I leave it at that point, Mr. President.

THE DOLLY MADISON MIRROR

Mr. LONG of Louisiana. Mr. President, will the Senator from Idaho yield to me?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Louisiana?

Mr. CHURCH. I am delighted to yield.

Mr. LONG of Louisiana. Having heard the debate about furniture purchased for use in Venezuela, it occurs to me it might be appropriate to make available for the RECORD part of the history of the Vice President's office in the U.S. Capitol Building, one paragraph of which reads as follows:

> Dolly Madison mirror: Over the clock in the Vice President's Office is a small gold mirror which is known as the Dolly Madison mirror. As the story goes, Mrs. Madison, the wife of President James Madison, was visiting in Paris while her husband was there on official business. She bought the mirror at a store for $50 in American money. When she arrived back at the port of New York there was a $30 customs fee due on the mirror, and Mrs. Madison, not thinking, charged it to the official account, and the Government paid the fee. At that time, the White House expenses and salaries were paid through the Senate Disbursing Office, and the Senate, through its audit committee, checked the expenses that the President and Mrs. Madison had incurred on their trip and came across the item of the mirror. There was no authorization by the Senate or the committee for such an expenditure, and an investigation was started as to whether or not Mrs. Madison had done anything wrong. This investigation cost $2,800 and was finally canceled.

That was an expenditure of $2,800 for an investigation of a $50 mirror. I hope that the matter of furniture under consideration will not result in a cost of investigation to exceed by that ratio the amount of money involved in the cost of the furniture.

Mr. DIRKSEN. $2,800 to investigate a $50 mirror?

Mr. LONG of Louisiana. That is correct.

Mr. DIRKSEN. That seems a little like the resolution we approved today, authorizing $35,000 to investigate the dogs which nobody knows exist, so far as political television and radio are concerned. It all becomes a little "doggie," even as it did in other days.

PARTICIPATION IN INTERNATIONAL CONVENTION OF CITIZENS FROM NORTH ATLANTIC TREATY NATIONS

The Senate resumed the consideration of the joint resolution (S.J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such conventions, and for other purposes.

Mr. CHURCH. Mr. President, now that the Senate has entered into a unanimous-consent agreement to limit debate upon the pending measure, such agreement to take effect at the conclusion of morning business tomorrow, and inasmuch as I have been asked by the Committee on Foreign Relations to present this matter to the Senate, I think it might be useful for a statement to be made at this time in support of Senate Joint Resolution 170, which will be in the RECORD for the Members of the Senate to peruse tomorrow.

Mr. President, the only hopeful aspect of the recent summit conference in Paris was the impressive display of unity among the Western nations emerging from it. It was a forceful reminder that mutual loyalty is one of our most precious diplomatic assets. But steadiness in a moment of crisis should only emphasize our need for more consistent, continuing cooperation among the free nations of the West.

When the Communist coup d'etat in Czechoslovakia awakened the West to the danger of Soviet military aggression in Europe, we joined with the threatened nations to form the North Atlantic Treaty Organization. NATO stopped the Soviets in Europe because it confronted them with a solid front of determined nations, united in a common defense.

Eleven years have passed since the birth of NATO. The nature of the Communist threat, and of the problems which beset the Atlantic nations, has changed drastically. No longer is direct military aggression the overriding danger. Changes in Russian strategy, the requirements of closer association, and the rise of the underdeveloped countries have had an impact on all NATO nations.

These developments cry out for closer cooperation in broader fields of policy. In hearings of the Senate Foreign Relations Committee, witness after witness testified to this problem. General William H. Draper, Chairman of the President's Committee To Study the U.S. Military Assistance Program, testified:

> As a former U.S. permanent representative to the North Atlantic Council, I can testify from personal knowledge both as to the seriousness of the problems within the Atlantic Community and as to the overwhelming need for greater unity: Military, political, economic, scientific, and cultural.

Even in the military realm, which is the heart of NATO, there is need for greater coordination. But these steps cannot be taken within the present structure of NATO, for they involve going behind the defense line to the sources of the military power.

Responsible authorities in many countries have long been aware of these deficiencies. In fact, the likelihood of such developments was anticipated in the North Atlantic Treaty, which directs that further arrangements for cooperation among its members should be considered in the future. Efforts have been made to achieve greater unity of purpose, but they have had very little success.

Senate Joint Resolution 170 is a suggested solution to this situation. It represents an idea which is relatively new in international affairs, but which has been extremely successful on domestic matters in the United States and in other Western nations. When we want an independent survey of a national problem, we appoint a commission of leading citizens to study that problem and recommend solutions to the proper governmental authorities. The two Hoover Commissions are the most notable American uses of this technique; in Canada and England royal commissions have long had a similar function.

Senate Joint Resolution 170 would create a U.S. Citizens Commission on NATO, consisting of not more than 20 private citizens. This Commission would invite the legislatures of other NATO countries to appoint their own corresponding delegations to a convention to recommend ways of achieving greater political and economic cooperation among these nations. It is expected that the convention would not include more than 100 persons in all, and that it would meet for as long or as often as necessary.

The American Commission would take the lead in arranging for the convention as well as participating in it. It would be composed of eminent private citizens, appointed jointly by the President of the Senate and the Speaker of the House after consultation with the Senate Foreign Relations and House Foreign Affairs Committees. The resolution specifically states that the Commission is not in any way to speak for, or represent, the U.S. Government. Its members would serve without compensation. It would be authorized to employ a staff of not more than 10 members. The Commission would cease to exist on January 31, 1962. It is not intended that its life will be extended.

The resolution authorizes $300,000 to be appropriated to the Department of State for the expenses of the Commission. No more than $100,000 of this may be used as the Commission's share of any international conference. Members of the Commission will be reimbursed for expenses incurred in the performance of their duties. Funds will be paid only on vouchers approved by the chairman of the Commission, subject to the laws, rules, and regulations applicable to the obligation and expenditure of public funds. The staff will be employed on a temporary basis, and will not be paid at rates greater than the maximum authorized for employees of congressional committees. The Commission will make semiannual reports to Congress accounting for all expenditures.

This proposal was first introduced as a Senate resolution more than a year ago. It has been entirely rewritten by the Foreign Relations Committee which produced the resolution before the Senate this afternoon. It has received strong support from numerous experts in foreign affairs as well as from authoritative gatherings concerned with strengthening the NATO alliance. It was approved unanimously by two NATO Parliamentarians' Conferences. Last year the Atlantic Congress, a meeting of 650 leading citizens from NATO countries, recommended unanimously that the convention proposed by Senate Joint Resolution 170 be held as soon as possible. The State Department is in favor of this resolution, and has testified that it would certainly welcome any constructive and practical ideas that might emerge from the proposed convention.

Two years ago, the Foreign Relations Committee reported unanimously a resolution expressing the sense of the Congress that at the appropriate time such a citizens' conference should be held. I submit, Mr. President, that there is no more appropriate time than the present. The failure of the summit conference has made a stronger NATO more urgently necessary than ever. The values and interests which the Western nations share give us an opportunity to make the alliance more powerful by making the most efficient use of our resources, and agreeing on joint action to meet the various aspects of Communist penetration.

Mr. President, we have today an opportunity to plant a seed which may grow into great, constructive measures for the strengthening of the free world. To the best of my knowledge no one has denied the need for strengthening NATO. Instead, objections to Senate Joint Resolution 170 have dealt with the suitability of this method of dealing with the problem. I would like to discuss the more important objections which have been raised in committee hearings and elsewhere. Foremost among these is the fear that members of the Commission will in effect be conducting foreign policy in competition with the Government. The delegates to the convention would not represent the Government; they would be exchanging ideas with other delegates. They would have no power to commit this Government. The resolution specifically states that—

The U.S. Citizens Commission on NATO is not in any way to speak for, or to represent, the U.S. Government.

To make sure that this is understood, we have limited membership on the Commission to private citizens. If there were the slightest danger that this Commission would be taken as an official voice of American foreign policy, the State Department would certainly object to its formation. The State Department has no such fears, however. Indeed, it supports this resolution and, as I have said, has testified that it would welcome any useful suggestions which might result from it.

Some critics of this resolution, while acknowledging the need for action in this field, complain that there is already a multiplicity of organizations which should be able to deal with this problem. This argument can best be discussed by examining the principal groups which might attempt such a task. The most obvious is the NATO Council. But the Council is conceived primarily as the governing arm of NATO, and as such is preoccupied with dealing with a narrowly circumscribed set of problems—which are largely military—in the light of existing policy. Each country's representative on the Council reflects his government's official position, and cannot deviate from it. Moreover, decisions of the Council must be unanimous; questions on which there is serious disagreement are left undecided and often are not even discussed. Many of these factors are matters of necessity for a body which essentially is the board of directors of a military alliance, but they do not encourage the imaginative searching which is required to find new solutions for difficult problems outside the scope of the Council's day-to-day operations.

The NATO Parliamentarians' Conference is another useful device which has been designed to serve a special and limited role and therefore is unsuited for the mission of the proposed convention. The annual conferences have operated under severe time limitations which would prevent adequate consideration of the kind of problems entailed or contemplated to be discussed under the resolution.

The Atlantic Congress, which convened last summer, had a somewhat similar handicap, since it met for only a week. In addition, it has more than 650 delegates, which makes it much too large a group for thoughtful discussion of complicated topics.

It has been suggested that we might turn to meetings of strictly private groups financed by private individuals or foundations, to consider the problems of NATO. Experience has shown, however, that citizens of the required eminence and ability have not been willing to devote sufficient time to such a task in the absence of a request from their Governments that they do so.

The convention contemplated by Senate Joint Resolution 170 is intended to go beyond the work of these various organizations. Avoidance of the difficulties under which they labor gives us added hope for its success.

It is, in short, to be a small, deliberative convention that has sufficient time to consider seriously and to debate at length, the weaknesses of the present NATO alliance, and thus to formulate thoughtful recommendations, to be returned to the various NATO governments, as to the steps that the delegates think best designed to give added unity and strength to the alliance.

Finally, Mr. President, we should ask what reason there is for expecting such a convention as is contemplated by this resolution to be productive of any real good. What right have we to expect serious and important accomplishments if such a convention is actually undertaken? In the course of our committee hearings one of the witnesses, General Draper, gave testimony bearing upon this point that is worthy of our serious attention. He said:

As Chairman of the President's Committee To Study the U.S. Military Assistance Program, I can testify from personal knowledge as to the value of the studying of our common problems by a commission composed of eminent citizens such as is provided for in this concurrent resolution.

Departments of the government deal constantly with national and international problems but our own Government has from time to time felt the need for a fresh and independent look at these problems by a commission of citizens. The Hoover Commission is a notable and successful example. The Committee of which I had the honor to serve as Chairman is one of the most recent ones.

For my own part, Mr. President, I would emphasize that the problem-solving procedures which this resolution would set in motion seem to me to be in the finest tradition of our own country, and of Western civilization generally. The chief glory of our society is the quality of the individuals it produces. This is what the doctrine of the state being the servant, not the master of the people is really about. This is why we have, and seek to maintain, an open society.

If this kind of society is to survive, it seems to me that we must find more effective ways to exploit its advantages. The central purpose of this resolution is to enable eminent, free citizens, products of this open society, to consider the present situation and recommend possible lines of action that would contribute to the strengthening of the free countries of the world in their common efforts to protect themselves against the Communist threat. It is precisely because they would constitute a citizen's conclave, free to speak and act independently of the official positions which their governments may heretofore have taken, that we could expect from them ideas and recommendations which would breathe new life into the struggle of Western man to retain his freedom. Established governments tend to get bogged down in ruts, and it becomes difficult for them to lift themselves out of these ruts—to break away from habits of vested interest and fixed position.

For this reason, the greatest advances of Western civilization have most often been initiated, not by governments, but by free citizens, thinking and acting in

ways made possible only by freedom; responsible, as free men are in the last analysis, only to their own consciences.

Whatever recommendations may come from the proposed convention will have no official status, no authority except what is given them by their intrinsic merit.

Mr. President, I see no basis for arguing that any harm can come from the kind of meeting which is here proposed. It seems to me, on the contrary, that it has in it the possibility of much good, that it is in the best tradition of free societies, and that it is the kind of initiative that we can properly take, and ought to take. I hope the Senate will approve the joint resolution.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to the Senator from Louisiana.

Mr. LONG of Louisiana. First I should like to congratulate the Senator from Idaho for the fine presentation he has made this evening, and also for the very diligent effort he has made to make certain that the measure before the Senate, or something along this line, should be acted upon by the Senate at this session.

The junior Senator from Louisiana was in the Senate and voted for the ratification of the North Atlantic Treaty. That treaty has been regarded as one of the very foundations of the security of this Nation. Much of it resulted from the leadership of the late Arthur Vandenberg, who was chairman of the Committee on Foreign Relations in the 80th Congress.

Yet here we see that, notwithstanding the fact that this organization has been a success, by general agreement of most Americans, I believe, many people are fearful of any additional strides toward strengthening and enlarging upon what has been a successful venture.

Most businessmen, when they see that their business is successful and showing a profit, usually like to expand it and make a greater investment in it, and broaden its activities. Yet the Senator from Idaho knows that there has been some fear expressed of what the possible consequences might be of considering new ideas such as those the resolution seeks to achieve. The resolution seeks to bring about some discussion by citizens of this Nation and citizens of our allied nations of ways and means whereby the NATO organization can be strengthened, so that suggestions and recommendations by those persons could be made with respect to what can be done along that line after these persons have had a chance to thoughtfully consider the subject.

I must say that I for one have been discouraged to see that there has been such a reluctance to consider or even to discuss ways in which this very successful undertaking can be enlarged upon. I very much hope that not only will the Senate pass the joint resolution, but that something will come of it as a result of the efforts the Senator is supporting.

I hope that those who will meet in this new organization will not only come forward with constructive suggestions, but will support them and help pursue them and also help muster public support for measures that will make NATO more effective.

There is no doubt that there are a number of things which could be done to strengthen the NATO alliance as far as military measures are concerned. Certainly, there must be some economic ways in which we can cooperate more fully.

I do not want the United States to make any concessions without gaining something by doing so. I would like to see the United States benefit, certainly, as much as the other members of the organization gain in a joint undertaking. I believe that as a result of this new organization, we might possibly achieve a greater matching by our partners of the effort we are making. The time has come when we have every right to demand that other nations make a greater contribution.

The Senator from Idaho has been one of those, in considering mutual security legislation, who have made the point that the North Atlantic Treaty countries have actually reduced their contributions to the overall defense, at a time when the United States has been increasing its contribution to that defense. I hope that a measure of this kind will not mean that America will give more and receive less from others. I hope that these ideas will be stressed as a part of the considerations and recommendations whereby the North Atlantic Treaty Organization can be strengthened.

Mr. CHURCH. I very much appreciate the fine support which is indicated by the remarks of the distinguished Senator from Louisiana. He is quite right when he says that the objective of this joint resolution is to seek out recommendations intended to give new strength and health to our NATO alliance. As a matter of fact, the preamble of Senate Joint Resolution 170 succinctly states the objective that is meant to be served. It reads:

> To authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of United States delegates to such convention, and for other purposes.

That clearly states the objective that is sought by such a convention. I would only make the observation that no alliance can remain static. It either will tend to unravel, to become weaker, and, in the end, fail, as the years go by, or it will tend to become stronger and more closely knit, and thus succeed in the accomplishment of its objectives. It cannot remain static.

There is a sense of uneasiness about the state of health of the NATO Alliance, and a realization that we must find ways to implement what was originally intended by Article II of the Alliance, which directs attention to political and economic ways by which the NATO nations should cooperate.

The truth is that up to now the NATO Alliance has been merely a military alliance. One of the uses of the proposed convention would be to explore ways and means for implementing the clear intent of article II of the NATO Treaty.

I am so pleased to have this endorsement from the Senator from Louisiana. I am hopeful he might find it possible to make a statement tomorrow, in the course of the debate, in support of the resolution.

Mr. CASE of New Jersey. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I am happy to yield.

Mr. CASE of New Jersey. First, I express my appreciation to the Senator from Idaho for his very forceful and clear statement with respect to Senate Joint Resolution 170. He has been more than fair in explaining it, and in explaining the objections which have been raised to this idea, as well as in presenting very clearly what, to me, are the overwhelming advantages and desirabilities of this particular procedure.

As the Senator from Idaho knows, I am one of four Senators who joined in submitting Senate Concurrent Resolution 17 earlier in this Congress. The Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Kentucky [Mr. COOPER], and I joined in submitting it. Shortly thereafter we had a great accession to our ranks in the person of the distinguished Senator from Idaho [Mr. CHURCH], who carried it forward, and now brings it to the floor with very great persuasiveness.

I should like to say, on behalf of the Senators who cosponsored Senate Concurrent Resolution 17 originally, that the committee has, I believe, produced a better resolution than the one which we originally submitted. Great credit is due the Senator from Idaho, the Senator from Louisiana [Mr. LONG], and their other colleagues on the Committee on Foreign Relations.

The joint resolution is tighter, more specific, and clearer. It avoids the dangers and the possibilities into which the original concurrent resolution, although it was never intended to produce them, might perhaps have led us.

I cannot add anything to the basic argument which the Senator from Idaho has presented in behalf of the joint resolution, except possibly the point made by the Senator from Kentucky [Mr. COOPER] at the hearing. He said that we do not very often have a new idea in this whole area, and that the joint resolution, in addition to its substantive appeal, is perhaps that kind of fresh idea which in itself will give a lift to all of us who are deeply involved in the problem of trying to bring about a more stable world, a world in which the ideas of cooperation and brotherhood may have a little better chance to work among those of us to whom has fallen the great responsibilitiy of preserving and extending the values of Western democracy.

One other thing: A number of us have been working on this problem. Among them is the Vice President of the United States, who, when he was in the Senate, had a great interest in this whole area, and still retains it. I am authorized by him to say that he welcomes this initiative on the part of Members of the Sen-

ate; that he strongly believes it is extremely desirable for the countries of the Atlantic Community to engage in cooperative efforts of every sort to draw closer together, for many reasons, including, of course, the reason that if this is not done, the responsibility on those of us who are carrying the major load will become unbearable. But that is only one of the important reasons. The Vice President regards this action as a manifestation of the right kind of initiative in this area. If he were still a Member of this body and had a voice and a vote in its proceedings, he would actively subscribe to the procedure.

I thank the Senator from Idaho and again express to him my appreciation of his excellent and persuasive address.

Mr. CHURCH. I thank the Senator from New Jersey very much for his statement. I am happy that he emphasized the fact that the joint resolution has the approval and endorsement of the Vice President. Should a tie vote result tomorrow, we can thus be sure of prevailing.

I also am desirous of making the RECORD clear, before the debate closes today, that my part in this proceeding has been a very minor one. I have tried to support the joint resolution and move it through the committee. I am happy to have the chance to present it on the floor.

But the objective of this resolution has been supported for a number of years by such Members of this body as the distinguished Senator from Tennessee [Mr. KEFAUVER], as well as by the other sponsors of the original Senate Concurrent Resolution 17, out of which the committee put together Senate Joint Resolution 170, which is now the pending business. I think special credit should be given to the original sponsors of Senate Concurrent Resolution 17, the Senator from New Jersey [Mr. CASE], the Senator from Kentucky [Mr. COOPER], the Senator from Minnesota [Mr. HUMPHREY], and the Senator from Tennessee [Mr. KEFAUVER]. They deserve to be commended for the long and sustained interest they have given to this cause. I want to make certain that the RECORD bespeaks it.

Mr. CASE of New Jersey. Mr. President, I desire to express my appreciation on behalf of myself and all cosponsors, each of whom is far more entitled to credit for this venture than I. Indeed, if it proves successful, there will be credit enough for all and great gain for the country.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to the Senator from Pennsylvania, my good friend and seatmate.

Mr. CLARK. First, I congratulate the Senator from Idaho on his very able presentation in support of the joint resolution. I note his usual modesty in deprecating the part he has played in bringing the joint resolution to the floor. I am confident that he is entitled at least to equal credit with the original sponsors, with all of whom I am happy to associate myself in this project.

Do I correctly understand that a unanimous-consent agreement has been entered into, and that no vote will be taken on the joint resolution tonight?

Mr. CHURCH. That is correct.

Mr. CLARK. I hope that the Senator from Idaho, if he controls the time, will yield me 4 or 5 minutes tomorrow to speak in support of the proposed legislation.

Mr. CHURCH. I shall be very happy to do so. I am pleased to learn that the Senator from Pennsylvania is willing to speak for the joint resolution.

Mr. CLARK. For the moment, I should simply like to say that I have not only listened to the Senator from Idaho, but I have read the report of the Committee on Foreign Relations and have given some consideration to the reasons advanced by the members of the committee who oppose the resolution for the position they take. It is very difficult for me to understand how those reasons can be taken very seriously. To me, they are not only not compelling, but are far from persuasive.

I am a little frightened at what the Senate is doing at this session in connection with our foreign relations. It occurs to me that we are living in a pretty rarefied atmosphere here and are not too well aware of what is taking place in the outside world.

I shall not detain the Senator further tonight other than to suggest to him that if the Senate cannot at this session pass this joint resolution, then indeed this body will have made it abundantly clear, in connection with many another action which we have either taken or failed to take, and I fear will take in the next few weeks, that we are not really very much interested in advancing, through the democratic technique of open discussion, the strength of the free world.

This attitude bothers me very much. I shall have occasion to speak about it on a number of other occasions during the course of the next month.

I hope the Senator from Idaho was speaking in jest when he talked of the possibility of a tie vote on the joint resolution being broken by the Vice President. Although I view with some chagrin the fact that the vote in the committee was 8 to 7, I hope the resolution can be passed with no dissenting votes. I see very little reason for opposing it. I hope I am not being ignorant or arrogant in saying this, but I am totally at a loss and am unable to understand the position of the opposition.

I shall speak tomorrow in behalf of the joint resolution.

I thank the Senator from Idaho.

Mr. CHURCH. I am very much pleased to learn that the Senator from Pennsylvania will speak tomorrow on behalf of the resolution.

Of course, I agree wholeheartedly with him that we should not have any fear of free men gathering together to debate ways and means to strengthen the unity of the Western democracies, if all they can do, as a result of their deliberations, is make recommendations to their respective governments, which, in turn, will evaluate them on the basis of their intrinsic merits.

Mr. CLARK. After all, what are we afraid of?

Mr. CHURCH. Yes; what are we afraid of? The deliberations will result in the formulation of ideas which the governments of the Western democracies can appraise, and pass upon as they see fit.

To defeat the resolution, to take the position that there should be no convention, and no deliberation by eminent free world citizens, would be to put on the blinders, as if that were some kind of virtue, when the dire fact of our situation is that the Western World is challenged today as never before, and therefore is called upon to plumb its resources and exert itself to the utmost, to find methods to strengthen the unity of purpose and the vitality of the Western World, to meet the threat that has been thrust upon it.

Therefore, I see nothing but good to come from such a convention. I do not believe any harm could possibly emanate from it.

So, Mr. President, I hope the Senate will concur, and will pass the resolution tomorrow.

Mr. LONG of Louisiana. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I yield.

Mr. LONG of Louisiana. I agree with the Senator from Idaho and with the Senator from Pennsylvania that a vote against the joint resolution could certainly be construed by many as fear on the part of this country of communication with other free peoples or fear of a good idea.

Mr. CHURCH. Yes.

Mr. LONG of Louisiana. Whereas the very basis of our type of democracy and that of our allies is, theoretically, the assumption that we have nothing to fear from exploring the other man's ideas, and discussing them and seeing how they can be improved upon, and that the answer to anyone's idea, if one does not agree with it, is to propose a better one.

Mr. CLARK. And the cliche that is used is "to hammer out the truth on the anvil of discussion."

Mr. CHURCH. Yes. No better method has yet been devised.

Mr. LONG of Louisiana. That is correct.

ADJOURNMENT

Mr. CHURCH. Mr. President, if there is no further business to come before the Senate at this time, I now move, under the previous order, that the Senate adjourn until tomorrow, at noon.

The motion was agreed to; and (at 6 o'clock and 2 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Wednesday, June 15, 1960, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 14, 1960:

U.S. MARSHALS

James H. Somers, of North Carolina, to be U.S. marshal for the middle district of North Carolina for a term of 4 years.

Herbert E. Patrick, of Tennessee, to be U.S. marshal for the middle district of Tennessee for a term of 4 years.

Fred S. Williamson, of Alaska, to be U.S. marshal for the district of Alaska for a term of 4 years.

HOUSE OF REPRESENTATIVES

TUESDAY, JUNE 14, 1960

The House met at 12 o'clock noon, and was called to order by the Speaker pro tempore, Mr. MCCORMACK.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

THE SPEAKER'S ROOMS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., June 14, 1960.

I hereby designate the Honorable JOHN W. MCCORMACK to act as Speaker pro tempore today.

SAM RAYBURN,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

St. John 1: 9: *That was the true Light, which lighteth every man that cometh into the world.*

Almighty God, who hast created us in Thine own image and made us for Thyself, we pray that Thou wilt now evoke within us those desires which Thou dost delight to satisfy and remove from us everything that hinders our minds and hearts from following Thy leading.

Grant that our daily life may be animated and aglow with the spirit of our blessed Lord who walked our human way and revealed unto us the worth and dignity of human life and the supremacy of duty toward Thee and our fellow men.

May the record that we have of His words of grace and His works of mercy kindle our souls with a passion to be faithful in discharging the tasks and responsibilities of our high vocation to which we have given our plight.

Hear us in His name. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate insists upon its amendments to the bill (H.R. 4192) entitled "An act to prohibit the examination in District of Columbia courts of any minister of religion in connection with communications made by or to him in his professional capacity, without the consent of the parties to such communications", disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HARTKE, Mr. FREAR, and Mr. CASE of South Dakota to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4283) entitled "An act to amend the District of Columbia Income and Franchise Tax Act of 1947, as amended, to provide that certain additional specified officers of the executive branch of the Federal Government shall be exempt from such act," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. FREAR, Mr. BIBLE, and Mr. BEALL to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 10087) entitled "An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD of Virginia, Mr. KERR, Mr. ANDERSON, Mr. WILLIAMS of Delaware, and Mr. CARLSON to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 715) entitled "An act to amend the law relating to indecent publications in the District of Columbia," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HARTKE, Mr. FREAR, and Mr. CASE of South Dakota to be the conferees on the part of the Senate.

COMMITTEE ON FOREIGN AFFAIRS—SUPPLEMENTAL REPORT ON S. 1502

Mr. HAYS. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs may have permission to file a supplemental report on the bill S. 1502.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

COMMITTEE ON RULES

Mr. SMITH of Virginia. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight tonight to file certain privileged reports.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Communications and Power of the Committee on Interstate and Foreign Commerce be permitted to sit during general debate this afternoon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

MISSILE STRIKE

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, I just listened to the statement by our delightful friend, the gentleman from Illinois [Mr. YATES] for what we have been doing abroad. For months, yes for years, we have been appropriating the taxpayers' money because someone from time to time frightens us and tells us there is a great emergency. So we go ahead and buy more bombers or missiles or something to protect us or authorize the expenditure for war material. In the papers today, we are told that tonight at midnight, the folks working on missiles in Florida and in California are going to tell us whether they will continue to work on production for war. How absurd can we be—appropriate the money because we are frightened half to death—we must get ready for war, a cold war or a hot war, and then permit these folks, sometimes the contractors and sometimes the workers, to hold up production until they get what they want. I am asking again—just how absurd can the Congress get before it does something about that kind of a situation?

COMMITTEE ON BANKING AND CURRENCY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may have permission to sit today during general debate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

ORDER OF BUSINESS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that any rollcall votes today on amendments, motions to recommit, or passage of bills may be put over until tomorrow, following the disposition of House Resolution 537 and H.R. 9883, the Federal employee pay increase bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mr. HALEY. Mr. Speaker, reserving the right to object, I would like to know why the gentleman wants to put these rollcalls over. Is there a primary going on somewhere or is there some specific reason for this request?

Mr. ALBERT. The gentleman is correct. There is a primary today in South Carolina.

Mr. HALEY. Mr. Speaker, I will withdraw my reservation of objection, but I do want to call the attention of the distinguished gentleman to the fact that I was not protected in a similar situation just a short time ago.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

CALL OF THE HOUSE

Mr. KASEM. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently, no quorum is present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 129]

Anfuso	Fisher	Magnuson
Ashmore	Flynt	Mahon
Barden	Fulton	Mitchell
Beckworth	Gallagher	Morris, Okla.
Bennett, Mich.	Gary	Moulder
Bentley	Glenn	Patman
Blatnik	Gray	Poage
Blitch	Hargis	Powell
Brooks, La.	Hemphill	Quigley
Brown, Mo.	Horan	Reece, Tenn.
Buckley	Ikard	Riley
Burdick	Jackson	Rivers, S. C.
Burleson	Jennings	Rogers, Tex.
Cahill	Jensen	Short
Carnahan	Jones, Mo.	Spence
Casey	Kearns	Stubblefield
Dawson	Kelly	Taylor
Diggs	Kilburn	Teague, Tex.
Dorn, N.Y.	Kilday	Teller
Dorn, S.C.	Kilgore	Thompson, N.J.
Dowdy	Kluczynski	Thompson, Tex.
Dulski	Lafore	Thornberry
Durham	Loser	Weis
Elliott, Ala.	McGinley	Widnall
Fallon	McGovern	Wright
Farbstein	McMillan	Young
Fino	Macdonald	

The SPEAKER pro tempore. On this rollcall 352 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

GRANTING REPRESENTATION IN THE ELECTORAL COLLEGE TO THE DISTRICT OF COLUMBIA

Mr. SMITH of Virginia. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 554 and ask for its present consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H.J. Res. 757) proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia. After general debate, which shall be confined to the resolution, and continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the resolution shall be considered as having been read for amendment. No amendment shall be in order to said resolution except amendments offered by direction of the Committee on the Judiciary. Amendments offered by direction of the Committee on the Judiciary may be offered to any section of the resolution at the conclusion of the general debate, but said amendments shall not be subject to amendment. At the conclusion of the consideration of the resolution for amendment, the Committee shall rise and report the resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the resolution and amendments thereto to final passage without intervening motion, except one motion to recommit, with or without instructions.

Mr. SMITH of Virginia. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio [Mr. BROWN] and now yield 10 minutes to the gentleman from Pennsylvania [Mr. WALTER].

Mr. BROWN of Ohio. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALTER].

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. WALTER] is recognized for 15 minutes.

Mr. WALTER. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

THE SCURRILOUS OBERDORFER-PINCUS ARTICLES

Mr. WALTER. Mr. Speaker, if the members of the Committee on Un-American Activities took the time necessary to answer the continuous attacks leveled against us by the Communists and Communist sympathizers, we would have no time left to conduct the affairs of the committee which, because of the intensification of Communist activity in the United States, necessitates more and more of our time in investigations, hearings, consultations, preparation of reports, and similar duties.

I have hesitated for quite some time before I decided to discuss the matter of the scurrilous series of articles which appeared under the byline of Don Oberdorfer and Walter Pincus in the Knight newspapers and in the Washington Post, as well as, in excerpts, in Life magazine. Along with many of my colleagues, I regard the Oberdorfer-Pincus series as a concoction of half-truths, untruths, smear, and innuendo adorned with adjectives used in lieu of facts.

I remained silent on that sorry subject until it became clear to me that the Oberdorfer-Pincus series could not be simply dismissed as another example of yellow journalism. I was silent until the cat was out of the bag, or rather—until the cat was out of the mailbag. By that I mean, until the Oberdorfer-Pincus duo devoted their longest article in the series to an investigation of the flood of Communist propaganda reaching the United States, an investigation conducted by the Committee on Un-American Activities.

It then became obvious to me that, at least that part of the Oberdorfer-Pincus series which directly played into the Communist hands by smearing the Committee on Un-American Activities, must be answered by that committee's chairman.

One of the Oberdorfer-Pincus articles was devoted to a "road show" which the Committee on Un-American Activities is charged with having conducted from city to city where, according to the articles, the same testimony and the same mail sacks of Communist propaganda are used—all for the purpose of wasting the taxpayers' money.

What is the truth? Several weeks ago, I was advised by the staff that the reporters were examining the vouchers and expense accounts of the committee and its staff. I immediately announced that we had nothing to keep secret with the exception of our security files and that I was not cognizant of a single item in the financial affairs of the committee which could not stand the closest scrutiny.

Mr. Pincus and Mr. Oberdorfer attacked the Committee on Un-American Activities, consisting of 9 members and a staff of 45 people, because of the hotel bills of 1 or 2 members of the committee, which bills are portrayed as excessive. With reference to my own expenses as chairman of the committee, even the Washington Post in its editorial a few days ago commented as follows:

The chairman, Representative FRANCIS E. WALTER, it should be acknowledged, has been pretty Spartan in his habits.

Let it be noted that of the 45 members of the staff, including the investigators who do the most traveling, there was not one item or a single voucher against which anything of a derogatory nature could be found. Regarding the personal expenses of one or two members of the committee the articles referred to "$45-a-day hotel rooms and restaurant bills" as though it is a common practice of all members of the committee and its staff to spend money lavishly and extravagantly while on committee investigations.

The truth is that the Committee on Un-American Activities, like all other committees of Congress, functions largely though subcommittees. The chairman of the subcommittee frequently will use, in addition to his own bedroom, a sitting room which is utilized for conferences with witnesses, the press, and Government officials. In signing for his hotel bill, the subcommittee chairman frequently signs not only for his own personal expenses but will sign the vouchers for those meals which the subcommittee members and the staff have together in the hotel.

It is an invariable policy of the committee that no member of the committee or its staff can charge against the committee accounts any personal expenses such as laundry, cleaning, or any personal entertainment or liquor expenses. If instances have occurred in which these items have been charged against the committee accounts—and I personally know of no such instances—they are obviously either in error or are wrong, and I would not begin to justify them. I cannot believe that any such instances of this kind are more than infrequent breaches which might occur in any operation as extensive as the operations of our committee, which cover the entire Nation. Aside from the personal expense accounts of one or two members used in the articles as a basis for the general indictment of the entire committee and its staff, the articles lay particular emphasis on two other items concerning which I shall now comment.

Mr. Pincus and Mr. Oberdorfer state that the members of the Committee on

Un-American Activities and its staff have taken from the Library of Congress a number of books and periodicals which were lost and paid for at taxpayers' expense. The articles list the books and their cost. The only reasonable interpretation of the article is that these books were taken in the recent past or at least during the existence of the Committee on Un-American Activities. The truth is that every one of these books was charged out from the Library of Congress in a period beginning in 1938 and extending until 1945 by the old Dies committee which was the predecessor of the Committee on Un-American Activities. I understand that these books were checked out of the Library of Congress by the old Dies committee from 1938 to 1945 as part of a great number of books which were being examined in connection with a project dealing with Communists who were writers.

Back in 1956 the Library of Congress completed an inventory of all of the books which had been checked out over many years but which had not been accounted for. In order to clear the records, I agreed as chairman of the successor committee that the charge for the books which had been unaccounted for by the Dies committee could be charged against the accounts of the present committee.

Mr. Pincus, the coauthor of the articles, was told prior to the time that he wrote his articles that these books had not been withdrawn or used by any member of the Committee on Un-American Activities or its staff and that the committee and its staff had no knowledge of these books, but, nevertheless, the article lists a number of the books by title and cost and conveys the clear impression that this committee and its staff have been promiscuously checking out books from the Library of Congress for personal use and charging the cost to committee accounts.

Another charge which the articles leveled against the Committee on Un-American Activities is to the effect that the committee spent taxpayers' money for limousine service, the clear impression being that it was done in an air of extravagance. The truth is that once or twice in New York City and again once in San Francisco during the course of the last several years the committee did engage limousines because the circumstances required the presence of several staff people as well as four or five members of the committee to conduct the hearings.

The limousines were used exclusively to transport the subcommittee and the staff from the hotels to the hearing rooms and return and were actually cheaper than taxicabs would have been to transport the same people. The use of limousines, moreover, permitted more careful adherence to a close schedule of committee operations. The implication of the articles, however, is that the members of the subcommittee and the staff, at taxpayers' expense, were joyriding around town in these limousines or using them for personal trips. This, of course, is a vicious distortion.

Now, permit me to comment respecting the article in the series which was devoted to the so-called roadshow in which it is charged that the committee goes from city to city with the same testimony by Mr. Irving Fishman of the Customs Service who opens the same mail sacks of Communist propaganda—all for the purpose of wasting the taxpayers' money.

The Washington Post in its editorial entitled "Wandering Minstrels" dated June 10, 1960, adds still another tidbit respecting this series of hearings by suggesting that the real reason for the hearings is to give the committee the names of "thousands of persons to whom mail happened to be addressed from Iron Curtain countries" so that the names of these persons can be added "in those bulging catchall files of the HUAC."

It was the same Washington Post which, in an earlier editorial, advocated the release of all impounded Communist propaganda mail and its immediate delivery to the addressees.

What are the facts? What I am now about to recite, Mr. Speaker, are not only facts known to me, but facts which were painstakingly told and explained to the authors of the Oberdorfer-Pincus series on three occasions prior to the time that their articles were written. Both authors were told that Communist propaganda literature is reaching this country in increasing volume through many ports of entry. They were told that the Communist poison is printed in many languages such as Chinese, Spanish, French, Polish and so forth. They were told that Communist propaganda literature is sent to ports of entry on the east coast, the west coast, the gulf coast, and to some ports on the Canadian border. They were told, also, that Communist newspapers, brochures and tracts are mailed to such ports of entry as serve certain areas of the United States where the local population or parts of it understand the language in which the material is printed.

It was for the purpose of tracing a pattern that hearings were held in New York, in San Francisco, in New Orleans, in Buffalo, and in other places where the foreign language mail is strategically divided and destined to what may be called target areas. It must have been perfectly clear to Mr. Oberdorfer and Mr. Pincus that the Committee on Un-American Activities did not "travel around with the same mailbag" but that our purpose was to show how the same source supplies different areas of our country with propaganda literature in many different languages, entering the United States through different postal conduits.

Mr. Irving Fishman, deputy collector of the U.S. Customs Service, has for several years specialized in developing information respecting this general area of Communist activity. His work has taken him to the four corners of the world. At the present time, he is in Asia in a cooperative enterprise with the Committee on Un-American Activities for which he is developing factual material respecting the sources of some of this Communist propaganda. I shall not attempt now even to give a broad survey of the tremendous scope of this problem or of the startling facts which we are constantly uncovering in its many ramifications. From time to time this subject matter is dealt with in our various publications.

In attempting to get at the facts the committee has on several occasions requested the U.S. Customs Service to assign Mr. Fishman to make a study at a particular port of entry in an area where the committee will be conducting a general investigation. We have found that the factual situation both as to source, destination, and volume of Communist propaganda varies over the Nation but that in content there appears to be a uniform pattern. The process by which we are trying to complete the mosaic is tedious and difficult.

The suggestion contained in the Oberdorfer-Pincus article—that this committee goes from place to place to repeat a presentation of the same testimony or to use the same material—is not only untruthful, but its presentation in this vein, after the authors were three times given a full explanation of the facts, is vile. Of course, the suggestion in the Washington Post editorial that our objective is to get the names of the recipients of Communist propaganda to be included in our files is likewise untrue. The facts are that most of the recipients of this Communist propaganda have not solicited it and many of them protested receipt of it. The only names we have of recipients of this Communist propaganda are the names of people who have addressed letters to the committee commending the committee for its efforts to cope with this poison which is being destined now to schools, colleges, and libraries as well as other groups and organizations across the Nation in increasing volume.

Mr. Speaker, I could go on with comments on still other misrepresentations appearing in these articles but I believe I have covered the principal items. I have never yet asserted that the Committee on Un-American Activities is above criticism. I readily assert that as a human institution we do make mistakes. We try to keep those mistakes to a minimum. I honestly feel that the overwhelming majority of the criticism against the committee and its work, however, stems either from those who have an ax to grind or are uninformed. I am convinced, likewise, Mr. Speaker, that the Committee on Un-American Activities is doing a vital work which has the approval of the House and the overwhelming majority of the American people.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 554, by the gentleman from Virginia [Mr. SMITH], makes in order, with 2 hours of general debate, the consideration of House Joint Resolution 757, a resolution which would amend the Constitution of the United States. The resolution provides not only for 2 hours of general debate but also for a closed rule under which no amendments, except those offered by the Committee on the Judiciary, may be considered. That was done because this joint resolution

deals with an amendment to the Constitution of the United States.

I think perhaps I also should point out that a two-thirds vote of the House and of the other body is required to approve a joint resolution of this type, submitting to the various States of the Union, for ratification, a constitutional amendment.

The House joint resolution, of course, does not require approval or disapproval by the President, but is first the action of the Congress and then later comes the action of ratification by the States. That ratification requires an affirmative vote of three-fourths of all the States, or 38 States.

This amendment to the Constitution, as proposed in the House joint resolution is a very simple one. It would give to the people of the District of Columbia who are legal residents—not residents of some other State, but legal residents of the District itself—the right and privilege to vote for President and Vice President, or perhaps I should say, rather, for not more than three electors to represent them in the electoral college which actually selects the President and Vice President, following the general election which is held in November each 4 years. This constitutional amendment would restrict to three the numbers of electors the District of Columbia would be permitted to have, which is the equal in number to that allowed the smallest State, but actually would be about the number the District would be entitled to on a population basis, if it were a State. But this resolution in no way creates the District of Columbia as a State. It simply confers upon the electors, the legal electors, the right to vote for President and Vice President.

The amendment does not carry any provision for delegates to sit in the House, or in either branch of the Congress. Neither does it have any connection whatsoever with the various home rule questions we have had before us for a long time.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Illinois.

Mr. MASON. Let us suppose that I land here in the District of Columbia and make it my home. I have come from Poland or some other place, and am not a citizen of the United States; would I have the right to vote?

Mr. BROWN of Ohio. No. The gentleman would have to be a citizen of the United States; he would have to meet all citizenship requirements, as I understand it.

Mr. Speaker, this resolution has received perhaps more consideration by the House Committee on the Judiciary than almost any piece of legislation which has come before this House in many, many years. There have been a great many constitutional and other legal questions raised in connection with this matter. I feel, as do most of the members of the Committee on Rules, that the Committee on the Judiciary has not only worked long and arduously, but has brought out a very simple and a very effective resolution which will in no way take away from the Congress of the United States the right and authority to control the affairs of the District of Columbia as the seat of the Federal Government, or give to the people of the District any powers except those which I have designated, to vote for electors for President and Vice President.

Mr. MEADER. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Michigan.

Mr. MEADER. I should like to refer to the question directed to the gentleman from Ohio by the gentleman from Illinois [Mr. MASON], namely, whether or not residents of the District of Columbia who were not citizens might participate in the selection of electors. I think section 1 of the proposed amendment is very clear and reads as follows:

> The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct.

In other words, the answer of the gentleman from Ohio to the question of the gentleman from Illinois should have been that that entire matter was left to the Congress of the United States and was not specifically either provided for or prohibited in the terms of the amendment itself.

Mr. BROWN of Ohio. That is right. But the Congress of the United States has the power to fix those voting rights, just as the legislature of any State may fix them in any particular State.

As I pointed out a moment ago, this does not take away from the Congress the power to control the public activities within the District of Columbia, whatever they may be, whether it deals with transportation or whether with the right of suffrage. As we have it now, the District elects delegates to the party national conventions.

Mr. MEADER. The gentleman is absolutely correct on that point. I should like to call attention to the language I have just read in section 1. The proposed amendment is the same phraseology as appears in article II, section 1 of the Constitution of the United States. The only difference is that we put in the word "Congress" instead of "legislature." This is the language of the Constitution:

> Each State shall appoint, in such manner as the legislature thereof may direct—

And so forth. We have simply taken the pattern established in the Constitution of the United States and left it completely within the discretion of Congress to set up the qualifications of electors, and how electors for President and Vice President shall be selected.

Mr. BROWN of Ohio. I appreciate the gentleman making his clarifying statement. I had hoped and thought that I had made the situation clear, but certainly the gentleman's explanation leaves no doubt in the mind of anyone that the Congress retains to itself the powers provided under the Constitution to deal with District of Columbia matters.

Mr. Speaker, I yield 5 minutes to the gentleman from Virginia [Mr. BROYHILL]

Mr. BROYHILL. Mr. Speaker, I rise in support of this rule and the joint resolution the rule makes in order. I see no earthly reason why we should not grant the same rights to the citizens of the District of Columbia who are American citizens to vote for President and Vice President as all other citizens of the United States have. In fact I would go so far as to say we should grant them the right to have full national representation, full representation in the House and the Senate, the same as all other American citizens enjoy. I have maintained that position for the past three Congresses. I have introduced similar resolutions in each Congress, one to grant the people of the District of Columbia the right to vote for President and Vice President, and the other to grant Congress the authority to give the people of the District of Columbia full voting representation in the House and the Senate.

The joint resolution which we will have before us is practically identical to the resolutions I have introduced in previous Congresses. It is, however, somewhat of a compromise, in that it limits the number of votes in the electoral college to no more than those of the least populous State. Of course it is a compromise. All major legislation gets through as a result of compromise.

It is unfortunate that while we are at it, going through the long, complicated process of a constitutional amendment, we do not do the job right and give them the full vote, the same vote they would have in the electoral college if they were a State of the same population. Yet, as I stated before, sometimes a compromise is necessary and I agree to this compromise.

I should like to address myself for just a moment to the confusion that has existed between this proposal for a constitutional amendment and the proposal for home rule in the District of Columbia. During the hearings the chairman of the Committee on the Judiciary admonished the witnesses, and properly so, not to confuse this issue with home rule, but it is confused. Not more than one out of a hundred Americans who are familiar with this problem really understand the difference between this constitutional amendment we are proposing today and the problem of home rule. I venture to say a very small percentage of the advocates of home rule really understand the difference between the two measures. The two measures are similar in only one respect, that is, they give the citizens the right to vote. That is what we want to do, to give the citizens of the District of Columbia the right to vote. The right to vote for President and Vice President does not infringe on the rights of the other people of this great Nation. If we granted the people of the District of Columbia representation in the House and Senate, it would not infringe on the rights of the other people of this Nation. However, if we attempt to turn over the government of the Nation's Capital to the people who live within its boundaries to rule and control, then we do impinge on the right of the other people of the Nation, because all the people of the States have a

stake and a vested right and interest in the government of the Nation's Capital.

Last week we were talking about a compact for interstate transportation. The gentleman from Missouri [Mr. CANNON] expressed great concern that we were setting up control over the taxicab rates here in the Capital and giving it to some outside agency.

He felt his constituents had a stake involved in the setting of taxicab rates here in the Nation's Capital. Last Monday, the House approved a bill introduced by the gentleman from Michigan [Mr. RABAUT] requiring that no more condemnation for urban renewal will take place until 50 percent of the people who had been evicted, as a result of previous condemnations, had been replaced. That was a proper bill and indicates the concern that the gentleman from Michigan had in the operation and conduct of the affairs of the Nation's Capital. I could give hundreds of other examples of how Members have expressed their interest and concern in the management of the Nation's Capital. Over and beyond the constitutional question involved, I maintain we do not have the right to turn over the control of the District of Columbia to the people living within its boundaries. Over and beyond that fact, we must recognize that 50 percent of all the property in the District of Columbia is owned by the Federal Government or by foreign governments. Of the 750,000 people living in the District of Columbia, they are largely transitory, Members of Congress, members of foreign governments, Federal executives, members of committee staffs. A large portion of the population does not have their grassroots and basic economic interests within the boundaries of the Nation's Capital. In the recent primary election here last month, only 21,000 people out of 750,000 population went to the polls to vote. So that indicates a very small percentage of those 750,000 really have any interest in the affairs of the Nation's Capital. So, if we granted home rule to the citizens of the District of Columbia, we would be turning over the Federal interest and the Federal rights to a very small percentage of the population. There is a precedent for not granting home rule or control of the local government here to the people who live within the boundaries of the Nation's Capital. On all military reservations throughout the country, we recognize the Federal interests are dominant. People living on military reservations have rights as other American citizens have. They can vote for President and Vice President, but they do not have any control or say-so as to how the affairs on that military reservation will be conducted. Regardless of what we do regarding home rule, we will still be responsible as to how the affairs of the Nation's Capital are conducted. In view of the fact that the right to vote is the predominant issue that we have here, I trust that the Congress will overwhelmingly approve this proposed constitutional amendment, giving the people the right to vote for President and Vice President and exercise some restraint on demanding that the House act on a measure that will turn over the control of the Nation's Capital to a few people who live within its boundaries. In fact, I hope some other Members will reconsider their previous action, and in the mannerism of Victor Borge, "Whisht," scratch their names off the discharge petition.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from Maryland.

Mr. FOLEY. I rise in support of House Joint Resolution 757 and support the gentleman's position on this resolution. As the gentleman has stated in his original remarks, some confusion may exist in the minds of the Members as to this national representation effort that we are supporting, you and I and many others. I rise merely to point out that you and I are supporting this particular measure, House Joint Resolution 757, 100 percent. But you and I differ on home rule. I am a very strong supporter of home rule, but I will not take the time to debate that question at this point, but will merely highlight the fact that you and I differ on the question of home rule, but that we are 100 percent for this resolution providing to the citizens of the District of Columbia the right to vote for President and Vice President.

Mr. BROYHILL. The main thing that the American people are concerned about and in a sympathetic way is to give the people of the District of Columbia the right to vote. That is what this resolution does.

The SPEAKER pro tempore. The time of the gentleman from Virginia has expired.

Mr. BROWN of Ohio. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio [Mr. MCCULLOCH], the ranking member of the Committee on the Judiciary.

Mr. MCCULLOCH. Mr. Speaker, with the Civil Rights Act of 1957 and the Civil Rights Act of 1960, the law of the land now, in full force and effect, every qualified citizen of this country, except those legally domiciled in the District of Columbia, has the right to exercise the elective franchise so far as electors for President and Vice President are concerned.

The rule which is under discussion now will make in order a resolution submitting to the States for ratification a constitutional amendment which will give the people legally domiciled in the District of Columbia the right to vote for presidential and vice-presidential electors. This, indeed, is a historic occasion. I trust the rule will be adopted and that the resolution submitting the question to the States will have the unanimous approval of the House of Representatives.

Mr. BROWN of Ohio. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. SMITH of Virginia. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, this resolution has been thoroughly explained by those who have preceded me. It simply provides that the citizens of the District of Columbia shall be entitled to vote for the President and Vice President of the United States and to elect electors for the purpose of electing the President.

I hope the House will not confuse it with many of the confusing things concerning the District of Columbia, because it deals solely with the one problem of the right of these people who are citizens of the United States to vote for their President. It is an entirely different question, as has been mentioned before, from the present agitation about home rule in the District, because there you run into a constitutional prohibition which has not only constitutional but also historic reasons why the Congress should exercise, as the Constitution requires, exclusive legislation over the District of Columbia. I will not go into that, because it has no relationship whatsoever to the bill before us. I hope this resolution may be adopted and that the constitutional resolution also may be adopted by the House, because I can see no valid reason why any citizen of the United States should be denied the right to vote for President and Vice President.

The joint resolution requires a two-thirds vote. After studious consideration by the Committee on the Judiciary, it has been stripped down to the one, as I regard it, noncontroversial question; and in this late day of the session it is my hope that this may be gotten through and go to the States for ratification. It is the one chance, because if it is complicated further with other matters that do not directly relate to the question of the right to vote for President, the whole thing is going to fail in this late day of the session. I hope very much it can be enacted by the Congress.

If it is enacted, then the question of who can vote in these elections in the District of Columbia is a matter to be determined by the Congress; in other words, the qualifications of the voters and all the details with respect to voting will have to be dealt with in an additional act of Congress. I hope the joint resolution may be passed by the House without objection.

Mr. Speaker, I yield 3 minutes to the gentleman from Hawaii [Mr. INOUYE].

Mr. INOUYE. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

Mr. INOUYE. Mr. Speaker, several days ago, articles appeared in certain Washington dailies strongly implying that certain distinguished Members of Congress had improperly expended public funds while performing special congressional assignments. I refer particularly to the expenditures for meals in the Surf Bar of the Royal Hawaiian Hotel in the State of Hawaii. These articles strongly inferred that the Surf Bar was only a cocktail lounge, or a place where only alcoholic beverages were served, and thereby by inference and implication accused these distinguished Members of falsifying their meal vouchers.

Knowing from my personal experiences that food is served in the Surf Bar regularly, I made certain inquiries in

Honolulu and have received the following information:

The Surf Bar during the year 1957, the specific year the articles referred to, did serve alcoholic beverages to their patrons, but at the same time served meals every day of the week.

My colleagues may be interested to know that in the year 1957, 76,871 meals were served to patrons of the Surf Bar. In the year 1958, 62,200 meals were served to patrons of the Surf Bar. In the year 1959, 77,448 meals were served to patrons of the Surf Bar. This year, as of May 31, 29,947 meals were served to patrons of the Surf Bar.

I have cited these statistics because these newspaper articles strongly inferred that only liquor was being served in the Surf Bar. This inference is understandable because the name, "Surf Bar," would naturally imply that as a place designated as a bar, only liquor would be served. I am hoping that by citing these statistics I am able to indicate to my colleagues that meals are served in the Surf Bar, and by meals I do not mean hors d'oeuvre. I mean full meals. It may also be of some interest to my colleagues to note that across the courtyard from the Surf Bar is the main dining room of the Royal Hawaiian Hotel. This dining room is called the Monarch Room and, naturally, the Monarch Room serves meals, but in a more lavish manner. I feel that I need not tell you that the meals in the Monarch Room are much more expensive than the meals in the Surf Bar.

I purposely cited the existence of the main dining room, the Monarch Room, to point out the strong possibility that our colleagues in having their meals served in the Surf Bar were actually saving taxpayers money. I am certain that my colleagues at the Royal Hawaiian Hotel could have very legitimately had their meals in the Monarch Room at much more expensive rates, but it seems from the printed vouchers that our colleagues decided to have their meals in the Surf Bar at coffee-shop rates.

Mr. Speaker, I hope that this short presentation has brought some light to the Surf Bar incident.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan [Mr. RABAUT].

Mr. RABAUT. Mr. Speaker, I ask unanimous consent to proceed out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. RABAUT. Mr. Speaker, it is most fitting that we, the representative body of the Congress, pause this day to pay tribute to our flag. What we do and say here today, I pray, will make itself felt not only to our own citizenry, but to the rest of the world as well—for today we express our love for country, our dedication to the principles of human decency, our devotion to the basic concepts of freedom, our national dependence upon Almighty God by pledging, as a nation, our allegiance to the Stars and Stripes.

The story of our flag is the story of our Nation. Shining forth from that field of blue is a star for each of the 50 United States. That field of blue had a proud and courageous beginning, and each addition since then has written a glorious chapter to the story of America.

Wherever this banner is unfurled there is hope in the hearts of men who believe that God created man and destined him to be free. Freed to fashion his life, alongside his neighbor, but not at the expense of his neighbor—to join freely in community with other communities of similar ambition in the creation of the state that will govern judiciously the acts of its citizens—free to choose its leaders and administrators who exercise their mandate to govern. All these basic principles of democratic government are contained in a symbol—a symbol that shall forever be the inspiration of a free people who daily pledge, as did their forefathers—their lives, their fortunes and their sacred honor—to the maintenance of their chosen way of life.

Six years ago today, the President signed Public Law 396, which inserted the words "under God" in our pledge of allegiance to the flag. As author of the bill, I should like to reflect a moment, on this anniversary occasion, upon the significance of this amendment.

In the last 184 years this Nation has gradually increased its role among the free sister nations of the earth to the position of undisputed leadership. This leadership is not only material, but spiritual as well. For today we have been catapulted into the unique position where influence has shifted from the material world to the world of ideas. It has been quoted by many commentators of our contemporary scene that the big battle now is for men's minds.

The means of ultimate material destruction are at hand—the need now is for the deterrent force of Christian ideas to neutralize the preponderance of material know-how.

In many circles not a few informed people are saying that this country is losing this most important battle for free minds. We cannot afford to capitulate to the atheistic philosophies of godless men—we must strive to ever remind the world that this great Nation has been endowed by a creator, and that this concept finds expression in our declared way of life.

The revision inserting the words "under God" in our pledge of allegiance to the flag goes far toward fulfilling this obligation. As legislators of this Nation's laws, I feel that this task falls primarily upon us—let us be ever alert to the necessity of this duty.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

Mr. CELLER. Mr. Speaker, pursuant to House Resolution 554, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 757) proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, House Joint Resolution 757, with Mr. TRIMBLE in the chair.

The Clerk read the title of the joint resolution.

By unanimous consent, the first reading of the joint resolution was dispensed with.

Mr. CELLER. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, I deem it a great privilege, in fact I look upon it as a most notable milestone in my service as a Congressman, to sponsor this constitutional amendment which will give the people of the District of Columbia the right to vote in Federal elections. It seems incongruous that citizens as far away as Hawaii and Alaska have the right to vote while the residents of the seat of Government do not, especially when it is remembered that the men and women of the District of Columbia have all the obligations of citizenship, including the payment of Federal taxes, local taxes, and service in our Armed Forces.

The District of Columbia with more than 748,000 residents has a greater number of persons than 15 of our States, and a greater number of its sons and daughters served in our Armed Forces in World War II than served from one-third of our States. The District's population, in fact, exceeds the combined population of Alaska, Nevada, and Wyoming. As against 748,000 of the District, Vermont has 372,000, Delaware 454,000, Wyoming 319,000, Nevada 280,000, and Alaska only 191,000 inhabitants.

In 1948, the last time the District's tax contributions were reported separately, the District paid over $363 million in Federal taxes, more than the contributions of 25 States.

One may ask why have the residents of the District of Columbia been denied the right to vote for President and Vice President? A study of the constitutional debates of the Constitutional Convention of 1787 and also the contemporary writings of our leading statesmen of that day discloses that it was not the intention of the Founding Fathers to deny the District such rights. The denial stems, apparently, from an oversight or omission on their part, for nowhere in our fundamental instrument is there an express prohibition against voting by residents of the District. It is just that the Constitution simply does not provide for the right.

At the time the Constitution was being considered in Philadelphia in 1787 James Madison wrote in the Federalist, No. 43, that the inhabitants of the new Federal City should "of course have their voice in the election of the Government which is to exercise authority over them."

At that time it was not known where the seat of Government would be or what would be the size of the area ceded

to the Federal Government for that purpose. It might have been, for all the Founding Fathers knew, a very small area indeed, just enough to encompass the Federal buildings needed to carry out the business of government, with the residents around it retaining their State citizenship. In any event, no provision for suffrage was included. As the remarks of Madison suggest, the failure to do so was due to an oversight rather than to an intention by the framers to deny residents of the District the right to vote.

Technically, voting rights are denied District residents because the Constitution is said to provide the machinery only through the States for the election of Senators and Representatives to Congress and for the selection of the President and Vice President—see article I, section 2. Since the District is not a State or part of a State, there is no machinery through which its citizens may participate in such matters.

The correction of this omission is the sole purpose of my resolution, House Joint Resolution 757, which calls for a simple amendment to the Constitution which would authorize Congress to pass laws permitting District citizens to vote in national elections.

I wish to emphasize that my resolution does not conflict with or have any bearing on the question of home rule for the District of Columbia. This is not an "either-or" proposition. My amendment only provides for a vote in Federal elections. This resolution is not "home rule" nor is it a substitute for "home rule." It is a matter of public record that the residents of the District of Columbia have been campaigning for the right to vote almost since the time the land which became known as the District of Columbia was ceded by the States of Virginia and Maryland.

Their early campaigns for the franchise were supported by several Presidents. President James Monroe in 1818, Andrew Jackson in 1831, William Henry Harrison in 1841, and Andrew Johnson in 1866 urged national representation for the District in various forms.

In addition, there have been numerous resolutions over the years, some 75 in number. Of these, three were favorably reported by the Judiciary Committees of the Congress, in the Senate in 1922 and 1925 and by the House Committee on the Judiciary in 1940. I may mention that I supported and voted for the bill in 1940, which was favorably reported by this committee.

In this Congress for the first time a resolution has passed one of the Houses of Congress. The Senate on February 2, 1960, favorably acted on Senate Joint Resolution 39. This circumstance and the recent granting of statehood to Alaska and Hawaii lead me to be optimistic about succeeding in getting my amendment adopted by the House during this Congress.

The long struggle to get a vote to the District of Columbia has slowly but surely educated the American public to the point where there is little resistance to giving the vote to the citizens of the District, at least in Federal elections. This legislation will in no way lessen the control of Congress over the seat of government. Further, the number of electors provided for shall in no event exceed the number allotted to the least populous State. That means the District would have three electors, the equivalent number of two Senators and one Representative.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Arizona.

Mr. UDALL. I think the chairman should be commended for making a very concise and clear presentation of what the legislation does. I wanted to ask two or three questions, if I might, to establish in our minds what it does not do.

The bill and constitutional amendment passed by the Senate in February, as I recall, did provide in addition to voting rights for President and Vice President, that the residents of the District could elect two Congressmen. The amendment before us today does not do that. Am I correct?

Mr. CELLER. That is correct.

Mr. UDALL. The constitutional amendment passed by the Senate last February also had no limitation with regard to the electoral vote in the electoral college of the District. However, there is such limitation in this bill, is there not?

Mr. CELLER. That is correct.

Mr. UDALL. I might say to my colleague, the chairman of the Committee on the Judiciary, that I find this limitation an invidious one. I think all of the citizens of our country should stand on equal footing. For my own part, I will favor and will vote for this amendment, but I think this limitation does not do justice to the people of the District, nor does it square with my idea of the Constitution as an equalitarian document.

Mr. CELLER. I will say to the gentleman, he, apparently, is interested in an issue. I am interested in a cause—the cause of the ballot. I am what one would call a practical politician. I could not get through my Committee on the Judiciary nor could I get through this House all that the gentleman wants. Therefore, to use the words that often reflect compromise—half a loaf is better than no loaf at all.

Mr. UDALL. I have no argument with my colleague on this point. May I ask one other question of the chairman, if he will yield further? The citizen of the ordinary American city has a bundle of voting rights consisting of the right to vote for his municipal officials, State officials, the right to elect a Congressman—and also to vote for President and Vice President. It is that bundle of rights that we normally speak of when we talk of voting rights. There is only one of those four rights conferred here today, am I correct in that?

Mr. CELLER. The gentleman is correct.

Mr. UDALL. I think the chairman made it quite plain that this amendment does not confer the right of local self-government that the citizens of every capital in the Western World—except I think Washington and Baghdad—have to govern their local affairs—to determine how to dispose of sewage, how to run the police force, and other matters of local concern.

Mr. CELLER. I think Brasília, the new capital of Brazil, is very much like our present District of Columbia. I think laws have been set up there by President Kubichek of Brazil and his colleagues, along the lines of the laws that appertain to our own District of Columbia.

Mr. UDALL. The only other question I would like to ask of my colleague, and I know he has fought long in his committee for a poll tax amendment, is this question: Is it not true that the other body in the series of constitutional amendments which it sent over contained an amendment sponsored by a Senator from the State of Florida to eliminate the poll tax by constitutional amendment?

Mr. CELLER. That is correct. I might add that the resolution which was passed by the Senate was three-pronged. It provided for a vote in the District of Columbia in Federal elections and for the election of a delegate or delegates. Secondly, it provided for the abolition of the poll tax. Thirdly, it provided for the selection by various governors of Representatives in Congress in the event of some holocaust or common catastrophe where a great many Representatives of the Congress might be exterminated. Again, being practical, I knew it would be very, very difficult to get such a three-pronged constitutional amendment through the House, much less through my Committee on the Judiciary, and I reasoned that it would be better not to have such a broad target at which opponents could aim their shafts of opposition, and, therefore, I tried to have this amendment as simple as possible and limit it to the joint resolution which you now have before you. I had a predilection to widen it a little bit, but I had to bow down to the wishes of my committee who are very astute and learned men and practical men. They offered amendments and we fashioned the proposed legislation that you now have before you. I think it is a good bill. On the way to the summit, we may have to visit a number of plateaus. This is one of the plateaus on the way to the summit.

Mr. UDALL. I might say to my colleague, I shall support his amendment. I just want to observe, however, that it seems to me the base of the amendment sent to us by the other body has been almost whittled away. I do not regard it as a generous proposal. I regard it as a minimum proposal, and I shall support it as such. I thank the gentleman for yielding.

Mr. CELLER. The bill, Senate Joint Resolution 39, which passed the Senate particularly contained the provision for the abolition of the poll tax. The distinguished and dedicated senior Senator from Florida, Senator HOLLAND, was the faithful and courageous sponsor of the poll tax repeal. He has assured me that in the interest of getting at least the vote for the District in national elections he would yield on his amendment. If

he does not make this sacrifice there might not be any bill passing the House. The Senator graciously yielded on his amendment. I hope that he will press for the poll tax repeal in the next session. I pledge every possible help to him in that repeal. I shall do all and sundry to support such repeal on the House side as he will on the Senate side.

The right, the privilege, the duty to vote—whatever characteristization you may ascribe to it—is the foundation upon which rests what is the essence of a democracy, namely, government by discussion. Therefore, unjustifiable segregation from political life is a cruel exercise in isolation.

Under Anglo Saxon concepts, since the year 1215 when the Magna Carta declared that exceptional feudal aids were not to be levied without the common counsel of the realm, the extension of the body of the electorate has been the universal goal. At first, the counsel demanded by the Magna Carta was given by an assembly consisting of great lords, ecclesiastical prelates and tenants in chief, but there were in essence local assemblies or town meetings. They met twice a year to determine questions of law, inflict criminal punishment and to transact other kinds of business. This was the skeleton of the true representative system.

In 1265 the leaders of the barons embattled with the king and called for a parliament of two knights out of each shire, two burgesses from the towns, and from five sports each, four men. Thirty years later, there was summoned what is known as the "model parliament" by King Edward I which consisted of 2 archbishops, all of the bishops, the more important abbots, 7 earls, 41 barons, and in addition to these, each sheriff "shall cause to be elected 2 knights from each shire, 2 burgesses each from 115 cities and boroughs." At first the clergy, the barons, and the commoners met separately. This, of course, could not work and gradually there evolved the House of Lords which was comprised of lords temporal and lords spiritual and a House of Commons representing all of the classes.

I have gone back to English history because our own institutions derived therefrom. In my review I am again struck with the thought that the extension of the franchise was the most civilizing element in the development of national entities.

The French Revolution and the American Revolution gave radical impetus to this extension of the franchise. Basic to our understanding is the historical statement in the Declaration of Independence "all governments derived their just powers from the consent of the governed."

It has been said another way, "Either no individual member of the human race has any real rights or else all have the same." Widening the electorate has been no easy victory. At the outbreak of the American Revolution there was not a colony which did not require the ownership of property for the privilege of voting. Eight colonies imposed religious or moral tests upon either officers or electors. New Hampshire excluded Roman Catholics; and South Carolina deemed unsafe all citizens who did not believe in God and a future life. Several required that assemblymen should be Protestants, while others demanded that they should believe in God and the divine inspiration of the Scriptures.

By 1830 it may be said that a broad, though not universal, suffrage had been acquired in practically all the Original Thirteen States. There were exceptions like North Carolina, or Rhode Island, where Dorr and his followers acquired the vote only by rebellion. Where a property qualification occurred in the State west of the Alleghenies, it was of little consequence, so long as an abundant supply of cheap land made it easy for all to obtain property. By the end of the Civil War, practically universal, manhood suffrage had been established for all whites.

It took until the second decade of the 20th century to remove the disqualification of sex. The paramount question therefore before us is—shall the citizens of the District of Columbia be classed with idiots, insane people, and persons convicted of serious crimes which today constitute the major classes of people who are disenfranchised? Great efforts have been made by this Congress to assure the right to vote to all inhabitants under the 15th amendment of the Constitution, although this amendment speaks of abridgements of the vote on racial groups. Our Civil Rights Act of 1957 through 1960 are based upon that amendment. There can be, therefore, no logic, no justification, no indifference to the disenfranchisement of the residents of the District of Columbia. Under this bill, the enfranchisement is a limited one.

The people of the District of Columbia want to participate in national elections, even if it were to be as abortive as such participation was back in 1924 when the Alabama Democratic delegation in Madison Square Garden said "24 for Underwood" through 103 ballots. Without any kind of vote, the people of the District of Columbia are mere wards of Congress. They are declassed. That reflects upon their dignity; it wounds their pride; they are disqualified, though qualified. They are written off like excess baggage.

What useful purpose would be served to deny them the right to vote at least in the presidential election? There is no skin off anyone's back in granting that right. None is hurt but many will be helped. We boast of our conception of fair play. It is not fair to have a whole Nation possessed of the ballot, but not the people of the District of Columbia. Why place a hex on them? Denial of any vote is not like cutting out a useless appendix; it goes to the heart and pride of the citizen, and pride is one of our most precious human emotions.

On an average, 40 percent of our people qualified to vote do not vote either through apathy or ignorance. I assure you the people of the District will not be guilty of either indifference or unwillingness or ignorance. They will vote to a man. Their hunger for the vote is too great—they would literally devour it.

For the reasons stated above, I hope the necessary two-thirds majority will be available to pass this resolution.

Mr. McCULLOCH. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, we have an opportunity today to do our part in conferring a fundamental American right—the right to vote for presidential and vice presidential electors—upon the citizens who reside in and have their legal domicile in the District of Columbia. It is indeed difficult to understand why, more than 180 years after the birth of our Nation, our Constitution has not been amended to provide such fundamental privilege. No one has explained why our fellow American citizens who choose to make their homes in the Capital City of the Nation should be denied the elective franchise in a representative republic. Therefore, we are presented not only with a rare historic opportunity but also with a basic historic challenge.

House Joint Resolution 757 proposes to amend the Constitution in only one particular—to permit the residents of the District of Columbia, who are legally domiciled therein, to vote for President and Vice President, or, more technically speaking, for presidential and vice presidential electors.

House Joint Resolution 757 does not include any of the other measures proposed by the other body in Senate Joint Resolution 39 and it does not contain any provision for the election of Delegates to the House of Representatives. In addition, the rule adopted by the House does not provide for any amendments except amendments offered by the Judiciary Committee.

No amendments will be offered. I am happy to make this statement in order to allay any fear of any Member who desires to support this measure but who could not support it in conjunction with unrelated measures which might be objectionable to any of my colleagues.

I might add that I am of the definite opinion that with anything as fundamental and lasting as a constitutional amendment I much prefer to confine consideration to one topic at a time.

The proposed amendment is necessary because the Constitution makes no provision for the selection of presidential and vice presidential electors by any political subdivision of the Federal Union other than States. Since the District of Columbia is not a State, there is no method short of a constitutional amendment which will permit the residents, legally domiciled in the District, to exercise the elective franchise.

The proposed amendment will simply authorize the District to select presidential and vice presidential electors in a manner similar to the method provided for the States in article II, section 1 of the Constitution. In fact, the language adopted is patterned after the language in article II. In addition, it contains the proviso that in no event shall the District be entitled to more electors than the least populous State. This proviso was adopted because it was thought that under no circumstances should the District, which is not a State, have a greater voice in selecting the President and Vice President than the least populous State.

Upon ratification of the amendment, the Congress will be empowered to enact enabling legislation setting forth the qualifications of the electors; the qualifications for District voters, and the manner in which elections are to be held. With respect to the States, these matters, under article II, section 1, are left to the respective State legislatures.

The proposed amendment next provides that the District electors "meet in the District and perform such duties as provided by the 12th article of amendment." This is the present provision of the Constitution which prescribes the manner in which the electors cast their ballots for President and Vice President. In the event the election is thrown into the House of Representatives, the District would not participate. In that contingency, the delegation from each State is entitled to one vote; and, since the District is not a State there is no method by which it could participate in such event. The committee considered this problem but thought it would be unwise to try to adopt language into this simple resolution which would give the District a vote in the House of Representatives, if such condition ever arose.

It is important to remember that the power of Congress to exercise exclusive legislation over the District under article I, section 8, clause 17, of the Constitution will not be affected. In other words, amending the Constitution to grant the right of franchise in presidential elections will in no way diminish the legislative power of Congress over the District.

There is strong argument that the Founding Fathers did not intend to deprive the citizens of the future District of the right to vote even though they did intend to create a separate seat for the Federal Government under the exclusive domain and control of Congress. To this extent adoption of the proposed amendment will not alter the character of the District as the permanent seat of the Federal Government.

Today the District has a population of about 750,000 people, which is more than the population of each of 13 of our States. The citizens of the District have fought and died in every U.S. war since the District was founded. Yet they cannot now vote in national elections because the Constitution has restricted that privilege to citizens who have a voting residence in one of the States.

The Founding Fathers did contemplate the creation of a Federal district but they neglected to make provision for the residents of the future District to vote for presidential and vice-presidential electors. In 1788 and 1789, Maryland and Virginia ceded the original territory to the Federal Government. In 1846, the Virginia portion of the District of Columbia was retroceded to Virginia. To my comprehension, it is inconceivable that the Founding Fathers, if they had contemplated the growth of the District as a permanent home for so many of our citizens, would not have made provision for them to vote. I believe, therefore, by adopting the proposed amendment we will be conforming the Constitution to present day reality, but in keeping with the spirit of our forebears who founded the Nation.

Finally, I should like to stress that this measure was given very careful consideration by the Judiciary Committee. It presents for your consideration a most important proposal. With its adoption by the Congress and its ratification by 38 States the legally domiciled residents of the District of Columbia shall at long last come of age. This is, indeed, a historic occasion.

Mr. HENDERSON. Mr. Chairman, will the gentleman yield?

Mr. McCULLOCH. I am happy to yield to my colleague from Ohio.

Mr. HENDERSON. I should like to commend the gentleman for his statement and his explanation of the resolution and the amendment which is provided in the resolution. In his remarks the gentleman referred to the 12th amendment, and it is also referred to in the body of the resolution itself. I should like to call to the attention of the gentleman from Ohio the following language which is a part of the first sentence of the 12th amendment:

> The electors shall meet in their respective States, and vote by ballot for President and Vice President, one of whom, at least, shall not be an inhabitant of the same State with themselves.

The amendment with which we are dealing this afternoon is an amendment not pertaining to a State but to the seat of government, or to a district, as it is called, the District of Columbia. May I ask the gentleman if the restricting language contained in this first sentence, which states, "one of whom, at least, shall not be an inhabitant of the same State with themselves," should be construed to apply to the electors of the District of Columbia, which itself is not a State.

Mr. McCULLOCH. I am of the opinion that the resolution before us if adopted would have no bearing on the question propounded by our colleague from Ohio. I am of the opinion, and we studied this question since the resolution was reported, that the President and Vice President would be limited so far as residences are required only and just as they have been limited in the past.

Mr. HENDERSON. I thank the gentleman.

Mr. WHITENER. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Chairman, I am very happy to support this resolution. If I gather the sentiment of the House, I would not be at all surprised that the suggestion of the gentleman from Ohio, who preceded me, would be followed by the House with a unanimous vote in support of this resolution.

I cannot understand how anyone could be opposed to giving the right to vote, the privilege to vote, to the residents of the District of Columbia.

There is no doubt that this resolution is a step in the right direction, but I must emphasize that it is only one step. I hope that no one who supports this bill will pretend that by so doing he has done all that need be done for the citizens of the District of Columbia. The right to vote is only one element that makes up the right of self-government. Giving the citizens of the District of Columbia the right to vote for President and Vice President of the United States is important, but it still does not give them the right to govern themselves within the District. It still does not give them the right to have an elective representative speak and vote for them in the Congress of the United States.

The right to representation in the Congress and the right to make local laws for their local self-government are encompassed within the home-rule bills before the House.

While it is safe to say that the sentiment for this measure now before us has been sparked and encouraged, at least in part, by the persistent action on the part of the sponsors of home rule, none who support this bill should assume that they have done their full duty by the citizens of the District of Columbia.

Having voted for this resolution, each of the sponsors thereof should then resolve to bring before the House for its action the home rule bill which will give to the residents of the District the other two rights which are just as important to them as the right to vote for President and Vice President, to wit, the right to be represented in the U.S. Congress and the right to make their local laws.

It is hard for me to understand how those who stand for States rights oppose home rule for the District. Although the District is not a State, States rights is merely a name for self-government. The State, or the Nation, is merely a fictional sovereign brought into being by the people as an instrumentality by which to govern themselves. To deny to the people of the District the right to govern themselves as to local matters, is to deny them the very rights which the supporters of States rights demand for themselves.

Let me call to your attention this inconsistency. There are seven discharge petitions at the desk. The discharge petition for home rule needs 13 more signatures. On one or more of the other discharge petitions there are at least 30 signatures of Members of the House whose names do not appear on the discharge petition for home rule. I wonder how they can justify withholding their signatures from the home rule petition. To do one's full duty by themselves and their country, those Members should sign discharge petition No. 2 for home rule for the District.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. WHITENER. Mr. Chairman, I yield such time as he may desire to the gentleman from Florida [Mr. BENNETT].

Mr. BENNETT of Florida. Mr. Chairman, as a Member of the Congress it is, of course, my privilege to be, you might say, on the city council or the State legislature of the District of Columbia. I own a house in the District of Columbia in which I live during sessions of Congress. I have neighbors who have lived in the District of Columbia for many years, some who have lived in the District for many generations. One of my immediate neighbors is the Marbury family

which has been in this general area for, perhaps, 200 years.

Mr. GROSS. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Seventy-one Members are present, not a quorum.

The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 130]

Addonizio	Fulton	Morris, Okla.
Alexander	Gallagher	Moss
Anfuso	Garmatz	Moulder
Ashmore	Gray	O'Neill
Auchincloss	Green, Pa.	Osmers
Ayres	Hargis	Patman
Bailey	Hébert	Poage
Baker	Hemphill	Powell
Barden	Holifield	Quigley
Beckworth	Holtzman	Rains
Bennett, Mich.	Ikard	Riley
Bentley	Jackson	Rivers, S.C.
Blitch	Jennings	Roberts
Boland	Jensen	Rogers, Tex.
Brown, Mo.	Jones, Ala.	Shelley
Buckley	Jones, Mo.	Short
Burdick	Kearns	Smith, Miss.
Burleson	Keith	Spence
Cahill	Kelly	Springer
Carnahan	Kilburn	Taylor
Casey	Kilday	Teague, Tex.
Daddario	Kilgore	Teller
Diggs	Kirwan	Thomas
Dingell	Kluczynski	Thompson, Tex.
Dorn, N.Y.	Lafore	Thornberry
Dorn, S.C.	Lesinski	Udall
Dowdy	Loser	Wallhauser
Durham	McGovern	Watts
Elliott, Ala.	McMillan	Weis
Fino	Macdonald	Withrow
Fisher	Magnuson	Wright
Flynt	Mahon	Young
Fogarty	May	
Forand	Mitchell	

Accordingly, the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. TRIMBLE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration House Joint Resolution 757 and finding itself without a quorum, he had directed the roll to be called, when 332 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The Chair recognizes the gentleman from Florida [Mr. BENNETT].

Mr. BENNETT of Florida. Mr. Chairman, I have had the privilege of temporary residence in the District of Columbia during many sessions of Congress, living in a house I own, with my family here with me and my children of school age going to school; so I have a good deal of experience in living in the District of Columbia.

I know what my neighbors feel about this. I have my own feelings on it. I think this is only a matter of sheer justice that this measure be enacted, and at the earliest possible moment.

Since the speaker before me made some reference to home rule, I should like to say that none of my neighbors favor "home rule" as those words are defined by most people who agitate for this. It has been my experience that most people who agitate for home rule are people far removed from the District of Columbia and they have theoretical ideas about what is proper for other people and have ideas as to what is of advantage to themselves for political, or other, reasons for becoming enthusiastic. In my opinion, it is not the desire of the majority of the people of the District of Columbia to have home rule. I find the majority of the people of the District of Columbia are very bitterly, violently, and vigorously opposed to the so-called home-rule provision; but they are in favor of the provision which is before us today. I hope it is enacted as soon as possible.

Mr. McCULLOCH. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. MEADER].

Mr. MEADER. Mr. Chairman, we are about to adopt a resolution which if ratified by three-fourths of the States within 7 years, or 38 States, will become the 23d amendment to the Constitution of the United States.

I am a member of Subcommittee No. 5 of the Committee on the Judiciary, which held hearings on this and related resolutions. I attended all the hearings and participated in the deliberations of the subcommittee and the full committee.

I regard the amendment of the Constitution of the United States as an extremely serious matter. I think we ought to pause and reflect that this remarkable document, the Constitution, has proved workable and flexible enough to permit our Nation to grow in the century and a half of its existence without serious change in the phraseology of our original charter. This consideration is one which should give us all pause when we are contemplating modifying that basic document.

We ought to reflect also that if we regard the bill of rights, the first 10 amendments, as an integral part of the Constitution itself, the Constitution has really been amended permanently only 10 times. The 18th amendment we found necessary to repeal by the 21st amendment. The 22d amendment, the Presidential tenure amendment, after less than 20 years, is now under attack. There is a great deal of sentiment for, and I believe the Senate even commenced hearings on, another constitutional amendment to repeal the 22d amendment.

We should also remember that only five additional resolutions have been presented by the Congress to the States and have failed of ratification. Thus, we realize that when we are proposing to add a 23d amendment to the Constitution we are taking a very serious step.

For that reason, I approached this proposal with resistance, and probably with the least enthusiasm of any member of the subcommittee and of the full Judiciary Committee.

I should like to point out some of the aspects of this proposed constitutional amendment which the Members of the House should have in mind when they vote and which may contribute to the consideration by the several legislatures of this resolution, if it is passed by a two-thirds vote of both the House and the Senate.

First, I do not believe there is a Member of this body or the other body who wants to deprive any legally qualified citizen of his right to participate in the selection of agents to express his will in their government. But this amendment does not cure that.

This amendment will merely enable the Congress to provide the means whereby electors for the District of Columbia could participate in the selection of President and Vice President. But, it does not do anything for a lot of other citizens of the United States—for the 2,300,000 Puerto Ricans who are citizens of the United States or for the people of other territories such as Panama, the Canal Zone, Samoa, the Virgin Islands and Guam. They will not have their franchise granted to them by this amendment.

The resolution before us is piecemeal legislation and it is also compromised legislation. Even with respect to the residents of the District of Columbia, it does not provide for a full voice in the election of officials who will exercise governmental authority over them. They have no representation in the Congress of the United States and this amendment will not give it to them. They will have no representation in any territorial legislature or in any local unit of government. So this is only a partial franchise that you are granting to the residents of the District of Columbia.

Mr. McCULLOCH. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Ohio.

Mr. McCULLOCH. It is true, is it not, that there is no constitutional authority needed in our system of government to give the District of Columbia a delegate or several delegates in the House, if we so desire to do?

Mr. MEADER. The gentleman, I believe, is correct as far as the constitutional authority of the Congress is concerned. We have provided by statute for delegates or commissioners from the territories, and we have that authority under the Constitution without further amendment.

There is considerable doubt, however, that the Congress could grant voting rights to any such representative of the District of Columbia. He could be here in the same sense that the Commissioner of Puerto Rico is here or the delegates that we used to have from the Territories of Hawaii and Alaska.

But, voting representation in the Congress either in the House of Representatives or the Senate or both, probably, could be provided for the District of Columbia only by a constitutional amendment. Indeed, the original form of this resolution did contain such a provision which would enable the Congress to provide for the election of delegates to the House of Representatives with the privilege of voting. But, that was stricken in the committee consideration of the measure.

Let me also point out that my attitude was that if this desirable objective; namely, granting the franchise to District residents, could be attained without amending the Constitution of the United States, but by mere statutory enactment, that we ought to explore all such possibilities carefully, thoroughly, and fully

before we take the unusual and important step of tampering with the Constitution of the United States.

Some questions were asked along that line during the hearings, and I just want to call them to the attention of my colleagues. The gentleman from Virginia [Mr. BROYHILL], who spoke earlier in the afternoon on the rule and who has sponsored legislation of this type for a number of years, was a witness before our committee on April 6, 1960. At page 28 of the hearings, I asked Mr. BROYHILL these questions and I received these answers:

Mr. MEADER. Mr. BROYHILL, you represent the area in Virginia which was previously at one time—I guess before 1846 or some such year—a part of the District of Columbia, the 10-mile square.

Mr. BROYHILL. A portion of my district was originally a portion of the District of Columbia—that is, Arlington County and Alexandria.

Mr. MEADER. Have there been any adverse effects that have come to your attention from the fact that the Federal Government did, by statute, relinquish or retrocede that portion of the District of Columbia back to Virginia?

Mr. BROYHILL. Any——

Mr. MEADER. Adverse effects so far as the National Government is concerned?

Mr. BROYHILL. No, indeed. The fact of the matter is that if you tried to get it back, you would meet with some resistance from people over there, I believe.

Some witnesses testified that retrocession was not popular either with the residents of the District or with the State of Maryland. I felt there should have been further exploration of the possibility of retrocession.

If the Maryland portion of the District, except for that portion which is now occupied by the principal Government buildings, the Federal Triangle, were retroceded to Maryland the residents of the District of Columbia would be given what? A partial vote? No, complete voting rights. They would have the right to vote for the Governor of the State of Maryland, for Representatives in Congress, and Senators, and their local city government.

The metropolitan area of Washington would not be artificially restricted by the District lines, but might become a normal metropolitan city. That possibility, in my judgment, although it is commented on in the committee report, was not thoroughly explored; it was superficially referred to.

Mr. MATTHEWS. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Florida.

Mr. MATTHEWS. I want to congratulate the gentleman on his observations and to ask him a question. As the gentleman may know, I am a member of the much-criticized District of Columbia Committee. When we have hearings about home rule we always bring up the idea: Why do we not retrocede part of the District to Maryland, contracting the Federal City? The gentleman I am sure will be interested to know that we could find no enthusiasm whatseover for that point of view. I do want the gentleman to know, however, that that point of view has been thoroughly explored by the District Committee.

Mr. MEADER. I want to call attention to another important aspect of this resolution. The resolution before you, on page 2, section 1, starting in line 2, reads as follows: "The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct" a number of electors, and so on. That language was adopted by the committee. The original resolution, and I want you to pay close attention to the distinction, read as follows: "The people of the District constituting the seat of Government of the United States shall elect in such manner and under such regulations as the Congress shall provide by law" a number of delegates and electors.

There is a very important distinction in the phraseology. I might say to the members of the committee that I suggested the language as it appears in the resolution before you because it follows precisely the language of the Constitution, article II, section 1, providing for the electors for President and Vice President.

Article II, section 1, clause 2, states "Each State shall appoint in such manner as the legislature thereof may direct" a number of electors, and so forth.

I want to call your attention to the fact that the phrase I have quoted does not require popular election of electors for President and Vice President; the legislature is given complete authority in article II, section 1, to determine how presidential electors are to be selected. That is the same position Congress will be in if this resolution becomes an amendment to the Constitution.

What does that mean? After 38 States have ratified this resolution and it becomes amendment No. 23 of the Constitution, enabling legislation will be introduced to provide the manner in which residents of the District of Columbia shall select electors for President and Vice President. Do you have any idea where that bill will be referred? It probably will be referred to the District of Columbia Committee. I do not know whether we have accomplished very much or not if, having amended the Constitution, its implementation is referred to the District Committee, which some have accused of being unfriendly to the residents of the District of Columbia.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield.

Mr. ROGERS of Colorado. You will concede that once this amendment is adopted by the 38 States the Congress then has the power to provide a method for the selection of electors, does it not?

Mr. MEADER. That is what this amendment does; it authorizes Congress by legislation to provide for the selection of the presidential electors.

Mr. ROGERS of Colorado. There is nothing in this amendment that would authorize a so-called election for those electors; is that correct?

Mr. MEADER. It would be completely within the power of the Congress to decide in what manner these electors shall be appointed.

Mr. ROGERS of Colorado. Does the gentleman think that Congress could itself elect the electors without referring it to the people?

Mr. MEADER. Let me ask the gentleman whether under article II, section 1, the State legislatures might elect the electors or appoint the electors, if they so decided?

Mr. ROGERS of Colorado. Yes. I understand the gentleman's argument is that the State legislatures may now, if they so desire, provide the method of selection of the electors without referring it to a vote of the people; is that correct?

Mr. MEADER. I am simply reading the exact language of the Constitution. I do not intend to make any interpretation of it other than what the language imparts. I do not know whether the legislature of any State has ever provided for the selection of presidential electors or for the appointment, to use the constitutional phrase, of presidential electors in any other fashion than by a direct vote of the people. I know of no State where that has been done, and I do not know whether there is any litigation involving the interpretation of article II, section 1, or not. I am assuming, however, that this resolution will give Congress the same authority with respect to the appointment of electors that the State legislatures have under article II, section 1.

Mr. ROGERS of Colorado. Once this is adopted and Congress fails to act in setting up machinery for the election of electors or their selection, then are they to be considered as a part of the electoral college and would they constitute one of the 538 that will be in that college?

Mr. MEADER. I believe that the count would be 540, would it not?—437 Representatives, 100 Senators, then 3 additional for the District of Columbia.

Mr. ROGERS of Colorado. Except that whenever this census is over, as I understand it, we go back to the 535; that is, after the last census.

Mr. MEADER. That is still to be determined.

Mr. ROGERS of Colorado. But if the Congress fails to take any action whatsoever, the people would not be permitted to vote in the District of Columbia?

Mr. MEADER. I think it would take affirmative action by the Congress before anyone could vote for electors in the District of Columbia. Does not the gentleman agree with me?

Mr. ROGERS of Colorado. I agree it would take affirmative action, and that under the affirmative action the Congress could set the qualifications for electors or the voters.

Mr. MEADER. I believe that Congress could.

Mr. ROGERS of Colorado. For the District of Columbia and set up the method and qualifications of the electors; could it not?

Mr. MEADER. It could, subject to any provisions in the Constitution, governing the time and place of choosing electors.

Mr. ROGERS of Colorado. It could set up all of the election machinery if the selection is to be by an election?

Mr. MEADER. I believe that the Congress could.

Mr. ROGERS of Colorado. I thank the gentleman.

Mr. MEADER. I have one other point. The District of Columbia being the seat of Government, a great proportion of the population is here only temporarily, being connected in one way or another with Government business. Many District residents actually exercise their franchise back home in States from which they come.

On that point I call the attention of the committee to page 34, Mr. McLaughlin's testimony, where he estimated the population of the District as 850,000 or so; but over 100,000 are estimated to have voted by absentee ballots in States from which they come.

In that connection I remind the committee that in the recent primary in the District of Columbia there was something less than 30,000 votes cast in the presidential preference primary.

I call attention also to the fact that the census statistics seem to indicate that the total number of persons 21 and over at the present time is estimated to be 553,000, of which a substantial number maintain voting residence in a State.

In that connection I call attention to the language of the report, and I must defer to my colleague the gentleman from Ohio [Mr. McCULLOCH] on this matter; that is, the committee inserted language which indicated in future censuses the committee does not intend to have those persons counted for the purpose of establishing the number of electors who maintain their domicile and their voting residence in other States and vote there. That matter can be taken care of by Congress under its control over the census laws.

Mr. WHITENER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I suppose that one of the most important duties that confronts one is when we are considering changing the basic document under which this country is governed. This decision as embodied in House Joint Resolution 757, will not only face the Members of the House and the Members of the other body. If two-thirds of the membership of the two bodies of the Congress approve this resolution, the general assemblies and legislatures of 50 States will within the next 7 years consider this change in the Constitution of the United States.

We have heard a great deal today about the provisions of this resolution. At the risk of boring some of my colleagues who have been so patient today I shall repeat what has been said in outlining the provisions of the resolution. It merely proposes an amendment to our Constitution empowering Congress later to provide for presidential and vice presidential electors for the District of Columbia, not to exceed the number of electors to which the least populous State in the Union may be now or hereafter entitled. This resolution should not be confused with the home rule agitation which has been so prevalent around the Capitol in recent days and for some time prior to the 86th Congress.

I think that as we consider this proposition we may, for the purpose of the record, consider some of the problems which will confront someone in the future in connection with this very simple resolution.

It has been pointed out in the committee hearings that there is some doubt as to what the actual population situation is in the District as compared to a sovereign State, by reason of some factors which are well known to all of us. In testimony before the committee the President of the Board of Commissioners of the District of Columbia, Mr. McLaughlin, testified that according to his best information—I believe that is on page 34 of the hearings—some 100,000 residents of the District participated in the last general election through the medium of absentee ballots in their respective States. Of course, Mr. McLaughlin and the other witnesses would not undertake to say how many nonparticipating voters there were in the District who were eligible to participate in elections back home under the laws of their States.

In North Carolina, my home State, there is a specific statutory provision which preserves the voting eligibility of a North Carolinian who is here in Washington, residing here and working for the Government. I would presume that the same is true in other States. So, when we talk about the eligible voting population of the District of Columbia we are dealing with a rather illusory matter.

In our committee report we said on page 4 that—

> It is the committee's intention regarding future enabling legislation to carry out the provisions of this constitutional amendment, that no District inhabitants (including minor dependents) who maintain legal domiciles or voting residences elsewhere, be included in the census computation insofar as determining the number of electors is concerned.

So we are faced with this practical problem, that the District of Columbia must of necessity, if the intent of the committee is carried out, become a favorite child in the census reports of the future and there will be a practical problem which seems to me to be insurmountable.

I think that points out the wisdom of this provision in the resolution—to which some opposition has been expressed—that the District should be limited to the number of electors enjoyed by the least populous State. In doing that we will in effect attempt to bar persons from having the right to vote both here and elsewhere and having them counted in the District as eligible people in determining the number of electors.

Mr. MASON. Mr. Chairman, will the gentleman yield?

Mr. WHITENER. I yield to the gentleman from Illinois.

Mr. MASON. In the regular elections between 50 and 60 percent of the regular voters or the legal voters of a State vote, and that is about all. Judging from that ratio if 100,000 voted from the District, that would mean that at least 180,000 or 190,000 had the right to vote in their own States, if they wanted to.

Mr. WHITENER. I may say to the gentleman that, of course, we are dealing in a rather imponderable realm when we talk of the population and the eligible population here in the District and its fictional characters who, some would say, are being taxed without representation.

The District Commission President in testifying before the committee just a few short weeks ago testified that he estimated the population of the District of Columbia to be between 830,000 and 850,000. As I am informed, just this week the Census Bureau has reported that the population was some 747,000. So when we have this limitation it is a very salutary one, and one which I think makes it possible for those of us who approach this proposal somewhat hesitantly to go along with it. I express the hope that a sufficient number of our colleagues will support it to make it possible to submit it to the several States for ratification.

Without that limitation, the so-called Cramer amendment, I would have serious doubt as to whether it would be the proper thing to let someone go around the city of Washington and count heads and say that therefore the District of Columbia would be entitled to have so many electors, because some of these that are counted are heads of people who are participating in political activity in their own States for both of the major political parties, and who desire to preserve their legal residence in North Carolina, Illinois, or some other State. It would not be proper, I think, to count them twice.

There is a great history about this constitutional provision. Some say it was an oversight on the part of the Founding Fathers that they did not provide for election of electors for President and Vice President within the District of Columbia. From the research I have been able to make, I do not believe that was an oversight because it seems to have been contemplated that this territory known as the seat of the Government, not to exceed, as the Constitution says, an area 10 miles square would be sort of a no-man's land, and that no one could interfere with its administration other than the elected Representatives of the people who serve in the Congress of the United States.

Madison presented the matter with a proposed constitutional provision. Pinckney of South Carolina, my neighboring State, presented another proposition. Out of these came the present provision, clause 17 of section 8 of article I of the Constitution. According to the recorded history this provision was very severely criticized in many States, including my own State of North Carolina. The great James Iredell, who later served on the Supreme Court of the United States, in the ratifying body of North Carolina satisfied the people of my State that we should not have the situation of conflicting authority as to the administration of the affairs of what was known as the seat of Government.

I say to you in conclusion that I think too many persons in our country today

under the false contention of liberalism would strike down constitutional principles which were carefully thought out, and which are not outmoded. Today as we deal with this measure we can pass it and amend our Constitution in the orderly manner provided in article V of the Constitution.

But we should not confuse it with home rule. In my judgment we should never engraft on the statute books or the Constitution so-called home rule for this area, which is now and should eternally be the seat of the Government, regulated and controlled solely by those who are elected to serve in the two bodies of the Congress of the United States.

Mr. GUBSER. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Eighty-one Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 131]

Addonizio	Fisher	Mahon
Alexander	Flynt	Mitchell
Anfuso	Fogarty	Morris, Okla.
Ashmore	Forand	Moss
Auchincloss	Fulton	Moulder
Ayres	Gallagher	Patman
Bailey	Garmatz	Poage
Baker	Gray	Powell
Barden	Green, Pa.	Preston
Bass, Tenn.	Hargis	Quigley
Beckworth	Hébert	Rivers, S.C.
Bennett, Mich.	Hemphill	Roberts
Bentley	Herlong	Rogers, Tex.
Blitch	Holifield	Shelley
Boland	Holtzman	Short
Boykin	Ikard	Smith, Miss.
Brown, Mo.	Jackson	Spence
Buckley	Jennings	Springer
Burdick	Jensen	Steed
Burleson	Jones, Ala.	Taber
Cahill	Jones, Mo.	Taylor
Carnahan	Judd	Teague, Tex.
Casey	Kearns	Teller
Celler	Kelly	Thompson, N.J.
Daddario	Kilburn	Thompson, Tex.
Daniels	Kilday	Thornberry
Davis, Tenn.	Kilgore	Vinson
Dent	Kluczynski	Watts
Diggs	Lafore	Weis
Dorn, N.Y.	Landrum	Wharton
Dorn, S.C.	Loser	Willis
Dowdy	McGovern	Winstead
Durham	McMillan	Withrow
Elliott, Ala.	Macdonald	Wolf
Feighan	Machrowicz	Wright
Fino	Magnuson	Young

Accordingly, the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. TRIMBLE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the joint resolution House Joint Resolution 757, and finding itself without a quorum, he had directed the roll to be called, when 325 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

Mr. McCULLOCH. Mr. Chairman, I yield 6 minutes to the gentleman from Florida [Mr. CRAMER].

Mr. CRAMER. Mr. Chairman, it will not be my intention to be repetitious, but rather to discuss principally my amendment which was offered in and approved by the committee and which appears on page 2, line 8 of the resolution and reads "but in no event more than the least populous State."

That means that the residents of the District of Columbia would have a right to a number of electors equal to those of the least populous State in the Union. If the bill had been voted out as presented by the subcommittee without this amendment, it would have meant that the District of Columbia, not having the status of a State in this Union, would in effect have a larger number, unquestionably, of electors, meaning three, four, or five. If it were 5 it would have a larger number of electors than 13 States in the Union today. If it were three it would have an equal number of electors to four States in the Union. If it were 4, a number equal to 13 States and more than 4. It was likely under the anticipated population of the District (800,000) that it would at least have four electors as the subcommittee initially voted the bill out without my amendment. The District of Columbia would have a larger representation in determining who the President and Vice President of the United States should be than any one of the following States, and this is the reason it was thought as the bill came out of the subcommittee it was not really fair to those States that have full State status. For instance, Delaware has three, Nevada three, Vermont and Wyoming three. The following States have four. The District of Columbia under the initial bill would have had four and possibly five, so that the District voters would have more to say about presidential and vice-presidential electors than the four States I have named and at least an equal number of electors and an equal voice in saying who should be President and Vice President of the United States as the following States: Arizona, Idaho, Montana, New Hampshire, New Mexico, North Dakota, South Dakota, South Carolina, and Utah. Obviously, it is understood that the number of electors is determined by two for the U.S. Senators and one for each Representative in the House of Representatives.

Therefore, the feeling of many of us was that the District of Columbia would have a disproportionate voice in determining who the President and Vice President of the United States should be, and thus would possibly have an even greater say-so in those all-important offices than some 13 States, and assuredly equal to some 13 States in the Nation, depending on whether, under the subcommittee proposal the District would get four or five electors.

On the bill itself, let me say that this bill deals only with the question of the President and Vice President as chosen by the electoral college. This is not a home rule bill. I have not seen a home rule bill which I personally feel I could support. This is not a bill dealing with the question of Representatives in Congress. It has been agreed that the Congress has power to determine that issue by legislation without constitutional amendment any time in the future it sees fit to do so.

It also requires 7 years for ratification by three-fourths of the States. This is necessary legislation because the Constitution itself in article II, section 1, deals with this question of choosing the electors and only refers to the "States." Therefore the District of Columbia not being a State is in a no-man's land in a sense. Therefore a constitutional amendment is needed in order to permit the District of Columbia, in effect for this purpose alone under the Constitution, to choose electors.

At present the electoral college is set up with 537. It is anticipated it will be set up due to statehood of Alaska and Hawaii with 2 new Members in the House and 4 in the Senate for the 1960 election, adding 6 new electors over the previous 531 figure. It is expected the number this year for President and Vice President will be 537. If this proposal were effective, once it is ratified by the needed number of States, the District of Columbia would have 3 in addition to those 537. After 1960, it is probable that the number will go back to 535, depending on what Congress does in the future with regard to 2 Representatives from Hawaii and Alaska and the number of Members in the House of Representatives, which of course is a decision only Congress can make after the census is determined. But assuming the number remained at 537, then this bill would add 3 new electors. It would not diminish the number of electors the States presently have, which is the case in the event the Congress fixed the number of Representatives in the House, that is, that the District of Columbia would have three additional electors and there would not be three taken away from the States themselves.

That is the effect of the bill. With regard to the amendment itself again, the reason why this amendment was proposed, I having the privilege of offering it in committee, was that we were concerned about the District of Columbia having a greater status than the States in determining the number of electors and who should be the President and Vice President of the United States.

An additional reason is, it is to some extent a flexible formula. In other words, if the smallest State at any time should have in excess of three, which I might add is highly improbable, then, of course, the District of Columbia likewise would be entitled to that larger number. If the smallest State had a larger number, it does, and I think necessarily so, relate the question of new electors to relative electoral strength of the States themselves and the population of those States, and relates to the say-so that those States have at the present time and in the future as to who should be President. I do not think we can separate the question of the District of Columbia's right to make that determination from the rights the States have, and cannot afford to give it greater say-so than the States themselves have.

Also, I think it is a minimal number, but again it is no more than any of the smallest individual States would have.

For instance, as an example of the problem the committee had in reaching a decision, the State of Florida has 10 and has an anticipated expected population at the end of the census of 4,870,000 people, or an increase of 90 percent in population. This would, without this amendment, give the District of Colum-

bia half as many electors as the State of Florida. This would result in disproportionate voice of the 800,000 estimated people in the District, many of whom are not "residents," as compared to Florida as well as all other States. My amendment guards against this disproportionate District vote.

Mr. McCULLOCH. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. CURTIN].

Mr. CURTIN. Mr. Chairman, I rise in support of House Joint Resolution 757, providing for legislation which is long overdue.

This resolution provides that an amendment be added to our Federal Constitution which will permit the residents of the District of Columbia to vote in presidential elections for their choice for President and Vice President.

One of the fundamental concepts of our Founding Fathers was that the new Government was to be a government by representation. Such representation, of course, should not be and was not intended to be restricted to certain electors, and that others should not participate just because they happen to reside in a certain locality. The recent civil rights bill was passed to insure the free right of suffrage to certain of our citizens who, it had been claimed, were being denied that privilege.

There is a group of our citizens, however, who are still being denied this fundamental right. I refer, of course, to those of our citizens who have their permanent home here in the District of Columbia, the Capital City of this great Nation, and, as such, the place where our Federal laws are made, which, among other responsibilities, are to guarantee and protect the rights of all of our citizens.

There seems to be no logical reason why these citizens should not have this Federal franchise. Certainly they are as interested in who is to be their President and Vice President as any other citizen. The denial of their right to vote for these offices seems to be more a matter of neglect than of intent. There is certainly no justification for this disenfranchisement of these good people.

Let us now pass this resolution, to start on its way an amendment that, when passed by the necessary three-fourths of the several States, will correct this oversight and give to the citizens of the District of Columbia this fundamental American right.

Mr. McCULLOCH. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. BALDWIN].

Mr. BALDWIN. Mr. Chairman, I rise in support of House Joint Resolution 757. In my opinion, this constitutional amendment is very much needed and is long overdue. I feel very strongly that the citizens in the District of Columbia should have the right to vote for President and Vice President. These citizens are taxpayers and are subject to our Federal laws. They should have the right to participate in the selection of a President and Vice President to govern them.

This is only one of several needed steps. I hope that Congress will also soon recognize the need for granting home rule to the residents of the District of Columbia.

Mr. McCULLOCH. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. LINDSAY].

Mr. LINDSAY. Mr. Chairman, I support House Joint Resolution 757. This resolution, proposing an amendment to the Constitution, will grant representation in the electoral college to the District of Columbia. Simply stated, the resolution, if adopted by us and subsequently ratified by three-fourths of the States, would permit the residents of the District of Columbia to vote for President and Vice President. The bill is not perfect, because it contains one glaring shortcoming, which I shall discuss further in a moment. Nevertheless, I support it.

At times it is difficult to realize that the citizens of this great city are unable to express their preference at the ballot box for the office of President or Vice President. The people of the District are no different than those in the cities you and I represent. The Treasury consumes their tax dollar in the same fashion as they do any other revenue. No boy was disqualified from serving in the Armed Forces because he was a resident of the District of Columbia. The District has a population equal to or larger than several States and the tax revenues from it exceed that of 25 States.

The vitality of this city stems from its residents regardless of the fact that the principal industry of this city is government. Our concern is with these residents who are American citizens. As such they deserve the rights and privileges of Americans, and among them certainly the opportunity to vote in presidential elections.

Now, what is the shortcoming in this bill? The bill gives the District of Columbia "a number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State." It is this "but" clause—this limitation upon the number of electors—that is bad. It serves no useful purpose, it violates logic, and it smacks of spite. If there is merit and worth in the general proposal, why must it be done in such a manner as to impose, by constitutional language, a permanent inferior status upon the District's participation in the electoral college? It is no argument that there is a shifting population in the District, or that a census is not a true count of the voting population because there are residents of the District who vote by absentee ballot in the States. This same argument is applicable to a great many areas. In my own congressional district in Manhattan, for example, there are many residents who vote elsewhere—in Connecticut, in New Jersey, in upstate New York, and in Nassau and Suffolk Counties.

The bill comes to us under a closed rule which permits no amendments. Therefore, an amendment to strike out the limitation would be out of order. This is indeed unfortunate, and I fear we have written in language that we will one day regret. Perhaps a closed rule is necessary, as a practical matter, to get this bill enacted, bearing in mind that a two-thirds vote is required. But I fear we have overcompromised on this one point.

This bill of course does not grant home rule to the District of Columbia. That is another subject, but no less important. It is unfortunate that the home rule bill is not also before us for action.

Mr. McCULLOCH. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. HENDERSON].

Mr. HENDERSON. Mr. Chairman, I favor the resolution which will set in motion machinery which will permit the people of the District of Columbia to vote for President and Vice President. This resolution is brought to the consideration of the House today after many weeks of detailed study by a subcommittee of the Committee on the Judiciary and by the full Committee on the Judiciary. The resolution presents one issue, namely, should American citizens who are residents of the District of Columbia be permitted to vote for President and Vice President as are other American citizens? Other issues such as statehood with the accompanying right to representation in the Congress and the principle of local self-government are not being considered in this legislation. I know of no reason why this legislation should not receive the wholehearted approval of all of my colleagues. The language is clear. It is brief and unambiguous. I would like to point to the language of the resolution, and to the fact that in drafting it the committee has been very careful to follow the parallel language of other portions of the Constitution.

So that there cannot be any question about the meaning of the language, so that there cannot be any new issues raised that have not already been considered by the courts of the land, brevity in the drafting of legislation, brevity in drafting constitutional provisions is of paramount importance; because, as you increase the number of words you also proportionately increase the number of opportunities for misunderstanding and consequent lawsuits.

Congress as the legislative authority over the District of Columbia will determine the exact details of exercising the vote.

I want to emphasize that this is a constitutional amendment, not mere legislation upon which we are voting. It must be approved by the House by a two-thirds vote, by the Senate in similar fashion, and finally ratified by three-fourths of the States before it is a part of the law of the land.

I do not feel that this action is premature; rather, it is long overdue. If arguments should be advanced that it is unwise or premature the fact that it will be subjected to the scrutiny of many people for many months will afford ample opportunity for consideration and weighing of all factors. I want to request that my colleagues in the House

give their earnest consideration and approval to this very worthwhile and long-needed amendment.

Mr. McCULLOCH. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. Bow].

Mr. BOW. Mr. Chairman, I should like to congratulate the Judiciary Committee for bringing this very important piece of legislation to the floor. I think it will be recalled that during debate on the civil rights bill I offered an amendment to accomplish this same purpose. At that time the distinguished chairman of the committee, the gentleman from New York [Mr. CELLER], said a bill would be brought in providing this constitutional amendment, and I am delighted it is here. I shall support it.

I am disappointed that the District of Columbia will not have representation in the House of Representatives. The more I sit on committees having to consider the affairs of the District the more I am convinced that the people of the District should have some representation here to present their arguments and their position to the committees of Congress.

When we say we are giving the right to vote to the people of the District of Columbia we are, in fact, giving back to the people the right to vote, for the Federal city in my opinion is different than Guam, Puerto Rico, or the Canal Zone that have been spoken of. The area now occupied by the District of Columbia was at one time part of the States, and the people resident therein had the right to vote, had all the rights of citizenship, the right to elect Members of Congress. When we took from those States the original area of the District of Columbia we took away from the residents thereof their constitutional rights to vote for President, Vice President, Senators and Members of the House. We are now in fact giving back part of those things we took from them, and I hope that later we will give back to them more in the way of representation. I believe under the Constitution the House cannot grant home rule, but I do believe that this is a step forward. I hope the bill now pending will pass and I hope the 38 States will soon ratify this action of the great Judiciary Committee.

I shall urge the State of Ohio to ratify as soon as possible.

May I say further that the gentleman from Ohio [Mr. McCULLOCH] has done outstanding work on this bill as he has on the civil rights bill and all other legislation before his committee.

Mr. CELLER. Mr. Chairman, I yield 3 minutes to the gentleman from Maryland [Mr. FOLEY].

Mr. FOLEY. Mr. Chairman, I rise in strong support of House Joint Resolution 757 and urge unanimous passage by the Members of the Committee.

This is truly historic legislation. And today is a great day for the citizens of the District of Columbia. It is, also, a great day for the Members of the House of Representatives. For on this day, June 14, 1960, the House sets in motion the enfranchisement of the last primitive pioneer colonial, political dependents in the United States.

Closing this last voting gap in our citizenry has taken 160 years. Since 1800, the democratic ideals from our fountain of justice for the rights of individual persons, of responsibility by individual citizens for the nature and conduct of their own government, and of responsiveness by elected Government officials to the problems of the citizens served, have all flowed inexorably through the corridor of time to the peoples in the farthest reaches on earth. They have flowed to most everyone save those persons occupying the doorstep of the citadel of democracy. These are the citizens who more than any of our citizens have gazed daily and longingly upon the U.S. Capitol, holding forth as it does the Statue of Freedom.

This symbol has meant to the District of Columbia citizens freedom in every respect but freedom to participate in the elective representative government process. Lacking this essential freedom has meant that the District of Columbia citizens until now have been the most free political serfs in the world. They have not, for the past 160 years, been full-fledged American citizens.

Since the end of World War II, over 755 million persons have established their own independent governments. These are new nations flying for the first time the flag of freedom. True, they are underdeveloped economically, politically youthful, socially emergent, taking firm first steps on their own to combat illiteracy, disease, and poverty. But they are free people. They can determine and participate in the conduct of their governments. They are now outside the Communist bloc. We must continue to help them remain free and independent.

Thus there is, in addition to all others, an immediate and timely reason to pass House Joint Resolution 757. By enfranchising the citizens of the District of Columbia, we will, on this Flag Day in 1960, be completing our firm fabric of freedom. The Statue of Freedom fully embellished will glisten and gleam with a luster, new and fresh, having lost its last tarnish, the unsightly spot before its eyes of District of Columbia citizens prohibited from voting.

This freedom light inspires and will continue to inspire all free persons, confirming them in their entitlement. This light will keep alive the noble aspirations of all those hoping to be free.

I urge passage of House Joint Resolution 757, and having extended these rights to the citizens of the District of Columbia, Congress should provide home rule to them to make them full-bodied American citizens.

The definitive work on the subject of home rule is "Government of the District of Columbia," by W. J. Dodd. The following historical facts are related there.

On the first Monday in December 1800 the seat of the U.S. Government was transferred from Philadelphia to the Federal District on the banks of the Potomac. In a letter to Maj. Pierre Charles L'Enfant on September 9, 1791, the three Commissioners were appointed by President George Washington to lay out and survey, purchase or accept such lands as the President deemed proper for the use of the U.S. Government and to provide suitable buildings for the Congress, the President, and the public officers of the Government. In discharging their responsibilities the Commissioners stated to Major L'Enfant that "We have agreed that the Federal District shall be called the Territory of Columbia and the Federal city the city of Washington."

Between 1790 and 1801 the laws of the States of Maryland and Virginia remained in force in the parts of the territory ceded by these States as a seat of the Federal Capital. On February 27, 1801, the Congress provided that the laws of Virginia should remain in force in that part of the District of Columbia ceded by that State, and the laws of Maryland should remain in force in that part ceded by Maryland. The District of Columbia was erected into two counties; one lying east of the Potomac called the county of Washington, the other lying west of the Potomac called the county of Alexandria. The incorporation of the city of Washington by Congress on May 3, 1802, increased the number of governing bodies in the District of Columbia to five: First, the county of Alexandria; second, the town of Alexandria; third, the county of Washington; fourth, the town of Georgetown; fifth, the city of Washington.

As time passed the Federal Government did not find occasion to use the territories ceded by Virginia as a site for public buildings. The people of the town and county of Alexandria were from the first dissatisfied because of their failure to reap any advantages from their inclusion within the Federal District. No benefits accrued to them from the connection, but on the other hand they were subject to the hardship of disfranchisement except with reference to their local affairs, and because Congress had not had time to give to a systematic revision of their laws, they were still subject to the somewhat antiquated laws which were enforced in Virginia in 1800. In the early part of 1846 petitions were presented to Congress asking that the town and county of Alexandria be retroceded to Virginia. On July 9, 1846, Congress retroceded to Virginia all that part of the District lying west of the Potomac River, the question of retrocession being first submitted to a vote of the citizens of that territory. By Presidential proclamation of September 7, 1846, the town and county of Alexandria ceased to form a part of the District of Columbia.

The county of Washington was governed as a county under the laws of Maryland until 1812. In that year Congress, by law, provided that the governing body, a levy court, should be composed of seven members designated by the President from among the justices of the peace of the county. This form of government continued substantially the same until 1871.

The town of Georgetown was governed under the laws of Maryland until 1805. That year Congress provided that a board of common councilmen of 11 members was to be annually elected by the

free white male citizens of full age who had resided within the town for 12 months and had paid a tax to the corporation and 5 persons were elected by the same voters to serve as aldermen for a term of 2 years. These officials annually by joint ballot chose a mayor and a recorder. In 1830 Congress provided that the mayor should be biennially elected by the citizens qualified to vote for aldermen and common councilmen. In 1856, Congress authorized the town of Georgetown to levy an annual poll tax of $1 for school purposes and granted the right to vote to every free white male citizen who had attained the age of 21 years and resided within the limits of the town for 1 year and had paid the school tax for the year preceding the one in which he desired to vote.

On May 3, 1802, the city of Washington was divided into three wards. A council of 12 members was created, elected annually by ballot on a general ticket by the free white male inhabitants of full age who had resided in that city for 12 months and who had paid taxes therein within the year preceding the election. The councilors chose from among themselves five members to form a second chamber. The mayor of the city was annually appointed by the President of the United States. Ordinances passed by the council were submitted to the mayor for his approval, but if he should veto them they might be reconsidered and passed by votes of three-fourths of the two branches of the city council. In 1804 Congress provided that each chamber of the city council should consist of nine members, to be chosen annually on separate ballots. In 1812 Congress provided that the board of aldermen should consist of eight members, elected for a term of 2 years, two from each of the four wards into which the city was now divided. The board of common council was composed of 12 members, 3 being from each ward, for a term of 1 year. The mayor was annually elected by joint ballot of the common council and board of aldermen. The elective franchise continued to be restricted to white males who paid taxes. The mayor was required to be 30 years of age and a resident of the city for the 2 years immediately preceding his election. In 1820 the mayor became elective biannually by the people qualified to vote for members of the common council and board of aldermen. In 1848 the officers of assessor, register, collector, and surveyor of the city were made elective and the suffrage was extended to all free white males of 21 years of age who were subject to the school tax of $1 per annum and who had paid such tax and all other taxes.

On January 8, 1867, a change was made in the charters of both Georgetown and Washington. This provided that male persons above the age of 21 years should have the right to vote at elections in the District of Columbia, without any distinction on account of color or race, and thus, established universal male suffrage. A law made on March 18, 1869, repealed the provisions of the charters of Georgetown and Washington which restricted to white persons the right to hold office.

In the early part of 1870 a movement began in favor of establishing a centralized government for the District of Columbia. This movement was successful, and by an act of February 21, 1871, the separate governments of the cities of Washington and Georgetown were abolished, and a government for the District established, similar in organization to that provided for the territories of the United States. The executive power was vested in a Governor, appointed by the President of the United States with approval of the Senate for a term of 4 years. The Governor was given a veto upon all legislation, such veto to be overcome by the votes of two-thirds of all members of the Council and House of Delegates. Legislative power was vested in an assembly composed of a Council and a House of Delegates. There were 11 members in the council, all appointed by the President with the approval of the Senate. The House of Delegates was composed of 22 members elected for a term of 1 year. Twenty-two districts were formed for the election of the members of the House of Delegates. Members of the two legislative bodies were to reside in the districts from which they were appointed or elected. The suffrage was exercised by all male citizens of the United States of the age of 21 years who had resided in the District for 1 year and the legislative assembly was forbidden to limit the right to vote in any way.

The voters qualified to elect members of the House of Delegates were authorized to choose a Delegate to the House of Representatives to serve 2 years with the same rights and privileges as Delegates from the territories.

The most important organ of the new government was the board of public works which consisted of the Governor as president and four persons appointed by the President of the United States with the approval of the Senate. The board had entire control of and power to make all regulations for keeping in repair the streets and sewers of the city, and such other works as entrusted to it by the legislative assembly or by the Congress. The board was limited and had no power to make contracts to bind the District to the payment of any sums of money except in pursuance of appropriations made by law. And not until after such appropriations had been made. Early in 1872, certain citizens of the District of Columbia charged the board of public works with extravagance, violation of law, and corruption. A congressional committee majority report found no evidence of corruption or illegality. However, on August 19, 1871, the Congress limited the debt of the District of Columbia to $10 million. The new government of the District had inherited a debt of nearly $4 mililon and by May 1872, had added nearly $5 million to the original amount. The board of public works in 1872 made improvements upon and around Government property and on January 8, 1873, Congress appropriated $1,241,920.92 to pay for such improvements. At the same time Congress forbade the board to incur further liabilities on behalf of the United States. Notwithstanding this prohibition, the board of public works on November 1, 1873, claimed an indebtedness of the U.S. Government to the District of over $4 million.

The arbitrary conduct of the board toward individuals, the rapidly increasing debt of the District, and the undeniable jobbery prevalent in the letting of contracts aroused the people to petition Congress for another investigation into the affairs of the District. A joint congressional committee found that the treasurer of the board was the sole disbursing officer of the funds under its control and there was no check whatever upon his actions. He kept no cash account and the checks issued by him did not correspond with the amounts which he reported to have been paid. He had the power to draw his checks upon public moneys without the knowledge of any other member of the board. No record was made of audits by the board. The board itself had never verified the accounts of the offices of treasurer and auditor. The original plan of improvement by the board was for $16 million. However, without further basis for making contracts they expended over $12 million in excess of this sum. These extensive obligations were contracted without legislative authority and in the face of legal prohibition. The joint committee found that an attempt had been made to accomplish an extensive and much needed system of improvements in too short a time. Because of this haste, contracts were often let before the details of engineering, work, plans, and estimates had been properly made, and defective plans added to the extension of the original estimates. Contracts were let without open competition at a fixed scale of prices and were sometimes awarded to persons who did not expect to fulfill them but who sold them to others at a profit.

The committee further found that the board of public works had done a tremendous amount of work within a short time. It had changed the whole appearance of the city of Washington. It had created a beautiful city out of a straggling, dirty, and mean looking town. However, by 1874, the District of Columbia was bankrupt. The joint committee recommended what was practically the appointment of receivers to conduct its affairs and to settle its financial obligations. On June 20, 1874, the existing government was abolished. Three Commissioners appointed by the President were vested with all powers formerly exercised by the Governor and board of public works. An officer of the Engineer Corps of the U.S. Army was detailed to have control of all public improvements.

When the government by Commissioners was created, it was considered merely a temporary expedient. A joint select committee was appointed by the Congress to prepare a suitable form of government for the District. On December 7, 1874, the committee reported an elaborate bill of over 200 pages. The bill was tabled by the Congress. The debate revealed that the appointed

board of public works was the strongest organ of the territorial government and its abuse of power was the cause of the dissolution of that government. The defects of the territorial government did not arise from its elective portion. Finally, on June 11, 1878, the organic law of the District of Columbia establishing the present Commission form of government was passed by the Congress.

Under the Federal Constitution the Congress may grant and has granted to the Commissioners power to adopt local police, health, building, and other regulations. Congress can delegate only its powers which relate to purely local matters and must exercise directly its legislative powers with reference to subjects of general interest such as contracts, titles of real property, corporations, commerce, and marriage. Congress is and under the Constitution must remain the supreme legislative power of the District of Columbia. The Commissioners and other bodies exercising subordinate legislative power have only such powers as Congress may see fit to confer upon them. Under the Constitution, Congress cannot confer general powers of legislation upon the District. But it has not seen fit even to confer the full powers of a municipal legislature upon the present District Government. It now occupies toward the District of Columbia a twofold relation of a general legislature and municipal council. The legislative power of the Commissioners is largely negative in character. They may usually prevent legislation by the expression of their disapproval. The bills submitted by the Commissioners to the Congress are frequently not reported at all by the District committees, and if reported, are so amended as to defeat the objects which the Commissioners have in view.

Even when Congress does act, it often acts in an unsatisfactory manner. As an indication of the careless methods of legislation with reference to the District of Columbia, the compulsory education law of June 8, 1906, provided that inspectors under the child labor law should assist in the enforcements of its terms. No child labor law was enacted until May 28, 1908. The child labor law when enacted provided for two inspectors who should enforce its terms, but Congress made no appropriation for the payment of such inspectors.

Since 1949, home rule legislation has been considered by the Congress on several occasions. Four previous times in the intervening years the Senate has passed home rule bills. This year for the fifth time, the Senate has acted favorably. A number of companion bills before the subcommittee provide for establishing the territorial form of government for the District of Columbia. H.R. 4633 is my bill. No doubt many Members will file statements rather than to appear personally. I hope the subcommittee's deliberations will be conducted with dispatch and that this public-interest legislation can be considered on the House floor before this session of the Congress adjourns. To this end, I introduced House Resolution 320 on July 16, 1959, to facilitate consideration by the House of the territorial government proposals in this 1st session of the 86th Congress.

I do not presume today to discuss with the subcommittee the fundamentals of American democratic theory. But I do think that this is an appropriate time to reconsider and reiterate what we, as citizens of the United States, ought all to agree on as basic principles of political life in a free society.

We have a dual concept in our political theory which recognizes the reciprocal relationship between civic rights and civic responsibility. The American citizen is endowed by his Creator with certain unalienable rights in the conduct, policymaking, and management of his government. In exercising those rights he assumes a relatively large measure of civic responsibility to take an interest in the affairs of government and to participate actively in those affairs.

What civic rights do American citizens throughout the country have? They have the right to vote assuming they meet reasonable qualifications, for public officers of their own choosing, and to run for elective offices themselves if they wish to do so. Citizens of the United States are entitled, within the framework of wide discretion, to select for themselves the form and manner in which the government of their local affairs shall be conducted. They are entitled to participate in the election of local officials. They are protected by constitutional guarantees against arbitrary or unreasonable infringements of their political and civic rights.

Citizens of the United States, in exercising their civic rights, assume great responsibilities, far exceeding those assumed by citizens in an authoritarian dictatorship who are spoon-fed from a cafeteria of state directives over which they have absolutely no control. Our citizens are expected to inform themselves about governmental and political affairs, and to go to the polls to vote for candidates of their own choice. Our young people, through our schools and other educational activities, are taught and encouraged to learn how to be good citizens by taking an active part in politics. Our society endows our citizens with free civic and political rights, and it extracts from them a large measure of civic responsibility.

What of the citizen of the District of Columbia? In contrast to other Americans, he is not a citizen of any State, and thus does not, as all others do, hold dual citizenship. He is only a citizen of the United States. He lives in the United States, pays taxes to his Government, serves in the Armed Forces of his country. Yet, he is not entitled, through an act of Congress, to vote or to manage purely local affairs through local self-government. His only rights are solely those of the Constitution. From a legislative standpoint he can petition the Government for redress of grievances; he can join voluntary associations for the advancement of goals through collective action; he has freedom of expression by speech or by writing. He has no effective civic rights. The Congress has imposed upon him telling civic obligations. He is, in effect, a serf who periodically does fealty to his masters in the Federal Government. What different status does he have from all the colonials of history? Very little, except the guarantees of the Constitution.

Citizens living in the District of Columbia pay their annual tribute to the Federal Government in taxes, though they are not represented in the levying of those tributes. And they pay more than most Americans. From 1929 until 1941, per capita personal income in the District of Columbia was higher than in any other State in the entire Nation. Since then the District has been in the top four or five among States in per capita personal income. In 1957, per capita personal income in the District of Columbia was fifth in the Nation, exceeded only by the States of Connecticut, New York, Delaware, and California.

Per capita personal income among 5 highest States and the District of Columbia, 1957

State:	
Connecticut	$2,821
Delaware	2,740
New York	2,578
California	2,523
District of Columbia	2,514

Source: U.S. Department of Commerce, "U.S. Income and Output," 1958, pp. 158–159.

Such a high per capita income means that the resident of the District of Columbia pays, on a per capita, a higher proportion of Federal taxes than most Americans in other parts of the country. Yet the District citizen has no voice in the determination of how Federal funds appropriated for local purposes shall be allocated, and no voice in the management of government. Furthermore, in addition to personal income taxes, the District resident pays substantial personal property taxes, though he has no control over or voice in the allocation of or use of such funds. He is taxed, and pays far more than the average share, without being represented in any way. Our Founding Fathers believed that taxation without representation was the cruelest form of tyranny. The Congress has, since 1874, allowed this state of affairs to continue. It is respectfully submitted that in 1959, after 85 years of congealed citizenship, there should be a thaw. The rights of free people again should flow in the lives of the people of the District of Columbia. For these citizens of the United States deserve privileges as well as responsibilities.

In addition to dutifully paying his taxes on income and property to the Government, without representation, the citizen of the District of Columbia is liable to service in the Armed Forces. In this respect District residents have made an extraordinary contribution. In World War II, the District of Columbia contributed 105,000 young men and women to the Armed Forces, a greater number than that contributed by 14 of the States. An even higher proportion of District residents marched off to defend the freedom to which they were not themselves fully entitled during the Korean war, when 28,200 citizens of the District of Columbia entered the Armed Forces of

the United States. This is a greater number than that contributed by 22 States of the Union. The record proves that the citizens of the District of Columbia are outstanding citizens of the United States.

The Congress in imposing burdensome obligations upon citizens of the District of Columbia has refused them a share in the determination of their own local affairs. This denial of fundamental civic rights which would create widespread public abhorrence if they were refused to Americans living elsewhere in the country. Those who support local self-government—local integrity in the determination of purely local affairs—should, to be consistent with our traditional high principles, restore home rule for the District of Columbia. Restoring home rule would destroy the blighted area at the doorstep of the Capitol of freedom.

These residents of the District of Columbia are, I think, the last remaining citizens of the United States who are wards of the Congress. We have made our political peace with the Indian tribes. Citizens living on Indian reservations have the right to participate in politics and, in large measure, manage their local affairs.

Eighty-five years of disuse normally would result in complete atrophy of civic interests by any citizens. Apathy, indifference result from lack of exercise. But any indifference of the residents of the District of Columbia toward their governmental affairs, and their political life, is far exceeded by basic disinterest by most of past Congresses toward their political fate. And congressional indifference toward District affairs and District problems is not a recent development. Walter F. Dodd 50 years ago wrote in 1909 that—

> The system of congressional legislation works badly in great measure because of the want of interest in District affairs upon the part of the great body of Senators and Representatives. Important legislation to which there is no particular objection often fails simply because the pressures of other business which affects more closely the interests of the Members of Congress. (From "the Government of the District of Columbia: A Study in Federal and Municipal Administration," 1909, p. 66.)

The absence of civic rights for citizens of the District of Columbia has, in my opinion, the further consequence of stultifying the development of responsible municipal leadership and the active interest of citizens in their own fate—a kind of political nihilism has been forced upon these citizens of the United States.

The present three commissioner form of government was created by act of Congress, approved June 11, 1878. From 1879 through 1920, the Federal Government made what is called the Federal payment to the District of Columbia on the basis of 50 percent of the general fund appropriation. Thus, the local District of Columbia taxpayer paid 50 cents of each dollar appropriated to operate and maintain the District with the remaining 50 cents being paid by the Federal Government. The primary purpose of this Federal payment is to compensate for the fact that the Federal Government, as the principal employer and land user in the District, is tax exempt, thus depriving the city of major sources of tax revenue common to other cities.

The practice of paying 50 percent of the cost of operating the District government was discontinued by the Congress in 1921. Since that time, the percentage of costs borne by the United States has fluctuated from a high of 39.5 percent in 1924 to a low of 8.5 percent in 1954. Since 1956, the Federal payment has been slightly over 12 percent. It is significant that during all this time, that is from 1879 to date, the Federal Government has maintained 100-percent control over the lawmaking power for the District of Columbia.

The most recently authorized annual payment by the Federal Government to the District is $32 million. However, the Congress has never appropriated the full authorized amount. In 1958, the Federal Government appropriated only $20 million of the authorized $32 million. In this regard, the most important legislative proposal submitted by the Commissioners in their 1959 state of the Nation's Capital report to the Congress was a request for the creation of a territorial form of government. The drive for home rule for the District of Columbia has developed strong impetus in recent years with a broad base of support regardless of political party affiliation. In the present Congress, three separate proposals have been submitted. These are S. 659, the Bible bill, providing for a territorial form of government; H.R. 1379, the Wier bill, providing for a mayor and a council form of government; and H.R. 2321, the Auchincloss bill, providing for a commission form of government. A comparision of the significant differences in these bills is set forth below. It is important to keep in mind that the territorial and the mayor-council bills are identical except for the differences noted below:

EXECUTIVE

S. 659: Bible bill, Territorial	H.R. 1379: Wier bill, Mayor and Council	H.R. 2321: Auchincloss, Commission
Governor, $21,000 and $2,500: A. Appointed by President. B. 4 years.	Mayor, $15,000 and $2,500 expenses: A. Elected by people. B. 4-year term.	Mayor, $19,000 and $2,500: A. Elected by Commission. B. 1-year term.

LEGISLATIVE

I. Legislative Assembly: A. 15 members. B. $10,000. C. $12,000 (for Chairman). D. 2-year term. E. Elected.	I. Council: A. 9 members. B. $3,000. C. $5,000 (for Chairman). D. 2-year term. E. Elected.	I. Commission: A. 5 members. B. $19,000. C. President elected among Commission. D. Secretary appointed. E. 1 commission elected by people annually. F. 5-year term.
II. District delegate: A. 2-year term. B. Elected by people.	II. Board of Education: A. 9 members. B. $29 a meeting. C. 2-year term. D. Elected by people.	Title IV: A. Each act deposited with Congress. B. After 30 days, sent to President and if no congressional joint resolution approving, President can approve act.
	III. District delegate: A. Elected 2 years.	

It is hoped and expected that the 86th Congress will adopt a home rule measure. The territorial bill has the broadest base of political support and appears to have the best chance of adoption.

Within the past year the most significant governmental development concerning Washington and the surrounding areas was the establishment by Congress of the Joint Committee on Washington Metropolitan Affairs. This committee is made up of three Senators—Senator BIBLE, of Nevada; Senator MORSE, of Oregon; Senator BEALL, of Maryland—and three Congressmen—Mr. MCMILLAN, of South Carolina; Mr. SMITH, of Virginia; and Mr. BROYHILL, of Virginia. During 1958, the staff of the joint committee developed significant reports on water supply, sewage disposal, and economic forecasts for the Washington metropolitan area. The area encompassed by the studies includes the District of Columbia; Arlington County and Fairfax County, Va.; Montgomery County and Prince Georges County, Md.

The most significant decision made by the joint committee was the unanimous proposal submitted to Congress on January 31, 1959. The joint committee favors the establishment of two governmental bodies, one Federal in nature—the other locally constituted. The Federal agency is the Regional Planning Council. This would be a nine member body; three representatives from the District of Columbia, one from each of the four counties, and two "at large" representatives, one from Maryland and one from Virginia. These members would be appointed by the President of the United States. The council would assume the functions of the National Capital Planning Commission with no authority over zoning. It would be financed with Federal funds. The establishment of this council would manifest a strong Federal interest in the entire metropolitan area. This Federal interest to date has been limited solely to the District of Columbia territorial boundaries. The manifestation of this Federal interest is justified by the great growth in population in the area since World War II. A strong community of social, economic, and political interest exists among the citizens of the four counties and the District of Columbia. By way of example, many, if not most,

of the persons who live in Montgomery County are employed either in the District of Columbia or Virginia. Though the increased Federal interest in the entire area is justified and should be made manifest, it is important to emphasize that this governmental structure would not impinge upon the local autonomy of the four counties in the two States.

The second governmental agency recommended by the joint committee is the Washington Metropolitan Regional Conference. Membership on this conference would be by election conducted by the counties. The conference would establish general policy on regional projects involving transportation, water supply, and sewage disposal. It would take steps to establish such projects. Financing for the conference would be by way of taxes collected by each county and transmitted to the conference. At the outset there would be a small Federal appropriation to establish the conference.

The joint committee thus has recommended the establishment of a combined Federal and local bicameral regional organization to coordinate development projects in the Washington metropolitan area. It should be emphasized, however, that the establishment of these two agencies would not break down the present balance of political power between the Federal and local governments.

A further important recommendation of the committee is the establishment of the office of Coordinator of National Capital Affairs. The Coordinator would be the Presidential aide in the White House advising the President on matters pertaining to the District of Columbia and the metropolitan area.

There is a very strong likelihood that the recommendation of the joint committee will be accepted by the Congress and these two agencies will be established within the next 2 years.

Finally, some mention should be made of the existing District of Columbia Committee for the House of Representatives. This committee, which now is an important factor in the enactment of all laws pertaining to the District of Columbia, consists of 25 Members of the House of Representatives. There are 16 Democrats and 9 Republicans. The committee is subdivided into four subcommittees: No. 1 deals with fiscal affairs; No. 2 with judiciary, insurance, and public utility matters; No. 3 with police, fire, traffic, streets, crime, and court matters; and No. 4 with health, education, recreation, and banking matters. Any citizen of the District of Columbia today can feel free, under the existing system, to contact any one of the members of the committees on any matters pertaining to roads, streets, sidewalks, retirement pay, taxes, and everything that any citizen would take up with a city council. To free Congressmen and Senators for national problems, home rule legislation is feasible and necessary.

Section 8, clause 17 of article I of the U.S. Constitution provides as follows:

Congress shall have power—

To exercise exclusive legislation in all cases whatsoever, over such district (not exceeding 10 miles square) as may, by cession of particular States, and the acceptance of Congress, become the seat of the Government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings.

And while the Founding Fathers of our Republic may not have foreseen all the needs of our District citizens, they certainly had no intention of disenfranchising them and relegating them to the unfortunate status of wards of the State. James Madison wrote in No. 43 of the Federalist Papers of the Federal District that "as the inhabitants will find sufficient inducements of interest to become willing parties to the cession; as they will have had their voice in the election of the Government which is to exercise authority over them; as a municipal legislature for local purposes, derived from their own suffrages, will of course be allowed them" then they will agree willingly to reside in the special Federal District acquired for the purpose of establishing a National Capitol. The Founding Fathers assumed that no Congress would, under the Constitution, deny citizens living in the Federal District the ordinary and widely respected rights of self-government.

I respectfully urge the Congress to restore local representative government to the District of Columbia. It is perhaps the most significant domestic political anomaly of all time that our Nation which properly proclaims to the world its belief in the democratic process of self-government through congressional action abrogated representative institutions at the seat of our Government.

I have cosponsored the so-called territorial home rule bill because I believe it is the legislation which is most compatible with the unique place the Capitol of freedom occupies in the world while providing constitutional representative local government. It has the support of the administration, the District Commissioners, and of citizens' groups in the District of Columbia who are fighting for their civic life. Home rule for the citizens of the District of Columbia should be provided as well as the right to vote for President and Vice President.

Mr. CELLER. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. TOLL].

Mr. TOLL. Mr. Chairman, this is really a great occasion, because for the fourth time this Congress, this great 86th Congress, is recognizing the universal right of suffrage.

First, in 1959, we recognized and extended through the leadership of the Congress the introduction of Alaska as a State, then it was extended to the introduction of Hawaii as a State, then in extending the right of franchise to all possible disfranchised people in the Civil Rights Act of 1957, it was extended so that all the people of the country would be given the right to vote.

Now, for the great glory of the 86th Congress, we are going to extend that same privilege to the people who live in the District of Columbia.

This is the greatest Congress in the history of America, and I congratulate its Members on having this opportunity to vote for the extension of this privilege to the people of the District of Columbia.

Mr. CELLER. Mr. Chairman, I yield 1 minute to the gentleman from West Virginia [Mr. HECHLER].

Mr. HECHLER. Mr. Chairman, this is a mild resolution which should win the overwhelming support of all Members of this Congress. However, I wish that it went even further than it does. I concur in what the gentleman from New York, Mr. LINDSAY, said, that there is an unfortunate limitation on page 2 with reference to the number of electors. I do believe we should go much further and grant home rule and self-government and representation to the people of the District of Columbia. Here in the Nation's Capital we really ought to be the showcase of democracy for the free world.

Someone during this debate referred to those supporting home rule for the District of Columbia as agitators, with theoretical ideas. Mr. Chairman, I am proud to be called an agitator and am proud to wear that label. We would not be sitting here today were it not for some agitators at Bunker Hill and Valley Forge and those who wrote the Declaration of Independence. I love the theoretical ideas so boldly set forth in the Declaration of Independence and the Constitution of the United States. Self-government is a revolutionary principle for which I will keep right on being an agitator.

Nevertheless, I concur with the chairman of the Committee on the Judiciary that we must take one step at a time; therefore, I hope that this resolution will win the overwhelming support of the Members of this House.

In passing this resolution, it is most appropriate and fitting that we take this action—the first step in amending the Constitution—to allow citizens of the District of Columbia to vote for President and Vice President on this particular day, Flag Day. I am honored to join in this minor piece of agitation to extend democracy in the shadow of the Nation's Capitol.

Mr. CELLER. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. MATTHEWS].

Mr. MATTHEWS. Mr. Chairman, like others, I want to thank the distinguished chairman of the Committee on the Judiciary for bringing this measure before us. I certainly intend to vote for it. But I do want to take this time, Mr. Chairman, to point out some observations that perhaps have not been brought before the committee in some time.

We have talked considerably this afternoon and at various times about home rule for the District of Columbia. I certainly do not want my vote for this very worthwhile resolution to be considered as a vote for so-called home rule, and I say "so-called home rule" because the better term is "Capitol rule." I hold to the position just as sincerely as I can that a Federal city, reserved especially for the Capitol of the United States, is a responsibility of all the representatives of the United States and we cannot abrogate that responsibility. Some this af-

ternoon have talked about the political serfs in the District of Columbia, because they have been denied the right to vote for what we might call city government. May I remind you that if we abrogate our responsibility there will be literally thousands of political slaves behind an iron curtain who will not have any voice in government because there are literally tens of thousands of people all over America who have their legal residence in your State and mine who, because of their position, live in the District, who can never become bona fide citizens of the District. And yet we are suggesting that we take away from them the right of representation.

The gentleman from North Carolina [Mr. WHITENER] mentioned a few minutes ago, if I recall correctly, the fact that there were 100,000 people, approximately, who voted in a presidential election here in the District several years ago. I take it then that these people voted by absentee ballot and I pause to yield to the gentleman to ask if the figure I gave is approximately correct.

Mr. WHITENER. I will say to the gentleman that that was the testimony of the President of the Board of Commissioners of the District of Columbia as will appear on page 34 of the hearings.

Mr. MATTHEWS. I shall assume that for every adult there probably is at least one other person who is not an adult, in the same situation, living in the District but with legal residence elsewhere. And I should assume, as the gentleman from Illinois [Mr. MASON] pointed out, that there are many thousands of people who are legal residents of States back home who live in the District who could have voted in this presidential election, to which I have referred, and who did not. So I suggest to you that the total number of people in the District of Columbia who have legal residence in the various States probably amounts to hundreds of thousands. You talk about political serfdom. I repeat, Mr. Chairman, that you will have political slavery behind an iron curtain for many thousands of citizens if you give so-called home rule, such as has been envisioned by many of my colleagues—and I respect them and I love them and I admire them. But I cannot abrogate my responsibility for the Capital City because this city is different. Its problems are different. It is the seat of the National Government. Its many beautiful and ornate public buildings were built by taxpayers' funds from all over the United States. Just the other day in one of our appropriation bills as I recall, between one-third and one-half of all the money appropriated for public buildings—tax money of your constituents and mine, was spent in the District of Columbia.

Mr. Chairman, I wonder if we ever stop to think of how many thousands of people live in the District of Columbia who are employed by the Federal Government. There are the great problems of mass transit which will cost literally hundreds of millions of dollars, which problems cannot be solved by the District of Columbia alone. They must be solved also by you and me. And I intend to do my part in trying to solve these problems.

The pollution of the Potomac River: whose responsibility is it? It must be the responsibility of the whole Nation, I say to you. And so I could go on and on and on. So there are two points of view; one, the District of Columbia, a great city, belongs to all the people of America. And there is the other point of view; the District of Columbia would have its responsibilities divided between a sort of a Capital-rule type of government on the one hand and an acceptance of some responsibility on the part of the Federal Congress on the other.

I know not what course you may take, but as for me, I say sincerely and humbly, I shall always continue to look upon this beautiful Federal city as our Capital City. I am a member of the Committee on the District of Columbia now. I do not expect to be a member of it too much longer. I think that is a responsibility all of my colleagues ought to enjoy. But so long as I am on that committee, I shall take the responsibility of making decisions on the basis of what I think is best for all of this great beloved Nation of ours.

Mr. McCULLOCH. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, our distinguished colleague the gentleman from Michigan [Mr. MEADER], as I recall, referred to the committee report on page 4 with respect to future enabling legislation if this resolution is adopted by the House and ratified by three-fourths of the States. He did not have time to read the language to which he referred but, by reason of its importance, I take that time now and I quote from page 4 of the report:

> It is the committee's intention, regarding future enabling legislation to carry out the provisions of this constitutional amendment, that no District inhabitants (including minor dependents) who maintain legal domiciles or voting residence elsewhere, be included in the census computation insofar as determining the number of electors is concerned.

Mr. Chairman, I am happy to repeat that which I said at the beginning of the debate on this important proposal. It is a step forward, a historic step forward. It would serve a useful purpose if this resolution were unanimously adopted by the House.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. McCULLOCH. I yield to the distinguished majority leader.

Mr. McCORMACK. All Congresses are very important and, as we know, very important legislation comes up in each Congress. It has in the last Congress, in the present Congress, and it will in future Congresses. But there are some Congresses that go down in history because of certain happenings that are historic in nature. The 86th Congress will be a historic Congress not for one historic event but for two: First, the admission of Hawaii as a State of the Union, and the other resolution now under consideration amending the Constitution. I join thoroughly with the remarks of my friend from Ohio in urging the adoption of this resolution.

Mr. Chairman, I yield 1 minute to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, after listening to the gentleman who said this was the greatest Congress the country has ever had, and shortly thereafter the majority leader said substantially the same thing, I will have to buy a new hat in the morning. It may be that because it has been and is my privilege to be a Member of this Congress. We are a great Congress. No doubt about that. Certainly we have had more inefficiency and waste; if we believe what we see in the RECORD and the press this Congress is the greatest in some respects within the memory of anybody here. We have established a record of spending, of the use of counterpart funds, and, if the press has the record correct, other public money for our own personal advantage over any previous Congress. Sure, we are a great Congress. Our tax levies, our spending, our public debt has never been exceeded. We are leaving a legacy to coming generations that has never been approached. Future generations will certainly remember us—but with what thoughts?

It is easy to give away the money exacted from others—or use it as our own. What does the Good Book say about pride?

Mr. ALGER. Mr. Chairman, the Constitution should not be changed except by the amendment procedure specified in the Constitution itself. The zeal we display today for preserving the Constitution is commendable. At the moment we are all constitutionalists. We praise the flexibility of the Constitution which has lived through the years, almost unchanged. The truth is, that we have already stretched the Constitution out of all recognizable shape and that today we are displaying our constitutional concern only on a noncontroversial matter, the granting to residents of the District of Columbia of the right to vote for President and Vice President. Yet, over the years we have adopted laws of dubious constitutionality without raising the constitutional question; and with few qualms about the oath taken every 2 years by Members of Congress. Using the general welfare clause and the interstate commerce provision we have justified many such measures if and when we felt justification was necessary.

As to specific laws which are unconstitutional as I see it, let me name a few: The present income tax, under which up to 91 percent of an individual's earnings may be seized—effective confiscation—and employers are compelled to act as tax collectors and bookkeepers for the Government without compensation; the social security program, which has been sold to the public and within the Congress as an insurance program, but justified before the courts as another out-and-out tax program; the farm programs, under which free Americans may be told how much of what crops they may raise on how many acres of their own land; the minimum wage law and the Davis-Bacon Act, which empower the Federal Government to establish wage rates in areas of commerce quite remote

from any subject to proper Federal jurisdiction; foreign economic aid programs, under which money seized from Americans is redistributed abroad in social welfare schemes whose relation to our national defense is a little hard to grasp; and Government dabbling in business enterprises either directly or through subsidies with the taxpayers' money as in the fields of public housing and power development.

Mr. GEORGE. Mr. Chairman, "As the District of Columbia goes, so goes the Nation" could very easily become the new political slogan.

The only reservation I had with respect to House Joint Resolution 757 was that if the District of Columbia is granted the privilege of voting for President and Vice President and the election returns were broadcast while the polls were still open in the States to the west, the outcome of the election could very easily be affected. With the difference in time from here to Hawaii and the fact that the majority of people go to the polls in the late afternoon and evening, the returns of a presidential election in the Capital of the Nation—the Federal city—could have a tremendous psychological effect upon the results elsewhere in the Nation.

To those people who have never been in Washington and know nothing about its citizens or the compact nature of its population, together with their attitude of hostility toward the occupant of the White House regardless of his political affiliation, the vote in the District could be controlling. This unprecedented situation should be desired by no one.

A study of the resolution, together with the committee report and the explanation by the able chairman, plus the colloquy between the gentleman from North Carolina [Mr. WHITENER], and the gentleman from Colorado [Mr. ROGERS], both members of the Judiciary Committee and able lawyers, have resolved this question to my complete satisfaction. The debate this afternoon has made it clear that Congress would have the power to prohibit the counting of the ballots or the totaling of them on voting machines until after the polls had closed in our most western State. It is also clear that Congress would have such power and authority to determine when the results of a presidential election in the District of Columbia would be made public.

No doubt House Joint Resolution 757 will receive early approval by the Congress and will be signed by the President. The critical hurdle will be to secure the approval of three-fourths of the State legislatures on the proposed amendment within the 7-year period.

Many State legislators might very well oppose the adoption of the amendment were they not cognizant of the fact that the Congress could postpone the release of the District of Columbia returns until the last American had cast his ballot. The debate this afternoon should resolve all doubt as to the congressional power in this regard.

The Committee on the Judiciary and its great and sincere chairman deserve much credit for the measure now about to be approved by the House, and the rapidity with which House Joint Resolution 757 was brought to the floor for consideration. The distinguished chairman and the members of the Rules Committee are to be commended for their expeditious consideration.

The prompt action by these two outstanding committees, composed of members from different sections of the country and of different psychological viewpoints, demonstrates the desire and purpose of this body that no American should be denied the right to vote for the two highest offices in the land.

I am sure the vote in both bodies, Mr. Chairman, will be practically unanimous, and I join with my fellow Members in hoping that the requisite number of States act within the prescribed time.

Mr. MACK. Mr. Chairman, I strongly support House Joint Resolution 757 which proposes an amendment to the Constitution of the United States to provide voting rights for the residents of the District of Columbia by granting representation in the electoral college.

Mr. Chairman, the framers of the Constitution did a magnificent job in providing guidelines and protecting individual rights of the citizens of this great Republic. It is a true charter for free men living with one another in peace and harmony. No other constitution has stood such rigid tests or served as well so many men. This Constitution has served this Nation throughout its history with few major amendments. It has been used as a model by our many States and many independent countries. Therefore, I have no criticism to offer about the work of our Founding Fathers in the drafting of this important document. It is possible that the failure to provide a vote for the residents of the District of Columbia was an oversight but it is also possible that the Founding Fathers assumed that anyone working in the Federal city would have permanent residence in some other State. Regardless of the reason for this omission it is time that we take affirmative action in granting the right to vote to the residents of the District of Columbia.

Mr. Chairman, I strongly support the proposed constitutional amendment and hope that favorable action will be taken before this Congress adjourns.

Mr. HALPERN. Mr. Speaker, the adoption by the Senate and now the House of Senate Joint Resolution 39, proposing a constitutional amendment that would permit residents of the District of Columbia to vote in national elections is a most commendable step forward. I believe that the entire Nation welcomes this measure that would provide for three votes in the electoral college for the District of Columbia.

Those who have long been observers of the national political process will at last become participants when the amendment is ratified by the required 38 States.

Pleased as we all are with the adoption of the amendment by both Houses of Congress, it is somewhat disappointing that the second so-called District provision in the original Senate version of the resolution was not included in the final measure. This would have provided the District with two House Delegates in Congress to represent the views of the more than 750,000 residents of the Nation's Capital. I surely hope that the Congress will consider this feature next year.

Another vital measure that should be brought before Congress for consideration is the so-called home-rule bill. We have broken through the barrier and opened a way for democracy to flow into the District. But, it is only a beginning, since the privilege of the vote has still to be extended to include the election of local government officials and representatives in Congress.

The fact that the District is a "Federal city" in which all the citizens of the country have an interest is not, in my opinion, a sufficient reason for denying to its inhabitants control over their local problems, matters in which the people neither of New York nor California could possibly have any concern.

Those of us who have supported the constitutional amendment cannot assume that our task is finished. Self-government has always been the bulwark of our Federal system and any supporter of States rights should ardently favor the same prerogatives of local rule for the citizens of the District.

The home-rule bill discharge petition before the House requires just a few more signatures to bring the measure to the floor for debate. Action this session by the House can send a bill to the President for enactment into law. I urge that the bill be cleared and that we maintain our momentum to bring to the residents of the District the privileges of democracy.

Mr. CELLER. Mr. Chairman, I yield back the balance of my time.

Mr. McCULLOCH. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Under the rule, the joint resolution is considered as read and open to amendment. Also, under the rule, no amendments are in order except those offered by direction of the Committee on the Judiciary. Are there any amendments?

Mr. CELLER. There are no amendments, Mr. Chairman.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. TRIMBLE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the joint resolution (H.J. Res. 757) proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia, pursuant to House Resolution 554, he reported the joint resolution back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and (two-thirds having voted in favor thereof) the joint resolution was passed.

Mr. CELLER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the joint resolution (S.J. Res. 39) proposing amendments to the Constitution of the United States to authorize Governors to fill temporary vacancies in the House of Representatives, to abolish tax and property qualifications for electors in Federal elections, and to enfranchise the people of the District of Columbia.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following articles are hereby proposed as amendments to the Constitution of the United States, and any one of which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"On any date that the total number of vacancies in the House of Representatives exceeds half of the authorized membership thereof, and for a period of sixty days thereafter, the executive authority of each State shall have power to make temporary appointments to fill any vacancies, including those happening during such period, in the representation from his State in the House of Representatives. Any person temporarily appointed to fill any such vacancy shall serve until the people fill the vacancy by election as provided for by article I, section 2, of the Constitution.

"ARTICLE —

"SECTION 1. The right of citizens of the United States to vote in any primary or other election for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax or to meet any property qualification.

"SEC. 2. Nothing in this article shall be construed to invalidate any provision of law denying the right to vote to paupers or persons supported at public expense or by charitable institutions.

"SEC. 3. The Congress shall have power to enforce this article by appropriate legislation.

"ARTICLE —

"The people of the District constituting the seat of the Government of the United States shall elect, in such manner and under such regulations as the Congress shall provide by law—

"a number of Delegates to the House of Representatives equal to the number of Representatives to which they would be entitled if the District were a State with such powers as the Congress, by law, shall determine; and

"a number of electors of President and Vice President equal to the whole number of Senators and Representatives in the Congress to which the District would be entitled if it were a State; such electors shall possess the qualifications required by article II of this Constitution; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and cast their ballots as provided by the twelfth article of amendment."

Mr. CELLER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CELLER: Strike out all after the enacting clause of Senate Joint Resolution 39 and insert the provisions of House Joint Resolution 757 as passed, as follows: "That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislature of three-fourths of the several States within 7 years from the date of its submission by the Congress:

" 'ARTICLE —

" 'SECTION 1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

" 'A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the 12th article of amendment.

" 'SEC. 2. The Congress shall have power to enforce this article by appropriate legislation'."

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the third reading of the joint resolution.

The joint resolution was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and (two-thirds having voted in favor thereof) the joint resolution was passed.

The title was amended so as to read: "Proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia."

A motion to reconsider was laid on the table.

House Joint Resolution 757 was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. CELLER. Mr. Speaker, I ask unanimous consent that Members may have 5 legislative days in which to extend their remarks on the resolution just passed.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

DINOSAUR NATIONAL MONUMENT

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 552) providing for the consideration of H.R. 6597, a bill to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6597) to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. BOLLING. Mr. Speaker, I yield one-half hour to the gentleman from Tennessee [Mr. REECE] and pending that yield myself such time as I may consume.

Mr. Speaker, the purpose of this resolution is clear from its reading. I know of no controversy on the rule and reserve the balance of my time.

Mr. REECE of Tennessee. Mr. Speaker, I have no requests for time, but I yield to the gentleman from Ohio [Mr. Bow].

Mr. BOW. Mr. Speaker, I understand from the reading of the resolution that it waives points of order. Can the gentleman tell me why points of order are waived in this instance?

Mr. BOLLING. If I may respond to the gentleman, the reason that points of order are waived is because of the language on page 28 of the bill, lines 3 and 4, which reads "and funds appropriated for the National Park Service shall be available for these purposes."

We understand this is not an evasion of the appropriation process, but merely makes it possible after this bill is passed for them to use moneys already appropriated for this purpose.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. ASPINALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6597) to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes.

The SPEAKER pro tempore. The question is on the motion.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6597, with Mr. BOLLING in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Colorado [Mr. ASPINALL] will be recognized for 30 minutes and the gentleman from Pennsylvania [Mr. SAYLOR] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Colorado [Mr. ASPINALL].

Mr. ASPINALL. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, although this is important legislation, it might have been brought up either under unanimous consent or on the suspension calendar, except for the reason that, as the House Committee on Interior and Insular Affairs was considering the legislation, the gentleman from Pennsylvania [Mr. SAYLOR], the ranking member of the committee, and the chairman of the full committee took opposite sides on an amendment which was adopted by the committee. So that we might present to this committee the two sides of the question involved, it was requested that a rule be granted. The members of the Committee on Interior and Insular Affairs are very appreciative of the fact that the Committee on Rules has permitted us to come before the House for this purpose. May I say as I start the discussion on this legislation that we shall be discussing one of those areas which is an integral part of the playgrounds of the United States of America, a part of the national parks system consisting of national parks, national monuments, historic sites, and other areas which the people themselves have the advantage of using. If it were not for this sort of program, which is comparatively new as far as our Government is concerned, we might have vast areas set aside for the recreation of individuals who are privileged because of circumstances to enjoy these places, while the traveling public, the ordinary citizen and family, the American people themselves, would not have the opportunities of such pleasure and enjoyment.

In this particular facility the United States is possessed of a fine playground and scientific research area which has been carved mostly out of the public domain. The reason the legislation is brought to the floor at this time is because the National Park Service and those sponsoring the bill wish to change the boundaries, provide for an approach road and administrative site, and establish a permanent status of national monument by statutory enactment. May I advise my colleagues that the boundaries will be so changed that there will be 960 acres fewer in the monument than there are at present. The access road will provide for an entrance road into that part of the park which is the playground, not that part from which the area gets its name, but that part which will afford recreational opportunities. The legislation also will provide that certain rights which are now permitted in the park for grazing will be continued in accordance with the plan established by the last Presidential order issued for this area.

This is not anything new, as the National Park Act itself provides for grazing within like areas. Where members of the committee differ, which will be brought out during the debate, is how we place a value, if any, on these grazing rights when they are terminated by action of Government.

And, now, may I say that this national monument was established by Executive order signed by former President Woodrow Wilson in 1915. It was established for the purpose of preserving this area which I now indicate on the map, a small tract where the dinosaur remains exist and where they are being set out in place by hewing away the rock in which the remains are buried, Then in 1935 former President Franklin Delano Roosevelt issued another order enlarging the boundaries of the park to include the area which is within the dark lines which I now indicate on this map, an area of approximately 209,000 acres. You may ask: Why such a large monument? In reply may I say that this is one of those unusual areas where the history of the world is very well written in rock and soil. One finds many fine phenomena of Nature's work as he visits this monument.

The fact is that this area has been so important in the minds of the American people, that in 1955 and 1956, when we were working on the Colorado River storage and development program, the sponsors of the bill, including the gentleman now speaking, endeavoring to have an irrigation project with a large dam and reservoir in this area known as the Echo Park project, were defeated in their efforts.

I now indicate the Colorado-Utah line. The part to the west of this line is in Utah. The larger area to the east is in Colorado. There is a fine headquarters in Utah where the dinosaur remains are found, and it is comparatively easy to visit the area. The visitor enters the park from the town of Jensen, Utah.

But to go from that area around to the playground area is practically impossible. There are no well-improved roads presently in the monument area. One can visit the interior of the monument area, of course, by pack train, wagon, horseback, boat or sturdy truck. It is easy to hire some boat operators and go down the two beautiful canyons that are in the area. The Canyon of the Green is to the north with beautiful Ladoe Canyon as a part of it. Much has been written about the area. Here to the east is the Canyon of the Yampa River.

You may well ask: How great in extent is the area? I would say that it is approximately 40 miles from east to west and 18 to 20 miles from north to south at the present time. Federal and State Highway 40 is located some 16 miles to the south of the southern boundary of the monument. This legislation will permit the building of a road outside the park from Highway 40 to the park area. As soon as it reaches the park area, then, of course, the construction of roads and trails would come under the jurisdiction which the National Park Service has at the present time.

The bill also provides for the acquiring of lands to the east, an area that is known as Lily Park, so that in time there may be a road from the east providing for travel both ways from east to west and west to east. There is a State road in that area at the present time. A visitor then could follow the rim of the Canyon of the Yampa down into the Steamboat Rock or the Echo Park area.

There is also a program which will be considered in years to come of building a road from the Steamboat Rock or the Echo Park area to the west along the canyon, which would then connect with the dinosaur area. But that must wait for further study and survey.

Mr. Chairman, for the remainder of my time I wish to explain the differences that exist between the gentleman from Pennsylvania and myself as to the reimbursement for the grazing rights which are present in the monument.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. ASPINALL. Mr. Chairman, I yield myself 5 additional minutes.

Mr. Chairman, the cost is modest in view of the benefits to be achieved. The estimated cost of land acquisition is $50,000, and the entrance road from U.S. Highway 40 will cost about $1,500,000.

In the boundary adjustments, there are 20,455 acres of Federal lands to be included within the boundaries for the first time. Another 22,475 acres of Federal lands will be removed from the monument, but it is the 20,455 acres to be added to which I wish to call particular attention at this time.

Most, if not all, of these added lands are being grazed by livestock under grazing privileges evidenced by grazing leases, licenses, or permits. These grazing privileges date back to pioneer times in the history of the States.

This area was established over 100 years ago. The men who went there saw that the farming values were to be found in livestock operations. Until the Taylor Grazing Act was authorized and became law, these people used these lands for which they did not have title as they saw fit in livestock operations, both cattle and sheep. But with the passage of the Taylor Grazing Act in 1934, permits and licenses became necessary. In the determination of who should use these areas, of course the people who had ranch operations or livestock outfits were given grazing areas in close proximity to their fee lands and they have been using them by term lease continually since that time. They pay lease rentals to the Federal Government.

Investments have been made by the ranchers on the Federal ranges. Fences and water facilities have been constructed. Many areas have been reseeded. The grazing privileges and the investment inprovements in the range have been capitalized into the value of the base properties. This is why range users traditionally resist any sharp increase in grazing fees. This is why any sudden withdrawal of privileges for monument purposes without compensation would cause severe hardship to the range users. The policy of the Government recognizing vested interests in public grazing lands has been reaffirmed in departmental regulations just published in the Federal Register.

On June 8, at page 5085, there appears the revised section 160.12 of title 43, Code

of Federal Regulations. This section deals with compensation to grazing lessees for loss of range improvements. Before any application for the sale of public land is allowed, evidence must be furnished that the applicant has agreed to compensate the grazing lessee and the United States for any authorized grazing improvement placed on the land. Payment must be in an amount and manner to be mutually agreed upon.

Mr. Chairman, I bring this to your attention because it is recognized that there are values that go with these leased properties; although I think it only fair to advise you that in reality, as far as statutory authority is concerned, a person's right in this property can be said to end with the termination of his lease.

It is unfortunate, in my opinion, that this obviously reasonable requirement depends merely on regulatory authority and is not a part of the statutes. It is unfortunate also that there is no statutory provision requiring the Government itself to make an equivalent payment to the owner of authorized range improvements when a Government department, rather than a private citizen, is the land applicant. The Government ought to be willing and able to pay in the same manner and to the same extent as it requires its citizens to pay under like circumstances.

May I add here that, at my suggestion, a study to examine inconsistencies in grazing fees on various classes of Federal lands has just been undertaken. The study will be made jointly by the Departments of Agriculture and the Interior. This will be a long-range study, and I mention it here even though it does not directly bear upon the present bill.

Mr. Chairman, the committee's report contains the separate views on the grazing question of my friend and colleague, the ranking minority member of the committee, the gentleman from Pennsylvania [Mr. SAYLOR]. With all respect to my friend, I must state that the information on which he has based his views, in my opinion, is not in keeping with the legislation, although on the general principle involved I am in agreement with him.

The last proviso of section 3 of the bill, as introduced—appearing on page 29, lines 2–8—has the format of an authorization to the Secretary of the Interior so that, when he appraises the value of privately owned land within the limits of the monument to be acquired under the act, he may take into account the influence on such value of the appurtenance of Federal range.

I say, advisedly, that the proviso has the "format of an authorization," because in all probability the Secretary already has the same authority, or would necessarily have to exercise it, whether this proviso is included or not.

Mr. Chairman, I shall reserve the balance of my argument on the range proposition until the gentleman from Pennsylvania [Mr. SAYLOR] presents his views.

Mr. SAYLOR. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, in 1915 Woodrow Wilson, then President of the United States, on the 4th day of October, following a study and discovery which had been made by certain American scientists who were exploring the canyons in western Colorado and in eastern Utah, issued a proclamation and set aside 80 acres wherein the fossil remains of dinosaurs had been discovered. From that time until the present that area and the area surrounding those 80 acres have been known as Dinosaur National Monument.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA—A PROCLAMATION—1915

Whereas in section 26, township 4 south, range 23 east of the Salt Lake meridian, Utah, there is located an extraordinary deposit of Dinosaurian and other gigantic reptilian remains of the Jura-Trias period, which are of great scientific interest and value, and it appears that the public interest would be promoted by reserving these deposits as a national monument, together with as much land as may be needed for the protection thereof.

Now, therefore, I, Woodrow Wilson, President of the United States of America, by virtue of the power in me vested by section 2 of the act of Congress entitled "An act for the Preservation of American Antiquities," approved June 8, 1906, do hereby set aside as the Dinosaur National Monument, the unsurveyed northwest quarter of the southeast quarter and the northeast quarter of the southwest quarter of section 26, township 4 south, range 23 east, Salt Lake meridian, Utah, as shown upon the diagram hereto attached and made a part of this proclamation.

While it appears that the lands embraced within this proposed reserve have heretofore been withdrawn as coal and phosphate lands, the creation of this monument will prevent the use of the lands for the purposes for which said withdrawals were made. Warning is hereby expressly given to all unauthorized persons not to appropriate, excavate, injure or destroy any of the fossil remains contained within the deposits hereby reserved and declared to be a national monument or to locate or settle upon any of the lands reserved and made a part of this monument by this proclamation.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this fourth day of October, in the year of our Lord one thousand nine hundred and fifteen and the Independence of the United States the one hundred and fortieth.

WOODROW WILSON.

By the President:

ROBERT LANSING,
Secretary of State.

The area continued to have 80 acres until July 20, 1938, when Franklin D. Roosevelt, then President of the United States, on the 14th day of July 1938, issued a proclamation, published in the Federal Register on July 20, 1938, in which the boundaries of the Dinosaur National Monument were expanded and included 209,000 acres of land.

[From the Federal Register, vol. 3, No. 140, July 20, 1938]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA—A PROCLAMATION

ENLARGING THE DINOSAUR NATIONAL MONUMENT, COLORADO AND UTAH

Whereas certain public lands contiguous to the Dinosaur National Monument, established by proclamation of October 4, 1915, have situated thereon various objects of historic and scientific interest; and

Whereas it appears that it would be in the public interest to reserve such lands as an addition to the said Dinosaur National Monument:

Now, therefore, I, Franklin D. Roosevelt, President of the United States of America, under and by virtue of the authority vested in me by section 2 of the act of June 8, 1906 (ch. 3060, 34 Stat. 225 (U.S.C. title 16, sec. 431)), do proclaim that, subject to all valid existing rights, the following-described lands in Colorado and Utah are hereby reserved from all forms of appropriation under the public land laws and added to and made a part of the Dinosaur National Monument:

LEGAL DESCRIPTION NOT COPIED

Warning is here expressly given to any unauthorized persons not to appropriate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

The reservation made by this proclamation supersedes as to any of the above-described lands affected thereby, the temporary withdrawal for classification, and for other purposes, made by Executive Order No. 5684 of August 12, 1931, and the Executive order of April 17, 1926, and the Executive order of September 8, 1933, creating water reserves No. 107 and No. 152.

The Director of the National Park Service, under the direction of the Secretary of the Interior, shall have the supervision, management, and control of this monument as provided in the act of Congress entitled "An act to establish a National Park Service, and for other purposes," approved August 25, 1916 (39 Stat. 535 (U.S.C., title 16, secs. 1 and 2)), and acts supplementary thereto or amendatory thereof, except that this reservation shall not affect the operation of the Federal Water Power Act of June 10, 1920 (41 Stat. 1063), as amended, and the administration of the monument shall be subject to the reclamation withdrawal of October 17, 1904, for the Brown's Park Reservoir site in connection with the Green River project.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this 14th day of July, in the year of our Lord 1938, and of the independence of the United States of America the one hundred and sixty-third.

FRANKLIN D. ROOSEVELT.

By the President:

CORDELL HULL,
The Secretary of State.

(No. 2290)

The Brown's Park Reservoir damsite is located within the confines of the Dinosaur National Monument.

President Roosevelt's proclamation stated that the land that was to be included in the monument would be subject to all valid existing rights. I point that out because in 1934 the Congress of the United States passed the Taylor Grazing Act. The Taylor Grazing Act had as one of its provisions the creation of grazing districts, and provided that the Secretary of the Interior should grant licenses to persons to graze cattle within these districts. It also had this provision:

But in the issuance of permits pursuant to provisions of this chapter shall not create any right, title, or interest in the land.

That is the condition that exists today.

The chairman of our great Committee on Interior and Insular Affairs, the Honorable WAYNE ASPINALL, introduced the bill which is presently being considered by the House, H.R. 6597, which

revises the boundaries of Dinosaur National Monument. With that part of the bill which contains the revision of the boundaries I am very much in accord. Our chairman has called attention to the changes wherein certain land was taken out of the boundaries of the monument and other land included. The new boundaries as near as possible conform to the topography of the land. These new boundaries will conform to the area which drains into the Green and the Yampa Rivers as they flow through the Dinosaur Monument. I certainly hope the committee will accept and approve that portion of this bill.

My only objections to this bill are contained in section 3. The first part of section 3 is necessary, but the last two provisos, in my opinion go too far. Members of the committee who were in Congress about 8 years ago will recall that the committee debated a bill which became known in the minds of the public as the D'Ewart bill or the stockmen's bill. At that time there was a deliberate attempt by the stockmen of the country to see that the provision of the Taylor Grazing Act, which specifically states that as a result of the license given to graze cattle on the public domain there was no property right given, was changed—an attempt to have the Congress change its view and say that if you obtained a license from either the Secretary of the Interior to graze on the public domain or on the Taylor grazing land, or from the Secretary of Agriculture to graze in the national forest, you had not a privilege or a license but you had a right—a right that could be transferred from father to son or could be bought and sold and become something which the Congress would recognize. Congress at that time defeated that proposition.

Mr. ASPINALL. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Colorado.

Mr. ASPINALL. It is probably for that reason, is it not, that we placed in our report on page 10 the last sentence, to show that this was not to be considered as a precedent or establish that sort of an idea for the general program?

Mr. SAYLOR. That is correct. On page 10 of the report we so stated. But I opposed in the committee the provision which appears on page 29 of the bill in line 2 with regard to private land that is within the boundary of the monument.

In the second proviso which was added in the committee bill, our committee states that these same rights must be considered for anyone who owns private land outside the Dinosaur National Monument but who has been given a license by the Secretary of the Interior to graze cattle within the monument.

I have not always been right in every one of my predictions of how our past actions will in the future haunt us, but I have said from time to time that even though a committee states in its report that this is not to be a precedent the departments downtown will invariably seize upon it, and sometime in the future you will find that the department, including the Interior Department or the Agriculture Department, will come up and point to this bill, saying that Congress on the 14th day of June 1960 passed a bill which established such a precedent. Therefore, I would ask the members of this committee to disapprove the committee amendment which appears on page 29 of the bill on line 8, which would extend to the property owners of private land outside of the monument, and who have grazing privileges in the monument, the provision authorizing the Secretary of the Interior to make a reasonable or equitable allowance to them for the value of such grazing privileges.

Then I would ask that the committee support an amendment which I will offer on page 29, line 2. After the word "default", strike the balance of the sentence. With this deletion from the bill, there would be no doubt in anyone's mind that there was an attempt to create for any property owner, who has a license for grazing privileges within the Dinosaur National Monument, a right for which he would be entitled to compensation.

The CHAIRMAN. The gentleman from Pennsylvania has consumed 10 minutes.

Mr. SAYLOR. Mr. Chairman, I yield 5 minutes to the gentleman from Utah [Mr. DIXON].

Mr. DIXON. Mr. Chairman, the committee report states definitely the position of our State with regard to whether these grazing privileges are rights or privileges. Definitely, it has been determined they are privileges offered by the Government. That is the way they are considered legally. But there is something behind this privilege. We had to testify before the committee on this bill, Mr. Colton, a man who came here with Millard Marriott. They were partners in starting the Hot Shoppes. Mr. Colton told about his father settling in this area near Vernal in 1879. In those days when a settler stayed and improved property, he could homestead the property and it became his. When he used water from the creeks for irrigation, he obtained title by right of usage. I am not arguing that these are legal rights, but I am explaining to you the background of this situation because of the history of how we acquired water rights and how we acquired homestead rights and so on.

There are other cases similar to this where the Government has had to acquire property. I know of one instance where we had to have quite attractive land for a military base, and the Government did offer the cattle and sheep people some compensation for their grazing privileges and improvements in order not to bankrupt these people. There are people who own private property within this monument who range their cattle and livestock outside their own property, but on the monument. I think they should have some consideration for improvements at least because they would lose the value of that grazing right. It might seem farfetched that a person in Colorado who does not live on the monument, but who has a ranch outside would be injured, but if his grazing privileges are taken away from him and his summer range is taken from him, then his ranch is not of much use.

It was testified in committee that there are not more than 1,000 cattle being grazed. These are privileges and they are worth about $50 per head. They are sold back and forth. Then there are some sheep. I do not think it would cost the Government $70,000 in this whole situation to compensate these people and save them from ruin. There are not more than 10 or 12 livestock people affected.

Furthermore, we must have their good will around the monument. They have to be boosters for this park. They have to be hospitable and they have to do everything to make this park succeed. I have in the testimony quotations from Conrad Wirth, head of the Park Service, who says that this is one of the most important points.

Another thing, Mr. Chairman, when this area was made a monument, the people were given to understand fully that their grazing privileges and their right to put in irrigation dams and reclamation projects on that monument would not be interfered with. They have definite testimony to that effect, and they were willing to go into this proposition because they had the faith that the Government would keep its word that their grazing privileges would not be interfered with. There is no question in the world about the moral rights of these fine people who have gone in with the Government and cooperated and who Mr. Wirth says we need so much to continue to cooperate in order to build up these wonderful parks.

I, of course, am very much in favor of this bill. I hope the amendments proposed by the gentleman from Pennsylvania will not be passed, but that this Committee of the Whole will sustain the amendments offered by the great Committee on the Interior and Insular Affairs.

Mr. Chairman, I would like to express my support for H.R. 6597 with the committee amendments.

Let me say first of all that people of Utah are very suspicious of any legislation expanding the amount of Federal land ownership in our State, because 75 percent of the land of Utah is already owned by the Federal Government.

However, the people and the agencies of Utah have tried to be reasonable and cooperative although they disagreed with the committee about the inclusion of a site of land identified by No. 12 on some maps, in the boundaries of the monument, they are still willing to accept this bill. The reason they are willing to accept the bill is that they recognize the need for further development of the Dinosaur Monument which will be provided as a result of this bill.

Few areas in America can lay claim to so many wonders worth preserving as those located in the Dinosaur National Monument area.

Apart from the purely scenic beauty of the colorful and "rugged wilderness of deep canyons, dissected erosional benches, and bold promontories of exceptional grandeur," the area is im-

portant from a geological, scientific, and historic point of view.

First. Imbedded in the rock formations is the geological story of what took place on earth for a period estimated to cover 500 million years.

Second. It contains the most unusual collection of fossil forms ever found, including the world-famous dinosaur quarry.

Third. Many of the caves and canyon bottoms contain refuse heaps left by people who are estimated to have lived in the area nearly 2,000 years before the birth of Christ.

Fourth. I am told that nowhere in the country is there such an outstanding example of stream piracy, whereby one stream intercepts another and its course changes completely, as is included in the Dinosaur National Monument area with the Green River.

As the Congressman in whose district this scenic wonder lies, I extend an invitation to all of you to visit this monument. It will be one of the most breathtaking experiences you will ever have

Let me point out to the House that as the bill and the committee amendments have been developed they represent a delicate compromise of all parties concerned with the new monument.

I hope the House will accept the committee amendments, particularly section 3 pertaining to compensation of any people who may lose grazing privileges within the boundaries of the monument.

With the committee amendment the bill will permit the Secretary of Interior to take into account the reasonable value of grazing privileges appurtenant to privately owned land which is acquired within the monument. This is standard practice, and I do not believe there can be any objection to it.

The bill takes into account another type of loss for which compensation might also be given. This is the loss of grazing rights within the monument which are appurtenant to privately owned land outside of the monument.

I believe this provision is equitable and should by all means be adopted by the House for the following reasons:

First. Grazing of this land has become a longstanding tradition with the cattlemen of the area. The nearest town to the monument, Vernal, was settled in 1879 and cattle grazing became a major industry in the development of the western area. This grazing began long before there was ever any monument and before the Bureau of Land Management or Department of Agriculture started to grant grazing permits.

It should be pointed out that use of Federal lands in many other fields becomes the basis for acquisition of title. It is use of the land which permits it to be homesteaded without charge. It is the initial discovery and development of mining claims which permits them to be patented and the use of these lands for grazing is a longstanding tradition.

Second. These grazing privileges have come to develop a marketable value. Every week people buy and sell these grazing privileges. A typical cost of sale is $50 per head of cattle and $10 per head of sheep. Many of the people who are grazing now in the Dinosaur Monument paid this kind of money in order to buy that privilege from the person who previously held the privilege.

Third. It had been reported to the people who graze their land in the monument area that their grazing privileges would not be disturbed. Consequently to deny these privileges without equitable compensation would, as far as the permittees are concerned, constitute a breach of faith.

Fourth. The amount of money involved is extremely small. It may be many years before these grazing privileges are ever canceled, but in any case the total value of an extended period of time probably will not exceed $50,000.

Fifth. It is extremely important with the further development of the monument to have a cooperative attitude on the part of the citizens in the neighboring areas. Conrad Wirth, the Director of the Park Service, stated this philosophy at Vernal in hearings on May 24 when as part of his statement he said:

> We realize that in running this great national monument it is important that we have friendly relations with our neighbors and that they should be our best friends and business helpers in the job we have to do.

You all know that there has been a festering controversy about water development in the monument. And this controversy has not yet been finally resolved considering all of the contention and controversy that has gone on about Dinosaur Monument. I believe it is extremely important to accept this provision compensating the users of grazing privileges within the monument for the marketable value of their privilege.

This will be a major factor in creating very good relations between the community and the Government and administrators of the monument.

Sixth. Finally, it is very important to state that the compensation of these grazers because of the special unique reasons which have been listed does not establish an important precedent on the basic question of whether these grazing privileges should be regarded as rights or not. These grazers are suddenly being told that they will ultimately lose privileges that they have long held.

This is a basic change of their status of the type which Congress has previously recognized. Although Congress was not willing to pass the D'Ewart bill which would have recognized a universal legal right and equity in these grazing privileges Congress has recognized special cases. For example, the act of July 9, 1942 (43 U.S.C. 315(g)) authorized the military services to compensate stockmen with grazing privileges on lands that had to be taken over for defense purposes.

Similarly in Public Law 85–868 section I(g) recognized the special rights of cattle grazers who lost their privileges because of land being transferred to the Navajo Indian tribe. Consequently this act can be passed based on the special situation involved by the people who have been traditionally grazing in the monument without any way affecting or changing the fundamental law involving grazing privileges.

Mr. SAYLOR. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. BALDWIN].

Mr. BALDWIN. Mr. Chairman, I am particularly pleased to see that this bill authorizes the construction of proper access roads into the major portion of the Dinosaur National Monument.

Six years ago it was my privilege to float on a rubber raft down through the entire length of the Yampa River through the entire national monument from Lily Park at one end on the east, out the monument on the other side, about a 6- or 7-day trip, an extremely unusual trip, a trip in which we studied the Indian petroglyphs on the walls and in which we found the tent poles, some lying in caves, used by Indians thousands of years ago, and saw many other extremely unusual characteristics of this national monument.

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. BALDWIN. I yield.

Mr. DIXON. I am glad the gentleman mentioned the wonders of this area. It is remarkable, it is unusual, it is irreplaceable. I am glad the gentleman went down the Green by boat.

Dinosaurs are peculiar beasts. He had a brain in his cranium and one at the base of his spinal column so when an idea missed the first brain he had a saving afterthought, I have often wished we had the same equipment. But even with all that equipment he became extinct because he could not adapt himself to his changed surroundings.

I thank the gentleman for praising this area.

Mr. BALDWIN. It seems to me it is quite appropriate that in this bill adequate provision is made for access roads, because the facts are true as stated by the chairman of the committee, the gentleman from Colorado [Mr. ASPINALL], that there is practically no access to it from Highway 40. I drove by there last year. If you look you will find no invitations along the road or signs to actually direct you into the main part of the monument. The only actual sign you will find is the one that leads to the dinosaur remains, but it will be completely unrelated to the main portion of the monument which, in my opinion, has some extremely unusual and significant features. I think it is appropriate that the committee has taken this step to make available authorization for the construction of proper access roads to the main monument so the monument can be visited so people can enjoy Steamboat Landing and the other features of the monument that are so unusual.

Mr. ASPINALL. Mr. Chairman, I have no further requests for time.

Mr. SAYLOR. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, as we sit here day after day and month after month there seems to be a continuous effort all the time to spend the taxpayers' money on reclamation projects, parks—first one thing, then another. I have noticed that all these reclamation projects are fine and wonderful, but someone with a commercial

idea gets in and takes over the park, or the lake, or a part of its shore, and commercializes the project. That has been the case in park after park. Just the other day we had a bill up here for a project with $171,000, that amount carried in the bill for—shall I say entertainment? Well, you might call it entertainment; yes, that is what it was, it was so designated. Now, you may make these improvements the gentleman has spoken of and soon you will not have a park any more, or a monument, fine though those improvements may be, the original purpose of taking the land has been abandoned. You will have a paved parking lot, a restaurant, a movie show; and when you get those things you defeat the original purpose of having a park, the main purpose of which, as I have always thought and understood, was to show this generation and future generations what nature actually was. That was really the main purpose, to have some place where they could learn what had been. But that is what you are doing, as I read it—a place of entertainment instead of nature's product. I have two amendments at the desk to be offered at page 29 to strike out those provisions giving authority to make unlimited payments. I think they are similar to amendments to be offered by the gentleman from Pennsylvania [Mr. SAYLOR] who, being a member of the committee, I assume, will be recognized to offer similar amendments.

What we are doing is just what he said, we are attempting for the benefit of some of these people who live there, some of them within the park and some outside the park, to turn a license and privilege into a property right, then asking the Government to pay for it. Is that not what we are doing, may I ask the gentleman?

Mr. ASPINALL. There are only three people who live within the confines of this area and they have lived there I suppose for 60 years, or longer. This is the area where the old trading rendezvous was had with the Indians.

Mr. HOFFMAN of Michigan. You are not answering the question. You are converting a license into a property right; are you not?

Mr. ASPINALL. We are not changing anything in this particular area. All we are asking is to have this road built to the park boundary, so that people can use it. There will be no new park concessions, if that is what my friend wishes me to say. There will be no new park concessions whatever.

Mr. HOFFMAN of Michigan. Referring to the people in the park the gentleman spoke about as having grazing rights, when you take that you want to authorize the Secretary to pay them for the grazing rights, which was a privilege, not on their land but on park land. Then those who live outside, having grazing rights inside, you want to pay them, for the grazing land; is that right?

Mr. ASPINALL. The gentleman is correct.

Mr. HOFFMAN of Michigan. I might go along with the gentleman from Utah, Mr. DIXON, who made a real, sympathetic plea to help these poor folks out and keep them good natured and happy. That is all right, but it is a strange thing that we want to give our own people something instead of sending it abroad. I can accept that argument too. But why should the Government pay for grazing rights on land it owns?

Mr. ASPINALL. Would the gentleman be willing, or does he think it is right that if the Government, the National Park Service, sooner or later takes over the grazing rights, as it has a right to do, the Government should pay?

Mr. HOFFMAN of Michigan. They belonged to the Government in the beginning. All you did was to give some license to let their cattle eat grass there for a term—no permanent right.

Mr. ASPINALL. I would like to finish my question. Would the gentleman be in favor of permitting the Government to pay the user for the permanent improvements that the user paid for on those grazing lands while he was using them?

Mr. HOFFMAN of Michigan. He took his chances when he made the improvements but the Government should—and under the bill will—pay for improvements, but a grazing permit is not an improvement.

Mr. ASPINALL. Yes. But the gentleman does not answer the question.

Mr. HOFFMAN of Michigan. The Government is paying him for what the land is worth as improved. What you are trying to do with this bill is to pay for that grazing right which originally belonged to and still is the property of the Government and which you let him exercise for awhile. You let him graze his cattle for so many years and now you want to say that is an absolute right and the Government has to pay for it. I cannot agree.

Mr. SAYLOR. Mr. Chairman, I yield myself such time as I need to make this observation to the members of the committee in regard to Mr. Colton's testimony which the gentleman from Utah mentioned in his argument. In describing his property he said it is open range:

> There are a few drift fences here and there that either the permittees themselves have constructed or in cooperative agreement with the Bureau of Land Management they have cooperatively built fences. Outside of that it is open range.

That is the reason I oppose these amendments in which you say that for this open range people would be paid.

Mr. ASPINALL. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota [Mr. WIER].

Mr. WIER. Mr. Chairman, I am a little bit confused here, as was the previous speaker, the gentleman from Michigan [Mr. HOFFMAN], because I remember well when the D'Ewart bill several years ago came to the House floor it had already been marked as a giveaway bill. The giveaway part of the bill was a perpetuation of the real ownership of these leased lands. In other words, you could go into the business of leasing to relatives or to other people; that is, the right that you felt you had to this property by transfer or lease of it to other people. Would you say there is any of the D'Ewart language in this amendment that you are contesting?

Mr. SAYLOR. This amendment has, in my opinion, the same result as the language of the D'Ewart bill.

Mr. WIER. I can hardly believe the gentleman from Colorado is mixed up in a giveaway. That would be hard to believe. But is there anything in this bill that bestows certain rights upon a rancher, no matter whether he has been there 1 year or 20 years, as the gentleman from Utah [Mr. DIXON] said, who has put some dams in the creeks to hold water, or he has built a few fences, or he built a little irrigation ditch? That, in my opinion, would not necessarily mean he had acquired ownership or the right to re-lease, sell, or transfer that lease he had acquired; is that correct?

Mr. ASPINALL. Mr. Chairman, if the gentleman will yield, the language is purely permissive. It permits the Secretary when these rights are terminated, if he sees fit, to place any value which he believes has accrued to the grazer because of improvements or for any other reason, that he has in that permit that he has been using.

Mr. WIER. Then is the crux of the difference between the gentleman from Colorado and the gentleman from Pennsylvania that the gentleman from Colorado's language is permissive, while the gentleman from Pennsylvania wants to make it very explicit?

Mr. ASPINALL. The gentleman from Colorado is not about to give away anything that belongs to the people of the United States. There are involved in this particular matter some 6,885 acres of rangeland in Colorado and 2,370 acres of private lands, as such, in Utah. With that go these grazing areas which, I might say, take 5 acres to take care of one cow for 1 month during the grazing season. These are the values that are involved. What the gentleman from Colorado thinks is that if these people who used this area and have built it up, have some values there that the Secretary of the Interior recognizes, then when these rights are terminated those users should be paid for those rights. Other than that the gentleman from Colorado and the gentleman from Pennsylvania [Mr. SAYLOR] are in accord. I am sure that the gentleman from Pennsylvania would admit that.

Mr. WIER. I thank the gentleman.

Mr. ASPINALL. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the boundaries of Dinosaur National Monument, established in pursuance of the Act of June 8, 1906 (34 Stat. 225; 16 U.S.C., 1952 edition, sec. 431), and administered in accordance with the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C., 1952 edition, sec. 1, et seq.), and Acts supplementary thereto and amendatory thereof, are hereby revised so that the monument shall include, subject to valid existing rights, those lands in the States of Colorado and Utah, encompassed within the following described boundaries:

Beginning at a point on the Utah-Colorado State boundary line at the northeast corner

of section 36, township 2 south, range 25 east, Salt Lake meridian, Utah—

thence westerly along the north lines of said section 36 and section 35, said township and range, to the north quarter-section corner of said section 35;

thence southerly along the north-south quarter-section lines of said section 35, said township 2 south, range 25 east, and sections 2, 11, and 14, township 3 south, range 25 east, to the north quarter-section corner of section 23, said township and range;

thence westerly along the north lines of said section 23 and sections 22, 21, and 20, said township and range, to the northwest corner of said section 20;

thence southerly along the west line of said section 20 to the northeast corner of section 30, said township and range;

thence westerly along the north lines of said section 30, said township 3 south, range 25 east, and section 25, township 3 south, range 24 east, to the north quarter-section corner of said section 25;

thence southerly along the north-south quarter-section lines of said section 25 and section 36 of said township and range to the northeast corner of the southwest quarter of said section 36;

thence westerly along the east-west quarter-section lines of said section 36 and section 35 of said township and range to the west quarter-section corner of said section 35;

thence southerly along the west line of said section 35, said township 3 south, range 24 east, to the southwest corner of said section 35, at a point on the north line of section 3, township 4 south, range 24 east;

thence westerly along the north line of said section 3 to the northwest corner of said section 3;

thence southerly along the west line of said section 3 to the northeast corner of southeast quarter of the northeast quarter of section 4, said township and range;

thence westerly along the north one-sixteenth latitudinal section lines of said section 4 and sections 5 and 6, said township 4 south, range 24 east, and unsurveyed section 1, township 4 south, range 23 east, to the northwest corner of the southwest quarter of the northeast quarter of said unsurveyed section 1;

thence southerly along the west line of the southwest quarter of the northeast quarter of said unsurveyed section 1 to the northeast corner of the southwest quarter of said unsurveyed section 1;

thence westerly along the east west quarter section line of said unsurveyed section 1 and unsurveyed section 2, said township and range, to the west quarter-section corner of said unsurveyed section 2;

thence southerly along the west line of said unsurveyed section 2 to the southwest corner of said unsurveyed section 2;

thence westerly along the south lines of unsurveyed sections 3 and 4 of said township and range to the north quarter-section corner of unsurveyed section 9, said township and range;

thence southerly along the north-south quarter-section lines of said unsurveyed section 9 and unsurveyed sections 16 and 21 and sections 28 and 33, said township and range, to the southwest corner of the northeast quarter of said section 33;

thence easterly along the east-west quarter-section line of said section 33, said township 4 south, range 23 east, to the thread of the Green River;

thence upstream along the thread of the Green River within said township and range and township 5 south, range 23 east, township 5 south, range 24 east, and township 4 south, range 24 east, to a point at its intersection with the south line of section 30, said township 4 south, range 24 east;

thence easterly along the south lines of said section 30 and sections 29, 28, and 27, said township and range, to the north quarter-section corner of section 34 of said township and range;

thence southerly along the north-south quarter-section lines of said section 34, said township 4 south, range 24 east, and section 3, township 5 south, range 24 east, to the southwest corner of the northeast quarter of said section 3;

thence easterly along the east-west quarter-section lines of said section 3 and sections 2 and 1 of said township and range to the east quarter-section corner of said section 1;

thence northerly along the east lines of said section 1, said township 5 south, range 24 east, and sections 36 and 25, township 4 south, range 24 east, to the southwest corner of section 19, township 4 south, range 25 east;

thence easterly along the south line of said section 19 to the southeast corner of said section 19;

thence northerly along the east line of said section 19 to the southwest corner of section 17 of said township and range;

thence easterly along the south lines of said section 17 and sections 16 and 15 to the northwest corner of section 23 of said township and range;

thence southerly along the west line of said section 23 to the southwest corner of the northwest quarter of the southwest quarter of said section 23;

thence easterly along the south one-sixteenth latitudinal section lines of said section 23 and fractional section 24, said township 4 south, range 25 east, Salt Lake meridian, Utah, to a point on the Utah-Colorado State boundary line.

thence southerly along the Utah-Colorado State boundary line being the west line of fractional section 23, fractional township 6 north, range 104 west, sixth principal meridian, Colorado, to the southwest corner of lot 12, said fractional section 23;

thence easterly along the south one-sixteenth latitudinal section lines of said fractional section 23 and section 24, said fractional township and range, to the northwest corner of the southwest quarter of the southeast quarter of said section 24;

thence southerly along the north-south quarter-section line of said section 24 to the south quarter-section corner of said section 24;

thence easterly along the south lines of said section 24, said fractional township 6 north, range 404 west, and section 19, township 6 north, range 103 west, to the northwest corner of section 29, said township and range;

thence southerly along the west line of said section 29 to the southwest corner of the northwest quarter of the northwest quarter of said section 29;

thence easterly along the north one-sixteenth latitudinal section lines of said section 29 and section 28 of said township and range to the southwest corner of the northwest quarter of the northeast quarter of said section 28;

thence southerly along the north-south quarter-section line of said section 28 to the southwest corner of the northwest quarter of the southeast quarter of the said section 28;

thence easterly along the south one-sixteenth latitudinal section lines of said section 28 and section 27, said township and range, to the northwest corner of the southwest quarter of the southwest quarter of section 26, said township and range;

thence southerly along the west lines of said section 26 and section 35, said township and range, to the west quarter-section corner of said section 35;

thence easterly along the east-west quarter-section lines of said section 35 and section 36, said township and range, and sections 31, 32, 33, 34, 35, and 36, township 6 north, range 102 west, sections 31, 32, 33, 34, 35, and 36, township 6 north, range 101 west, and sections 31, 32, 33, 34, 35, and 36, township 6 north, range 100 west, sections 31 and 32, township 6 north, range 99 west, to the southeast corner of the northwest quarter of said section 32;

thence northerly along the north-south quarter-section lines of said section 32 and section 29, said township and range, to the southwest corner of the northeast quarter of said section 29;

thence easterly along the east-west quarter-section lines of said section 29 and sections 28 and 27, said township and range, to the southeast corner of the northwest quarter of said section 27;

thence northerly along the north-south quarter-section lines of said section 27 and section 22, said township and range, to the northeast corner of the southwest quarter of said section 22;

thence westerly along the east-west quarter-section line of said section 22 to the east quarter-section corner of section 21, said township and range;

thence northerly along the east line of said section 21 to the northeast corner of said section 21;

thence westerly along the north line of said section 21 to the southeast corner of unsurveyed section 17, said township and range;

thence northerly along the east line of said unsurveyed section 17 of the east quarter-section corner of said unsurveyed section 17;

thence westerly along the east-west quarter-section line of said unsurveyed section 17 to the southeast corner of the northwest quarter of said unsurveyed section 17;

thence northerly along the north-south quarter-section lines of said unsurveyed section 17 and unsurveyed section 8, said township and range, to the north quarter-section corner of said unsurveyed section 8;

thence westerly along the north line of said unsurveyed section 8 and unsurveyed section 7, said township 6 north, range 99 west, sections 12, 11, 10, 9, and 8, township 6 north, range 100 west, to the southeast corner of section 6, said township and range;

thence northerly along the east line of said section 6 to the east quarter-section corner of said section 6;

thence westerly along the east-west quarter-section lines of said section 6, said township 6 north, range 100 west, and unsurveyed sections 1 and 2, township 6 north, range 101 west, to the east quarter-section corner of unsurveyed section 3, said township and range;

thence northerly along the east section lines of said unsurveyed section 3, said township 6 north, range 101 west, and section 34, township 7 north, range 101 west, to the east quarter-section corner of said section 34;

thence westerly along the east-west quarter-section line of said section 34 to the east quarter-section corner of unsurveyed section 33, said township and range;

thence northerly along the east section lines of said unsurveyed section 33 and unsurveyed section 28, said township and range, to the east quarter-section corner of said unsurveyed section 28;

thence westerly along the east-west quarter-section lines of said unsurveyed section 28 and unsurveyed sections 29 and 30, said township 7 north, range 101 west, and unsurveyed sections 25, 26, 27, and 28, township 7 north, range 102 west, to the east quarter-section corner of unsurveyed section 29, said township and range;

thence northerly along the east section line of said unsurveyed section 29 to the northeast corner of said unsurveyed section 29;

thence westerly along the north lines of said unsurveyed section 29 and unsurveyed

section 30, said township and range, to the north quarter-section corner of said unsurveyed section 30;

thence northerly along the north-south quarter-section lines of unsurveyed sections 19 and 18 and sections 7 and 6 of said township 7 north, range 102 west, to the south quarter-section corner of section 31, township 8 north, range 102 west;

thence easterly along the south lines of said section 31 and section 32, said township and range, to the south quarter-section corner of said section 32;

thence northerly on the north-south quarter-section line of said section 32 to the southwest corner of the northeast quarter of said section 32;

thence easterly on the east-west quarter-section lines of said section 32 and section 33, said township and range, to the east quarter-section corner of said section 33;

thence northerly on the east line of said section 33 and sections 28, 21, and 16, said township and range; to the east quarter-section corner of said section 16;

thence westerly on the east-west quarter-section line of said section 16 to the east quarter-section corner of section 17, said township and range;

thence northerly on the east section lines of said section 17 and section 8 and unsurveyed elongated section 5, said township 8 north, range 102 west, to a point in the south line of section 33, township 9 north, range 102 west;

thence easterly along the south line of said section 33 to the south quarter-section corner of said section 33;

thence northerly along the north-south quarter-section lines of said section 33 and sections 28, 21, and 16, said township and range, to the north quarter-section corner of said section 16;

thence westerly along the north line of said section 16 and sections 17 and 18, said township and range, to the north quarter-section corner of said section 18;

thence southerly along the north-south quarter-section lines of said section 18 and section 19, said township and range, to the north quarter-section corner of section 30, said township and range;

thence westerly along the north line of said section 30 to the northwest corner of said section 30;

thence southerly along the westerly line of said section 30, said township 9 north, range 102 west, to the northeast corner of section 36, township 9 north, range 103 west;

thence westerly along the north line of said section 36 to the northwest corner of said section 36, said township and range;

thence southerly along the west line of said section 36, said township 9 north, range 103 west, to a point in the north line of elongated section 2, township 8 north, range 103 west;

thence westerly along the north line of said elongated section 2 to the northwest corner of lot 6, being a mid-point of the north line of said elongated section 2;

thence southerly along the north-south line dividing said elongated section 2 to the north quarter-section corner of section 11, said township and range;

thence southerly along the north-south quarter-section line of said section 11 to the south quarter-section corner of said section 11;

thence westerly along the south line of said section 11 and the north line of section 15, said township and range, to the northwest corner of said section 15;

thence southerly along the west lines of said section 15 and sections 22 and 27, said township and range, to the northeast corner of section 33, said township and range;

thence westerly along the north line of said section 33 and section 32, said township and range, to the northwest corner of said section 32;

thence southerly along the west lines of said section 32, said township 8 north, range 103 west, and section 5, township 7 north, range 103 west, to the northeast corner of section 7, said township and range;

thence westerly along the north lines of said section 7, said township 7 north, range 103 west, and section 12 and fractional section 11, fractional township 7 north, range 104 west, sixth principal meridian, Colorado, to a point on the Utah-Colorado State boundary line, being a point on the east line of township 3 south, range 25 east, Salt Lake meridian, Utah;

thence northerly along the Colorado State boundary line, being the said east line of township 3 south, range 25 east, and the east line of township 2 south, range 25 east, Salt Lake meridian, to the northeast corner of section 36 of the said township 2 south, range 25 east, Salt Lake meridian, Utah, the point of beginning.

The tract as described contains approximately 214,500 acres subject to adjustment to lines of public land surveys.

Mr. ASPINALL (interrupting the reading). Mr. Chairman, I ask unanimous consent that section 1 of the bill be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Page 2, line 3, strike out from line 3 down to and including line 17 on page 14 and insert in lieu thereof the following:

"Beginning at a point on the Utah-Colorado State boundary line at the northeast corner of section 12, township 3 south, range 25 east, Salt Lake meridian, Utah—

"thence westerly along the north lines of said section 12, and section 11, said township and range, to the north quarter-section corner of said section 11;

"thence southerly along the north-south quarter-section lines of said section 11, and section 14, township 3 south, range 25 east, to the north quarter-section corner of section 23, said township and range;

"thence westerly along the north lines of said section 23 and sections 22, 21, and 20, said township and range, to the northwest corner of said section 20;

"thence southerly along the west line of said section 20 to the northeast corner of section 30, said township and range;

"thence westerly along the north lines of said section 30, said township 3 south, range 25 east, and section 25, township 3 south, range 24 east, to the north quarter-section corner of said section 25;

"thence southerly along the north-south quarter-section lines of said section 25 and section 36 of said township and range to the northeast corner of the southwest quarter of said section 36;

"thence westerly along the east-west quarter-section lines of said section 36 and section 35 of said township and range to the west quarter-section corner of said section 35;

"thence southerly along the west line of said section 35, said township 3 south, range 24 east, to the southwest corner of said section 35, at a point on the north line of section 3, township 4 south, range 24 east;

"thence westerly along the north line of said section 3 to the northwest corner of said section 3;

"thence southerly along the west line of said section 3 to the southwest corner of said section 3;

"thence westerly along the south lines of sections 4, 5, and 6, said township 4 south, range 24 east, and unsurveyed sections 1, 2, 3, and 4, township 4 south, range 23 east, to the north quarter-section corner of unsurveyed section 9, said township and range;

"thence southerly along the north-south quarter-section lines of said unsurveyed section 9 and unsurveyed sections 16 and 21 and sections 28 and 33, said township and range, to the southwest corner of the northeast quarter of said section 33;

"thence easterly along the east-west quarter-section line of said section 33, said township 4 south, range 23 east, to the mean high water mark on the north or right bank of the Green River;

"thence upstream along the mean high water mark on the north or right bank of the Green River within said township and range and township 5 south, range 23 east, township 5 south, range 24 east, and township 4 south, range 24 east, to a point at its intersection with the south line of section 30, said township 4 south, range 24 east;

"thence easterly along the south lines of said section 30 and sections 29, 28, and 27, said township and range, to the north quarter-section corner of section 34 of said township and range;

"thence southerly along the north-south quarter-section lines of said section 34, said township 4 south, range 24 east, and section 3, township 5 south, range 24 east, to the southwest corner of the northeast quarter of said section 3;

"thence easterly along the east-west quarter-section lines of said section 3 and sections 2 and 1 of said township and range to the east quarter-section corner of said section 1;

"thence northerly along the east lines of said section 1, said township 5 south, range 24 east, and sections 36 and 25, township 4 south, range 24 east, to the southwest corner of section 19, township 4 south, range 25 east;

"thence easterly along the south line of said section 19 to the southeast corner of the said section 19;

"thence northerly along the east lines of said section 19 and section 18 of the northeast corner of said section 18 of said township and range;

"thence easterly along the south lines of sections 8 and 9 to the northwest corner of section 15 of said township and range;

"thence southerly along the west line of said section 15 to the west quarter-section corner of said section 15;

"thence easterly along the east-west quarter-section line of said section 15 to the center of said section 15;

"thence southerly along the north-south quarter-section line of said section 15 to the south quarter-section corner of said section 15;

"thence easterly along the south line of said section 15 to the northwest corner of section 23, said township and range;

"thence southerly along the west line of said section 23 to the southwest corner of the northwest quarter of the southwest quarter of the said section 23;

"thence easterly along the south one-sixteenth latitudinal section lines of said section 23 and fractional section 24, said township 4 south, range 25 east, Salt Lake meridian, Utah, to a point on the Utah-Colorado State boundary line;

"thence southerly along the Utah-Colorado State boundary line, being the west line of fractional section 23, fractional township 6 north, range 104 west, sixth principal meridian, Colorado, to the southwest corner of lot 12, said fractional section 23;

"thence easterly along the south one-sixteenth latitudinal section lines of said fractional section 23 and section 24, said fractional township and range, to the northwest corner of the southwest quarter of the southeast quarter of said section 24;

"thence southerly along the north-south quarter-section line of said section 24 to

the south quarter-section corner of said section 24;

"thence easterly along the south lines of said section 24, said fractional township 6 north, range 104 west, and section 19, township 6 north, range 103 west, to the northwest corner of section 29, said township and range;

"thence southerly along the west line of said section 29 to the southwest corner of the northwest quarter of the northwest quarter of said section 29;

"thence easterly along the north one-sixteenth latitudinal section lines of said section 29 and section 28 of said township and range to the southwest corner of the northwest quarter of the northeast quarter of said section 28;

"thence southerly along the north-south quarter-section line of said section 28 to the southwest corner of the northwest quarter of the southeast quarter of the said section 28;

"thence easterly along the south one-sixteenth latitudinal section lines of said section 28 and section 27, said township and range, to the northwest corner of the southwest quarter of the southwest quarter of section 26, said township and range;

"thence southerly along the west lines of said section 26 and section 35, said township and range, to the west quarter-section corner of said section 35;

"thence easterly along the east-west quarter-section lines of said section 35 and section 36, said township and range, and sections 31, 32, 33, 34, 35, and 36, township 6 north, range 102 west, sections 31, 32, 33, 34, 35, and 36, township 6 north, range 101 west, and sections 31, 32, 33, 34, 35, and 36, township 6 north, range 100 west, sections 31, and 32, township 6 north, range 99 west, to the southeast corner of the northwest quarter of said section 32;

"thence northerly along the north-south quarter-section lines of said section 32 and section 29, said township and range, to the southwest corner of the northeast quarter of said section 29;

"thence easterly along the east-west quarter-section lines of said section 29 and sections 28 and 27, said township and range, to the southeast corner of the northwest quarter of said section 27;

"thence northerly along the north-south quarter-section lines of said section 27 and section 22, said township and range, to the northeast corner of the southwest quarter of said section 22;

"thence westerly along the east-west quarter-section line of said section 22 to the east quarter-section corner of section 21, said township and range;

"thence northerly along the east line of said section 21 to the northeast corner of said section 21;

"thence westerly along the north line of said section 21 to the southeast corner of unsurveyed section 17, said township and range;

"thence northerly along the east line of said unsurveyed section 17 to the east quarter-section corner of said unsurveyed section 17;

"thence westerly along the east-west quarter-section line of said unsurveyed section 17 to the southeast corner of the northwest quarter of said unsurveyed section 17;

"thence northerly along the north-south quarter-section lines of said unsurveyed section 17 and unsurveyed section 8, said township and range, to the north quarter-section corner of said unsurveyed section 8;

"thence westerly along the north lines of said unsurveyed section 8 and unsurveyed section 7, said township 6 north, range 99 west, sections 12, 11, 10, 9, and 8, township 6 north, range 100 west, to the southeast corner of section 6, said township and range:

"thence northerly along the east line of said section 6 to the east quarter-section corner of said section 6;

"thence westerly along the east-west quarter-section lines of said section 6, said township 6 north, range 100 west, and unsurveyed sections 1 and 2, township 6 north, range 101 west, to the east quarter-section corner of unsurveyed section 3, said township and range;

"thence northerly along the east section lines of said unsurveyed section 3, said township 6 north, range 101 west, and section 34, township 7 north, range 101 west, to the east quarter-section corner of said section 34;

"thence westerly along the east-west quarter-section line of said section 34 to the east quarter-section corner of unsurveyed section 33, said township and range;

"thence northerly along the east section lines of said unsurveyed section 33 and unsurveyed section 28, said township and range, to the east quarter-section corner of said unsurveyed section 28;

"thence westerly along the east-west quarter-section lines of said unsurveyed section 28 and unsurveyed sections 29 and 30, said township 7 north, range 101 west, and unsurveyed sections 25, 26, 27, and 28, township 7 north, range 102 west, to the east quarter-section corner of unsurveyed section 29, said township and range;

"thence northerly along the east section line of said unsurveyed section 29 to the northeast corner of said unsurveyed section 29;

"thence westerly along the north lines of said unsurveyed section 29 and unsurveyed section 30, said township and range, to the north quarter-section corner of said unsurveyed section 30;

"thence northerly along the north-south quarter-section lines of unsurveyed sections 19 and 18 and sections 7 and 6 of said township 7 north, range 102 west, to the south quarter-section corner of section 31, township 8 north, range 102 west;

"thence easterly along the south lines of said section 31 and section 32, said township and range, to the south quarter-section corner of said section 32;

"thence northerly on the north-south quarter-section line of said section 32 to the southwest corner of the northeast quarter of said section 32;

"thence easterly on the east-west quarter-section lines of said section 32 and section 33, said township and range, to the east quarter-section corner of said section 33;

"thence northerly on the east lines of said section 33 and sections 28, 21, and 16, said township and range, to the east quarter-section corner of said section 16;

"thence westerly on the east-west quarter-section line of said section 16 to the east quarter-section corner of section 17, said township and range;

"thence northerly on the east section lines of said section 17 and section 8 and unsurveyed elongated section 5, said township 8 north, range 102 west, to a point in the south line of section 33, township 9 north, range 102 west;

"thence easterly along the south line of said section 33 to the south quarter-section corner of said section 33;

"thence northerly along the north-south quarter-section lines of said section 33 and sections 28, 21, and 16, said township and range, to the north quarter-section corner of said section 16;

"thence westerly along the north lines of said section 16 and sections 17 and 18, said township and range, to the north quarter-section corner of said section 18;

"thence southerly along the north-south quarter-section lines of said section 18 and section 19, said township and range, to the north quarter-section corner of section 30, said township and range;

"thence westerly along the north line of said section 30 to the northwest corner of said section 30;

"thence southerly along the westerly line of said section 30, said township 9 north, range 102 west, to the northeast corner of section 36, township 9 north, range 103 west;

"thence westerly along the north line of said section 36 to the northwest corner of said section 36, said township and range;

"thence southerly along the west line of said section 36, said township 9 north, range 103 west, to a point in the north line of elongated section 2, township 8 north, range 103 west;

"thence westerly along the north line of said elongated section 2 to the northwest corner of lot 6, being a midpoint of the north line of said elongated section 2;

"thence southerly along the north-south line dividing said elongated section 2 to the north quarter-section corner of section 11, said township and range;

"thence southerly along the north-south quarter-section line of said section 11 to the south quarter-section corner of said section 11;

"thence westerly along the south line of said section 11 and the north line of section 15, said township and range, to the northwest corner of said section 15;

"thence southerly along the west lines of said section 15 and sections 22 and 27, said township and range, to the northeast corner of section 33, said township and range;

"thence westerly along the north lines of said section 33 and section 32, said township and range, to the northwest corner of said section 32;

"thence southerly along the west lines of said section 32, said township 8 north, range 103 west, and section 5, township 7 north, range 103 west, to the northeast corner of section 7, said township and range;

"thence westerly along the north lines of said section 7, said township 7 north, range 103 west, and section 12 and fractional section 11, fractional township 7 north, range 104 west, sixth principal meridian, Colorado, to a point on the Utah-Colorado State boundary line, being the northeast corner of section 12, township 3 south, range 25 east, Salt Lake meridian, Utah, the point of beginning.

"The tract as described contains approximately 208,760 acres, subject to adjustment to lines of public land surveys."

Mr. ASPINALL (interrupting the reading of the amendment). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD at this point and open for amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The Clerk read as follows:

SEC. 2. (a) In order to provide suitable access to Dinosaur National Monument and facilities and services required in the operation and administration of the monument, the Secretary of the Interior is authorized to select the location of an entrance road or roads to the monument and to points of interest therein, from U.S. Route 40, including an entrance and related administrative headquarters site of not more than four hundred acres, and he may provide, upon lands donated outside of the monument, connections between Dinosaur National Monument park roads. To carry out the purposes of this Act the Secretary of the Interior may acquire non-Federal lands or

interests in lands by donation, purchase, or exchange: *Provided*, Lands and interests acquired for said entrance roads and connections shall consist of the fee title to a right-of-way of not more than an average of twenty-five acres per mile and of scenic easements on lands adjoining the right-of-way, said easements not to exceed an average of one hundred acres per mile. Said roads and administrative site shall constitute a part of Dinosaur National Monument and be administered pursuant to such special regulations as the Secretary of the Interior shall promulgate in furtherance of the purposes of this section.

(b) The Secretary of the Interior is hereby authorized to construct, reconstruct, improve, and maintain upon the land so acquired or otherwise in Government ownership an entrance road or roads and connections of parkway standards, including necessary bridges and other structures and utilities as necessary, and funds appropriated for the National Park Service shall be available for these purposes.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 27, line 7, after "acres," insert "and he may provide, upon lands donated outside of the monument, connections between Dinosaur National Monument park roads."

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment, page 27, line 13, after "roads" insert "and connections".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 28, line 1, after "roads" insert "and connections".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 28, line 2, after "bridges" insert "and other structures and utilities as necessary".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 3. Where any Federal lands included within the boundaries of Dinosaur National Monument as revised pursuant to this Act were legally occupied or utilized on the date of approval of this Act for grazing purposes pursuant to a lease, permit, or license issued or authorized by any department, establishment, or agency of the United States the person so occupying or utilizing such lands, and the heirs, successors, or assigns of such person, shall upon termination of such lease, permit, or license be entitled to have the privilege so possessed or enjoyed by him renewed from time to time, subject to such terms and conditions as the Secretary of the Interior shall prescribe, for a period of twenty-five years from the date of approval of this Act, and thereafter during the lifetime of such person and the lifetime of his heirs, successors, or assigns, but only if they were members of his immediate family on such date, as determined by the Secretary of the Interior: *Provided*, That grazing privileges appurtenant to privately owned lands located within Dinosaur National Monument shall not be withdrawn until title to the lands to which such privileges are appurtenant shall have vested in the United States, except for failure to comply with the regulations applicable thereto after reasonable notice of default: *Provided further*, That in the acquisition by purchase or exchange of any privately owned land within Dinosaur National Monument, the Secretary of the Interior is authorized to make equitable and reasonable allowances, as determined by him, for the value of any grazing privileges appurtenant to such privately owned land.

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 29, line 8, strike out the period, and insert a colon and the following: "*And provided further*, That in the event grazing privileges within the Dinosaur National Monument appurtenant to lands outside the monument are retired, then the Secretary of the Interior is authorized to make equitable and reasonable allowances, as determined by him, for the value of such grazing privileges."

Mr. SAYLOR. Mr. Chairman, I rise in opposition to the committee amendment.

Mr. Chairman, this is the proviso which states that if you own land outside the monument, and have a license to graze cattle within the monument, the Secretary is authorized to make an equitable or reasonable allowance as determined by him for the value of the grazing privileges. This to me is a direct attempt by the stockmen to make sure that the principles of the D'Ewart bill are inserted for the first time in legislation. As I called to the attention of the members of the committee, this is in direct contravention of the Taylor Grazing Act, which specifically states that the Secretary of Agriculture is not allowed to give any value to these grazing privileges. I sincerely hope that this committee amendment is defeated.

Mr. WIER. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Minnesota.

Mr. WIER. Is the gentleman referring to the defeat of the whole amendment or just this part?

Mr. SAYLOR. This is just an amendment which is added by the committee, on page 29, line 8. It concerns merely lines 8 through 13 on page 29. It does not apply to all of section 3.

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield to the gentlewoman from Illinois.

Mrs. CHURCH. May I ask the gentleman if this issue has not been up before the Congress?

Mr. SAYLOR. This isue was up before the Congress several years ago under the bill which has been referred to as the D'Ewart bill. At that time the Congress stated that this grazing privilege was not to become a property right, and it was overwhelmingly defeated. I sincerely hope that this amendment is overwhelmingly defeated by the Committee.

Mr. ASPINALL. Mr. Chairman, I rise in support of the amendment. It comes to us from the committee. I take issue with my friend from Pennsylvania. He states this is an outgrowth of the Congressman D'Ewart legislation a few years ago. It is true that if this were a matter of general policy that would apply to all the public lands of the West, I would have to admit that the gentleman's argument would be sound. But in the committee report there is a statement that this is not to be considered a statement of principle; in fact, it is not to be considered as establishing a precedent. All that this provision would do, and I might add also, all that the preceding proviso would accomplish would be to permit the Secretary, if he saw fit, to make payment for any values that he found present in the grain at the time of the taking. Those values might be the establishment of water resource development facilities, they might be some fencing, some corrals, or reseeding. Whatever the values were, this would permit the Secretary to acknowledge them. If he saw fit to acknowledge any value in the grazing permits he could do so. It is a permissive provision in the legislation as it is now before us.

Mr. WIER. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Minnesota.

Mr. WIER. Let us assume that the Saylor amendment to strike out these few lines in this particular amendment prevails, what damage is done to the bill?

Mr. ASPINALL. No damage is done to the bill particularly. It might deny to some of the livestock people—they are not all cattle people, there are some sheep people involved—settlement for some of the improvements they have made and values which they feel they possess.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Iowa.

Mr. GROSS. But leaving these few lines in the bill, you have a nibbling process, do you not?

Mr. ASPINALL. I do not like to accept my colleague's definitive term. Nevertheless, I can see that in his reasoning that it might amount to that.

Mr. DIXON. There is a great possibility and likelihood that these people who have grazing privileges could be given other privileges in nearby areas without any cash payment so that they would not be ruined.

Mr. ASPINALL. I think the gentleman is correct. Perhaps, that will be the result, anyhow. But here we are establishing what we thought was some language to set forth certain equities to be found in the grazing privileges.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield.

Mr. KYL. Mr. Chairman, in fairness it should be pointed out that there are probably no more than a dozen instances in the United States similar to this. Yet, I have some reservation, which has been indicated by others as well, about the matter of establishing a precedent. The legislative history which is set forth in the committee report indicates that this is not to be a precedent. Yet, in the hearings we have these words by a member of the committee, which I think

might be considered as in some respects the legislative history of this proposal. May I quote this language:

> In other words, they have a value which they feel has accrued to them over the years and it is something that rightfully belongs to them. I personally do not believe this committee should take the position they would close out something which these people feel belongs to them and make no provision that they be compensated for it.

Mr. HOFFMAN of Michigan. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, as a special pleader, the gentleman from Colorado has no equal in this House. Note what he says—he lays down the general doctrine with which he agrees but which he does not wish applied in the present instance—he says this bill will not establish a precedent because of that statement in the hearings which he quoted. The doctrine is all right he agrees. He does not want this amendment to establish a precedent. What he is doing is creating an exception for his people; do you not see? That is just exactly what he is doing. The principle involved is correct, but do not adhere to it in the bill. There is no disposition and there is no language in the bill that would deprive anyone who owns land either within or without, the park if it is taken by the Government, of the value of the improvements that have been made on it. But what it amounts to, as was stated earlier, is that it just simply is creating a temporary privilege or turning a privilege into a permanent property right for which someone in the Government is given authority to pay. How much? There is no limit. We have heard in the last few days, and we have read in the RECORD how in the other body the gentleman who is one of the representatives of Illinois has just been giving us fits about the way the military people have been spending and wasting money. Here is an authorization which will permit another Secretary to go ahead and use his own judgment. Spend high, wide, and handsome. How long will it be before that charge of waste comes up again? If there is anything of value to the individual, it is his good name and good reputation. The same is true with the Congress. Yet, we read day after day first in one paper and then in another, and for weeks we have heard over the radio about all these charges against Members of Congress and about the misuse of tax money. It seems to me we should close every door and every crack where there is any possibility of anyone making a deal with someone to pay them more than they are entitled to receive. I have nothing against the stockmen. They are all right so far as I know. They as a group are as honest as anybody else. But, they have tried this thing before and here is the nose in the door, the beginning of something that will never end. It is about time the Congress began to protect its own good name and to see to it that there is no opportunity afforded not only for waste and inefficiency but opportunity to do something that is downright, as a Member of the other body in just the last few days has charged, absolutely dishonest.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was rejected.

Mr. SAYLOR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. SAYLOR: On page 29, line 2, after the word "default" strike out the colon, insert a period and strike the balance of the section.

Mr. SAYLOR. Mr. Chairman, this amendment merely strikes from the bill the same provision with regard to private lands that are within the boundaries of the monument, stating that if those people have a grazing privilege it cannot become a right and be compensated for by the Secretary of the Interior. I would like to call to the attention of the members of this committee the statement of Mr. Colton, whose testimony has been referred to. Mr. Colton represented the stockmen and I asked him whether or not this grazing license was a right or a privilege. I stated, in my opinion, that this was a privilege—these permits which they received from the Secretary of the Interior or the Secretary of Agriculture were privileges.

I asked him whether or not that was correct, and this was his answer:

> Congressman, that is today. But it is a long story, these rights or privileges. I think they are rights.

In other words, unless the second amendment is adopted the stockmen believe that they have, as a result of the grazing license or permit, a right which they actually sell to one another in the area. I hope this amendment will be adopted.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield.

Mr. SPRINGER. Just to clarify this, I understand this is the committee amendment applied to those who are outside of the monument, allowing those who are outside the monument to graze inside.

Mr. SAYLOR. That is correct.

Mr. SPRINGER. Your amendment will apply to those who are inside the monument and allow them to graze inside the monument.

Mr. SAYLOR. That is correct.

Mr. SPRINGER. In other words, the principle is the same in your opinion in both cases.

Mr. SAYLOR. In both cases, that is correct.

Mr. ASPINALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think the logic made by the gentleman from Illinois is correct as far as that is concerned.

Mr. ASPINALL. Mr. Chairman, my opposition to the amendment offered by the gentleman from Pennsylvania [Mr. SAYLOR], primarily is that the amendment, by striking out certain language, will remove from the bill a perfectly proper and workable provision which merely declares that the Secretary of the Interior must carry out well known constitutional requirements in the acquisition of privately owned lands.

I refer to that portion of article V of the Constitution which provides that private property shall not be taken for public use without just compensation.

The language that would be stricken by the pending amendment reads as follows:

> *Provided*, That in the acquisition by purchase or exchange of any privately owned land within Dinosaur National Monument, the Secretary of the Interior is authorized to make equitable and reasonable allowances, as determined by him, for the value of any grazing privileges appurtenant to such privately owned land.

The committee's report—Report No. 1651—describes the meaning of this language as follows:

> The second proviso authorizes the Secretary of the Interior, in fixing the price to be paid on acquisition by the Government of privately owned lands newly included within the boundaries, to include an allowance for added value arising from Federal land grazing privileges appurtenant thereto. This latter provision, the committee has been advised, is in accord with the standard appraisal practice in public land grazing areas which recognizes that buyers and sellers, in bargaining for the sale of base ranch properties, take due account of the added productivity and value arising from relationship to appurtenant Federal range.

In opposition to this language, in his separate views in the committee's report, the gentleman from Pennsylvania stated:

> The last proviso of section 3 authorizes the Secretary of the Interior in the case of purchase or exchange of privately owned lands within the monument, to make equitable and reasonable allowances for the value of any grazing privileges appurtenant to such privately owned land. This discretion vested in the Secretary, in my opinion, goes too far.

I must differ with my colleague from Pennsylvania on this point. The practice set forth in the language merely conforms to the standard real estate appraisal practice in public land grazing areas. This practice is accepted by the Lands Division of the Department of Justice. It is recognized in decisions of the Federal courts, and I cite as directly in point the case of *United States* v. *Jaramillo* (C.C.A. 10, 1951, 190 F. 2d 300). This case dealt with the valuation of certain condemned privately owned base ranch lands in New Mexico to which were appurtenant certain national forest grazing lands administered by the Forest Service. The court held in part as follows:

> In the judicial determination of fair value as just compensation for the land taken, the highest and most profitable use for which it is reasonably adaptable may be considered, "not necessarily as the measure of value, but to the full extent that the prospect of demand for such use affects the market value while the property is privately held." *Olson* v. *United States* (292 U.S. 246, 255, 54 S. Ct. 704, 109, 78 L. Ed. 1236). See also *Boom Co.* v. *Patterson* (8 Otto 403, 98 U.S. 403, 408, 25 L. Ed. 206); *Mitchell* v. *United States* (267 U.S. 341, 344, 45 S. Ct. 293, 69 L. Ed. 644); *McCandless* v. *United States* (298 U.S 342, 56 S. Ct. 764, 80 L. Ed. 1205); *United States ex rel. T.V.A.* v. *Powelson* (319 U.S. 266, 275, 63

S. Ct. 1047, 87 L. Ed. 1390); (2 Lewis Eminent Domain, 3d ed., sec. 707, p. 1233). All rights, easements and privileges appurtenant thereto should be considered in estimating its fair value or compensation to be paid, taking into account also the possibility of their being discontinued without resulting obligation (2 Lewis Eminent Domain, 3d ed., sec. 721, p. 1262). In determining the adaptability of the lands as a ranch, it was therefore proper to take into consideration the availability and accessibility of the permit land as an appurtenant element of value for ranching purposes, provided that consideration is also given to the possibility that the permits could be withdrawn or canceled by the Government at any time without constitutional obligation to pay compensation therefor.

This case has not been overruled or superseded, and is reported by the Lands Division, Department of Justice, as being the rule in effect today.

I trust, even though the pending amendment should be adopted, and the language is not later restored, that the Secretary nevertheless will have authority to observe constitutional principles in the valuation of properties, since in the condemnation of the land, should it be necessary, those principles certainly will be applied by the courts.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. SAYLOR].

The amendment was agreed to.

The CHAIRMAN. Under the rule the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore, having resumed the chair, Mr. BOLLING, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6957) to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes, pursuant to House Resolution 552, he reported the bill back to the House with sundry amendments adopted in the Committee of the Whole.

The SPEAKER pro tempore. Under the rule the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

MUTUAL SECURITY APPROPRIATION BILL, 1961

Mr. YATES. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. YATES. Mr. Speaker, I had intended to file additional views to the report of the Appropriations Committee on the bill making appropriations for mutual security which was considered by the committee yesterday, but I learned too late that this would have required special permission from the House. I am therefore using this means of making my viewpoint known.

I find myself in disagreement with the committee particularly in respect to sections 107 and 109. Section 107 prohibits the use of funds to carry out the provisions of section 404 of the Mutual Security Act of 1954 which makes funds available to carry out the agreement of the United States to contribute toward settlement of the Indus River Basin controversy between India and Pakistan.

Section 109 prohibits the use of funds for the construction of any building, structure, or other similar facility in connection with the Special Program for Tropical Africa.

The possibility of establishing peace between the heretofore irreconcilable nations of India and Pakistan through an agreement for sharing the waters of the Indus River has been hailed throughout the free world as a monumental achievement. The controversy has raged since 1947 when India was partitioned. The Indus Basin has been one of the principal food sources of the area and its use was understandably of concern to both nations. The prospective agreement reached marks the completion of long years of negotiation by the International Bank for Reconstruction and Finance and by our Foreign Service. The United States is being given justifiable credit for her role as a peacemaker in this dispute.

Section 107 of the bill disrupts the proposed settlement. In my opinion, this action was shortsighted for two reasons. First, it was harmful to our own national interest in shattering a constructive program for bringing a peaceful solution to a bitterly hostile relationship between two great Asiatic nations. Doubt will now be created throughout Asia of the sincerity of our proposals and our desire to promote peace through rational negotiation.

Second, it will terminate the first major cooperative effort between the great nations of the free world to initiate a program of joint contributions for helping solve the economic difficulties of underdeveloped nations. The objection has frequently been made that the United States has long carried too much of the burden of assisting new nations to help themselves. It has been rightly suggested that this responsibility should be borne as well as by other nations which have recovered from the devastation of the last war and are now enjoying a prosperous economy. The Indus Basin proposal is such a multilateral undertaking. While it is true that the United States would still carry a major portion of the financing arrangements, the fact remains significant contributions would also be made by other nations. The committee's action requires the postponement of the joint undertaking.

The Special Program for Tropical Africa is essentially an educational program for training the personnel to carry on affairs of government in the new nations. In my opinion this is the best kind of technical assistance that a nation can give if we want to cement closer relationships with a newly born nation.

Mr. Speaker, I think both sections 107 and 109 should be stricken and I shall offer proposed amendments to do so.

A BILL TO EXTEND AND AMEND THE SUGAR ACT OF 1948

Mr. HOEVEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. HOEVEN. Mr. Speaker, I have today introduced a bill which extends and amends the Sugar Act of 1948. I intend to offer the language of this bill as a substitute to H.R. 12311, the sugar bill as amended and reported by the Committee on Agriculture on June 6.

The committee bill contains two provisions. The first is a 1-year extension of the act, and the second is an authorization for the Secretary of Agriculture to reduce the quota of a country or area which is unable to fill its quota. The Secretary may reduce the quota by the amount of the deficit for 1 year only.

My substitute contains both of the provisions included in the committee bill, and it contains three additional and important items.

The first is the grant of authority to the President to act only when the 86th Congress is not in session. Under this provision, the President must first find action necessary either in the national interest or to insure an adequate supply of sugar. If Congress is not in session, he would send his recommendations to Congress. If Congress has adjourned, the President could reduce the quotas of foreign nations—except the Republic of the Philippines which is covered by treaty. The Secretary of Agriculture would be charged with the responsibility of obtaining such amounts of sugar elsewhere and insofar as practical would follow the pattern of quotas set forth in the act.

The second additional provision in my substitute will prevent a windfall to Cuba which will occur unless the act is changed. This year Puerto Rico and Hawaii have been unable to fill their quotas. It now appears that there will be a total deficit of 500,000 tons from these areas. Under present law about 156,000 tons of this deficit will be assigned to Cuba. This would be worth between $15 million and $16 million to that country. My substitute will prevent this windfall. I for one do not think Castro should be rewarded for his previous conduct.

The final additional provision in my substitute is to bring our new State of Hawaii into full statehood as far as the sugar act is concerned. It strikes out of the act all references to Hawaii as a "Territory."

PROTECT AMERICAN JOBS

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Indiana [Mr. BRAY] is recognized for 15 minutes.

Mr. BRAY. Mr. Speaker, I wish to bring to the attention of the House the fact that the Ways and Means Committee has taken no action on House Concurrent Resolution 610, which is merely a resolution to be passed by the House and Senate that the United States should grant no further tariff reductions in the forthcoming tariff negotiations. The gentleman from West Virginia [Mr. BAILEY] and several other Members of this body have introduced similar resolutions. Frankly, American labor and business are being severely injured by the importation of foreign-made goods—goods that are manufactured by labor that receives only a fraction of what American labor receives.

I fear that our zeal to assist manufacturing and production in foreign countries has caused us to forget that the principal duty of any country is to first look after the interests, welfare, and security of its own citizens. I have voted against every reciprocal trade bill since I have been in Congress, because in each instance I felt that the welfare of the American workingman and American industry was secondary. I spoke against the reciprocal trade bill on June 10, 1958, and at that time pointed out the growing problems of unemployment caused by unfair foreign competition. The developments in the last 2 years have shown that I was accurate in my estimate of future developments, as imports have cut deeper and deeper into our economy.

At that time I mentioned that the importation of rubber clothing and raincoats from abroad was going to destroy a thriving American business in Washington, Ind. Within the last month or so I have received over 300 communications from workmen in the United States Rubber Co. plant at Washington, Ind., protesting that if something was not done they were going to be out of work. I also received letters from the management of that firm. A few days ago I met here in Washington with representatives of workers from the rubber industry throughout the country to discuss these same problems. I recently had conferences with workers in the glass industry and also with workers in the shoe industry from Vincennes, Ind. Conditions in those industries are also becoming critical and unless we take action in the near future these industries will be damaged beyond our assistance. This year there will be 1 million boxes of sheet glass imported into the United States from the cheap labor areas of Europe. This is one-third of the U.S. production. The glass industry must get the tariff on glass increased, yet, I am informed that there will be attempts made to again cut the tariff on glass.

I learned from my meeting with the shoeworkers that there must be some quota imposed on the importation of shoes or this industry will be destroyed. The veneer, tile, battery, and all types of electronic equipment industries are facing a serious future unless our Government recognizes the problem before it is too late. The same applies to the ladies garment industry. The textile and watch industries are rapidly becoming nonexistent in this country. The importation of residual oil is greatly damaging the coal industry.

The bill which I have introduced is the very minimum of what we should do. In fact, we should go far beyond what this bill suggests. Such bills to go much further have been introduced—including my bill H.R. 5776 introduced in March 1959—but no committee action has been taken on them. I do not claim that my resolution will cure this problem. It should keep conditions from getting much worse in the immediate future. We must in the next session take constructive legislation to give American labor some real protection.

In my opinion Congress made a great mistake when it gave up all control over tariffs. I am proud that in each instance I fought to restore this control to the Congress to such a degree that we could save such industries from irreparable harm. No one political party is responsible for this situation, for leadership of both parties has been favoring the granting to foreign countries unusual concessions to encourage the importation of their goods into this country. This philosophy violates the ancient principles of trade. The normal course of international trade is for a country to import those items which are scarce and export those which it produces in surplus. The products which I have mentioned are those which we certainly have in surplus. No one would object to our importing coffee, silk, sugar, tropical wood and the like into America; however, I do not believe that anyone expects Japan to import silk, Italy to import spaghetti, or Brazil to import coffee, but we in the United States have been following a course equally as absurd.

I am well aware that we who are fighting this battle to protect American industry seem to be in the minority, but I trust that we will soon be in the majority.

FURTHER COMMENTS ON ALLEGATIONS IN MR. VANIK'S SPEECH OF JUNE 2, 1960

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from California [Mr. GUBSER] is recognized for 60 minutes.

Mr. GUBSER. Mr. Speaker, first let me briefly recap the history of the controversy to which I shall address myself. On June 2 the gentleman from Ohio [Mr. VANIK] addressed the House, claiming that a procurement contract for M–113 armored personnel carriers was "rigged."

On Friday, June 10, Assistant Secretary Douglas as well as Assistant Secretary Perkins McGuire repudiated these charges in a factual memorandum.

On yesterday I utilized some of the material compiled by Assistant Secretaries Douglas and McGuire along with certain factual information known to me which further repudiated the charge made by the gentleman from Ohio.

May I summarize briefly the points I made yesterday?

First, no one knows or should know the outcome of the bid competition for the contract under discussion. Therefore, any charge of rigging is pure speculation until the contract is actually awarded.

Second, the competition has been conducted in strict accordance with Army Service Procurement regulations, Budget Bureau 60–2, section 4532–A, title X of the United States Code.

Any impression given in any bidders' conference that these previously established rules would be ignored is unjustified. The simple fact remains that no new ground rules were made for this competition. They were in existence prior to the bidders' conference and have been rigidly followed. To say this contract was rigged is about as ridiculous as it would be for the Washington Senators to show up at Griffith Stadium expecting the right to field 12 men instead of 9 because somebody on the street corner had said it would be all right.

Third, the gentleman from Ohio [Mr. VANIK], has repeatedly stated that the Ford Motor Co., employed at a fee of $338,000 to survey Government-owned facilities, determined that the M–113 production should take place at the Cleveland Arsenal. The gentleman from Ohio [Mr. VANIK] has quoted the Army as approving this finding. As I have repeatedly stated to the gentleman from Ohio [Mr. VANIK], he has misinterpreted the facts.

First, I quote Secretary Douglas in the letter which the gentleman from Ohio [Mr. VANIK] inserted in the RECORD yesterday:

> The Ford Motor Co. was employed to serve selected Government-owned plants that had been predetermined by the Department of the Army as part of a concept for the establishment of a production base for combat vehicles. It was not intended and did not take into consideration the capability of private industry to produce equipment.

In another paragraph of the same letter Mr. Douglas states:

> The Department of the Army is familiar with the contents of this letter, and agrees with the statements made.

Now, this is repudiation enough of Mr. VANIK'S contention, but I have more authority. Assistant Secretary of the Army for Logistics, Courtney Johnson, said this morning:

> I will say emphatically that we do know of both statements in Secretary Douglas' letter and agree with both of them.

Mr. Johnson informed me that this was his understanding, even at the time the contract was awarded Ford Motor Co., and he said further:

> I did not request them to go into private plants except insofar as necesary to determine what was needed for production in these Government-owned facilities.

Thus, Mr. Speaker, the gentleman from Ohio, Mr. VANIK'S charges of rigging in this contract are nothing more than sheer fantasy.

Personally, I would be ready and willing to end this controversy and let the facts speak for themselves, as they do so conclusively. However, it is regrettable that on yesterday the gentleman from Ohio [Mr. VANIK] had more to say. Confronted with factual repudiation of

his charge of rigging, he resorted to a technique which unfortunately is often seen on Capitol Hill. In order to becloud the issue and throw up a smokescreen to obscure the true facts, he has countered with reckless statements, erroneous figures, and even implied vilification of an individual's character. Some of these are so ridiculous that I shall not dignify them with an answer, but I shall reply with factual evidence to statements of specific facts which are clearly in error.

Yesterday, during my colloquy with the gentleman from Ohio [Mr. VANIK], he stated clearly that the original research and development contract with Food Machinery for development of the M–113 vehicle was for $1½ million, and he stated further that the U.S. Government was forced to bail out Food Machinery with an augmentation of $10,600,000, bringing the total cost of the research and development contract to $12,100,000.

Mr. Speaker, the gentleman from Ohio [Mr. VANIK] must get his figures from a foggy crystal ball, because they are not correct.

The original contract number was DA 04–200–ORD 536. The original bid was not for $1½ million but for a figure in excess of $2,331,000. After the successful bid, changes were ordered during the negotiation process, some of which added to the cost and some of which subtracted. The final contract amount was not $1½ million but $2,459,000. The actual amount expended under the contract was less than the contract price, namely, $2,331,000.

Under this contract several handmade prototype vehicles were produced and tested but, as is normal during the process of a research and development contract, the experts of the Army, as well as the Food Machinery engineers, fulfilled their true mandate under a research and development contract to develop the best possible vehicle. These combined brains—and may I include the Army for a just share of those brains—found that thickening the armor was desirable and also found that it was entirely possible that using a water-cooled engine instead of an air-cooled engine could reduce costs. It was also felt that using off-the-shelf commercial components might further reduce the costs. Accordingly, the Army very wisely decided that even though their first prototype vehicles were satisfactory, they could be made better. This is not unusual in any research and development activity. In fact, improvement of existing weapons is the general basis of research and development.

Convinced that further cost reductions were possible, the Army amended the original contract for an additional $2,465,000 and here is the result of that amendment. The armor was thickened. A water-cooled engine, available from inventories, was installed. The need for special engine manufacture, special parts and special tools, was eliminated. The standard Allison TX–200 truck transmission was used instead of the expensive special development originally contemplated. And what was the gain to the taxpayer of this amendment? A total saving of $5,681 per vehicle, a saving of 20 percent. This saving amounted to $5,112,900 on the first 900 vehicles and the same saving when projected through the 1,380 vehicles now out for bid will represent a total saving to the taxpayers of $12,962,900.

I would say that this research and development contract as amended paid handsome dividends to the taxpayer, and the Army as well as Food Machinery can well be proud of its decision.

Mr. Speaker, the total expenditure in research and development for the M–113 vehicle was $4,996,000. I ask you and I ask the gentleman from Ohio [Mr. VANIK], how in the world did he dream up the figure of $12.1 million? This, Mr. Speaker, is a classic example of the most slippery of slippery arithmetic. It is used as a side issue to becloud the fact that the bidding of which he speaks was not rigged. But as a side issue it is just as ridiculous as the first charge because his facts and his figures will not stand the light of day.

As another smokescreen to hide the ridiculous statements of yesterday, the gentleman from Ohio [Mr. VANIK] has stated that a champagne party was scheduled to celebrate the award to Food Machinery of this bid. Once again the charge is without basis in fact.

In the first place, there will not be any champagne or liquor. It was never intended that there should be. I have learned that the ceremony now in progress or almost concluded at this time to celebrate the initiation of production on the last contract awarded Food Machinery for 900 vehicles was suggested last October; and by whom? By the Army Chief of Information. The program was planned to secure beneficial public relations for the Army in pursuing its program of modernization. This was suggested in October, and the original bidders conference was not until December 17. It was originally scheduled to be held in March, but because the chairman of the board of Food Machinery was in India it could not be held, and the only available date was today, June 14. The ceremony today is to commemorate the delivery of the first production of the M–113 to field troops.

May I remind the gentleman from Ohio [Mr. VANIK] that such parties to inaugurate production facilities are common practice. I understand that a similar occasion was held at the Willys plant in Toledo, Ohio, and they have been held in many other places.

Mr. Speaker, some of the other charges made yesterday were just as ridiculous as the ones I have referred to. I shall not dignify them with a response. Insofar as I am concerned, I will refuse to engage in future debate on unfounded shotgun charges which have no bearing on the basic issue. This basic issue, I repeat, is whether the established, written procedures have been followed in the competition for construction of the M–113 vehicles. The facts clearly show that they have, and I will rest my case on fact instead of fancy.

Mr. VANIK. Mr. Speaker, will the gentleman yield?

Mr. GUBSER. I yield to the gentleman from Ohio.

Mr. VANIK. I am sure the gentleman did not expect me to be sitting here in the Chamber and not have a reply ready at this time, because otherwise we could not get to the very heart of the issues that are involved here. I think the gentleman has completely overlooked, perhaps conveniently so, the issues which are clearly on the record upon which I contend that through this so-called process of evaluation and setting up of ground rules the bidding can only occur in a way which can direct the contract ultimately to only one prospective bidder, the Food Machinery Corp.

Mr. GUBSER. I must interrupt the gentleman. He, in anticipation, has reserved a special order following mine, so I can presume to interrupt him when I have yielded to him. I think it would be very useful for the gentleman and I here and now to get at what the issue is. This whole controversy arose when the gentleman said this competition was "rigged."

Mr. VANIK. Exactly.

Mr. GUBSER. Now, I ask the gentleman this question: Is there any ground rule, to use the gentleman's term, by which this competition has been conducted which was not in writing before the invitation to bid was issued?

Mr. VANIK. That is correct. At the bidders conference in December 1959, the bidders were told they could build on the Government plant and there would be no penalty for using the Government plant and facilities, and thereafter——

Mr. GUBSER. I must ask the gentleman this question in order to finish this issue.

Mr. VANIK. If I may finish the statement, if the gentleman will permit.

Mr. GUBSER. I yield.

Mr. VANIK. Thereafter, in order to deliver this contract to only one possible bidder, these impossible obstacles were written into the specifications. The Army was told to put them in.

Mr. GUBSER. May I ask the gentleman, these impossible obstacles are the terms of Budget Bureau Bulletin No. 60–2; is that not correct?

Mr. VANIK. They are arbitrary obstructions which constitute an abuse of discretion.

Mr. GUBSER. They are the requirements of 60–2; is that correct?

Mr. VANIK. No; they are not.

Mr. GUBSER. Then what are they?

Mr. VANIK. The gentleman refers constantly to 60–2, which is the Budget Director's regulation. Now, the change in specifications in which these roadblocks or obstacles to fair and equal competitive bidding—these obstacles were written in, theoretically, all relating to 60–2, but they constitute a misapplication of 60–2 and are arbitrary. I might say it is an abuse of discretion on the part of those people in the Pentagon who ordered the Army to make specification changes. The Army has not really spoken to this point. Nowhere does the gentleman refer to a statement made by the Army. The Defense Department says the Army approves of this position, or that the Army is aware of this position. But the Army, the Secretary of the Army, Wilber Brucker, is the one who must

sign this contract and comply with the law. Nowhere do we find that anyone responsible for the Army has taken the position or concurred in or ratified the procedure which is now imposed upon the Army.

Mr. GUBSER. I am not going to yield to the gentleman for a speech, but I shall only quote, as I quoted in my earlier remarks, Mr. Courtney Johnson, Assistant Secretary of the Army for Logistics, who told me this morning that this statement in this letter from Secretary Douglas which you have inserted in the RECORD was his understanding even at the time the contract was awarded to the Ford Motor Co.

Mr. VANIK. You are talking about one facet of this, the Ford survey; but you do not deal with the change in evaluations, the change in specifications which was imposed upon the Army by higher authority in the Pentagon after the bidders' conference in December of 1959.

Mr. GUBSER. The gentleman is referring to 60–2 and its interpretation; is that correct?

Mr. VANIK. I am referring to the ground rules which provide this, and I will just enumerate, if the gentleman will please be patient.

First. The ground rules provide that if the Government plant were to be used, a rental charge would have to be added to the bid. The bidding would have to be increased by a rental figure based upon the acquisition cost of the plant, ignoring the factor of depreciation, and upon some recommendation by the local real estate board. That rental figure comes to 5½ cents per square foot for the total plant regardless of what part the producer or manufacturer who had used that plant would use.

Mr. GUBSER. The gentleman is in error on that point. The bid specifications do not call for payments for the entire plant but only for that part used.

Mr. VANIK. Will the gentleman quote his authority?

Mr. GUBSER. One of the bidders.

Mr. VANIK. I do not know who he is, but I do have other information on that score. The gentleman has, I might say, more access to this Pentagon information, because Mr. Johnson's conversation or writing to you is something exclusively in your possession, and I do not have any information of that type.

Mr. GUBSER. The gentleman has a telephone in his office exactly the same as I have, and all he needs to do is to pick it up and call, and I am sure he would get the same answers that I get.

Mr. VANIK. I might say to the gentleman from California that in my office I try not to do business by telephone. I like to make it a matter of record. I like to do it by an official communication so that I have something I can document and have something that I can include in the RECORD rather than something that I can allude to.

But, the second item in which the impossible barrier was set up for the use of the Cleveland plant provided that if the equipment and the tools and machinery in this plant were used, they would be evaluated on the basis of a 19-month period, a full calendar term rather than the productive period. Now when any corporation evaluates the cost of its productive equipment, they take into consideration the time that the machine is in production on that job, and they certainly cannot charge any other bidder fairly for a 19-month use of a piece of equipment which is only used in the plant, perhaps, a total of 18 hours on the whole production contract. This makes it impossible for the taxpayers of America to get any reasonable use or benefit from their investment in the public facilities.

The third consideration was a matter of special tools which the gentleman and I discussed yesterday, which were paid for by the taxpayers of America in the Food Machinery plant and which are withheld from any other producer who seeks to use a Government-owned facility. If the gentleman can condone this kind of waste in the interest of bringing something to his district, it seems to me I cannot reconcile it with the gentleman's past positions on this floor and in this Congress when he has always been advocating economy.

Mr. GUBSER. I can assure the gentleman that this is his last filibuster that I shall permit on my time. But I would like to say in response to the gentleman that 60–2 which is rather clear cut and specific was in existence as of September of last year, prior to the time that invitations were sent out. I would like to point out this bidding has been strictly in adherence to regulations or 60–2 and I would like to point out that the mistaken impression that the provisions of 60–2 would be ignored for this competition was apparently given out erroneously by someone who did not have the authority to do so.

This made the meeting, in February, of the bidders necessary in order to correct this impression and in order to inform them that the established rules and regulations were to be followed.

60–2 calls for a fair rental payment for the use of Government facilities. I believe the gentleman is in error when he says the entire plant would have to be paid for; I do not believe that is true, but that is something we will have to prove or disprove at a later date.

May I remind you that this regulation is imposed against all bidders, including Food Machinery & Chemical Corp., and that they have to pay an adequate rental for any Government facilities which they are now using on exactly the same terms and at exactly the rate as would the potential user of the Cleveland Arsenal.

Insofar as tools are concerned which you say are not made available and are presently Government-owned and in the plant of Food Machinery, and are not made available for use at the Cleveland Arsenal, I hope the gentleman does not think that the M–113 is the only defense equipment that is constructed by Food Machinery. There are five or six different versions of this vehicle which are being constructed there. There are missile launchers, there are other tanks, there are all sorts of defense items which are being manufactured there and in which these tools would have to be used. So if you were to equip this old worn-out bomber plant that the Government built for bombers in the first place with the tools which are currently producing elsewhere in the United States you would be robbing Peter to pay Paul.

I repeat, the same requirements were imposed upon any bidder as were imposed upon a potential user of the Cleveland Arsenal. These were the ground rules which were established in advance, and one cannot say that the contract was rigged.

If you want to argue the philosophy of 60–2 that is another subject, but the issue here is: Was there anything which had been previous practice, and which was included in the M–60 and M–80 programs? My answer to the gentleman and the evidence from authorities who support me is that there was not.

Mr. VANIK. Mr. Speaker, will the gentleman yield further?

Mr. GUBSER. I will be glad to yield, but the gentleman has a special order of 30 minutes to follow mine. I had not intended to us all my time. Would the gentleman like to take his special order now, or will this suffice for it?

Mr. VANIK. This will suffice. I do not want to hold the matter up. Let us wisely use whatever we have to get the issue threshed out.

In the colloquy the gentleman from California referred to the extra payment that was made to the Food Machinery Corp. which he said was in the sum of approximately $2,600,000. I have not had an opportunity to check on it. Obviously this is double the amount, more than double the amount of the original bid.

Personally, I am concerned about these extra charges that are fastened onto a contract on the basis of alleged changes. It seems to me that if changes are going to be made in a contract for research and development, and the creation of several prototypes of a weapon, that changes that would involve doubling the cost of the original contract, or exceeding it by 110 percent, certainly indicate that something was paid to help this corporation out on its original contract.

It is inconceivable to me how the changes which the gentleman discussed and the change which he said would save the taxpayers so many millions of dollars in the long production run, it is difficult for me to understand how these changes compare so drastically in cost in comparison to the entire development contract, more than 110 percent of the original contract.

Does the gentleman contend that this is ordinary, justifiable, proper practice by the Department of Defense or by the Army in its relationship to Food Machinery Corp.?

Mr. GUBSER. I say this, and I regret to say to the gentleman, but in all frankness I must say it: The gentleman has betrayed a complete ignorance of the concept of research and development.

Development is a thing which progresses; as you learn one thing the next step down the road may be entirely different based upon what you have learned.

Any industrial corporation of this country which develops machinery finds this to be true, and it is true in practically every defense contract.

I do not think the gentleman should imply that this first development contract as it was originally signed was not carried out. It was carried out, and it was successful; but jointly, the Army and the Food Machinery Corp. engineers saw on the basis of their experience something better down the road.

Now, Food Machinery could have gone ahead and produced a prototype which had been tested and found to be successful. What would have happened?

Here is the kick in the teeth the taxpayers would have gotten. They would have paid for each one of those vehicles the sum of—I cannot find the exact figure now, but as I recall it—$5,681 more per vehicle, or a 20-percent increase. Based upon this saving, because the Army and Food Machinery saw a new road ahead, based upon what they have learned, and that is development; it is learning, because of that when the next 1,380 vehicles are produced along with the 900 currently being produced, we will see a saving to the taxpayers of this country of $12,962,900.

I ask the gentleman, Do you think it would have been good business for the Army and Food Machinery jointly, when the first research and development contract was completed, to have shut off their minds and said: We have reached the ultimate in learning, we cannot progress further, and if we can save $12 million we do not want to because we do not want to admit there is anything better than we have now? That is what the gentleman is arguing.

Mr. VANIK. I think the gentleman reaches out into space on the $12 million saving. Did not the Army in entering into this contract pay 110 percent more than its original contract? Did it not fail to save $2 million that could have been saved if they had given the contract to the next lowest bidder who agreed to do the whole job for $3 million? The next lowest bidder had never in previous history assessed any additional charge upon the Army, for any modifications or changes, which are as slight and minor and as insignificant as those indicated by the gentleman in the research and development contract of the M–113 by Food Machinery.

Mr. GUBSER. This was not in any sense of the word a lack of fulfillment of the contract. If the gentleman goes down to a clothing store, he can buy a suit with one pair of pants. He can walk out and in a couple of weeks he thinks he should have gotten the other pair of pants and he says: "I want to amend my contract and get another pair of pants."

That is all we are doing here. We found out something we ought to have and something we need on the basis of our experience, and we said we want that and it is mighty lucky we got it because the net profit to the taxpayers is over $10 million.

Mr. VANIK. Referring to the pants, I want to point out that in the first contract with Food Machinery the Government got pants that were moth eaten. I think they were completely inadequate to perform the function for which they were intended.

Mr. GUBSER. There were a lot of fellows who hit the beaches in the South Pacific, and a lot of them who went to foreign shores in World War II who thought they were riding a pretty good vehicle, and there are a lot of them walking around today who maybe would not have been walking around if it had not been a good vehicle.

Mr. VANIK. You discussed the so-called production celebration. My belief and concept is that Food Machinery, located in the gentleman's district, had full satisfaction that this contract was coming its way. I want to read a telegram which I hold in my hand and which I want to submit to an appropriate congressional committee if I am given the opportunity, and it states as follows. This is a bidder:

Since there is an existing manufacturing source for this vehicle, the M–113, and since we have been advised a second source is not required—

This goes on to say——

Mr. GUBSER. May I have the name of that individual?

Mr. VANIK. No. I will submit this telegram to an appropriate committee. The gentleman can take my word for it. I will be happy to submit it to a congressional committee.

Mr. GUBSER. It has no validity unless he is willing to give the name of the signator.

Mr. VANIK. I agreed to submit it to an appropriate congressional committee.

Mr. GUBSER. Is the floor of the House a proper place or is a committee a more proper place?

Mr. VANIK. I would not want to expose any particular bidder to the harassment he might receive at the hands of the Department of Defense for crossing up what the Department of Defense has planned. The Department said that it had someone in mind for this contract, there is no use for others to bid.

If you can get a better example of rigging, I want to you to produce it.

Mr. GUBSER. The point the gentleman is making, I am sorry to say, is made more for the benefit of the newspapers than it is to cast light upon this discussion here today. I maintain you have no right to introduce something as evidence unless you are willing to qualify that evidence and give the name of the signator. I think the gentleman has done a disservice in saying that.

Mr. VANIK. I think the gentleman recognizes this is not the proper tribunal. This is not the place at all, and the gentleman is aware of that. The place where the evidence should be submitted and weighed, and where the matter can be thoroughly gone into and investigated is in an appropriate congressional committee which has the power to subpena and which has the power to call witnesses before it.

Mr. GUBSER. And which gets its authority from this body.

Mr. VANIK. The gentleman may be sure that I will be delighted to produce all of the evidence I have in my file, including some evidence which I have not discussed in this case up to this point; because I am trying to get the appropriate congressional committee alerted by this discussion to what I consider the rigging processes that are going on in the Pentagon, to award these contracts in an unfair way, under unfair rules, to bidders or producers who they have predetermined should get the job. I say to the gentleman that I am only seeking economy for my Government, I want to see that the taxpayers' dollar buys the maximum amount of defense and I want to be sure that the bidding procedures are fair so that every bidder and every community in America has an equal opportunity to participate in the matter of defense production.

Mr. GUBSER. May I say for the benefit of my colleagues here that though this discussion between the gentleman from Ohio [Mr. VANIK] and myself has become rather heated and a little vociferous at times, I want it clearly understood that there is absolutely no personal animosity on my part; and I think the gentleman from Ohio feels the same way. We each hold the other in completely high regard. But, as he says, we are both arguing for economy in Government. I intend to conclude my remarks by simply pointing to the record over the years of Food Machinery which has taken the predecessor of the M–113, the M–59, cut the price of it in half through sensible engineering techniques and which today is producing a vehicle, half as heavy, better in every respect, for less than half the money. I maintain that that is a real record. I maintain that if their price is low, after they pay for the use of Government tools and Government facilities, the same as anyone else, and if it appears that they can continue to give the fine record of performance that they have always given to this Nation and its Armed Forces, then they will be justified in receiving the contract.

As I said yesterday, if it happens to be in the gentleman's district, and Cadillac of General Motors or any other bidder happens to be low, and the taxpayer saves the most dollars through their bid, after all proper factors of evaluation are taken into consideration, then I say to Cadillac or to the successful bidder, "Congratulations, and best wishes." We are out to save money. Let the lowest bid get the business.

CONTRACT FOR THE M–113

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. VANIK] is recognized for 30 minutes.

Mr. VANIK. Mr. Speaker, continuing this colloquy with my distinguished colleague from California [Mr. GUBSER], I want to point out that it is not my intention to take all of the time. I merely want to discuss some of the high points in rebuttal to the argument he has made today.

First of all, the gentleman raised the question about Budget Bureau Regulation 60–2 which is cited by Secretary

Douglas and by Courtney Johnson and other people at the Pentagon as being the governing regulation in this matter. I want to point out for the RECORD that in my opinion the Budget Director's Regulation 60–2 does not supersede and is subordinate to the Federal Code which provides that production, as far as the Army is concerned, shall take place in a Government-owned facility so far as those factories can make those supplies on an economical basis. The purpose of 60–2—and it has some commendable purposes—was to eliminate competition between the Government and private enterprise. It was not intended to eliminate competition between other members of private enterprise. And in this argument, in the use of the Government-owned facility at Cleveland, we have a plant which anybody in America can operate. There is no intention anywhere in this proceeding that the Government should operate the arsenal in Cleveland for the manufacture of the M–113 personnel carriers. The only issue involved is whether or not this facility should be used by any of the interested producers who are qualified as bidders on this contract. Earlier the gentleman from California made the point I had nothing to be excited about, that the contract has not been awarded. Does he think I would be on better ground to come here after the contract had been awarded when I would be in the position of expressing sorrow or regret that the economy factor involved and my communities production facilities have been overlooked. I am here at this time because I want to prevent the Defense Department from doing something which will increase costs to the taxpayer, which will disregard the law, the intent of Congress, that insofar as the Army is concerned the Government facilities will be used.

Mr. GUBSER. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from California.

Mr. GUBSER. I must ask the gentleman, Has he seen the bid figures? If not, how does he know that if this award goes to Food Machinery, and I do not know whether it is or not, the taxpayer is going to lose money? How does he know that 4532(a) will be violated?

Mr. VANIK. The gentleman is fully aware of the fact that if Food Machinery is using its plant, it is using plant and equipment for which it must assess a charge. I do not believe for one moment that the Food Machinery Corp. is going to be so philanthropic as to fail to charge the Government in its bid for duplicating the same facilities at its San Jose plant. Certainly it is going to charge the Government. It is going to charge the Government at least the $6,500,000 figure which I previously quoted on this floor.

Mr. GUBSER. It is my contention the gentleman has proven my point. Yes, I presume that as a good business concern of course Food Machinery will charge the Government for proper amortization and depreciation and interest on its own investment. I presume that. I presume any company bidding does that.

Mr. VANIK. Does the gentleman also take into consideration the duplicating of facilities which are in being in the Cleveland Ordnance Plant?

Mr. GUBSER. There are Government facilities in the San Jose plant and they are subject to the identical requirements that the facilities in the Cleveland plant are. I say this: No one in the world except possibly one or two people in the Pentagon knows whether or not any money is going to be lost if this goes to Food Machinery. I say you cannot know until you see the figures. 4532(a) says you have to make these supplies on an economical basis. You do not know which is the most economical basis until the bids are opened and the contracts are awarded.

Mr. VANIK. It is quite obvious the gentleman completely overlooks the fact that if these same facilities which will be used in the San Jose plant of the Food Machinery Corp., for which he so ably speaks today, were used, obviously the great cost of those facilities will simply be added to the cost of the facilities which the Government already owns and which are in being in the Cleveland plant. It is duplicating a facility which is unnecessary and unneeded and which is an added cost to the taxpayer.

Mr. GUBSER. The gentleman talks about duplication of facilities. We have a tank production line, an M–113 production line in being. It is opening. It is being celebrated today. Tanks are rolling off the end of the line. At Cleveland you have an empty building with a few tools which might be utilized but to a lesser extent than the gentleman thinks. Now if you are going to talk about duplication of facilities here you are proposing to build another one that is expensive.

Mr. VANIK. I must say to the gentleman that these tools and the equipment which he says are in being at the Food Machinery plant were duplicated, an unnecessary expense to the taxpayers because somebody in the Pentagon insisted that this work be done at the San Jose plant of the Food Machinery Corp.

Mr. GUBSER. Back in World War II and Korea we needed plants to build defense items. They are up in the gentleman's district, they are up in Detroit, they are all over the United States. Government machine tools are all over the place. This is an old company that has been making defense items for a good long time. I should like to point this out to the gentleman, and it will take me only 30 seconds. Originally there were two buildings in the ordnance department belonging to the Federal Government. I should like to point out to the gentleman that the Food Machinery Chemical Corp. purchased one of those buildings and is under contract to purchase the other. Many of the machine tools have also been purchased by private industry. So we have private capital doing this defense work instead of keeping it as a burden on the taxpayers.

Mr. VANIK. Private capital would be doing the defense work in Cleveland using the ordnance plant and using all the facilities which have already been bought and paid for by the taxpayers. As a matter of fact, the Food Machinery Corp. or any other corporation is qualified to come in and bid on the use of these facilities.

I want to point out something that was not answered in any way by the gentleman in his colloquy. The Ford survey which was made of Government-owned facilities and private facilities, and by his own admission they included the Food Machinery plant, determined it would be most economical and feasible to produce this vehicle in the Cleveland Ordnance Plant. This is how they came to that conclusion. The Ford engineers determined, and they are independent and impartial in this matter, determined that these vehicles were unique in production and in application and that they would not lend themselves to commercial production. Therefore, considering all aspects of the situation and the unique nature of this weapon, and in view of the mobilization base that is required, that is, the capacity to expand production in the event of a mobilization emergency—considering all of these factors in that survey study, this job should have gone to Cleveland and nowhere else. That is the substance of the Ford survey report. This has not been refuted. But it has been ignored. Does the gentleman presume for one moment that this survey would have been ordered simply to have been cast aside and thrown off into the wastebasket? What was its purpose? Can the gentleman tell me? What was the purpose of authorizing a $338,000 survey to determine the feasibility of production in a plant that was apparently never considered seriously for this job? What was the purpose of this survey? Why undergo and undertake this tremendous expense to determine the economic productive points for this production—if they did not intend to follow the recommendations?

Mr. GUBSER. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield.

Mr. GUBSER. The gentleman has again unequivocally stated that the Ford study showed that this production should be carried on at the Cleveland Arsenal and nowhere else. He is in direct contradiction to the statement made by Assistant Secretary of the Army Courtney Johnson at about 11 o'clock this morning. This we cannot resolve. I cite my authorities. You cite yours.

Mr. VANIK. Will the gentleman, at this point, please find out for me why, if he has this telephone relationship with Mr. Johnson, if he can find out for me on an official basis; why the $338,000 was spent for a survey which has apparently been discarded by the Pentagon.

Mr. GUBSER. The gentleman is an effective representative of his people and has ample ability to get the same information I do. I am sure he will do it. If he chooses not to do so, I shall be happy to assist him. However, I just have to point out to the gentleman that private industries were not considered as a possibility in this case, and I will speculate with the gentleman as to the reason why the Army ordered this survey.

It was because they were developing a plan. Every day the Joint Chiefs of Staff develop war plans in case certain eventualities occur. As we all know, 99 percent of those plans are scrapped. But those plans must be in being. As I understand it, and I am not speaking for the Army—as I understand it, this was a mobilization study and the proposition of whether the Government arsenals should be utilized for production was under consideration. It was necessary to determine what each of these Government arsenals could do. Under this determination, it was determined that the Cleveland Arsenal could do this M–113 job, but not a thing in the world was said which would indicate that some private company could not do it better and cheaper.

Mr. VANIK. Then, I cannot understand the purpose of the survey. It is completely unreasonable for me to assume that this survey and this great expense would have been undertaken if it would be an incomplete survey and if it was only to take into consideration publicly owned facilities, as the gentleman has said.

I want to point out in closing that in my original charge I stated that the bids were completely rigged against using the Government-owned plant and facilities. I further contend they are designed to increase costs by paying for plant and facilities of another bidder, a second time, by sending this contract to his plant. It is my contention, under the law, under the section of the Code that we have previously cited, that the Army is bound and compelled to use Government facilities—60–2 notwithstanding. Budget Regulation 60–2 provides specifically that if a Government-owned plant was used, there would be competition between private bidders as to who should operate the Government plant. This is how the contract was rigged. The gentleman has asked that this be explained. I want to put this in the RECORD. If the Government-owned plant is used, the rental evaluation must be added to the bid based upon an appraisal, based upon acquisition costs. This completely overlooks the depreciation factor which is considered by every private bidder on his own plant. Thus, anyone who uses the Government-owned plant in Cleveland is penalized by a rental for the entire plant on the basis of 5½ cents per square foot per month regardless of what part of the plant is used in production.

The charge is computed on a 19-month basis notwithstanding the fact that this production contract is for a lesser period of time.

I address this to the gentleman: The rental evaluation I used on the Cleveland plant is based on a 19-month production period notwithstanding the fact that the production period is considerably less. This is admitted by the insertion in the RECORD which the gentleman made from the Food Machinery Corp.'s own statement on yesterday.

Mr. GUBSER. Mr. Speaker, will the gentleman yield?

Mr. VANIK. Let me finish.

Mr. GUBSER. Does not the same rule apply to Government-owned tooling for Food Machinery?

Mr. VANIK. I will go into that later. Now, this rental evaluation completely ignores the $760,000 which every year is paid to maintain the Cleveland plant in a state of idleness. This should certainly be applied and deducted from the rental charged.

I charge that the bids were rigged for the benefit of the Food Machinery Corp. because the use of Government-owned facilities and equipment would require in addition rental based on acquisition cost prorated for the full calendar period of 19 months, whether they may be used several hours a week or 18 or 20 hours for the entire life of the contract. It is not possible on these terms to use Government-owned facilities in the Cleveland plant.

The proper charge for the use of these public facilities should be based on the actual time these facilities are used for production and only for such time. This is the only basis on which a charge should be made, not the "jimmied" evaluation procedure. I say it is "jimmied." It is totally unfair in the use of Government facilities to charge a 19-month rental for equipment which may be used only 20 hours during the entire 19-month period. It is eminently, basically, and obviously unfair to penalize the user of Government facilities on a full-time calendar rental without considering the time the equipment is actually used. That is not the generally accepted industrial concept in this regard.

I think the gentleman will agree with me that the bids are rigged when the research and development contractor, which in this case was the Food Machinery Corp., was adequately, completely, and, in my judgment, overly and excessively paid for its work in research and development of this tank. It is unfair when this bidder has exclusive use of the special tools which were paid for by the Federal Government and which are not available to any other bidder under the terms of these specifications. It is impossible, it is absolutely impossible for any other bidder to determine the cost of producing these special tools.

The procedures in this bidding method are clearly established to create a monopoly in the production not only of the M–113, but the entire light tank family, to concentrate that production in the hands of one manufacturer who does not have the mobilization base to take care of this Nation's needs in the hour of mobilization. This is not only much more expensive to the taxpayer, but also it threatens the national security. That is why the Army was so anxious to keep in custody, to keep under control, to keep in use the Cleveland Ordnance tank plant. In this plant we have the ability to concentrate production not only in the orderly and proper needed peacetime requirements of this weapon but in the mobilization day's need if and when that should occur.

So I say to the gentleman that the rigging of these bids is obviously designed to eliminate any chance of using the Government-owned facility in Cleveland and to direct the contract to only one prospective bidder, and that is the bidder the gentleman has defended.

I hope the gentleman will join me if he wants to clarify the matter. If he wants to get down to the bottom of this problem, I hope he will join me in urging that the appropriate congressional committee take this matter in hand so that the facts can be placed in the RECORD under oath, as they should be, as they must be, so that the appropriate people from the Pentagon can be brought in and have their statements placed into the record so they can be studied. In the interests of national security and economy, I hope that the right thing will be done.

Mr. Speaker, I yield back the balance of my time.

ADDITIONAL VIEWS OF HON. SILVIO O. CONTE—I. REGARDING AMENDMENT PROHIBITING USE OF MSP FUNDS FOR INDUS WATERS PROJECT, SECTION 404, MUTUAL SECURITY ACT OF 1954—II. USE OF CONTINGENCY FUND

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Massachusetts [Mr. CONTE] is recognized for 30 minutes.

Mr. CONTE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Speaker, the minority report on the mutual security appropriation bill did not include additional views by individual members. Because of a technicality, I was unable to present my views yesterday on what I consider a most vital international project. Therefore, I am taking this opportunity to present my additional views and to give substantial reasons for my deep concern over a grave situation which could produce serious consequences.

Section 107 of the bill, which would deny the use of mutual security funds for U.S. participation in a multilateral effort to finance the development of the Indus Basin, is singularly shortsighted in terms of the interests of the United States.

The controversy between Pakistan and India over the use of the Indus Basin waters has been one of the major international conflicts in the past decade. Bitterness and violence have characterized the situation and the possibility of military conflict has been a real one.

Through the good offices and protracted efforts of the International Bank for Reconstruction and Development, 9 years of patient negotiation have resulted in virtual agreement on the terms of settlement of the controversy. Final agreement depends on firm assurances from friendly countries of essential financial assistance required to construct the system of works recommended by the Bank.

The Bank itself plans to contribute to the costs of the development, and five other nations—the United Kingdom, Canada, Australia, New Zealand, and West Germany—in addition to Pakistan and India have signified their willingness and intention to join in the funding of this project. U.S. participation, which would involve over a 10-year period the provision of $177 million of grant assistance and $103 million in loan assistance, plus the provision of local currency arising from sales of agricultural surpluses from the United States, is essential to the successful completion of this giant international effort.

The provision of funds for this purpose not only would serve to contribute in a major way to the economic development of the vast subcontinent of Asia but would materially contribute to the improvement of relations between the two countries. In the absence of a settlement, no one can predict what the outcome will be; but certainly, the possibility of bitter and prolonged dispute and eventual military conflict could not be excluded. We have an opportunity to make a major contribution to world peace, to strengthen the orientation of over 500 million people to the West, and to secure the participation of other industrialized nations in financing the costs. To cast aside this opportunity would be contrary to the political and security interests of the United States.

Because of the grave consequences which would result should this restriction be allowed to remain in the bill, Thursday of this week I will offer an amendment to delete this limitation. I trust that the House of Representatives, in its wisdom, will concur in the elimination of section 107 of the mutual security appropriation bill.

In addition, I would like to discuss another provision contained in the mutual security appropriation bill as reported. I am referring to section 451(b), the so-called contingency fund, which provides $150 million for assistance under this section. The amount, which is $5 million less than provided last year for these purposes, appears reasonable.

However, the bill contains a restrictive provision:

> That none of the funds appropriated in this paragraph shall be used for any project or activity for which an estimate has been submitted to Congress.

The report accompanying the bill describes this language as "designed to preclude Executive nullification of specific congressional reductions."

This action suggests, first, that the Executive has heretofore used these funds in a manner contrary to that authorized by the Congress, or second, that the authorization previously given and affirmed in this session, is too broad.

As to the first point—that of the authority granted—I believe it is clear that the legislation permits the Executive to use these funds, and I quote "in furtherance of any of the purposes of such acts, when the President determines that such use is important to the security of the United States." This authority clearly permits the President to use the Contingency Fund to provide military or economic assistance in addition to amounts specifically otherwise authorized for such purposes. The distinguished chairman of the Subcommittee on Foreign Operations has himself recognized that the law provides this authority.

Presumably, from the bill and the report, the majority of the committee considers the authority, provided in the authorizing legislation, to be excessive and that it requires limitation by appropriate action. What standards or criteria are proposed?

The existing law provides that the funds may be used when the President determines that such use is important to the security of the United States if such use was for a project or activity for which an estimate was submitted to the Congress. In other words, no adjustment whatsoever in the programs presented to the Congress is to be made through the use of these funds. This assumes an accuracy of judgment as to the future, of which neither the Executive nor the Congress is capable. It provides a measure of rigidity and inflexibility which is neither warranted nor sensible. It is a limitation which prevents responsiveness to changing conditions.

The contingency fund is less than 5 percent of the total appropriations recommended. A margin of 5 percent to permit adjustments in aid when the President determines the national security so requires, is a minimal degree of flexibility.

It is noteworthy that the committee fails to cite any specific instances where it believed the use of contingency funds was not in the security interest of the United States. The record of such uses, which was available to the committee, clearly indicated that each use was justified and that it served our national interests. Rather, the complaint conceals a desire to deny the Executive any real ability to deal with flexibility with any volatile and unpredictable international situation.

During the current year, these funds enabled the President to provide additional military and defense support assistance to Laos when Communist subversion and attack threatened. Under the proposed provision this would not be possible because estimates of requirements for these purposes are included in the presentation to the Congress. Similarly, the President could not have given added support to Greece when its economy began to fail unexpectedly. Added support for Iran's military defenses when threatened by Communist pressures would not have been possible. Additional amounts to assure base rights could not have been provided. In sum, our security interests are not to be measured by a current Presidential assessment, but are limited to previous estimates, however inaccurate they prove to be.

The deletion of the limiting provision is essential if any reasonable degree of flexibility is to be permitted our Government in combating the pressures of international communism. Its inclusion will seriously and adversely hamper the effective use of this program to advance our security interests.

In essence, by inserting this limitation, the Appropriations Committee is telling the executive branch of the Government, "please don't tell the committee how you are going to spend your money, because if you do we will not allow you to use the contingency fund at some future date." This is a bit ridiculous especially when the responsible Appropriations Committee is so opposed to the principles of back-door spending.

The contradiction contained within the provision for the use of the contingency fund must be removed.

[From the Washington Post, June 14, 1960]

HAMSTRINGING FOREIGN AID

If there were a better understanding here and abroad of the complexities of American Federal budgetary processes, it might be possible to shrug off at least some of the reduction in foreign aid funds voted by the House Appropriations Committee. Assuming that the administration would use every avenue open to it—such as drawing more heavily upon past appropriations than had been planned—it might be possible to get by on the $3.4 billion in new funds which the committee approved in place of the $4.1 billion requested by President Eisenhower, leaving aside certain crippling restrictions.

But whatever the technical and bookkeeping opportunities that may exist for running an adequate mutual security program in the short term without full-fledged congressional support, such methods would in the long run tend to compromise public confidence in administration and perhaps do truly serious damage to the basic underpinning of the mutual security concept.

The House committee has written into the bill and its report a number of specific restrictions that perhaps do more serious damage to the program than the reductions in funds. The most unfortunate single example of this attempt to manage the details of foreign aid from Capitol Hill is the wholly unwise prohibition against any assistance for the Indus River project. Many years in the planning, and still the subject of negotiation by India and Pakistan, the program for the Indus is to be underwritten by the United States, Australia, Canada, Germany, New Zealand, Britain, India and Pakistan, as well as the World Bank. Of the $1 billion, 10-year outlay that has been envisaged, only $177 million would be in American grants, with additional U.S. help in the form of surplus commodities and repayable, interest-bearing loans. About half the cost would be borne by other governments and the World Bank.

Clearly, if this country were now to withdraw its support, the prospect of solving the Indus waters dispute, which has lately looked so promising, would be measurably lessened, and the framework of free world cooperation on the venture could be shattered. It is scarcely possible to imagine a more insidious scheme to destroy world confidence in American intentions toward the underdeveloped nations than the committee's proposed sabotage of the Indus project.

Equally serious are the body blows which the committee would strike at aid to the emerging nations of tropical Africa. By requiring advance committee approval of every individual project, the House group would rule out for a year or more any start on technical assistance for 10 or a dozen new African nations. Experience has shown that such a void is quickly and effectively filled by the Soviet Union, whereas a timely initiative in such countries often can forestall damaging Soviet inroads.

The reductions in special and technical cooperation funds would fall heavily upon the African programs, since firm commitments to other areas would use up the reduced appropriations proposed. And, as if to foreclose any attempt to ameliorate mistakes that Congress might make in the administrative role that the House Committee has assumed, the committee would prohibit use of contingency funds to make up for specific cuts that might turn out to have serious consequences for this country's interests.

All in all, the House committee's treatment of mutual security would—if it went unchallenged—make democratic calls for "new initiatives" and "bold programs" in foreign policy look pretty transparent. There is virtually unanimous agreement among the experts that the next short-term threat from the Communist bloc will arise in Asia. Yet it is Asia and Africa that the House committee seems to single out for calculated neglect. Congress must right this mischief or forfeit any just claim to wisdom in foreign policy matters.

AMENDING FEDERAL TRADE COMMISSION ACT BY PROVIDING ASSISTANCE TO SMALL BUSINESS

Mr. VANIK. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. LESINSKI] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. LESINSKI. Mr. Speaker, the two bills which I have introduced, H.R. 12626 and H.R. 12627, would amend the Federal Trade Commission Act by providing assistance to small business in its struggle to overcome unfair trade practices in industry and commerce.

The hearings which have been conducted by the House Small Business Committee's Special Subcommittee on Small Business Problems in the Dairy Industry have made it clear that the practice of selling dairy products at unreasonably low prices and frequently as loss leaders far below the level of cost, is widespread. Only a few days ago, it was reported that a large concern was selling milk in Florida at 1 cent per half gallon. Other instances have been brought to the attention of Members of Congress where milk has been retailing at less than one-quarter of the cost of producing the product. Small business concerns are much alarmed about this practice and its effect toward eliminating them and creating monopolies in this great industry. Many States have enacted legislation to combat this practice of selling at prices below cost. Courts have upheld the State laws, but due to the fact that the law of any State does not reach beyond the State line, it can have no application to transactions in interstate commerce. Therefore, the need for Federal legislation on the subject to fill this void is apparent. It is believed that H.R. 10235 will fill this need, and, as I have stated, today I have introduced H.R. 12626, a companion bill identical to H.R. 10235.

Also it is apparent that there is need for legislation which would provide small businessmen with immediate, effective relief from these destructive practices. H.R. 10235 will strengthen the substantive law to provide relief, but it leaves untouched the procedural law. Small businessmen need immediate, injunctive relief from these destructive practices. Therefore, one of the bills I have introduced, today, H.R. 12627, is identical with the provisions of H.R. 8841. It would empower the Federal Trade Commission to enter temporary cease and desist orders while the issues under its complaint are being litigated. In this way, many small business concerns could be saved during the prolonged litigation of cases which evolve sales at prices below cost.

LEGISLATIVE EXPENSE ACCOUNTING ACT OF 1960

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. LIPSCOMB] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. LIPSCOMB. Mr. Speaker, I have introduced a bill in the House of Representatives today, H.R. 12628, which proposes enactment of what would be known as the Legislative Expense Accounting Act of 1960.

For the information of the membership of the House concerning this proposed legislation, I submit for inclusion at this point in the RECORD an analysis of the bill as introduced:

ANALYSIS OF BILL TO BE KNOWN AS LEGISLATIVE EXPENSE ACCOUNTING ACT OF 1960, INTRODUCED BY CONGRESSMAN GLENARD P. LIPSCOMB

1. This measure would be known as the Legislative Expense Accounting Act of 1960.

2. Section 2 would add a new section to the law to regulate payments from the contingent fund of the House of Representatives. This section would—

(a) Provide that no payment could be made from the contingent fund except in accordance with regulations issued by the House Administration Committee and on vouchers approved by the committee.

(b) Provide that no payment could be made from the contingent fund as additional salary to any officer or employee of the House.

(c) Provide that vouchers (together with all documentation therefor) approved for payment from contingent fund would be available for public inspection.

3. Section 3 of the bill would provide for the Comptroller General to audit all disbursements from contingent fund of the House.

(a) Audits would be not less frequently than once each 6 months.

(b) Comptroller General would report to House Speaker and House Administration Committee the results of each audit not later than 30 days after audit completed.

4. Section 4 is to provide for reports on expenditures by Members of the House and Senate for foreign travel. Provides that within 30 days after return by Member of House or Senate from foreign travel for investigation, study, meeting, or conference (outside United States, District of Columbia, U.S. territories and possessions), such Member would—

(a) File with Senate Committee on Rules and Administration or House Administration Committee a statement of expenses incurred by him or her.

(b) Such statement would include accounting of counterpart funds used for Member's expenses, number and identity of persons in party (including information as to wife or husband of Member, any of their expenses paid from Government or counterpart funds, and services, if any, performed by such person for the Government).

5. Section 5 is to provide that the expense statement required under section 4 of the bill would be included in statements required under present law (Title 2 U.S.C. 102) by Secretary of the Senate and Clerk of the House of Representatives at the commencement of each session of Congress, and would be printed as a House Document. Present law requires statements covering report on employment of clerks and other persons during preceding year in the respective Houses, and a detailed statement of the manner in which the contingent fund for each House has been expended during the preceding year.

6. Section 6 of the bill amends and repeals certain present law as necessary. Under present law, basically payments from the contingent fund of the House and Senate are regulated under a provision contained in an 1888 appropriation act (25 Stat. 546; 2 U.S.C., secs. 68 and 95). The pertinent section of the 1888 law, which applies to both the House and Senate, provides that no payment shall be made from the contingent fund of House and Senate unless sanctioned by the Committee on House Administration and the Senate Committee on Rules and Administration; provides that payments made on vouchers approved by these committees shall be deemed, held, and taken, and are declared conclusive on all the departments and officers of Government (commonly known as the finality clause); provides no payment shall be made from contingent fund as additional salary for officers or employees of either body.

(a) Section 6(a) of the bill, in effect, repeals that part of the 1888 law which applies to the House by rewriting that provision so that the law as it applies to the Senate is left unchanged.

(b) Section 6(b) repeals a provision contained in an appropriation act of March 4, 1911 (36 Stat. 1318; 2 U.S.C. 95). The 1911 provision, in providing that payments made from the contingent fund of the House on vouchers approved by the Committee on Accounts shall be deemed, held, and taken, and are conclusive on all departments and officers of Government, for no apparent reason repeats (only with reference to the House) certain provisions in the 1888 act. It is therefore also repealed.

(The net result of section 6 (a) and (b) of the bill, therefore, is to repeal certain sections of present law regulating payments from the contingent fund so far as the House is concerned, but leaves intact the law as it applies to the Senate.)

(c) Section 6(c) of the bill provides that sections 6(a) and (b) would apply only to expenditures made from the contingent fund of the House to pay obligations entered after enactment of the bill, so as to provide that it would not apply to obligations in being.

7. Provides that the bill would take effect 30 days after enactment. This will allow the House Administration Committee time to prepare adequate and suitable regulations as required in section 2 of this bill.

REQUEST TO WITHDRAW PAPERS

The SPEAKER pro tempore. The Chair lays before the House the following personal request.

The Clerk read as follows:

JUNE 14, 1960.

Mr. LANE requests, pursuant to rule XXXVII, leave to withdraw from the files of the House papers in the case of Jean K.

Simmons (H.R. 4825) original affidavit of Agnes Dunn, subscribed to on July 27, 1959, 86th Congress, no adverse report having been filed thereon.

THOMAS J. LANE.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

RIGHT OF UNION TO CONVENE AND ELECT ITS OFFICERS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New York [Mr. HALPERN] is recognized for 10 minutes.

Mr. HALPERN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HALPERN. Mr. Speaker, in line with the American tradition of democracy in action and its aspects of guaranteeing to every individual the opportunity to be heard and to express his opinion, I appeal that any duly constituted body, including unions, functioning in compliance with existing law, be assured of its basic right to convene, not only on a local level, but in national convention, and to elect its officers. I state this in response to the considerable number of letters that I have received from rank-and-file teamsters residing in my district appealing for the right to hold a convention to elect officers and adopt programs.

In answer to these letters, I wish to make my position clear. To me the important consideration is the principle of freedom of assembly and regardless of whether the members of one or a dozen groups are involved the principle should be applicable wherever rights are denied. This is a fundamental privilege guaranteed by law and specifically and clearly spelled out in recent legislation passed by Congress which states:

Equal rights: Every member of a labor organization shall have equal rights and privileges within such organization to nominate candidates, to vote in elections or referendums of the labor organization, to attend membership meetings, and to participate in the deliberations and voting upon the business of such meetings, subject to reasonable rules and regulations in such organization's constitution and bylaws.

Freedom of speech and assembly: Every member of any labor organization shall have the right to meet and assemble freely with other members; and to express any views, arguments, or opinions; and to express at meetings of the labor organization his views, upon candidates in an election of the labor organization or upon any business properly before the meeting, subject to the organization's established and reasonable rules pertaining to the conduct of meeting: *Provided*, That nothing herein shall be construed to impair the right of a labor organization to adopt and enforce reasonable rules as to the responsibility of every member toward the organization as an institution and to his refraining from conduct that would interfere with its performance of its legal or contractual obligations.

Every national or international labor organization, except a federation of national or international labor organizations, shall elect its officers not less often than once every 5 years either by secret ballot among the members in good standing or at a convention of delegates chosen by secret ballot.

Regardless of how one feels about the controversy surrounding any particular circumstances, it only seems fair that the rank-and-file members of trade union be given the opportunity under democratic processes to carry out their rights to convene and hold elections, as set forth under the laws.

The officers who are elected would have to comply with the requirements of the Labor-Management Act of 1959, and any derelictions from duty would subject them to the penalties of the act. Suppression of the rights of the rank and file which have been granted by Congress through legislation is not the way of America.

I hope that, wherever and whenever any instance of denial of such rights occurs, it will be remedied immediately in line with our American way of life.

FRANKLIN, KY., WINS AGAIN

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. NATCHER. Mr. Speaker, it certainly is with a great deal of pride and pleasure that I cite the fact that Franklin, Ky., has won first place in group 2 of the Kentucky Chamber of Commerce 5-year community development contest. For this victory, which attracted the competition of cities of 3,500 or more in population, an award of $1,000 will be presented to Franklin in September at the State fair on Kentucky Chamber of Commerce Day.

This award marks the happy completion of 5 successful years of Franklin's participation in this long-range community planning contest with year-to-year continuity and certainly this city, which is the county seat of one of the outstanding counties in Kentucky—Simpson County—is fully deserving of this distinction and merits heartiest congratulations. Franklin captured three first places and two seconds over a 5-year period, and the total earnings of $5,400 have been put to good use in furthering the community's development.

Many accomplishments have made possible this victory for Franklin—notably among these is a new junior high school building, the opening of several new industrial plants and numerous stores, as well as the development of a number of attractive residential subdivisions. Moreover, the people of Franklin have demonstrated that they know their responsibilities as good citizens by annually cooperating in approving an adequate budget for their schools. Scrapbooks, which were also included as entries in the contests over the years, were well prepared by the Franklin Business and Professional Women's Club.

It is crystal clear that the residents of Franklin have not permitted themselves to become so absorbed in the privileges of American citizenship that they forget the responsibilities and duties that go with this blessing. I am sure that none of those who live in this fair city have ever taken their community for granted—they know that there is no magic that can automatically solve the inevitable problems that arise and so they have, as it were, adopted a "do-it-yourself" spirit to promote their city's progress and improve the local economy. These efforts have indeed brought enviable results and proved once again that communities—large and small—can always profitably take inventory of their local potentials, looking toward bolstering the economy and enhancing community conditions generally.

Franklin, Ky., is indeed fortunate in having as its mayor, Mr. Paul B. Massey, a thoroughly dedicated public official, who is equally fortunate in having highly qualified individuals serving with him in the city's government. Assisting these officials in all their endeavors are the various civic clubs, the local chamber of commerce, the Franklin Favorite, one of Kentucky's outstanding weekly newspapers, radio station WFKN, and the Franklin Industrial Board.

Certainly this small city, conspicuous for its excellent school system, lovely homes and churches, may well be proud of this latest honor and I want to reaffirm the genuine happiness that I derive in being privileged to represent Simpson County in the Congress of the United States. May the guidance of providence lead Franklin onward to even greater and brighter achievements.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. BENTLEY (at the request of Mr. HALLECK), for Wednesday, June 15, on account of medical reasons.

Mr. GREEN of Pennsylvania (at the request of Mr. BYRNE of Pennsylvania), for June 14 and 15, on account of death in family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. CONTE, for 30 minutes, today.

Mr. HALPERN, for 10 minutes, today.

Mr. PORTER (at the request of Mr. ALBERT), for 1 hour, tomorrow.

Mrs. ROGERS of Massachusetts, for 30 minutes, on Wednesday, June 15.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. BROCK and to include extraneous material.

Mr. SAYLOR, to include in the remarks made in the Committee of the Whole today the proclamation of President Wilson of 1915 and the proclamation of President Roosevelt of 1938.

Mr. LANE.

(At the request of Mr. ALBERT and to include extraneous matter the following:)

Mr. FLOOD.

Mr. MULTER.

Mr. BURKE of Massachusetts.

Mr. BRADEMAS in two instances.

(At the request of Mr. CURTIN, and to include extraneous matter, the following:)

Mr. DERWINSKI in two instances.

Mr. WESTLAND.

Mrs. WEIS.

Mr. ARENDS.

Mrs. ST. GEORGE.

Mr. SCHWENGEL.

DEPARTMENT OF AGRICULTURE AND FARM CREDIT ADMINISTRATION APPROPRIATION BILL, 1961

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H.R. 12117) making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ADJOURNMENT

Mr. VANIK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 25 minutes p.m.), the House adjourned until tomorrow, Wednesday, June 15, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2257. A letter from the Administrator, General Services Administration, transmitting the report of the Archivist of the United States on records proposed for disposal under the law; to the Committee on House Administration.

2258. A letter from the Acting Chairman, U.S. Atomic Energy Commission, transmitting a draft of proposed legislation entitled "A bill to amend section 5 of the Euratom Cooperation Act of 1958"; to the Joint Committee on Atomic Energy.

2259. A letter from the Secretary of State, transmitting a draft of proposed legislation entitled "A bill to amend section 960 of title 18 of the United States Code"; to the Committee on the Judiciary.

2260. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 1, 1960, submitting a report, together with accompanying papers and illustrations, on Redwood River at Marshall, Minn., requested by a resolution of the Committee on Public Works, U.S. Senate, adopted on June 20, 1957, and authorized by the Flood Control Act, approved June 22, 1936 (H. Doc. No. 417); to the Committee on Public Works and ordered to be printed with two illustrations.

2261. A letter from the president of the Board of Commissioners of the District of Columbia, transmitting a draft of proposed legislation entitled "A bill to provide for the administration of unclaimed funds held and owing by life insurance companies in the District of Columbia; to the Committee on the District of Columbia.

2262. A letter from the President of the Board of Commissioners of the District of Columbia, transmitting a draft of proposed legislation entitled "A bill to amend the District of Columbia Redevelopment Act of 1945, as amended, and the act approved December 20, 1944, as amended, and for other purposes"; to the Committee on the District of Columbia.

2263. A letter from the Secretary of Defense, transmitting a draft of proposed legislation entitled "A bill to provide for the withdrawal from the public domain of certain lands in the Ladd-Eielson area, Alaska, for use by the Department of the Army as the Yukon Command training site, Alaska, and for other purposes"; to the Committee on Interior and Insular Affairs.

2264. A letter from the Secretary of Defense, transmitting a draft of proposed legislation entitled "A bill to provide for the withdrawal from the public domain of certain lands in the Big Delta area, Alaska, for continued use by the Department of the Army at Fort Greely, and for other purposes"; to the Committee on Interior and Insular Affairs.

2265. A letter from the Secretary of Defense, transmitting a draft of proposed legislation entitled "A bill to provide for the withdrawal from the public domain of certain lands in the Granite Creek area, Alaska, for use by the Department of the Army at Fort Greely, Alaska, and for other purposes"; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAYS: Committee on Foreign Affairs. S. 1502. An act to provide for adjustments in the annuities under the Foreign Service retirement and disabilities system without amendment (Rept. No. 1626, pt. 2). Referred to the Committee of the Whole House on the State of the Union.

Mrs. PFOST: Committee on Interior and Insular Affairs. S. 2174. An act to permit the filing of applications for patents to certain lands in Florida; without amendment (Rept. No. 1819). Referred to the Committee of the Whole House on the State of the Union.

Mr. SPENCE: Committee on Banking and Currency. S. 3226. An act to amend section 809 of the National Housing Act; without amendment (Rept. No. 1820). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Tennessee: Committee on Public Works. H.R. 900. A bill to amend section 7 of the act of August 18, 1941, to provide that 75 percent of all moneys derived by the United States from certain recreational activities in connection with lands acquired for flood control and other purposes shall be paid to the State; to validate certain payment; and for other purposes; with amendment (Rept. 1821). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Tennessee: Committee on Public Works. H.R. 2178. A bill to authorize the Secretary of the Army to make certain changes in the road at Whites Branch, Grapevine Reservoir, Tex.; with amendment (Rept. No. 1822). Referred to the Committee of the Whole House on the State of the Union.

Mr. WALTER: Committee on the Judiciary. H.R. 10598. A bill to clarify certain provisions of the Criminal Code relating to the importation or shipment of injurious mammals, birds, amphibians, fish, and reptiles (18 U.S.C. 42(a), 42(b); and relating to the transportation or receipt of wild mammals or birds taken in violation of State, National, or foreign laws (18 U.S.C. 43), and for other purposes; with amendment (Rept. No. 1823). Referred to the Committee of the Whole House on the State of the Union.

Mr. HALEY: Committee on Interior and Insular Affairs. H.R. 11813. A bill to amend the Menominee Termination Act; with amendment (Rept. No. 1824). Referred to the Committee of the Whole House on the State of the Union.

Mr. SPENCE: Committee on Banking and Currency. H.R. 12346. A bill to amend section 14(b) of the Federal Reserve Act, as amended, to extend for 2 years the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury; without amendment (Rept. No. 1825). Referred to the Committee of the Whole House on the State of the Union.

Mr. KILDAY: Committee on Armed Services. H.R. 12417. A bill to amend title 10, United States Code, to bring the number of cadets at the U.S. Military Academy and the U.S. Air Force Academy up to full strength; with amendment (Rept. No. 1826). Referred to the Committee of the Whole House on the State of the Union.

Mr. SPENCE: Committee on Banking and Currency. H.R. 12465. A bill to provide for a simpler method of determining assessments under the Federal Deposit Insurance Act, and for other purposes; without amendment (Rept. No. 1827). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Tennessee: Committee on Public Works. H.R. 12530. A bill to authorize adjustment, in the public interest, of rentals under leases entered into for the provision of commercial recreational facilities at the John H. Kerr Reservoir, Virginia-North Carolina; without amendment (Rept. No. 1828). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Tennessee: Committee on Public Works. H.R. 12532. A bill to provide compensation for certain property losses in the Tuttle Creek Reservoir project, Kansas; without amendment (Rept. No. 1829). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Tennessee: Committee on Public Works. H.R. 12564. A bill to authorize multiple-purpose development at Victory Reservoir site, Vermont; without amendment (Rept. No. 1830). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONNER: Committee on Merchant Marine and Fisheries. S. 3106. An act to change the title of the Assistant Director of the Coast and Geodetic Survey; without amendment (Rept. No. 1853). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 10876. A bill to amend section 22 (relating to the endowment and support of colleges of agriculture and the mechanic arts) of the act of June 29, 1935, to increase the authorized appropriation for resident teaching grants to land-grant institutions; without amendment (Rept. No. 1854). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONNER: Committee on Merchant Marine and Fisheries. H.R. 3900. A bill to permit the use of foreign-built hydrofoil vessels in the coastwise trade of the Commonwealth of Puerto Rico; with amendment (Rept. No. 1855). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAYS: Committee on Foreign Affairs. H.R. 808. A bill to authorize the Secretary

of State to evaluate in dollars certain financial assistance loans expressed in foreign currencies arising as a result of World War II and for other purposes; with amendment (Rept. No. 1856). Referred to the Committee of the Whole House on the State of the Union.

Mr. MORGAN: Committee on Foreign Affairs. S. 3072. An act to authorize the Secretary of the Treasury to effect the payment of certain claims against the United States; without amendment (Rept. No. 1857). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROBERTS: Committee on Interstate and Foreign Commerce. S. 1283. An act to regulate the interstate distribution and sale of packages of hazardous substances intended or suitable for household use; with amendment (Rept. No. 1861). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Tennessee: Committee on Public Works. H.R. 12539. A bill to implement section 4 of the act approved December 22, 1944 (Public, No. 534, 78th Cong.), as amended; without amendment (Rept. No. 1862). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee of conference. H.R. 12117. A bill making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 1863). Ordered to be printed.

Mr. O'NEILL: Committee on Rules. House Resolution 556. Resolution for consideration of S. 1898, an act to amend the Communications Act of 1934 with respect to the procedure in obtaining a license and for rehearings under such act; without amendment (Rept. No. 1864). Referred to the House Calendar.

Mr. DELANEY: Committee on Rules. House Resolution 557. Resolution for consideration of H.R. 11123, a bill to increase the authorization of appropriations for construction and equipment of facilities for the Gorgas Memorial Laboratory; without amendment (Rept. No. 1865). Referred to the House Calendar.

Mr. O'NEILL: Committee on Rules. House Resolution 558. A Resolution for consideration of H.R. 2467, a bill to amend the act of September 7, 1950, to authorize the Secretary of Commerce to reimburse owners and tenants of lands acquired for Chantilly Airport for their moving expenses; without amendment (Rept. No. 1866). Referred to the House Calendar.

Mr. DELANEY: Committee on Rules. House Resolution 559. Resolution for consideration of H.R. 7624, a bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act so as to authorize the use of suitable color additives in or on foods, drugs, and cosmetics, in accordance with regulations prescribing the conditions (including maximum tolerances) under which such additives may be safely used; without amendment (Rept. No. 1867). Referred to the House Calendar.

Mr. LANE: Committee on the Judiciary. H.R. 12620. A bill to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes; without amendment (Rept. No. 1868). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WALTER: Committee on the Judiciary. H.R. 1671. A bill for the relief of Hans E. T. Hansen; without amendment (Rept. No. 1801). Referred to the Committee of the Whole House.

Mr. SMITH of California: Committee on the Judiciary. H.R. 2117. A bill for the relief of Ireneo D. Brodit and Antonio D. Brodit; without amendment (Rept. No. 1802). Referred to the Committee of the Whole House.

Mr. CHELF: Committee on the Judiciary. H.R. 2124. A bill for the relief of Mrs. Teruko Teri Miyamoto (nee Ikeda); with amendment (Rept. No. 1803). Referred to the Committee of the Whole House.

Mr. MOORE: Committee on the Judiciary. H.R. 2705. A bill for the relief of Bernardo Paternostro; without amendment (Rept. No. 1804). Referred to the Committee of the Whole House.

Mr. MOORE: Committee on the Judiciary. H.R. 2716. A bill for the relief of Miss Elisabeth Hollander; without amendment (Rept. No. 1805). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. H.R. 2944. A bill for the relief of Luciano Di Franco; without amendment (Rept. No. 1806). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. H.R. 3534. A bill for the relief of Epifanio Trupiano; without amendment (Rept. No. 1807). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary, H.R. 3804. A bill for the relief of Rosolina Ciuferri; with amendment (Rept. No. 1808). Referred to the Committee of the Whole House.

Mr. SMITH of California: Committee on the Judiciary. H.R. 4236. A bill for the relief of Woo Bow Land; with amendment (Rept. No. 1809). Referred to the Committee of the Whole House.

Mr. MOORE: Committee on the Judiciary. H.R. 4555. A bill for the relief of Anatolijs Janitis; with amendment (Rept. No. 1810). Referred to the Committee of the Whole House.

Mr. CHELF: Committee on the Judiciary. H.R. 4970. A bill for the relief of Haralambos Groutas; with amendment (Rept. No. 1811). Referred to the Committee of the Whole House.

Mr. SMITH of California: Committee on the Judiciary. H.R. 5647. A bill for the relief of Wong Gee Sing; without amendment (Rept. No. 1812). Referred to the Committee of the Whole House.

Mr. SMITH of California: Committee on the Judiciary. H.R. 6804. A bill for the relief of Mary Elizabeth Tighe Crespo; with amendment (Rept. No. 1813). Referred to the Committee of the Whole House.

Mr. MOORE: Committee on the Judiciary: H.R. 7425. A bill for the relief of Mrs. Humiko Ross; without amendment (Rept. No. 1814). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H.R. 8253. A bill for the relief of Pierre R. DeBroux; with amendment (Rept. No. 1815). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H.R. 8384. A bill for the relief of Otto Small; without amendment (Rept. No. 1816. Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. H.R. 9610. A bill for the relief of Sister Frances Cabrini (Virginia Bilbao); with amendment (Rept. No. 1817). Referred to the Committee of the Whole House.

Mr. SMITH of California: Committee on the Judiciary. H.R. 10002. A bill for the relief of Ida Exle (nee Ida Sterio); without amendment (Rept. No. 1818). Referred to the Committee of the Whole House.

Mr. BONNER: Committee on Merchant Marine and Fisheries. S. 1765. An act to authorize and direct the Treasury to cause the vessel *Edith Q.*, owned by James O. Quinn, of Sunset, Maine, to be documented as a vessel of the United States with full coastwise privileges; with amendment (Rept. No. 1831). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 762. An act for the relief of Manuel Alves de Carvalho; without amendment (Rept. 1832). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2089. An act for the relief of Henry K. Lee (Hyun Kui); without amendment (Rept. No. 1833). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2106. An act for the relief of Emiko Nagamine; without amendment (Rept. No. 1834). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2528. An act for the relief of John Lipset; without amendment (Rept. No. 1835). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2639. An act for the relief of Mo Tong Lui; without amendment (Rept. No. 1836). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2646. An act for the relief of Lloyd C. Kimm; without amendment (Rept. No. 1837). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2681. An act for the relief of Yi Young An; without amendment (Rept. No. 1838). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2768. An act for the relief of Frederick T. C. Yu and his wife, Alice Siao-Fen Chen Yu; without amendment (Rept. No. 1839). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2886. An act for the relief of Nikolija Lazic; without amendment (Rept. No. 1840). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2918. An act for the relief of Boris Priestley; without amendment (Rept. No. 1841). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2942. An act for the relief of Eugene Storme; without amendment (Rept. No. 1842). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2964. An act for the relief of Kang Sun Ok; without amendment (Rept. No. 1843). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2991. An act for the relief of Ah See Lee Chin; without amendment (Rept. No. 1844). Referred to the Committee of the Whole House.

Mr. CHELF: Committee on the Judiciary. H.R. 1588. A bill for the relief of Julius F. Steinhoff; with an amendment (Rept. No. 1845). Referred to the Committee of the Whole House.

Mr. MOORE: Committee on the Judiciary. H.R. 1681. A bill for the relief of Maurice Devlin; with amendment (Rept. No. 1846). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 3016. An act for the relief of Walter F. Beecroft; without amendment (Rept. No. 1847). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 3038. An act for the relief of Jung Hi Pak; without amendment (Rept. No. 1848). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 3049. An act for the relief of Oh Chun Soon; without amendment (Rept. No. 1849). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 3091. An act for the relief of Pasquale Mira; without amendment (Rept. No. 1850). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 3130. An act for the relief of Anne-Marie Stehlin; without amendment (Rept. No. 1851). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 3235. An act for the relief of Cecilia Rubio; without amendment (Rept. No. 1852). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2740. An act for the relief of Julia Sukkar; with amendment (Rept. No. 1858). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2941. An act for the relief of Mrs. Ming-Chen Hsu (nee Nai-Fu Mo); with amendment (Rept. No. 1859). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 2967. An act for the relief of Huan-pin Tso; with amendment (Rept. No. 1860). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CELLER:

H.R. 12620. A bill to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes; to the Committee on the Judiciary.

By Mr. BAILEY:

H.R. 12621. A bill to provide for the humane treatment of animals used in experiment and tests by recipients of grants from the United States and by agencies and instrumentalities of the U.S. Government, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BUDGE:

H.R. 12622. A bill to amend chapter 85 of title 28 of the United States Code relating to the jurisdiction of the U.S. district courts, and for other purposes; to the Committee on the Judiciary.

By Mr. THOMSON of Wyoming:

H.R. 12623. A bill to amend chapter 85 of title 28 of the United States Code relating to the jurisdiction of the U.S. district courts, and for other purposes; to the Committee on the Judiciary.

By Mr. HOEVEN:

H.R. 12624. A bill to extend the Sugar Act of 1948, as amended, for 1 year; to authorize Presidential action during the time Congress is not in session if such action is in the national interest or is necessary to insure an adequate supply of sugar; to stabilize the quota for Cuba; and for other purposes; to the Committee on Agriculture.

By Mr. KARTH:

H.R. 12625. A bill to amend the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, and to amend the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, for the purpose of prohibiting loss leader sales; to the Committee on the Judiciary.

By Mr. LESINSKI:

H.R. 12626. A bill to amend the Federal Trade Commission Act to provide for the issuance of temporary cease and desist orders to prevent certain acts and practices pending completion of Federal Trade Commission proceedings; to the Committee on Interstate and Foreign Commerce.

H.R. 12627. A bill to amend the Federal Trade Commission Act to strengthen independent competitive enterprise by providing for fair competitive acts, practices, and methods of competition, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. LIPSCOMB:

H.R. 12628. A bill relating to the reporting by Members of the House of Representatives of expenditures from the contingent fund of the House of Representatives and of expenditures of counterpart funds by Members of Congress; to the Committee on House Administration.

By Mr. SHEPPARD:

H.R. 12629. A bill for the establishment of a Resources Planning Commission for the Lower Colorado River Basin, to study the multipurpose resources of public lands and other land and water areas in and near the Colorado River between Hoover Dam and the Mexican boundary, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. UTT:

H.R. 12630. A bill for the establishment of a Resources Planning Commission for the Lower Colorado River Basin, to study the multipurpose resources of public lands and other land and water areas in and near the Colorado River between Hoover Dam and the Mexican boundary, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. CELLER:

By Mr. HENDERSON:

H.R. 12632. A bill to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes; to the Committee on the Judiciary.

By Mr. LANE:

H.R. 12633. A bill to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes; to the Committee on the Judiciary.

By Mr. KIRWAN:

H.R. 12634. A bill to authorize the Secretary of the Interior to construct a National Aquarium in the District of Columbia; to the Committee on the District of Columbia.

By Mr. KOWALSKI:

H.J. Res. 763. Joint resolution to establish a Joint Committee on Central Intelligence; to the Committee on Rules.

By Mr. CELLER:

H. Con. Res. 700. Concurrent resolution to designate the first day of May each year as Law Day in the United States of America; to the Committee on the Judiciary.

By Mr. KOWALSKI:

H. Con. Res. 701. Concurrent resolution to establish a Joint Committee on Central Intelligence; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARR:

H.R. 12635. A bill for the relief of Tio Sien Tjiong; to the Committee on the Judiciary.

By Mr. BROCK:

H.R. 12636. A bill for the relief of Dr. John Lopinto Arzaga; to the Committee on the Judiciary.

By Mr. CONTE:

H.R. 12637. A bill for the relief of Marieta Fernandes Patricio; to the Committee on the Judiciary.

By Mr. DINGELL:

H.R. 12638. A bill for the relief of Bishara Hanna Iqal; to the Committee on the Judiciary.

By Mr. GALLAGHER:

H.R. 12639. A bill for the relief of Imre Tokodi, Piroska Tokodi and Eva Tokodi; to the Committee on the Judiciary.

By Mr. HAGEN:

H.R. 12640. A bill for the relief of Jacinto Machado Ormonde; to the Committee on the Judiciary.

By Mr. HALPERN:

H.R. 12641. A bill for the relief of Jeffrey J. Powder; to the Committee on the Judiciary.

H.R. 12642. A bill for the relief of Mrs. Eleonore Sidi; to the Committee on the Judiciary.

H.R. 12643. A bill for the relief of Miss Liu Lai Ching; to the Committee on the Judiciary.

By Mr. JONAS:

H. R. 12644. A bill for the relief of Robert H. McNeill; to the Committee on the Judiciary.

By Mr. KEOGH:

H.R. 12645. A bill to provide tax relief for the annuity fund of the slate, tile, and roofing industry of New York City and the contributors thereto; to the Committee on the Judiciary.

By Mr. McDOWELL:

H.R. 12646. A bill for the relief of Vicente Rodriguez; to the Committee on the Judiciary.

By Mr. MOORE:

H.R. 12647. A bill for the relief of Joseph (Giuseppe) Frija (Frijia); to the Committee on the Judiciary.

By Mr. RABAUT:

H.R. 12648. A bill for the relief of Ryoko Shiozaki; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 12649. A bill for the relief of Anna B. Prokop; to the Committee on the Judiciary.

By Mr. SANTANGELO:

H.R. 12650. A bill for the relief of Ho Ching Chen; to the Committee on the Judiciary.

By Mr. WIDNALL:

H.R. 12651. A bill for the relief of Jozef Gromada; to the Committee on the Judiciary.

By Mr. YOUNGER:

H.R. 12652. A bill for the relief of Jorge Alberto De Sousa Freitas; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

492. By Mr. CUNNINGHAM: Petition of Edith McCauley Provost and other members of the Omaha Tribe, in opposition to H.R. 11782; to the Committee on Interior and Insular Affairs.

493. By Mr. DOOLEY: Resolution adopted by the New York Board of Trade, New York, N.Y., expressing its opposition to the passage by the U.S. Congress of any bills now before it which would extend medical, surgical, and hospital care to those persons now covered by the Social Security Act; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

Stupidity or Madness?

EXTENSION OF REMARKS
OF
HON. LAWRENCE BROCK
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. BROCK. Mr. Speaker, the collapse of the recent summit meeting and the events preceding and subsequent thereto have been distressing to all of us, the Members of Congress, the executive branch, and the American public.

Time and history alone will eventually relate the circumstances, the fault, or the blame, if such can be properly characterized, for the incidents which the Soviet Union so conveniently utilized to disperse the scheduled talks dwelling upon peace in the troubled world, dispelling the cold war and lowering the Iron Curtain.

In all this history of international relations, and particularly those involving the very personages of the heads of government, has there been such abuse and vilification heaped upon the head of a sovereign people, as has occurred in the series of irresponsible, vitrolic, and extremely vulgar utterances by Premier Khrushchev of the Soviet Union.

While we, as officials of this Government, and the citizens of this great Republic have the constitutional right to our thoughts and expressions, if you will, as to the rights or wrongs leading to the summit collapse, we should meditate very seriously on the immediate tensions that have arisen out of this situation. Further, this is the time that, "we, the people," should unite and stand fast in support of our Chief Executive and our Government until these tensions subside and the vitriolic and polluted air is cleared.

We should bear in mind that right or wrong, he is our President and this is our Government. United, we stand but divided, we shall fall.

Mr. Speaker, I would call to your attention and to the attention of my colleagues in this House the purpose of an editorial published on June 6 in the Norfolk Daily News, Norfolk, Nebr., a progressive daily with an enterprising editorial staff.

The editorial, entitled "Stupidity or Madness?" is an excellent treatise on the summit and postsummit actions and utterances of one Nikita Khrushchev. It is a courageous piece of writing, one that endeavors to reflect our national thinking on the ultimate results therefrom.

May I, therefore, Mr. Speaker, and with the consent of my colleagues in the House, include these portions of a fine editorial in the CONGRESSIONAL RECORD, where it may be available for all to read and give sober reflection to the threat about us.

The article, in part, reads:

The world, or, at least, that decent portion of it which still believes in manners and morals, was gagged by his vitriolic attack on President Eisenhower at Paris following the collapse of the summit meetings. But his freelance repeat performance in Moscow the other day was even worse.

Khrushchev has been so arrogant and ill mannered against the man whose efforts for peace have given the world its great hope that he no longer can be regarded as a responsible leader of a major nation.

The world hasn't seen such a disgusting display of irresponsibility since Adolf Hitler was spouting curses at all who stood in the way of his designs for world conquest.

Immediate war was Hitler's aim. We cannot believe that Khrushchev really wants war. The only conclusion to be drawn is that we are watching the spectacle of a world leader roaring into the winds, cloaked in a mantle of stupidity and madness.

President Eisenhower Thanks Democratic Congressmen for Their Assurance of Support of Mutual Security Funds

EXTENSION OF REMARKS
OF
HON. JOHN BRADEMAS
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. BRADEMAS. Mr. Speaker, today is a day of great importance to the security of the United States and the defense of the free world, for we are to begin debate on the bill providing appropriations for the mutual security program.

Mr. Speaker, I was glad to be one of a group of Democratic Members of Congress who on May 25, 1960, wrote a letter to President Eisenhower assuring him that, in spite of criticisms we felt with respect to the handling by his administration of the foreign policy of our country, we would oppose any unwise cuts in the mutual security appropriations bill.

We told the President of our pride in the support which the Democratic Party has given to the Marshall plan, the Truman doctrine, point 4 and the mutual security program. We concluded:

We wish to reaffirm the policy of the Democratic Party in past years of resisting the encroachment of communism and stimulating the advance of democracy in the underdeveloped areas of the world.

Mr. Speaker, under unanimous consent, I include at this point the text of the letter to President Eisenhower to which I have referred:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 25, 1960.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We, the undersigned Democratic Members of Congress, are writing to you concerning the mutual security appropriations bill shortly to be considered by the House of Representatives.

We take note of the letters many of us have received from your Deputy Assistant expressing your gratification and appreciation for our support of the mutual security authorization bill. We take note as well of the action of the Vice President in urging Republican Members of the House Appropriations Committee to resist massive reductions in this program.

We have for the past 7 years been critical of the handling by your administration of the foreign policy of our country and in recent days we have been deeply distressed by the conduct of our affairs before the summit meeting. Indeed, some of us have just written to you a series of questions concerning the collapse of the summit conference.

We nonetheless believe the mutual security program an indispensable part of our foreign policy and we wish to advise you that we shall oppose any unwise cuts in the mutual security appropriations bill.

We are proud of the support which the Democratic Party has given to the Marshall plan, the Truman doctrine, point 4 and the mutual security program. We wish to reaffirm the policy of the Democratic Party in past years of resisting the encroachment of communism and stimulating the advance of democracy in the underdeveloped areas of the world.

Respectfully,

CHET HOLIFIELD, 19th District, California; CHESTER BOWLES, Second District, Connecticut; STEWART L. UDALL, Second District, Arizona; JAMES ROOSEVELT, 26th District, California; CLEMENT W. MILLER, First District, California; CHARLES O. PORTER, Fourth District, Oregon; HUGH J. ADDONIZIO, 11th District, New Jersey; MARTHA W. GRIFFITHS, 17th District, Michigan; EMANUEL CELLER, 11th District, New York; GEORGE A. KASEM, 25th District, California; CHARLES C. BIGGS, JR., 13th District, Michigan; ROBERT N. GIAIMO, Third District, Connecticut; THOMAS J. LANE, Seventh District Massachusetts; LEONARD G. WOLF, Second District, Iowa; LEE METCALF, First District, Montana; FRANK THOMPSON, JR., Fourth District, New Jersey; JOHN BRADEMAS, Third District, Indiana; EDITH GREEN, Third District, Oregon; JEFFREY COHELAN, Seventh District, California; JOSEPH KARTH, Fourth District, Minnesota; JOHN A. BLATNIK, Eighth District, Minnesota; LEONARD FARBSTEIN, 19th District, New York; HERMAN TOLL, Sixth District, Pennsylvania; RALPH J. RIVERS, At Large, Alaska; JAMES G. O'HARA, Seventh District, Michigan; JOHN R. FOLEY, Sixth District, Maryland; EUGENE J. KEOGH, Ninth District, New York; WILLIAM J. GREEN, JR., Fifth District, Pennsylvania.

Mr. Speaker, Mr. FRIEDEL, of Maryland, also asked to be associated with the letter.

Under date of May 31, 1960, I received, as the signatory of the May 25 letter on behalf of my colleagues, a letter from President Eisenhower expressing his appreciation for our assurances of support for this program.

Said President Eisenhower, "It is gratifying to me, and reassuring, that we are in full accord in respect to this activity so basic to our security and the future of freedom everywhere."

Mr. Speaker, under unanimous consent I include at this point in the RECORD

President Eisenhower's letter of May 31, 1960:

THE WHITE HOUSE,
Washington, May 31, 1960.

Hon. JOHN BRADEMAS,
House of Representatives,
Washington, D.C.

DEAR MR. BRADEMAS: I hope you will advise the cosigners of your May 25 letter of my appreciation of their assurance, and of yours, that your group will steadfastly support adequate funds for the mutual security program. Of course I am aware that we may differ on certain aspects of the Nation's affairs, but it is gratifying to me, and reassuring, that we are in full accord in respect to this activity so basic to our security and the future of freedom everywhere.

With best wishes.

Sincerely,

DWIGHT EISENHOWER.

REPUBLICAN EX-CONGRESSMAN STRONG ON WORDS, WEAK ON DEEDS

And, Mr. Speaker, if I may be permitted to make a personal reference, as I listen to some of the criticism directed at me by my Republican predecessors in Congress because I am among those Members of Congress from both sides of the aisle interested in having more facts about the U–2 incident—as I listen to some of my Republican predecessor's criticisms, I am constrained to point out that the voice of the demagog is once more heard in the land.

For the Republican ex-Congressman who seeks to cover with a blanket of silence an honest and essential discussion of foreign policy events that may deeply affect the security of our country is very strong on words but very weak on deeds in the support of freedom against the menace of communism.

REPUBLICAN EX-CONGRESSMAN VOTES AGAINST EISENHOWER PROGRAM

For, Mr. Speaker, the Republican ex-Congressman to whom I refer on May 14, 1958, voted for the mutual security authorization bill but on July 2, 1958, turned right around to vote against the mutual security appropriation bill. This Republican ex-Congressman thus cast his vote against a program which President Eisenhower has repeatedly insisted is essential to the defense of the free world against the forces of communism.

Mr. Speaker, I voted for the mutual security authorization bill and I shall vote for the mutual security appropriations bill as well. The times are too dangerous to be able to afford the doubletalk of voting for the first and against the second.

Mr. Speaker, under unanimous consent I insert at this point the text of a letter to me dated May 17, 1960, from Bryce N. Harlow, deputy assistant to the President, concerning my vote in support of the mutual security authorization bill:

THE WHITE HOUSE,
Washington, May 17, 1960.

Hon. JOHN BRADEMAS,
House of Representatives,
Washington, D.C.

DEAR MR. BRADEMAS: On Saturday last, as he completed preparations for the summit conference in Paris, President Eisenhower requested me to send to you, in his behalf, this note of gratification and appreciation for your support of the mutual security authorization bill. He stressed once again his profound conviction that this program is indispensable to our own and free world defense against Communist imperialism, and indispensable also in encouraging struggling millions in less fortunate nations in their effort to live their lives in freedom. It is a program requiring, he said, unreserved support by all of our informed citizens and officials, and he feels it would be the height of folly to allow isolated administrative shortcomings and disappointments, or local considerations, political or otherwise, to tempt anyone to jettison or cripple the entire undertaking.

Especially the President voiced this hope, and asked that it be communicated to you in his behalf: that your responsible act of support for the mutual security authorization be matched by a determined resistance to any effort to effect massive reductions in the mutual security appropriations soon to be considered by the House. Massive reductions, he pointed out, can be accomplished only by undermining our own security, free world security, and the cause of human freedom everywhere in the world.

The President asked me to explain that he would have advised you himself of these views had his time permitted before leaving for Paris.

With best wishes.

Sincerely,

BRYCE N. HARLOW,
Deputy Assistant to the President.

Mr. Speaker, I hope very much that we Democrats will support adequate funds for the mutual security program. It is in the interest of our country and of the cause of human freedom that we do so.

"Genocide Day" for Baltic Peoples

EXTENSION OF REMARKS
OF
HON. EDWARD J. DERWINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. DERWINSKI. Mr. Speaker, the understanding of current world problems is facilitated by placing them in a historical sequence since the events of the past, when duly documented, are a great aid to us in the consideration of current problems and plans for the future.

Today, June 14, sadly and with a sense of frustration, we make note of what is historically described as Genocide Day. In June 1941 the forces of the Soviet Union conducted mass deportations of Latvians, Lithuanians, and Estonians to central Russia from which area very few ever returned to their homeland. The purpose of these deportations was to complete the consolidation of control of the Communists over these previously independent Baltic peoples. Each of the three Baltic States, Estonia, Latvia, and Lithuania, had a long history of nationalistic opposition to Russian control, inspired, in a great part, by the religious structures of the countries which provided the people additional strength and the will to resist. In the previous period from 1918 to 1940, they made remarkable strides in developing as free nations.

Mr. Speaker, we, in these days of renewed international tensions should reiterate our solemn promise to these brave peoples that the conduct of our foreign policy pledges us to work so that they may eventually regain their freedom from the present oppressive Communist slave regime.

Million Filipinos Greet President Eisenhower

EXTENSION OF REMARKS
OF
HON. DANIEL J. FLOOD
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. FLOOD. Mr. Speaker, relevant to the visit of the President to the Far East including the Philippines, there appeared a leading editorial in the Journal of Commerce of New York in its issue of Tuesday, June 7, 1960. Under leave to extend my remarks in the RECORD, I include herewith this timely editorial:

A PARTICULAR IMPORTANCE

In a letter to Senator WALLACE BENNETT, Republican, of Utah, last week, President Eisenhower said he attaches "particular interest" to congressional enactment of a 4-year extension to the Sugar Act together with flexible authority for the President to change U.S. quotas for foreign producers.

We should think he would attach particular importance to it. We should think Congress would, too, including the House Agriculture Committee, which just voted a simple 1-year extension of the act, and the Rules Committee, which is now considering what priority, if any, the subject should be given on the floor.

For as matters stand today, what the Agriculture Committee has done has been to vote a handsome dividend for Mr. Fidel Castro, that well-known exponent of the democratic way of life in Cuba, while threatening to deprive the President of something that could prove very valuable to him and to American foreign policy generally in the course of his forthcoming visit to the Philippines and the Far East.

As the law stands today, and as it would stand until the end of 1961 under the 1-year extension of the Sugar Act approved by the Agriculture Committee, whenever any domestic sugar-producing area cannot fill its assigned quota, the Secretary of Agriculture must award a substantial proportion of the shortfall to Cuba.

And right now it looks as though Puerto Rican output will fall short of its quota by 300,000 tons and the Hawaiian crop by 200,000 tons.

So the prospect is that unless Congress as a whole overturns this ill-advised move on the part of the House Agriculture Committee, Dr. Castro's regime will automatically get a bonus of 160,000 tons as a reward for his confiscatory attacks on American business and for his incessant vilification of the United States and its institutions. This assumes, of course, that Cuba could actually supply that much, which is very doubtful.

As we previously remarked in discussing this subject, if anyone has ever demonstrated the need for an extensive overhaul of U.S. legislation on sugar quotas, it is Dr. Castro. It is ridiculous that U.S. controls should be so rigidly fixed that they cannot be adapted to changing circumstances in general, and to deal with as consistently bad an actor as Castro in particular.

But the shortcomings in the present Sugar Act were evident long before the present Cuban regime shot its way into power.

President Eisenhower himself called attention to some of these when in signing the present act 4 years ago, he said explicitly that in any further extensions of the act, provision ought to be made to permit the Philippines to enjoy the same proportionate share of increasing American consumption as is enjoyed by other countries.

Not only is the present system too rigid, but its rigidity is fixed in such a way that it discriminates painfully against a country whose steady friendship and cooperation is of the utmost importance to the United States.

It would be one thing to be caught in a situation in which a rigid system of controls permitted no change to be made for a period of years, as might be the case if, say, the Sugar Act had 2 or 3 years to run.

But it is quite another to find the way open to such a change, and then fail to make it. The way is now open, for the 1956 Sugar Act (which was of 4 years' duration) expires at the end of this year, so Congress must deal with it in one way or another during 1960 or the whole quota system will collapse.

But here we face a peculiar situation. Congress has ordered the administration to stop all foreign aid to Cuba—an action we thought and still think unwise because we believe the administration should have more discretion in such matters. Now, the House Agriculture Committee, and some other legislative circles, seem bent on refusing the President the discretionary powers he needs to cut down on the quota bonuses that would automatically go to Cuba under the existing law. Moreover, he is still frustrated in his efforts to achieve a better break for the Philippines, which certainly deserve one.

It certainly doesn't make sense, unless it is expressed in terms of a conviction that Congress is better-equipped than the President to handle the day-to-day twists in our foreign relations, economic as well as political, a conviction from which we heartily dissent.

We very much hope that more responsible quarters in the Senate and House will grasp that "particular importance" of passing a sensible 4-year sugar bill, and of doing so before the President sets off for the Philippines.

On Sunday, June 12, the New York Times carried two articles datelined Havana entitled "Reds Stepping Up Missions to Cuba" and "American Hotels Seized in Havana."

How much more of the Castro regime can the American people stand?

On the other hand, we were told a few days ago by Secretary of State Herter who spoke before the SEATO Council, that further Communist activity in the Far East is likely as an aftermath of the failure of talks at the summit. We have our firm friend and ally, the Republic of the Philippines, with 600 million Chinese Reds breathing down the back of her neck. It is time, Mr. Speaker, that we had a reevaluation of the world situation with respect to the United States and the millions of our friends in the Far East, especially the Republic of the Philippines.

Philippine-American relations have rather been subjected to a rough beating. Long unresolved problems between the two countries have generated irritants which in turn have developed into big thorns in the side of Philippine-United States friendship. Most of these irritants are caused by misunderstandings. President Eisenhower can do much to dispel these misunderstandings.

As a matter of fact, in the statement made by President Eisenhower as his reasons for the trip he stated and I quote:

I am going to these countries: Because with the Republic of the Philippines we have the closest ties of association beginning six decades ago, and because it was in the Philippines many years ago that we launched our first major program to help a developing people achieve a prosperous independence.

PHILIPPINE SUGAR

Every American is aware of the sacrifices of our friend and ally, the Republic of the Philippines made during World War II. The sacrifices of the Philippine sugar industry because of its experience during World War II is even more pronounced when you consider that sugar lands and processing factories were devastated and destroyed. Recovery and rehabilitation were slow because of the shortage of machinery and the lack of cane seeds, work animals, and agricultural implements. It actually consumed more than the proverbial 7 lean years by Philippine sugar producers to attain their prewar position. In the period from 1941–53, the Philippines shipped to the United States only 4,433,501 short tons out of what would have been their share of 12,376,000 short tons. Other foreign sources, principally Cuba, supplied the difference of almost 8 million tons lost by the Philippine sugar interests through no fault of their own. The facility with which U.S. sugar users were able to obtain the sugar supply curtailed by the war in the Fart East is commendable and has been recognized and rewarded. The Philippine sugar industry by the same token should not be deprived of its opportunity to come back to some extent through sharing with other foreign suppliers the increased demand in U.S. sugar consumption.

During 8 years after the liberation of the Philippines, sugar lost its preeminent position as a Philippine export product and ranked second to copra in importance. Today, however, the sugar industry is again on its prewar productive capacity and from now on will provide the country with a source of dollar income of $100 million annually. Moreover, the industry is a major source of revenue to the Philippine Government. According to recent estimates 25 percent of its total receipts is derived from the sugar industry.

Among all foreign suppliers no other country occupies the position of the Republic of the Philippines in its relationship with the United States and no fair analogy might be drawn between United States-Philippine relations and other international connections and loyalties. For more than 50 years the Philippines to all intents and purposes were a part of the United States and the continuing interest of the Government and citizens of the United States in promoting the welfare of the relatively new Government of the Philippines has been manifested in many generous gestures. To detach sugar legislation from a broad program of diplomatic, legislative, political, economic and social collaboration and cooperation, and to adopt standards based on such considerations as the payment of duties, the assistance to other countries in exploitation of agricultural resources or in other respects on an arms length basis affords an anomaly in U.S. official and unofficial conduct.

At this point it may be well again to clarify what seems to be an impression, mistaken though it is, that the fixed Philippine quota of 980,000 tons annually cannot be increased due to the provisions of the Sugar Act and the trade agreement in force between our country and the Philippines. Article II of the Philippine Trade Agreement Revision Act of 1955 specifically provides:

The establishment herein of the limitation on the amounts of Philippine raw and refined sugar that may be entered, or withdrawn from warehouse, in the United States for consumption, shall be without prejudice to any increases which the Congress of the United States might allocate to the Philippines in the future.

There are many other strong economic and political reasons for including in any revisions which this Congress makes of the Sugar Act for the period commencing January 1, 1961, an increase in the Philippine quota commensurate with other foreign suppliers to meet the annual increased sugar needs of the United States. I shall not elaborate upon them, but point again only to the moral obligation which we have to act in this manner in fulfillment of the promise of the President of the United States reflected in the editorial which I have quoted to the effect that at this very time we would allow the Philippines to share in increased consumption.

Address by James C. Oliver Before the Ahepa Tristate Convention

EXTENSION OF REMARKS
OF
HON. JAMES A. BURKE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. BURKE of Massachusetts. Mr. Speaker, on Sunday, June 12, 1960, at the Ahepa Tristate Convention, Portland, Maine, our distinguished colleague, the gentleman from Maine [Mr. OLIVER], made a noteworthy address which I feel could give inspiration to all of us and which I deem a pleasure to include in this RECORD. The address follows:

Mr. Chairman, it is with a deep sense of humility that I speak here today before you, a distinguished assembly of American citizens of Greek-American extraction.

Yet, it is most appropriate that I, as an elected public official, holding office through the indulgence of a free electorate in one of the greatest, if not the greatest, of all assemblies of free men, the U.S. House of Representatives, should take advantage of this great privilege which you have accorded me to address you, the dedicated members of Ahepa.

For, as your freely elected Representative, here in this meeting assembled today, I take this opportunity to speak to you of liberty and freedom, as fought for and practiced by the ancestors of all of us. I, also, must avail

myself of this opportunity to warn you that the threat of loss of freedom hangs heavily over us and, in fact, over the entire world.

Today we face a common foe, not only in Greece and in America but in every section of the world, more ruthless, more cunning, more determined, more barbarously willing and eager to enslave mankind than were the Huns, the Slavs, the Persians, and all the other power-drunk conquerors of the ages.

The Soviets and the Red Chinese, ladies and gentlemen, have never changed their spots. These despoilers of freedom are dedicated to the conquest of peace-loving and freedom-worshipping peoples of the Western World. Their boast that they will bury us is no idle talk. This is no game which they are playing for mere marbles of gain. They are playing in deadly earnest and for keeps. We are fat, we are complacent, we are unwilling to listen to the hard facts and the harsh realities of the world in which we live today.

Your family ancestors in Greece for centuries faced up to the facts of life, as for example at Thermopylae and Salamis. A small and battered slab of marble discovered about a year ago in Troizen, just south of Athens, tells, through its inscription, of the battle orders issued by Themistocles when the Persians were on the march from Sardes, the seat of their government.

This slab and its inscription of fighting words has been described by its discoverer as the Athenian equivalent of our Declaration of Independence.

In truth, this battle order cut in marble backgrounds the crucial victory of the Greeks that followed at Salamis over the greatest empire of that period of history. It gave your ancestors command of the sea. It restored their freedom to pursue their ideals of liberty and made possible their golden age for which mankind has ever since gained the political and cultural inspiration which will never be extinguished.

So, my friends, we know from the past that we must fight for freedom and the heritage of liberty which, in fact, have been passed to us in this generation on a silver platter and which we are destined to lose if we fail to wake up to the threatening clouds which are becoming ever blacker, almost daily.

Then, again, as we refer in rather inadequate words to another episode in the glorious history of your great fatherland, we are once more inspired by the bravery and the indomitable courage of the Greek people and its leadership of the past.

It was 139 years ago when Archbishop Germanos of Patras raised the standard of revolt in his monastery at Kalavryta against the Turks on March 25, and his people joined him in this national struggle against their oppressors, his daring act ushered in a new day for the Greek people. That courageous deed by a stouthearted dignitary of the Greek Church marked a sharp break from the events of preceding centuries when Greeks were subjected successively to the Romans, the Frankish kings and the Turks. That day became the independence day of the Greeks.

We in this country have always held the Greeks in exceptionally high esteem. We have always had great sympathy for them, and have done our utmost to help them whenever we could. In their fight for freedom and independence against the tyranny of the Turks, and especially in their desperate struggle to maintain their independence against fascism, nazism, communism, and all forms of totalitarianism, they have counted upon our sympathy and on our aid. We are proud to say that fortunately we have been in a position to help them and have not disappointed them. And this has been true in the past as it is at present.

In the early days of the Greek war of independence a number of philhellenic groups were formed in this country for the purpose of raising funds and thus extending material aid to the fighting Greeks. A wave of philhellenic enthusiasm swept over America. President Monroe himself was not immune to the contagion of this philhellenism. This is clearly shown in his annual message on December 3, 1822, when he gave some reasons for our interest in the Greek cause. "The mention of Greece," he said, "fills the mind with the most exalted sentiments and arouses in our bosoms the best feelings of which our nature is susceptible. Superior skill and refinement in the arts, heroic gallantry in action, disinterested patriotism, enthusiastic zeal and devotion in favor of public and personal liberty are associated with our recollections of ancient Greece. That such a country should have been overwhelmed and so long hidden, as it were, from the world under a gloomy despotism has been a cause of unceasing and deep regret for ages past. It was natural, therefore, that the reappearance of those people in their original character, contending in favor of their liberties, should produce that great excitement and sympathy in their favor which have been so signally displayed throughout the United States. A strong hope is entertained that these people will recover their independence and resume their equal station among the nations of the earth."

This was an eloquent and welcome explanation. As the elected head of the government of this country, he expressed the feeling of our people. No less eloquent was Daniel Webster, perhaps the most illustrious statesman-orator of his day, when he characterized the Greek War of Independence as part of a greater struggle between the absolute and the regulated governments. He stated that America could not and should not hold aloof from world affairs, and it was time for the people and the Government of this country to take a stand. "As one of the free states among the nations," he declared, "as a great and rapidly rising republic, it would be impossible for us, if we were not disposed, to prevent our principles, our sentiments, and our example from producing some effect upon the opinions and hopes of society throughout the civilized world." "Our side of this question," he added, referring to the Greek War of Independence, "is settled for us, even without our own volition. Our history, our situation, our character, necessarily decide our position and our course before we have even time to ask whether we have an option. Our place is on the side of free institutions."

There are many fine thoughts and noble ideals in these few sentences of that inimitable orator-statesman, but the core is found in the last sentence, for it reflects the full and free American spirit; our place is, and has always been, on the side of free institutions, erected and kept erect by free men. And the Greeks were among the forerunners of free men who founded free institutions and fought for their preservation.

Nor has our expression of sympathy and our show of kinship of ideas with the Greeks been limited to mere words and declarations. It is well known that whenever Greeks have been in trouble, in need of material aid, we have been generous in helping them. This has been particularly true at the end of the First World War, and, of course, more so during and since the end of the last war. Early in the course of that war, when Greece was overrun by the Axis forces, our wartime President, the late Franklin Roosevelt, declared confidently that Greece would be liberated and rewarded for her heroic fight on the side of democracies against the forces of barbarism and darkness. He certainly echoed the true and genuine sentiment of the people of this country when he said: "I am glad to have the opportunity to reassure my friends of Greek origin and Greek birth everywhere that it is the desire of the American Government to help Greece to the utmost of its capabilities."

Our postwar role in Greek affairs, our aid to Greece, both financially and militarily, is rather widely known and I need not dwell upon them in detail. As soon as circumstances permitted, toward the end of the last war, we were more generous in aiding Greece than at any time in our history. In March 1947 when we were asked by the hard-pressed Greek Government for urgent emergency and military assistance, we felt that it was our duty to comply with this request. The then President Truman felt that it was our solemn responsibility to give all we could to save Greece from the tightening clutches of communism. In his message to Congress on March 12, the President declared: "I do not believe that the American people and the Congress wish to turn a deaf ear to the appeal of the Greek Government."

Here again the President was echoing the sincere wishes of our people. We could not turn a deaf ear to the appeal of the Greek Government, even though we had already expended more than $500 million in the form of supplies, lend-lease aid, and under the United Nations Relief and Rehabilitation Administration. Fortunately, we had some more expendable dollars, and we did not seem to mind to add close to $3 billion worth of aid to the Greeks. Yes, the Greeks have deserved well of us. I am indeed glad to say that we were able and willing thus to pay at least a part of our intellectual debt which we all feel humanity owes to Greece and to the Greek genius.

In their enthusiasm for creative things of lasting value, the attainments and accomplishments of the Greeks remain unsurpassed and unequaled. In their fervent enthusiasm for liberty and democracy, they have struggled against great odds, have fought bravely and have guarded their democratic institutions tenaciously. For almost 2,000 years, from 146 B.C. to A.D. 1821, Greece was ruled by the Romans, the Frankish kings, and by the Ottoman Turks. From the Battle of Corinth in 146 B.C. when Greece was overrun by Roman legions to the Battle of Navarino in 1827 when the tyranny of the Ottoman Turks was finally brought to an end in Greece, Greeks lived under alien rule, but during those centuries their spirit of freedom was not extinguished; their dauntless will to fight never deserted them. And the best proof of that was the long, often despairing, and almost endless fight which they carried on for 8 years before they could attain their freedom and independence.

While we are discussing the Greek heritage to the civilization of the free world it would be most remiss of me to neglect a brief reference to the tragedy of Cyprus where the Greek majority have been frustrated for too long in their legitimate fight for this preponderantly Greek area. The gallant struggle, symbolized by the dedicated efforts of that great patriot, Archbishop Markarios, will eventually succeed and the ends of justice will be served. Of this, I feel certain.

Today, my friends of Ahepa, these memorable events of history inspire us to defend our freedom and liberty, eternally, against the impending and potential dangers of totalitarian tyrants.

I should speak, if time permitted, of the great contributions which have been made to America by those in your families who came to our shores and now comprise in every center of population in the United States the core of God-loving, law-abiding, public spirited citizenry, which has helped to make and will continue to help to keep America great.

I would speak, my friends, if time permitted of the cultural contributions which America has gained from the illustrious his-

tory of Greece and its people down through the centuries. For these America is profoundly grateful.

But the greatest contribution of all is the philosophy of the dignity of man and of the freedom of the individual. It is for these that freedom loving people all over the world must be the most grateful. It is for these priceless values that we must prepare to fight when threatened. It is for this heritage which our forefathers died to preserve that we will fight to defend against any and every enemy of human self-respect wherever and whenever he shows his ugly head and his rocket rattling belligerency.

In closing, ladies and gentlemen, my friends of Ahepa, may that day never come again when we shall be compelled to fight in defense of these greatest of all assets of mankind, freedom and liberty, but, if, God forbid, it does come then in the philosophy of the song of the Greek heroes of the ages, we shall find this to be our one and only reply:

I may have a rock for my pillow
And only the snow for my cover
But I will never serve as a slave!
Dig a grave for me
Large and deep,
That I may stand with my gun—
Ready to fight.

The Baltic Peoples and Their Tragic Fate in 1940

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. MULTER. Mr. Speaker, the modern history of the Estonians, Latvians, and Lithuanians has been fraught with much tragedy relieved by occasional triumph. Centuries before World War I they had lost their independence and lived under foreign regimes.

The end of that war ushered in a new era for these peoples. All three regained and proclaimed their independence in 1919, established their own democratic governments. These governments were duly recognized by other countries and they became members of the world community of nations.

During the period of freedom which they enjoyed during the interwar years, they rebuilt their war-ravaged countries, and were perfectly content with their lot. Unfortunately, however, in the larger world of international politics and diplomacy they were not masters of their fate.

With the rise of totalitarian governments both in Germany and in Russia the Baltic peoples found themselves in a very precarious position. They succeeded in maintaining their independence until the outbreak of the last war, and then brute Soviet force became the arbiter of their fate.

As the friends of these peoples in the West became involved in the war, the Soviet Union felt free to deal with the Baltic peoples as its dictator wished—to occupy and annex these countries and enslave their inhabitants. This was done not only in a high-handed manner but by resorting to barbaric methods.

By early June 1940 these countries were occupied by the Red army and at about the middle of the month the Soviet authorities in these countries rounded up all those suspected of opposing communism, numbering hundreds of thousands, and exiled them to the distant corners of the Soviet Union. From that day to this, 20 years after that tragic event, we still do not exactly know the fate of these helpless and unfortunate people who were arrested, herded into freight cars and destined to incarceration, servitude, and even death in desolate parts of the Soviet Union.

Today it is possible that some of these people, who survived the terrible years in exile, have returned to their homeland, but it is more probable that most of them have died in exile and misery, far away from their beloved homeland.

In observing the 20th anniversary of that tragic event, the Soviet deportations of men, women, and children by the hundreds of thousands in 1940 from the Baltic States, we pray for the souls of these brave but helpless people.

Sound Debt Management

EXTENSION OF REMARKS
OF
HON. JACK WESTLAND
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. WESTLAND. Mr. Speaker, last week the gentleman from Texas [Mr. PATMAN] took note of the recent Treasury offering to exchange up to $5½ billion of new 4-year notes and 8-year bonds for outstanding securities maturing on November 15, 1961. The gentleman views this offering as a giveaway, inasmuch as the existing bonds are earning interest at 2½ percent, whereas the new notes and bonds will earn rates of 3¾ percent and 3⅞ percent, respectively.

The gentleman's predilection for perpetually low interest rates, which could only lead to disastrous inflation, are well known to us, and need not be repeated at this time. It is important that the record be set straight, however, and that the current Treasury operation be judged for exactly what it is—a sound and imaginative debt management transaction that will ease the task of the next administration and benefit the American people.

The facts are these. On November 15, 1961, $11.2 billion of 2½-percent bonds come due, of which almost $11 billion are held by public investors. This huge amount is the largest publicly held maturity now outstanding. The easiest course for Secretary of the Treasury Anderson to take would be to do nothing, but simply ignore the problem that will confront the Treasury in November 1961.

If the size of this maturity is not in some way reduced, the pressure on the Government securities market in November 1961 could be almost unbearable. As anyone even vaguely familiar with the market mechanism knows, $11 billion of securities is simply too much to refinance efficiently at one time. Any attempt to do so would shoot interest rates upward and could greatly disrupt the market. This could do serious damage to the cause of sound Government finance. It would not be responsible for Secretary Anderson to ignore this problem.

The gentleman from Texas implies that it is foolish to offer securities with higher interest rates for outstanding bonds with lower rates. He attempts to compare the situation with an individual who might voluntarily refinance a home mortgage or an automobile loan at a higher rate. But I am sure that all of us would agree that such an action, rather than being improvident, would be quite appropriate if the individual were confronted, as is the Treasury, with a huge amount of debt coming due all at once. Such an individual would be wise to arrange for refinancing some of the debt well in advance, even if he had to pay a little more in interest to do so. Moreover, there is no assurance at all that the Treasury will be paying more interest for this necessary debt extension than if it waited until November 1961 to meet the problem. In fact, the necessary rate of interest to refinance $11 billion of securities at one time could be very high indeed.

There is another important reason for the Treasury offering. The refusal of the Congress to remove the 4½-percent interest rate ceiling has forced the Treasury to sit by while the outstanding marketable debt has grown shorter and shorter in maturity. Today, almost 80 percent matures within 5 years. This progressive shortening of the debt cannot be viewed with complacency; it is highly dangerous. It forces the Treasury to come into the market more frequently and for larger amounts, and it complicates the problems of avoiding inflation, because the shorter a security gets, the more like money it is.

Thus, the current offering is a sensible and well-designed attempt to stretch out some of this ever-shortening debt. The Treasury is offering a coupon rate of 3⅞ percent on the new 8-year bond. It is willing, as stated many times, to sell a reasonable amount of such bonds, and would have done so in the past year, but the 4½-percent ceiling has prevented such action.

The record should also be set straight on the net interest cost of this operation. The gentleman from Texas maintains that the extra interest payable between June 23, 1960, and November 15, 1961, to those holders who elect to exchange will come to $130 million on the whole $5.5 billion. The gentleman's arithmetic confuses me, because I come up with an additional cost, for that period alone, of about $99 million. But this is not the significant figure, if we agree, as we should, that some debt extension at this time is imperative, lest our huge public debt grows ever shorter in maturity. The true net cost, then, must be judged in terms of what it would cost the Treasury today to obtain the debt extension beyond November 1961

represented by the new 4-year notes and 8-year bonds. Assuming market conditions in November 1961 are as they are today, such securities would have to carry interest rates no less than 4½ percent and 4⅛ percent, respectively. On this basis, the net cost to the Treasury of achieving this valuable debt extension is less than $25 million, a modest amount indeed in view of the good that will be achieved.

Finally, note should be made of the reference of the gentleman from Texas to this offering as a "big giveaway." If such were the case, we would expect current holders of the 2½-percent bonds to be clamoring to exchange for the new securities. But the New York Times noted the other morning—June 9—that, as the books opened yesterday, "dealers in Government securities continued to sense that the Treasury invitation would meet largely with indifference." This is hardly a picture of a gigantic giveaway.

Mr. Speaker, the man who occupies the position of Secretary of the Treasury in November 1961, regardless of party, will owe a large debt of gratitude to Secretary of the Treasury Anderson for his courage and imagination in making this current offering. Rather than criticizing this action, the Members of this body should rise up with a resounding vote of thanks.

Captive Nations Week

EXTENSION OF REMARKS
OF
HON. EDWARD J. DERWINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. DERWINSKI. Mr. Speaker, due to the insistence on the part of the Democratic Party leaders to ignore the taxpayers and suspend congressional work for purpose of their preconvention activity, I would call the attention of the Members to a very important commemorative occasion which deserves our complete attention and support.

I hope that we can all put aside partisan feelings and cooperate in the observance of Captive Nations Week, July 17–23, to display to the world the concern of individual U.S. Congressmen for lack of freedom that exists in these unfortunate countries now engulfed behind the Iron Curtain.

I need not remind you of the tragic consequences of the Yalta and Potsdam agreements that drove these people into political slavery. Groups of dedicated American citizens who are concerned with the plight of people in Rumania, Hungary, Bulgaria, Czechoslovakia, Poland, Lithuania, Latvia, Estonia, Yugoslavia, East Germany, Ukraine, and other segments of the Russian Empire will be using that week to remind all Americans of the desire to maintain interest in these Iron Curtain countries and work effectively toward their eventual freedom.

Since freedom is such a precious thing, we who often take its blessings for granted could learn much observing and understanding the suffering of those who have lost their freedom to the ruthless atheistic Communist regimes.

Captive Nations Week must be remembered by all of us. I appeal to you to give it your attention in the period between the national conventions.

Massachusetts 1960 Convention of Veterans of World War I

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include part of my remarks as guest speaker at the department of Massachusetts 1960 convention held on June 11, 1960, at Springfield, Mass.:

Greetings, the Veterans of World War I, of the U.S.A., is less than 2 years old.

Even though the average age of our membership is in the sixties, we believe that our greatest period of growth is just ahead of us. In fact, there will be a few of our comrades left to remind the Nation of our service, and to our ideals, in the year 2000.

To those who say that our organization exists for one purpose only, I say that during the next 10 to 20 years we shall develop a fullbodied program to strengthen our national heritage, and to protect our freedom.

In line with this, we have taken steps toward the creation of a memorial to the veterans of World War I.

It is likely that it will be built in the vicinity of Washington, D.C., near the site of a famous Civil War battlefield. Its proximity to Arlington National Cemetery and other heroic shrines will emphasize the courage which unites all who have fought in defense of our liberties, through the generations.

This is a good beginning.

World War I had its special goals, that gave a new vision to our national purpose.

Under the farseeing leadership of President Wilson, we were in step with the future. Although the cause for which we fought and bled was betrayed by politics at home, and by conspiracies abroad, we know that we did not sacrifice in vain. The enemy of 1917–18 is the friend of today—and one of the allied powers of those days, seized by the new tyranny of communism—has become the oppressor that would conquer the world.

In this age of swift communications, and of missiles that leap across the oceans, the need becomes more imperative for a world organization to eliminate warfare. And when that time comes, the world can look back to Woodrow Wilson and to the men who fought to make the world safe for freedom.

Before we achieve that goal we shall have to overcome many dangers, and to learn new techniques for turning back the Communist challenge to our survival.

Around the clock, communism is waging war against us with economic and political, and psychological weapons.

And because of this invisible but unrelating strategy, many of our people find it hard to comprehend that we are presently engaged in a war where we could suffer defeat and slavery without a shot being fired.

The zigs and zags of Communist policy are directed against the minds of the free world in order to confuse, disarm, and demoralize us for the Communist takeover.

We were shocked and dismayed when Khrushchev sabotaged the summit conference and insulted the President of the United States.

But we should have been prepared for any eventuality, including that one, and should have been ready with measures to counteract it.

Our great weakness is the belief that the Communists will respond to reason, when we should know by this time that they will exploit every sign of weakness or indecision on our part.

In the field of psychological warfare we sometimes help them without realizing it.

When Khrushchev wrecked the summit conference it was news—sensational news—but we did not have to play it up to the extent that we did. I noticed on one day that a highly respectable New York newspaper carried six separate stories on its front page, each one of them containing the name of Khrushchev in its headlines. This overemphasis gave to the Communist dictator the recognition and the prestige that he does not deserve. In other words, he scored a propaganda victory, and this newspaper helped him to exploit it—by featuring him in six front-page stories.

This is but one example of how the Communists play upon your gullibility, and use us to further their own ends.

For several years I have been disturbed by our preoccupation with the defense. This is a negative frame of mind, that gives every advantage to the Communists. It betrays fear of initiative, and fear of mounting the counteroffensive to win the minds of men.

The Communists spend on brainwashing, $2 a year for every person in the free world, while we spend only 2 cents for each person within the Communist orbit in an effort to reach them with the truth.

To expose the lies of Communist propaganda which so often hypnotize innocent people and then to advance the missionary work of freedom, we must enlarge and intensify our program not only to help the underdeveloped countries, but to nourish and strengthen the underdeveloped minds, in the West as well as in the East.

Remember how the Communists promoted the so-called Stockholm peace petition a few years ago and induced millions of well-meaning people in the free world to sign it? Under the cloak of the word "peace" which appeals to most of humanity, they sought to lull the free world into a sense of false security. Fortunately, more realistic minds saw through this clever maneuver, and were not fooled by it.

Although myself and a few other Congressmen vigorously protested against the invitation of the White House to have Khrushchev visit the United States, we opened the doors of our hospitality to him.

Many Americans deluded themselves with the hope that he would be impressed and softened by the evidence of our material prosperity. But in one of his tantrums at Los Angeles he threatened to "bury us," if we failed to appease him by concessions that would mean surrender on the installment plan.

Soviet diplomacy is not diplomacy in the accepted meaning of that term. It is a principal weapon among the many used by Soviet propaganda. "Every form of exchange between Communist and other countries, whether diplomatic, cultural, commercial or technical, is conceived and worked out with propaganda in mind." According to Suzanne Labin who wrote "The Unrelenting War," a study of the strategy and techniques of Communist propaganda and infiltration.

"All members of Soviet missions abroad are trained primarily to charm and hoodwink high political or financial circles in the countries they are to undermine."

J. Edgar Hoover, Director of the FBI, aptly described the Communists as "masters of deceit."

But, in spite of these warnings, too many Americans are apathetic toward the danger.

The Congress is forcing the administration to strengthen our retaliatory power in order to discourage and prevent a massive surprise attack upon the free world.

But this is not enough.

Our one, dangerous, unprotected front is psychological, political.

On the battlefield of "the war of minds" it is folly to sit back and wait. We must advance toward definite goals and with firm purpose.

Earlier in my remarks, I mentioned the need of a well-rounded and positive program for the Veterans of World War I, of the U.S.A.

As we are the older veterans, we must assume the responsibility of leadership in order to make our country strong and to keep it vigilant.

But we also have needs of our own, and those needs have been neglected by the Federal Government. Our self-respect requires that we battle to overcome the benefits deficit that has discriminated against the veterans of 1917–18.

We shall attain equality with our fellow veterans of other wars only when we finally succeed in winning a service pension for all honorably discharged veterans of World War I.

The Trail of Hoover's Life an American Heritage—Speech at the Dedication of the Hoover Boy Scout Trail at West Branch, Iowa, Saturday, June 11, 1960, by Congressman Fred Schwengel

EXTENSION OF REMARKS

OF

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 14, 1960

Mr. SCHWENGEL. Mr. Speaker, on Saturday, June 11, I was privileged to be the principal speaker at the dedication of the Hoover Trail for the Boy Scouts of Iowa at Herbert Hoover's birthplace in West Branch, Iowa.

On this occasion it was only fitting that I pay tribute to the wonderful force for good which President Hoover has been, not only in the Boy Scout program, but in the lives of all Americans.

It is my feeling that Herbert Hoover is one of the greatest living Americans and the attributes which have marked his distinguished career provide guidelines for all of us in becoming better citizens and in dedicating ourselves in serving our fellow man.

With that thought in mind, I would like to bring my address to the attention of my colleagues and under leave to extend my remarks, ask that the speech appear in the CONGRESSIONAL RECORD.

THE TRAIL OF HOOVER'S LIFE, AN AMERICAN HERITAGE

(Speech at the dedication of the Hoover Trail, June 11, 1960, by the Honorable FRED SCHWENGEL)

This dedication of this Hoover Trail is a historic, meaningful event in the life of this Nation and it will prove to be a picturesque feature of your Boy Scout program.

The appeal of Iowa's countryside is strong, but the citizenship values that we can get from appropriate thoughts during this dedication can likewise be very important.

The combination of the life of Herbert Hoover, the Scout program, and the Iowa woodlands and countryside is a rare and beautiful combination that should give to us a special message of confidence in and hope for the future of America.

It is my desire that we may receive from this dedication a little of what the surroundings of West Branch gave to Herbert Hoover as a boy, and in turn what Herbert Hoover has given to America and the world. He has already testified to the early influence of this community on his life.

I invite you to explore with me for a few moments the trail that President Hoover took through life—a trail that began in this peaceful and charming community.

For centuries before the advent of Herbert Hoover, his ancestors had been Quaker pioneers. The American part of their story started in 1725—half a century before the Boston Tea Party. America was still the red man's country White settlements, except for the outposts of fur traders and explorers, were scattered only along the Atlantic coast. Trails were important then—not only as routes to adventure, but as the routes of travel—there were no roads as we know them today.

It was in 1725, according to family tradition, that three small boys landed in Boston from a sailing vessel just in from England. Their father and mother had died during the hard 3-month voyage, and they were taken into religious, kindly, stern New England homes. Papers in their baggage showed their name to be Minthorn and the oldest of the three, William, was Herbert Hoover's great-great-great grandfather—his first ancestor to live in America.

Many trails were followed by the Minthorns and the Hoovers from the eastern seaboard into Maryland, Virginia, North Carolina, Ohio, and eventually across the Mississippi to a spot they decided to call home. The little community in Iowa named West Branch grew quickly. It was not long before there appeared a Quaker meeting house, frame homes, stores, and a blacksmith shop. These were in the midst of some of the most fertile land in America.

West Branch and surrounding settlements never became a metropolis but it did grow into a pleasant, prosperous town and the good Quakers carried their faith into their relations with one another. They did not consider written agreements necessary to bind any business deed—an oral promise was all that was asked. And as the boy Herbert Hoover grew to manhood, his world held high the Quaker tradition of honesty.

The ability to stand and walk erect is the most distinguishing characteristic of man. The best books of travel have been largely views afoot. One gets only passing views and superficial knowledge from automobiles, planes, and trains. There is no other way to acquire a true love of nature or an intimate acquaintance with birds and flowers and rocks and trees. Trails are a necessary laboratory to the study of botany and biology.

The trail also has an intimate social side. It tends to develop comradeship and intimacy. One can walk 10 miles on a trail with less fatigue than would grow out of a 5-mile hike on the concrete.

The boyhood of Herbert Hoover in the atmosphere of West Branch of that time taught him to follow the trail, to stand erect, to dig deeply for the knowledge that lies alongside the path, to hold with high regard comradeship and respect for the dignity of his fellow man, and to let the trail yield beneath his feet as a source of relaxation and introspection.

A great deal of America has been lost to view. It is behind our fences, over our hills, down our old tangled trails. The broadening aspects of exploring, as the Scout well knows, the education to be had from nature at firsthand, the joy one gets from being in the open, all were a part of Herbert Hoover's youth. In later years President Hoover said of the Scout program, "I know of no other form of Americanization that so produces real Americans."

In 1927 in a speech to the Iowa Society in Washington, D.C., Mr. Hoover spoke of the old swimming hole near West Branch under the railroad bridge "which needs to be deepened" because it was "hard to keep from pounding the mud with your hands and feet when you shove off for the 30 feet of a cross-channel swim." He spoke of fishing with his friends in the creek for "sunfish, suckers, and catfish with a willow pole, a line of butcher's string, a cork salvaged from a rubbish heap, an angleworm and a 1-cent hook." He recalled in the wintertime "sliding down Cook's Hill in a homemade sled and thawing our young chilblains with ice water." He remembered the tasty wild strawberries and wild grapes to be had for the picking along the trail he followed; the skating in winter over the frozen swimming hole on a pair of heelplate skates and the collection of fragments of coral, agate, or other bright-colored stones from the ballast along the railroad tracks. Perhaps here is the introduction of Herbert Hoover, the mining engineer.

Apart from these outdoor pastimes and school attendance there was the quiet, gentle, home life, with its family Bible reading at the day's close. But you good people of West Branch know the detailed story of Herbert Hoover better than most.

Herbert Hoover followed the trail across America to Oregon when his parents died. He earned his way through Stanford University, graduating with a degree in geology and engineering. He was employed in mines in several Western States and then in Australia, and held numerous important mining jobs around the world.

It was when World War I broke out that Mr. Hoover's trail took him to Europe. Thousands of Americans were stranded in London. Herbert Hoover organized resources to help them back home, and then worked to send relief to the overrun population of Belgium and France. His success in this endeavor brought him wide fame and led to his appointment as U.S. Food Administrator in 1917. He was able to get cooperation from the United States and successfully supplied the Allied food demands. The war over, he headed the American Relief Administration and when that agency was liquidated he raised a private fund for the same purpose.

Ambassador Walter Hines Page wrote President Wilson when Hoover had completed the refugee job:

"Life is worth more, too, for knowing Hoover. * * * He's a simple, modest, energetic man who began his career in California and will end it in heaven; and he doesn't want anybody's thanks."

A Secretary of Commerce under both Harding and Coolidge, Hoover reorganized the Department and sought to maximize its usefulness to business. At the same time he organized several famine relief campaigns. Four years later, in 1928, he was the Republican nominee for President and won the election.

Many of the disturbing factors prevailing in 1929 were international in character while others were manifestations of domestic trends in particular countries. Basically, World War I had thrown the economic and financial organization of the entire world completely out of balance. It was difficult to maintain the balance of economic and financial equilibrium in the United States.

Before he took the oath of office as President, Mr. Hoover stated and I quote that he "conceived the Presidency more than an administrative office; it is a power for leadership bringing coordination of the forces of business and cultural life in every city, town, and countryside. The Presidency is more than executive responsibility. It is the symbol of America's high purpose. The President must represent the Nation's ideals and he must also represent them to the nations of the world."

After 4 years in the White House Herbert Hoover still regarded the Presidency "as a supreme obligation."

A basic tenet of his faith in the American way of life—a phrase which he is said to have originated—was "voluntary cooperation within the community." It included perfection of the social organization, care of those in distress, advancement of knowledge, scientific research, education, and the many phases of economic life.

"This," and I again quote President Hoover, "is self-government outside of government; it is the most powerful development of individual freedom and equal opportunity that has taken place in the century and one half since our fundamental institutions were founded."

Mr. Hoover believed in voluntary cooperation of all the people in all of the Nation's communities, along with a growing sense of individual responsibility, rather than an extension of government into our social and economic life which would find the correct "solution of many of our complex problems."

He once stated before a group of Young Republicans:

"While the inspiration to reform comes from the human heart, it is achieved only by the intellect. Enthusiastic hearts have flooded us with illusions. Ideals without illusions are good. Ideals with illusions are no good."

This advice is timeless, indeed, and we with the complexities of our age could really make something of this earth if we approached the solutions of our problems with high ideals and advanced programs with intelligence and enthusiasm.

Enthusiasm is an earmark of youth. It is an earmark of the Boy Scouts of America. As the Scouts of this area grow in stature to man's estate, it is my fond hope that they will study the life of Herbert Hoover so that they may become intimate with the trail that he has followed throughout his great and good life—a life he has shared with so many with completely unselfish motives.

Mr. Hoover has always been concerned with the kind and sort of men we place as leaders of America's youth. His stamp of approval would be placed upon those leaders who are sterling, clean, genuine—successful men, capable men, leaders in their own field—sympathetic and patient with boys. He has recognized that scouting is more than building a fire without a match along life's trail. That is only a part of the initiative needed to keep America strong.

During Herbert Hoover's term as President of the United States he was honorary president of the Boy Scouts of America. As you know, it is the custom of scouting to confer this honor and privilege upon the President of the United States. He is currently your honorary vice president. It is interesting, however, to glance over our shoulders today and recall a message from Honorary President Hoover which came from his heart in 1929—the first year of his Presidency. I quote as follows:

"I have gladly assumed the honorary presidency of the Boy Scouts of America because the first ideal of our democracy is that each individual shall have opportunity to take that position of leadership in the community to which his character, his ability, and his ambition entitled him; and because the progress of our country is thus directly related to the training in leadership we can give to the youth of the Nation. In meeting the vital need that when the oncoming generation takes over our national affairs it shall be a generation bulwarked with character, the Boy Scout movement plays a most useful part. I wish all success to the boys themselves and to the scoutmasters who lead them, and I commend both to the unwearied support of the public that they so inspiringly serve."

The American Boy Scouts have done millions of good turns, from helping someone to cross the street to saving lives; but the greatest achievement is the millions of better men they have made, or are making of themselves by daily discipline and struggle toward an ideal. I refer especially to that quiet and determined discipline and struggle which Herbert Hoover learned so well from the trails he followed as a boy around West Branch.

Many years ago—it was either in the late twenties or early thirties—Herbert Hoover composed a "bill of rights" for boys which I give you today:

"1. Like everybody else, he has a right to the pursuit of happiness.

"2. He has the right to play that will stretch his imagination and prove his prowess and skill.

"3. He has a right to the constructive joy from adventure and thrills that are a part of an opening life.

"4. He has a right to affection and friendship.

"5. He has a right to the sense of security in belonging to some group.

"6. He has a right to health protections that will make him an inch taller than his dad.

"7. He has the right to education and training that amplifies his own natural bents and that will fit him into a job.

"8. He has a right to a chance in getting a job."

Mr. Hoover has commented that these are not all the "rights" of an American boy, but they are the ones which should be of deep concern to all.

The direction which individuals and nations have traveled has always been of tremendous concern to Mr. Hoover. The direction of the trail that he took through life has continued to keep him active and interested in public affairs through his boyhood days into the present. He was born August 10, 1874, in West Branch, and we now find him in his 86th year, still alert with the characteristics that took him to the White House, to head the Hoover Commission, and again in more recent years as Chairman of a Famine Emergency Committee to serve the food requirements in 38 countries around the globe.

I could do no greater service to you today in the dedication of this Herbert Hoover Trail than to close with the following words from an address prepared by Mr. Hoover in February of this year. He wisely advised America and I quote:

"In looking over the current scene in our national life, if we take a worm's-eye view of the crises and forces which surround us, we may worry that we are approaching the decline and fall of the greatest nation in history. If we take a bird's-eye view, we see the fundamental strength of the American people."

These words of admonition come from one who followed the trail with an aim so high and so clear, with the spirit of the out-of-doors filling his being, that his usefulness to mankind will continue to reverberate for years to come.

Learning from the life and work of men like Herbert Hoover and the training and experiences that shaped their destinies can be very important in retaining and promoting those ideals that made and can keep us the great nation that we are.

Results of Poll on President and Issues in Third Congressional District of Indiana

EXTENSION OF REMARKS

OF

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 14, 1960

Mr. BRADEMAS. Mr. Speaker, in April I mailed questionnaires to some 160,000 registered voters in the Third Congressional District of Indiana, asking my constituents to register their opinions on major issues facing this Congress and also requesting them to indicate their preference for President of the United States. More than one of every eight persons receiving the poll responded.

Because the Third District of Indiana is considered a representative cross-section of public opinion, I believe the tabulation of the 23,485 replies may be of interest to my colleagues.

POLL PREDICTS ACTUAL PRIMARY VOTE WITHIN 1 PERCENT

I point to the fact that the poll, which was taken before the May 3 presidential preference primary in Indiana, predicted within 1 percent the actual Democratic and Republican Party votes in the Third District.

The poll showed 55 percent of the voters indicating a preference for President favoring Democratic candidates while 45 percent favored Republican candidates. The actual primary vote in the district on May 3 in the presidential race was 56 percent Democratic and 44 percent Republican.

The apparent accuracy of the poll's presidential results strongly suggests that the answers to questions on issues should provide a fair and reliable measurement of public opinion in my district.

SUMMARY OF SOME RESULTS ON MAJOR ISSUES

Mr. Speaker, let me summarize some of the more interesting results of the poll. Substantial voter approval was given to such programs as health insurance for the elderly, Federal support of education, loans and grants to depressed areas, and amendments to the minimum wage law.

Nearly two-thirds of all voters were for using Federal funds for classroom construction. Democrats favored such aid by a margin of 5 to 1, Republicans by 5 to 4, and independents by 5 to 3; 53 percent of all voters approved the use of Federal help to improve teachers' salaries as well.

Voters strongly supported—by 2 to 1—a Federal program of health insurance for social security beneficiaries—70 percent approved an increase in the minimum wage from $1 to $1.25 an hour as well as extension of coverage to more workers.

Opinions were most divided on the issues of agricultural policy and the missile gap. Nearly one-third of the voters expressed "no answer" on the complex issue of farm policy. A slim majority of

51 percent felt the United States was keeping up with Russian space and missile developments.

Because voters were asked to indicate their party preference, the following tables of the results of the poll are divided into these categories: Democratic, Republican, independent, and total of all replies.

TABLE 1

Questions	Democratic			Republican			Independent			Total of all replies (23,485) and percentages					
	Yes	No	No answer	Yes	No	No answer	Yes	No	No answer	Yes	Percent	No	Percent	No answer	Percent
1. Do you favor legislation to guarantee all Americans, regardless of race or color, the right to vote in State and Federal elections?	8,699	445	199	5,233	278	117	7,754	492	268	21,686	92	1,215	5	584	3
2. Do you favor reducing the national debt in preference to cutting taxes if the budget shows a surplus?	5,681	3,243	419	4,317	1,112	199	6,036	2,056	422	16,034	68	6,411	27	1,040	5
3. Do you favor an agricultural program providing:															
A. Price supports and limitations on production?	3,750	2,889	2,704	1,141	2,595	1,892	2,003	3,647	2,864	6,894	29	9,131	39	7,460	32
B. No supports and unlimited production?	4,353	1,955	3,035	3,645	824	1,159	5,151	1,245	2,118	13,149	56	4,024	17	6,312	27
4. Do you favor providing health and hospitalization insurance to social security beneficiaries?	7,507	1,702	234	2,564	2,852	212	4,841	3,325	348	14,912	63	7,879	33	794	4
5. Do you feel confident that the United States is keeping up with Russian space, missile, and other defense developments?	3,843	4,779	721	3,658	1,451	519	4,596	2,885	1,033	12,097	51	9,115	39	2,273	10
6. Provided there is a guarantee against Federal control, do you favor Federal support of State and local efforts to:															
A. Build more classrooms?	7,503	1,460	380	2,928	2,460	240	4,947	3,095	472	15,378	65	7,015	30	1,092	5
B. Improve teachers' salaries?	6,000	2,528	815	2,424	2,871	333	4,069	3,697	748	12,493	53	9,096	39	1,896	8
7. Do you favor a program of loans and grants to areas of serious and persistent unemployment?	6,862	1,912	569	2,299	2,846	483	4,302	3,375	837	13,463	57	8,133	35	1,889	8
8. Do you favor:															
A. Raising the minimum wage to $1.25 an hour?	7,801	1,145	397	3,126	2,171	331	5,451	2,515	548	16,378	70	5,831	25	1,276	5
B. Extending coverage of workers not now covered?	7,533	832	968	3,449	1,507	672	5,638	1,672	1,204	16,620	71	4,011	17	2,844	12
9. Do you believe we should seek an agreement with the Russians for nuclear disarmament with effective inspection?	7,203	1,660	480	4,333	1,030	265	6,357	1,589	568	17,893	76	4,279	18	1,313	6

TABLE 2.—*Results of presidential preference poll*

Candidates for President	Democrats	Republicans	Independents	Total	Percent
Humphrey	866	26	330	1,222	5
Johnson	331	35	173	539	2
Kennedy	4,572	232	1,488	6,292	27
Nixon	382	4,789	2,897	8,068	34
Rockefeller	165	276	416	857	4
Stevenson	1,201	29	431	1,561	7
Symington	1,003	19	302	1,324	6
No answer	823	222	2,477	3,522	15

Mr. Speaker, I attempted to present these questions on issues as fairly and objectively as possible, and I am glad to say that the reaction of my constituents as well as the press in this regard was excellent. I cite the following editorial which appeared in the LaPorte, Ind., Herald-Argus on May 20 as an example of the nonpartisan reception given the poll:

BRADEMAS' POLL

For several years Third District Congressmen have sent questionnaires to register voters of the district to try to get voter reaction on various issues. Returns on the recent one of Congressman JOHN BRADEMAS were the most extensive of all with 23,485 persons responding. This represented about one out of every eight to whom the questionnaire was sent.

Questionnaires which require straight yes or no answers are not wholly satisfactory. A weakness of any such query is also that so few voters out of the total electorate respond at all. Once a Congressman gets the returns, he will if he is honest with himself be somewhat in doubt as to just what he has on his hands.

However, just as only a relatively small percentage of the registered voters go to the polls in any election so the fact that only one of eight voters responded to the questionnaire does not mean it is valueless. That 34 percent of those responding indicated Nixon as their choice for President seemed to dampen the effectiveness of any charge that inasmuch as BRADEMAS is a Democrat only Democrats would respond to the queries.

If we can accurately assume that those replying constitute a cream of the crop of registered voters in that they give more attention to issues and tend to think them through and are willing to express themselves, then the results give some solid food for political thought.

Substantial majorities of those replying favor hospital and health insurance for social security beneficiaries, Federal aid for more school classrooms and improvement of teachers' salaries, legislation to guarantee full voting rights in Federal and State elections for all persons regardless of race or color, raising the minimum wage from $1 to $1.25 an hour, Federal loans and grants to areas of serious and persistent unemployment.

In short, those replying feel rather strongly that responsibilities of the Federal Government for the general welfare should be extended rather than cut back. Those replying in this Third District poll apparently don't take seriously the cries of those Hoosiers who would turn back the calendar to a rapidly receding States rights era.

The 185th Birthday of the U.S. Army

EXTENSION OF REMARKS

OF

HON. KATHARINE ST. GEORGE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 14, 1960

Mrs. ST. GEORGE. Mr. Speaker, 185 years ago today, on June 14, 1775, the Continental Congress established the U.S. Army to protect the freedom of our Nation. Since this date, the Army has met every test both in peace and in war. Today, in a world unsettled by tension due to threats of war and the ever-present specter of communism, our Army continues to provide for our freedom by guarding the frontiers of the free world.

To celebrate this occasion here in Washington, the Army is holding a special retreat review at Fort Myer, Va., at 5 p.m., to which the public is invited and a One-Army Birthday Ball at the Willard Hotel at 9 p.m.

I rise to extend congratulations to the U.S. Army on the occasion of their 185 years of faithful service to our Nation and to wish them well in all future undertakings.

The 185th Birthday of the Army

EXTENSION OF REMARKS

OF

HON. LESLIE C. ARENDS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 14, 1960

Mr. ARENDS. Mr. Speaker, today June 14, 1960, marks the 185th anniversary of the establishment of the U.S. Army. The Continental Congress in 1775 established the U.S. Army and since that date the relationship between the Congress and the Army has been both close and cordial.

I wish to extend my heartiest congratulations to the Army on this anniversary

of their 185 years of faithful service to our great Nation. In the celebration of this event, marked in our Capitol by a retreat parade at historic Fort Myer this afternoon at 5 p.m. and at the one Army birthday ball this evening at the Willard Hotel, the best wishes of a grateful Nation should be extended to the dedicated men of the U.S. Army who are today continuing to provide for the security of our country by standing firm on the borders of freedom throughout the world.

Words To Tell Our Story

EXTENSION OF REMARKS
OF
HON. JESSICA McC. WEIS
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 14, 1960

Mrs. WEIS. Mr. Speaker, my friend and colleague, the Honorable CATHERINE MAY, of the State of Washington, on May 28, 1960, delivered the commencement address to the graduating class of Marjorie Webster Junior College here in Washington, D.C. Because I feel that this address carries a message of great importance, not only to our youth, but to every American, under unanimous consent I insert it in the CONGRESSIONAL RECORD:

CAN YOU SELL THE TRUTH?

(Hon. CATHERINE MAY'S commencement address given May 28, 1960, Marjorie Webster Junior College, Washington, D.C.)

Graduates, Dr. Webster, Dean Dumas, Mrs. Smart, parents and friends, I am honored to be the speaker for your 1960 commencement. This is an important day in the lives of you young women who are members of the graduating class, and I am proud to share it.

Traditionally, commencement speakers refer to this day as a milestone, a point of departure into a new life. Timeworn as the statement may be, it is very true—this day is the door into your world of tomorrow. And you will go by many different paths on to more education perhaps, many of you into careers, and most of you eventually into marriage and motherhood. Wherever you go, you will have an influence on those around you. You will become the center of an orbit where, very much like a pebble dropped into water which sends ever-widening circles onto the water's surface, your words and actions will reach out to touch the lives of others. And those lives, thereby, will be changed and influenced to some degree. Thus, I feel that my responsibility as your graduation day speaker, is to convey to you, if I can, in the next few minutes some special message, an idea, an inspiration that you may carry away with you today to be used as a contribution to your world of tomorrow.

Now, as members of the 1960 graduating class of the Marjorie Webster Junior College, already you have been well educated and trained to contribute much to the good of society here at home and abroad. To this special knowledge and preparation for your life ahead there is probably little I could add that would not be duplication. But, the other day as I sat in my office trying to string together some thoughts for this address to you, I recalled a meeting I attended in June of last year in London. In particular, I remembered with great clarity sitting in a room with 30 or 40 other people, men and women from many nations, and discussing with them the youth of our countries. Because this was a meeting of the Atlantic Congress where 14 member nations of NATO—in other words, 14 of our free world countries—had sent over 600 citizen delegates to discuss, among other things, how well we were doing in the great war that rages, as you well know, out in that world you are about to enter—the war for men's minds. The war between two great ideologies—that of freedom, as exemplified by our American way of life versus the Communist doctrine. Now, as it happened, as a delegate to this Atlantic Congress from the United States, I was appointed to work on a subcommittee which had as its subject of study a most fascinating and frightening subject—Communist propaganda.

The work of our committee was based on some excellent depth studies that had been made on the extent of the Communist propaganda penetration into our free world countries, as well as our uncommitted countries. The studies presented proven and factual information on the thousands of agents and provocateurs who were trained and sent out by the Soviet into the world to spread Communist propaganda. It presented the actual figures of the millions of dollars being spent by the Soviet on their propaganda program alone. In addition, the material on the extent of the success of Communist propaganda penetration pointed up the fact that the youth of Russia were highly trained as Communist crusaders. A basic aim of Russian education for its youth is to instill in them a burning dedication to the Communist way of life. As a result, young men and women of Soviet countries are extremely effective, convincing and articulate in persuading youth of other nations to their beliefs.

It was then that we started this discussion which made such an impression on my memory. We had just agreed that we should be providing more opportunities for our citizens and our young people to go into uncommitted countries, to youth festivals, to cultural exchange meetings so they might tell the story of freedom.

Then, a delegate from Norway pointed out, "Ladies and gentlemen, I think we are agreed that the doctrine of a free world democracy has far more appeal for humanity than the Communist doctrine. And, I know the young people of my country are just as dedicated to their beliefs as are the young Communists. But, when it comes to telling and selling the great truth of a free way of life I don't think they are prepared. I am afraid a great many of them could not find the words.

"Tell me, is this true of the young people in your countries?"

A thoughtful silence followed his words. Then, one of the other delegates spoke up and said: "I am afraid it's quite true, not only of our youth, but of our adult citizens, too." And, one by one, all of us nodded in serious and even shocked agreement.

I think by now you young women know what message and what idea I wish to try and leave with you today. You see, this episode I have just related taught me first of all something about myself that I had not known. In evaluating how well we Americans do as ambassadors for our country and its free way of life, I was brought to the shocking realization that I myself was sadly lacking in effective word weapons to fight against the Communist ideology. To admit this on behalf of myself, as well as my fellow countrymen, was both puzzling and frightening. Puzzling, because I knew I was a patriotic American, a loyal American, with a deep and abiding love for my country. Frightening, because for many years now we have recognized that the great world struggle in which we are engaged is not alone one of military might. Beyond that, and even bigger than that, is the power of an idea. And our opposition in this struggle is so well organized that they can train and support their spokesmen all over the world while they spread their Red death among the brain cells of humanity.

Since my return from the Atlantic congress, I have brought this subject up for discussion and study wherever I could. I have done this, because it seemed to me that I had no more significant contribution to make my country as a result of this free world meeting than to try and influence the young people of America to prepare themselves to sell the truth better than their elders have done.

Now, in bringing you a few thought-provoking ideas on how you might best do this:

In one group where we were discussing this, a friend of mine said: "We Americans are a funny lot. We have such great dedication to freedom, for others as well as ourselves, that we would fight for it and even die for it, but, by gum, we can't tell others what it is." Partly, I think we can agree, this is because we've had the plain good fortune to be born Americans. We have just always taken for granted the air of freedom which we breathe. There may have been a time when it was apathy, but, with two great world wars in the past, and with the present serious international tension, I cannot believe this is true now. I am certain that the generation which you young women represent does not look at what's going on in the Iron Curtain countries and say smugly, "This cannot happen here." I think that is perhaps why I have such high hopes that some of the ideas I leave with you will fall on fertile ground. With things as they are today, and as they have been since the day you were born, never has a generation in this country had a heavier burden of responsibility for learning to sell the truth laid upon them.

I can't give you any set words to use for expressing your beliefs, but I think maybe I can try to set up a few thinking guidelines for you.

First, I would sincerely hope that, in the busy lives that lie ahead of you, you would take some time out and search deeply into your hearts and minds for the answer to the question, What do I truly believe? Start with thinking of the basic beliefs which all of the free world countries engaged in this struggle against communism have in common—respect for the freedom of the individual, for the dignity of human nature, and a simple faith in God. Then, go behind these words in a search for their real meaning. Because, at this point, I would remind you of what I hope you already know—that the words of the Communist manifesto are beautiful words, too, apparently offering a wonderful life to those who would follow the creed, unless one went behind them and realized how the goals were to be accomplished.

So, having found the words for our basic beliefs, how then do we communicate to someone else what we in America mean by freedom and democracy, as opposed to what Communists mean by these words? We know that, in the hearts of all men, there is a universal and unquenchable longing for an atmosphere of freedom, for equality of opportunity, and the establishment of human dignity. How can we communicate the truth that these goals can be reached only through nontotalitarian government—with words that are the same words that the enemies of this way of life also use?

One night, when a group of us were discussing this problem, we came up with what I think is a pretty good idea. It was decided that we might start with the material approach to life, because something that everyone understands, regardless of race or language barriers, is hunger and cold and the desire for possessions and good things around us.

Frankly, I have never been exposed to a debate with a dedicated Communist over the virtues of a totalitarian form of government versus democracy, but, since the episode I related earlier in my talk to you, I've put myself through a lot of mental practice as to what I might say if such an occasion should arise. And, by the way, I recommend this mental exercise to you. It's not only challenging, but it's kind of fun.

But, to go back to preparing myself for this imaginary debate, one day I discovered a book that to me provides the perfect approach to telling our freedom story so that anyone can understand its basic truth. That book is called "The Mainspring of Human Progress," and it was written by Henry Grady Weaver. And, after reading it, I decided that I would present my argument as he does by posing a question to my imaginary opponent in this way: Why did men die of starvation for 6,000 years? And, why is it that we in America have never had a famine? For 60 known centuries, this planet we call earth has been inhabited by human beings not much different from ourselves. Their desire to live has been just as strong as ours. They have had at least as much physical strength as the average person of today, and among them have been men and women of great intelligence. But, down through the ages, most human beings have gone hungry, and many have always starved. The ancient Assyrians, Persians, Egyptians, and Greeks were intelligent people, but, in spite of their intelligence and their fertile lands, they were never able to get enough to eat. The Roman Empire collapsed in famine, the French were dying of hunger when Thomas Jefferson was President of the United States. As late as 1846, the Irish were starving to death, and, it is only within the last century that Western Europeans have had enough food to keep them alive. Even in this century, famines have killed multitudes, in China and India and Africa, and, as late as the 1930's thousands starved to death on the richest farmlands of the Soviet Union.

Down through the ages, countless millions, struggling unsuccessfully to keep bare life in wretched bodies, have died young in misery and squalor. Then, suddenly, in one spot on this planet, people eat so abundantly that the pangs of hunger are forgotten. Just think, for 6,000 years, men died of starvation. For 6,000 years, families lived in caves and floorless hovels without windows or chimneys. Then, within a few generations, we in America take floors and rugs and chairs and tables for granted, and regard electric lights, refrigerators, running water, and porcelain bathtubs as common necessities. For 6,000 years, men and women and children toiled desperately from dawn to dark to eke out their meager existence, and then, suddenly, in one place on earth, there is an abundance of such things as radios and TV sets, nylon hose and shower baths, and ice cream sodas and lipstick, and permanent waves. If you just think about it, it's almost incredible. In less than 100 years, Americans have conquered the darkness of night, from pine knots and candles to neon lights and fluorescent tubes, from fireplaces and stoves to automatic burners and air conditioners. We are conquering pain and disease and prolonging life. We've made stupendous attacks on space, from oxcarts to airplanes, and attacks on time, from pony express to telephone and television.

Now, it's true that many of these developments originated in other countries, but new ideas are of little value in raising standards of living unless and until something is done about them. The plain fact is that we in America have outdistanced the world in extending the benefits of inventions and discoveries to the vast majority of people in all walks of life. How did it happen? Well, perhaps the best way to find the answer is to first rule out some factors that were not responsible. To say that it was because of our natural resources is hardly enough. The same rich resources were here when the mound builders held forth. Americans have had no monopoly on the metals. China, India, Russia, Africa all have great natural resources. Crude oil oozed from the earth in Baku 4,000 years ago. And, when Julius Caesar marched west into Gaul, Europe was a rich and virgin wilderness inhabited by a few roving savages, much as America was when the Pilgrim Fathers landed at Plymouth.

Is it because we work harder? Again, the answer is no, because in most countries people work much harder on the average than we do.

Can it be that we are people of inherent superiority? That sounds fine in after-dinner oratory, and goes over big at election time, but the argument is difficult to support. Our own ancestors, including the Anglo-Saxons, have starved right along with everyone else.

Can it be that we have more energy than any other peoples of the world? That's not the answer either, but it's getting pretty close. We are not endowed with any superior energy, mental or physical. But, it is a fact that we in the United States of America have made more effective use of our human energies than have any other people on the face of the globe anywhere or at any time. That's the answer, the real answer, the only answer.

Now, I would remind you that I'm saying all this in my mythical debate with a dedicated Communist in trying to explain what we mean in America by freedom. But, I think you gather that my real purpose is to offer you here today a starting place in your thinking and in your search for words to sell the truth.

Let me lead you down this path a little further, before I set you out on your own. Why does human energy work better here than anywhere else? Well, now the answer here is actually a study in physics with which I won't attempt to bore you. But, as simply as I can tell you, it is that the nature of human energy is controlled by yourself—nothing else can control it. The decision to use your energy to act or not act is always under your own control. And, this leads to two important points. One is that individual freedom is the natural heritage of each living person. And, second, freedom cannot be separated from responsibility. Your natural freedom—your control over your own life energy—was born in you along with life itself. It is a part of life itself. Any time you try to turn the control over to someone else, or any time anyone tries to take the control of your energy from you, something happens. It just can't be used effectively. For centuries, it's been tried. Every conceivable form of authority has been tried. Every conceivable form of unified control that takes this individual's use of his own energy away from him. But, each time, the experiment has failed, because only an individual human being can generate human energy, and only an individual human being can control the energy he generates.

The lack of understanding of these simple basic truths has for over 6,000 years stagnated human progress, kept the vast majority of people underfed, poorly clothed, and embroiled in wars and dying from famine and pestilence.

Don't take my word for it. Just take some time to study world history, going back to the pagan days, right up through all this whole history of all the dictator forms of government that rose and fell over a span of 6,000 years. And, then think of the history of your own Nation, which had its beginning just a little over 160 years ago. As John Gunther once said: "Ours is the only country deliberately founded on a good idea."

I realize that, by this time in your education, you've had a pretty good grounding in American history. But, I promise you that, if you'll spend sometime going back over this rich and wonderful heritage of every American, you'll find it very exciting to find out how every move our Founding Fathers made was with this great idea in mind.

I think with this approach you'll see the history of your country with entirely different eyes. You'll realize, maybe for the first time, that the great fact of our history is that the American Revolution had no leader. To again quote from Mr. Weaver's book—"This fact is the hope of the world, because human freedom is a personal matter. Only the individual can protect human rights in the infinite complexity of men's relationships with each other. Nothing on earth is more valuable than the person who knows that all men are free and who accepts the responsibilities that go with freedom." As I said, the war for American independence was begun by an individual. He was asleep in bed when someone pounded on his door, and shouted in the night—"The Redcoats are coming." Well, what could he do? He was not a king or a governor. He was not rich or important. He was just one little man, unknown to anyone outside his neighborhood. Should he take the initiative? Such things usually cleared up. They always had. He must keep calm, consider the practical aspects, think of his family. Most men felt that way. They knew they could do nothing, and they had better sense than to try. And, that night in Lexington, many of them stayed in bed.

But, the unknown individual chose between submission that looked like safety, and rebellion that seemed utterly helpless. He had the courage of his convictions. He got up, put on his clothes, took his gun, and went out to meet the British troops. And, I like to think that he had a good wife there helping him put on his boots, as she said: "This is the right thing, and you must do it, John."

Not acting under orders, not being led, or wanting to be the leader, he stood on his own feet, a responsible, self-controlling person, and fired the shot heard round the world. And, the sound of that shot said that man is a free agent, that government is the servant, rather than the master. You know, it's men like this, and the thousands of others we find in the pages of history—the Washington and Lincoln and Jefferson and Lee—with whom you and I walk today, and we walk because of them carefully and proudly and also humbly, lest we fail them. And, because of this knowledge of our past, with a keen sense of the present and the future, we should each say to ourselves: "I am an American, and therefore, what I do, however small, is of importance."

It just seems to me that, once we grasp this root idea of our freedom, it becomes much easier to explain the tree of liberty that has grown from it.

For instance, words to explain to somebody about the form of government we set up to protect our idea of freedom. "Mainspring" says it this way: "America was to be set up as a republic, which means that the laws would be made and administered by representatives chosen directly or indirectly by the people to protect the interests of all the people. In the last analysis, any government, regardless of what it may be called, must be one man or a small group of men in power over many men. That being the case, how is it possible to transfer the power of the ruler to each man of the multitude? The answer is that it's not possible. The only solution lies in the direction of destroying power itself. The only way in which men can remain free and left in control of

their own individual energies is to cut the power of the government to its smallest degree."

The answer was simple, once it was found by our Founding Fathers. The head of a state is a human being, and a human being's thinking and deciding and acting and judging are inseparable. But, in this new American Republic, no top official would ever be permitted to act as a whole human being. The function of government would be divided into three parts:

1. The first part was to think and decide, and it would be called Congress.

2. The second part was to be responsible for getting action. It would be headed by the Chief Executive, the President.

3. And the third part was to serve as a judge or a referee, known as the Supreme Court.

Each of these three parts was to act as a check on the other two, and over the three was set a written statement of political principles, intended to be the strongest check on them all. There was to be government by law, with clearly defined rules of the game, rather than government by whim—the Constitution. The dangers of dictatorship must be avoided for all time to come. No one person or small group of persons must ever be permitted to get too much power, and the minority, even down to the last individual citizen, must be protected against oppression by the majority, or by any organized pressure group.

And these objectives made it possible for our American Revolutionary leaders to draw the blueprints for this new and completely different political structure—our unique form of government, not only in the world of today, but in all time.

I said when I began this that all I would even try to do this afternoon was to offer you a few guidelines to follow on your search for words to sell the truth. My mission is accomplished if I start you on that exciting journey. It is accomplished if I have succeeded in getting you to look at your country and your birthright of freedom with new eyes—eyes that are both critical and understanding, because it is very important that you know that America is far from perfect.

And, I'm sure you do. Otherwise, we wouldn't get from your generation what our country must always have to keep progressing—ideas for a much better world. But, as you find our shortcomings, and think of plans to overcome them, be sure you always ask to what degree are our shortcomings traceable to the form of political structure under which our country was founded—are they due to having drifted away from that concept, and how does our record compare with the records of countries which have tried to operate under the opposite philosophy?

Godspeed you, graduates of 1960, in your world of tomorrow. As students seeking more knowledge, as successful career girls, as happy wives and mothers, and as enthusiastic ambassadors for freedom. If you understand, and believe because you understand, you will find the words, and I guess I don't have to tell you how very important it is for you and the young people of all free world nations to find those words. Because it may well be that, in your generation, this great war for men's minds will be decided. Remember, your battleground is wherever you go. Use your voice, with your heart and beliefs behind it, among your fellow citizen and fellow workers, family and friends, and—very importantly—on the children you raise.

Thank you again for giving me the privilege of sharing this important day with you. You have my congratulations on winning your diplomas, and my very best wishes for your future.

SENATE

WEDNESDAY, JUNE 15, 1960

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Thou God of our fathers, help us to be spiritually aware that when Thy voice was heard in ages past it did not cease to speak. Give us to know that for those who become quiet enough to listen, Thy word for this day resounds clear and sure above all the tumult and shouting of the confused babel of human folly.

In all our deliberations and appraisals of the affairs of state having to do with the tangled relationships of men, forbid that we should be insensitive to voices other than our own, and which make the world about us a whispering gallery telling of divine realities that surround us.

Give us open ears, alert and quick to hear each whisper of Thy word.

With hearts tuned to the unseen presence which enfolds our days with a love that never forgets, a light that never fails, and a life that never ends, may we face life's changing scenes with the radiant faith that—

> This is my Father's world,
> He shines in all that's fair.
> In the rustling grass
> I hear Him pass—
> He speaks to me everywhere.

To that glad truth our hearts respond, "Speak, Lord, for Thy servant heareth." Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, June 14, 1960, was dispensed with.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting nominations was communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate a message from the President of the United States submitting sundry nominations, which was referred to the Committee on Foreign Relations.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the joint resolution (S.J. Res. 39) proposing amendments to the Constitution of the United States to authorize Governors to fill temporary vacancies in the House of Representatives, to abolish tax and property qualifications for electors in Federal elections, and to enfranchise the people of the District of Columbia, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H.R. 6597) to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 6597) to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes, was read twice by its title and referred to the Committee on Interior and Insular Affairs.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETING DURING SENATE SESSION

Upon request of Mr. MANSFIELD, and by unanimous consent, the Committee on Foreign Relations was authorized to meet during the session of the Senate today.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, early today we hope to complete action on the NATO joint resolution (S.J. Res. 170), on which we have a unanimous-consent agreement.

Then we expect to proceed to consider the Kennedy-Clark loyalty measure.

We have ready the Department of Defense appropriation bill. It is a very important measure, and we want to get to it as early as we can. We shall meet early and shall remain in session late, if necessary, in order to take action on that bill this week.

We also would like to proceed with consideration of the housing bill, and the postal and classified workers pay increase bill.

Then there is the proposed constitutional amendment relating to the District of Columbia, which will be before us.

So I should like to say to all Members of the Senate that I think they can count on long meetings for the remainder of this session and much hard work, including Saturday sessions and early morning meetings and late evening meetings, if necessary.

At this time I am not prepared to set forth to the Senate any long list of bills, because, in the first place, it would be presumptuous on my part to try to say what the collective judgment of the Congress would be; and Senators will have to determine what measures will be reported by the committees, and what measures will be passed; and, in the second place, I have never found that we could expedite the work of the Congress by displaying mimeographed lists of so-called must bills. I think that merely deters us and delays us.

Nevertheless, I think most people know that Congress is going to face up to the issues, and that we are going to pass a substantial number of very important bills between now and the time when we leave for the conventions. There is a great deal of important work to be done; and we shall have to work long and hard in order to finish it before that time.

Therefore, I plead with each Senator to examine very carefully his schedule and try to arrange his personal appointments so that he can take part in the consideration of the various measures which will be before the Senate. If he is unable to do so, I hope he will not ask that the consideration of these measures be held over until he returns to town. By way of illustration, let me say that as regards one of the very important bills we shall take up this week, I was told this morning by one Senator that it would not be convenient for him to be here either Friday or Saturday. Of course, that would mean postponing the consideration of that measure until Monday. However, we cannot afford to postpone for one or more days the consideration of important bills in order to accommodate any Senator. I do not think we can properly set aside the consideration of any bill so late in the session. I shall not ask the Senate to do so, and I hope other Senators will not ask the Senate to do so.

Mr. MANSFIELD. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. MANSFIELD. I was called out of the Chamber just before the Senator from Texas began his statement. Do I correctly understand that he said that after the NATO joint resolution, the pending business, is disposed of, the Senate will proceed to the consideration of the proposed legislation relating to the loyalty oath?

Mr. JOHNSON of Texas. Yes; we would like to do so if we can.

Mr. MANSFIELD. I am especially interested in the schedule for consideration of the Department of Defense appropriation bill, because I was assured by the Senator from New Mexico [Mr. CHAVEZ] that that measure would not be brought up today.

Mr. JOHNSON of Texas. I cannot say. Perhaps Senators will talk at length; I do not know. That bill is available, and it is important, and it has priority; and we should take it up as soon as possible.

We also had word from the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Pennsylvania [Mr. CLARK] that they wish to have the Senate take up the loyalty bill on Wednesday.

I wish to be as accommodating as I can.

Mr. MANSFIELD. All I can say is when the Senator from New Mexico comes in, be prepared.

Mr. JOHNSON of Texas. I try to be prepared, because we have these measures outlined, and we have said to the authors of the bills that we shall take up the NATO joint resolution, and then the loyalty bill, and then the Department of Defense appropriation bill. I made no commitments otherwise. Of course, if there were to be extended debate on those bills, we would have to adjust to it.

Our big problem is the seeming necessity to get all the work of the week done on Wednesday and Thursday. I am trying to get away from that. I believe it important that we realize that at this time in the session there are always a number of very important major measures which must be considered.

We shall have conference reports, and we shall have the Japanese Treaty.

Mr. FULBRIGHT. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. FULBRIGHT. Will request be made that the Senate take up the Japanese Treaty on tomorrow?

Mr. JOHNSON of Texas. I wish to talk to the Senator about that. I want to be agreeable to anything the Senator wishes. We have a difficult problem, because we have commitments which have been made prior to the time when we had any commitment on the Japanese Treaty. But I understand the Senator's problem, and I shall try to meet it.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON REVIEW OF ATOMIC ENERGY COMMISSION CONTRACT WITH UNION CARBIDE NUCLEAR CO., URAVAN, COLO.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of Atomic Energy Commission contract AT(05-1)-36 with Union Carbide Nuclear Co., Uravan, Colo., for the procurement of uranium concentrates, December 1959 (with an accompanying report); to the Committee on Government Operations.

WITHDRAWALS FROM THE PUBLIC DOMAIN OF CERTAIN LANDS IN ALASKA

A letter from the Secretary of Defense, transmitting a draft of proposed legislation to provide for the withdrawal from the public domain of certain lands in the Ladd-Eielson area, Alaska, for use by the Department of the Army as the Yukon Command Training Site, Alaska, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

A letter from the Secretary of Defense, transmitting a draft of proposed legislation to provide for the withdrawal from the public domain of certain lands in the Big Delta area, Alaska, for continued use by the Department of the Army at Fort Greely, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

A letter from the Secretary of Defense, transmitting a draft of proposed legislation to provide for the withdrawal from the public domain of certain lands in the Granite Creek area, Alaska, for use by the Department of the Army at Fort Greely, Alaska, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

AMENDMENT OF EURATOM COOPERATION ACT OF 1958

A letter from the Acting Chairman, U.S. Atomic Energy Commission, Washington, D.C., transmitting a draft of proposed legislation to amend section 5 of the Euratom Cooperation Act of 1958 (with accompanying papers); to the Joint Committee on Atomic Energy.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A resolution adopted by the South Carolina State Association of Life Underwriters, remonstrating against the use of insurance terminology in the Social Security Act; to the Committee on Finance.

Two petitions signed by Eugenia Vasiliev, and sundry other anti-Communist American citizens of Russian descent, relating to amendments to Public Law 86-90, concerning the Week of Subjugated Nations; to the Committee on the Judiciary.

RETIREMENT OF SENATOR MURRAY—RESOLUTION

Mr. CHURCH. Mr. President, when our good friend and distinguished colleague, the senior Senator from Montana [Mr. MURRAY] announced his plans for retirement, both the Members of this body and the press of the Nation extolled his record of yeoman service to the Nation.

They were unanimous that he had made a great contribution to the welfare of his country, just as we are unanimous in the realization that next year we shall be most aware of his absence from this floor and the committee rooms where he accomplished so much.

But I think that perhaps nowhere were these thoughts more aptly expressed, and the affection and esteem of his home State more singularly demonstrated, than by a group from the Fort Belknap Indian Community. The community council at Harlem, Mont., unanimously approved a resolution thanking—as they put it—their "great and true friend."

I ask unanimous consent that this significant and welcome resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

"RESOLUTION OF THE GOVERNING BODY OF THE FORT BELKNAP INDIAN COMMUNITY, AN INDIAN-CHARTERED CORPORATION

"Whereas the Honorable JAMES E. MURRAY, senior Senator from Montana, has served the people of the State of Montana and the people of the United States of America for 24 years; and

"Whereas on the 28th day of April 1960, he announced his intention not to seek reelection; and

"Whereas the Honorable JAMES E. MURRAY has for his entire period of service in the Senate of the United States shown a special

interest in the problems of the Indian people of his State and of his Nation; and

"Whereas there is on the statute books of the United States, hundreds of laws benefiting the Indian people of the United States; and

"Whereas through his entire service in the Senate of the United States, the Honorable JAMES E. MURRAY has been a friend of the people of the Fort Belknap Reservation and always attentive to their needs; and

"Whereas the Honorable JAMES E. MURRAY has given unselfishly of his time to assist the individual members of the Fort Belknap Community and the Tribal Council of the Fort Belknap Community: Now, therefore, be it

"Resolved, That the Tribal Council of the Fort Belknap Community, representing every member of the community, go on record as expressing their appreciation for the services rendered to this community and their love and affection for a great Senator and fellow Montanan; and be it further

"Resolved, That the tribal council, expressing for themselves and their people, wish to the Honorable JAMES E. MURRAY, senior Senator from Montana, their hope that he will live long and well and that he will forever remember that the people of this community will carry him in their hearts and their prayers and remember him forever as a great and true friend."

CERTIFICATION

I, the undersigned, as secretary of the Fort Belknap Indian Community Council of the Fort Belknap Indian Reservation, hereby certify that the Fort Belknap Community Council is composed of 12 members, of whom 10 members, constituting a quorum, were present at a meeting thereof, duly and regularly called, noticed, convened, and held this 4th day of May 1960; that the foregoing resolution was duly adopted at such a meeting by the affirmative vote of 10 for, 0 against, 2 absent, 0 not voting; and that the said resolution has not been rescinded in any way.

J. MATT BELL,
Chairman, the Fort Belknap Indian Community.

JAMES HAWLEY,
Secretary-Treasurer, Fort Belknap Agency, Harlem, Mont.

The following are the members of the Fort Belknap Community Council and hereby endorse this resolution: J. Matt Bell, chairman; Frank Kirkaldie, vice chairman; Gilbert Horn, council member; David J. Hawley II, Jr., council member; Preston Bell, council member; Rufus Warrior, council member; James Hawley, secretary-treasurer; George J. Fox I, sergeant at arms; Marguerite Cole, council member; Herbert Fish, council member; Andrew Gray, council member; Richard King, council member.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLELLAN, from the Committee on Government Operations, without amendment:

S. 3485. A bill to amend section 7 of the Administrative Expenses Act of 1946, as amended, to provide for the payment of travel and transportation cost for persons selected for appointment to certain positions in the United States, and for other purposes (Rept. No. 1584); and

S. 3579. A bill to authorize agencies of the Government of the United States to pay in advance for required publications, and for other purposes (Rept. No. 1583).

By Mr. McCLELLAN, from the Committee on Government Operations, with an amendment:

S. 2712. A bill to authorize the Administrator of General Services to convey all lands comprising Fort Dearborn, Rye, N.H., and Rye Air Force Base, Rye, N.H., to certain former owners of such lands (Rept. No. 1586);

S. 3487. A bill to amend the "Anti-Kickback Statute" to extend it to all negotiated contracts (Rept. No. 1585); and

H.R. 766. An act to amend section 5 of the act of July 16, 1914, relating to penalties for the use of Government-owned vehicles for other than official purposes (Rept. No. 1587).

By Mr. CHAVEZ, from the Committee on Public Works, with amendments:

S. 2919. A bill to provide that the Secretary of the Smithsonian Institution shall study and investigate the desirability and feasibility of establishing and maintaining a national tropical botanic garden (Rept. No. 1589).

By Mr. WILLIAMS of New Jersey, from the Committee on Banking and Currency, with an amendment:

S. 3278. A bill to amend section 701 of the Housing Act of 1954 (relating to urban planning grants), and title II of the Housing Amendments of 1955 (relating to public facility loans), to assist State and local governments and their public instrumentalities in improving mass transportation services in metropolitan areas (Rept. No. 1591).

By Mr. PROXMIRE, from the Committee on Agriculture and Forestry, with an amendment:

S. 2917. A bill to establish a price-support level for milk and butterfat (Rept. No. 1592).

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES (S. REPT. 1590)

Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service, reported an original bill (S. 3672) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes, and submitted a report thereon; which bill was read twice by its title and placed on the calendar.

REPORT ENTITLED "GOVERNMENT COMPETITION WITH BUSINESS: LIQUID OXYGEN PRODUCTION" (S. REPT. 1588)

Mr. BIBLE. Mr. President, on behalf of the Senate Small Business Committee, I send to the desk a report entitled "Government Competition with Business: Liquid Oxygen." This is based upon hearings held on May 12 and 13 by our Subcommittee on Relations of Business With Government and is a unanimous committee report. I ask that the report be printed.

The VICE PRESIDENT. The report will be received and printed, as requested by the Senator from Nevada.

JUVENILE DELINQUENCY—EXTENSION OF TIME TO FILE INDIVIDUAL VIEWS

Mr. HRUSKA. Mr. President, it is my understanding that there will be submitted to the Senate today, from the Committee on the Judiciary, a report entitled "Juvenile Delinquency" pursuant to Senate Resolution 54, as extended.

I ask unanimous consent that the report be held open for the filing of individual views until midnight a week from Friday, which will be June 24, in order to make possible the printing of the report and the individual views in one document.

The VICE PRESIDENT. Without objection, it is so ordered.

REPORT ENTITLED "JUVENILE DELINQUENCY" (S. REPT. 1593)

Mr. HART. Mr. President, on behalf of the Senator from Missouri [Mr. HENNINGS], from the Committee on the Judiciary, pursuant to Senate Resolution 54, as extended, I ask unanimous consent to submit a report entitled "Juvenile Delinquency" and ask that it be printed subject to the unanimous consent agreement, previously agreed to.

The VICE PRESIDENT. Without objection, the report will be received and printed, pursuant to the unanimous consent agreement previously entered into.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce:

Robert E. Lee, of the District of Columbia, to be a member of the Federal Communications Commission.

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service:

Eighty-eight postmaster nominations.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ELLENDER (by request):

S. 3671. A bill to facilitate the administrative operations of the Department of Agriculture; to the Committee on Agriculture and Forestry.

By Mr. JOHNSTON of South Carolina:

S. 3672. A bill to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes; placed on the calendar.

(See reference to the above bill when it was reported by Mr. JOHNSTON of South Carolina, which appears under the heading "Reports of Committees.")

By Mr. MAGNUSON (by request):

S. 3673. A bill to provide emergency authority for priorities in transportation by merchant vessels in the interest of national defense, and for other purposes; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. KERR (for himself and Mr. MONRONEY):

S. 3674. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Waurika reclamation project, Oklahoma; to the Committee on Interior and Insular Affairs.

By Mr. HUMPHREY:

S. 3675. A bill to establish a Peace Corps of young men to assist the peoples of underdeveloped areas of the world to learn the basic skills necessary to combat poverty, disease, illiteracy, and hunger; to the Committee on Foreign Relations.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. MOSS:

S. 3676. A bill for the relief of Sirkka Terasvuori; to the Committee on the Judiciary.

By Mr. KEFAUVER:

S. 3677. A bill to amend the Federal Food, Drug, and Cosmetic Act to redefine the term "new drug" and to provide for the licensing of persons engaged in the propagation, manufacture, or preparation of drugs dispensed only upon prescription, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. KEFAUVER when he introduced the above bill, which appear under a separate heading.)

EMERGENCY AUTHORITY FOR PRIORITIES IN TRANSPORTATION BY MERCHANT VESSELS

Mr. MAGNUSON. Mr. President, by request, I introduce, for appropriate reference, a bill to provide emergency authority for priorities in transportation by merchant vessels in the interest of national defense, and for other purposes. I ask unanimous consent that the letter from the Under Secretary of Commerce, requesting the proposed legislation, together with a statement of the purpose of the bill, be printed in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the letter and statement will be printed in the RECORD.

The bill (S. 3673) to provide emergency authority for priorities in transportation by merchant vessels in the interest of national defense, and for other purposes, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter and statement presented by Mr. MAGNUSON are as follows:

THE SECRETARY OF COMMERCE,
Washington, D.C., June 6, 1960.

The PRESIDENT OF THE SENATE,
U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There are enclosed herewith four copies of a proposed bill, together with a statement of purpose and need for legislation, to provide for emergency authority for priorities in transportation by merchant vessels in the interest of national defense, and for other purposes.

The proposed legislation would authorize a system of ship warrants. It is based upon previous experience in World War II under Public Law 173, 77th Congress, approved July 14, 1941 (55 Stat. 591), and repealed July 25, 1947 (61 Stat. 449). The bill is strengthened in the light of certain shortcomings of the World War II law, which were met by administrative action and provision for which should be incorporated in the frame of the legislation.

The Department recommends enactment of this legislation. In addition to being an important authority as part of the readiness program in the interest of security, the legislation is desirable to meet the commitments on the part of the United States for exercising this authority in coordination with authority already adopted by various member nations of the North Atlantic Treaty Organization, in the event that coordination efforts of these nations become necessary.

We have been advised by the Bureau of the Budget that there would be no objection to the submission of this legislation to the Congress.

Sincerely yours,

PHILIP A. RAY,
Under Secretary of Commerce.

STATEMENT OF PURPOSE AND NEED FOR LEGISLATION TO PROVIDE FOR EMERGENCY AUTHORITY FOR PRIORITIES IN TRANSPORTATION BY MERCHANT VESSELS IN THE INTEREST OF NATIONAL DEFENSE, AND FOR OTHER PURPOSES

The draft bill would authorize the President, during any period in which vessels may be requisitioned under section 902 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1242), whenever he deems and proclaims it to be in the interest of national security or the maintenance of essential supplies and services, to prescribe regulations for the issuance and revocation of warrants and governing the use of services and facilities under the act with respect to any vessel using or seeking to use such services or facilities. Whenever the warrant system is prescribed, it shall terminate upon proclamation of the President to that effect, or as Congress by concurrent resolution may provide, and in any event the act itself will terminate 5 years after date of enactment.

The system of warrants for merchant vessels under the act is designed to enforce priorities in congested ports to those vessels of greater importance to our national security, to secure the maximum economic use of available vessels and port facilities and services, to prevent the waste of scarce materials and supplies in servicing vessels which might be engaged in activities harmful or less essential to the interest and programs of the United States, and to prevent unreasonable increases in charter hire and freight rates for ocean transportation. Such coordination in time of war or active mobilization is of high critical importance to the United States and to its allies or associates who will be exercising similar controls in the event that coordinated efforts of nations become necessary. Under the bill, vessels desiring to use the shore and port services or facilities or marine insurance services of this country would be required to secure a warrant or similar document as a condition to the use of such facilities or services. The use of these facilities or services would be prohibited to any vessel not having such a warrant.

As a condition on the receipt of a warrant, the vessel operator would be required to enter into undertakings with respect to the trade in which the vessels of the operator are employed, the voyages undertaken thereby, the passengers or cargoes to be carried, and to abide by fair and reasonable maximum charter and transportation charges. In determining such rates and charges, the President is directed to give due consideration to the valuation principles prescribed in section 902 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1242). A breach of any undertaking would subject the operator to the forfeiture of his warrant and thereby the loss of use of port and shore facilities and services, as well as insurance for ship and cargo.

In considering applications for warrants, the President is authorized to consider certain circumstances, including the origin and previous operating history of the vessel, the price and terms upon which the vessel may have been sold or transferred, as well as the operating practices of the applicant. Such provision for withholding of warrants in cases where there is a history of failure to assist the Government or of activities hampering the Government's programs and objectives, has the objective of securing the most tonnage for services contributing to the purposes of the act.

The regulations under the act may be made applicable to the use of any facilities for loading, discharging, lightering, or storage of cargo, any facilities for the furnishing of oil, coal, or other fuel, supplies, stores, or food, or any facility for the overhauling, drydocking, reconditioning, or repair of vessels, or furnishing marine insurance. The President may except from the regulations types of vessels the control of which he determines not to be required for the purposes of the act.

The proposed system of ship warrants for use in war or national emergency is not new or untried but is based upon previous experience in World War II under Public Law 173, 77th Congress, approved July 14, 1941 (55 Stat. 591), and repealed July 25, 1947 (61 Stat. 449). The bill is strengthened in the light of certain shortcomings of the World War II law, which were met by administrative action and which should be incorporated in the frame of the legislation.

In any emergency period requiring mobilization of the Nation's shipping and other resources involving great acceleration of the use of supply and repair facilities for shipping, ports will be subject to congestion and strain. In such times it will be vitally important to carefully control the use of vessels in the movement of cargoes. The international character of shipping makes special provisions of law desirable in order to prevent deterioration in the situation of our country and any allied or associated countries. To have statutory authority available will have the ultimate advantage of securing for the United States and cooperating nations the use of tonnage from the world's supply. The existing large Government-owned reserve fleet of merchant vessels is now 12 to 18 years old and is not in itself a guarantee of national safety so far as shipping facilities in time of war or defense emergency are concerned. No matter how well maintained a reserve fleet may be it takes at least some days to move it into operation. Tonnage and control of operating tonnage will be immediately vital in the event of attack which, it must be assumed, will be sudden and sweeping in scope.

The bill contains several sections of a supplementary or administrative character which will be noted section by section.

Section 3 provides that operators of listed facilities in the United States and places within its jurisdiction shall be governed by the regulations regardless of existing contracts.

Section 5 provides that it shall be the policy of the United States to coordinate the authority granted by the act with the exercise of similar authority by allied or associated nations.

Section 6 defines the word "person" so as to include any entity capable of entering into a contract.

Section 7 is an interpretative provision to prevent the imposition of any condition, that a vessel owner relinquish the care and supply of his vessel to any other person.

Section 8 is designed to preserve the coastwise laws of the United States from modification, but does not exempt vessels engaged in coastwise trade from the provisions of the act. This section also provides that the act is in no way to affect authority already granted by the Defense Production Act (extended in part until June 30, 1960). A severability clause is included.

Section 9 authorizes the President to delegate any power and authority conferred on him by the act (except the issuance of proclamations) to the Secretary of Commerce or the head of a department or agency deemed appropriate by the President, and authorizes redelegation of such authority to

appropriate officials in the department or agency. Provision is also made for interdepartmental coordination in carrying out programs under the act in relation to other programs of the Government.

Section 10 exempts the functions exercised under the act from the requirements of the Administrative Procedure Act (except as to section 3 thereof, which contains requirements as to notice to the public, and provides also that no secret matter need be published).

Section 11 provides penalties for violation of the act, the regulations, or orders issued, with a maximum penalty of $10,000 fine and 2 years' imprisonment. U.S. courts having territorial jurisdiction are given jurisdiction over offenses.

Section 12 relieves persons who comply with rules, regulations, or orders issued under the act, from damages or penalties resulting from compliance, notwithstanding that such rule, regulation, or order may be declared invalid by judicial or other competent authority.

The Department recommends early consideration and enactment of this legislation. In addition to being an important emergency authority as part of the readiness program in the interest of national security, the legislation is desirable to meet the commitments on the part of the United States for exercising this authority in coordination with authority already adopted by various member nations of the North Atlantic Treaty Organization, in the event that coordinated efforts of these nations become necessary.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1961—AMENDMENTS

Mr. PROXMIRE submitted an amendment, intended to be proposed by him, to the bill (H.R. 11998) making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes, which was ordered to lie on the table and to be printed.

Mr. JACKSON (for himself, and Senators AIKEN, ENGLE, ERVIN, THURMOND, and CANNON) submitted amendments, intended to be proposed by them, jointly, to House bill 11998, supra, which were ordered to lie on the table and be printed.

DETENTION OF MAIL FOR TEMPORARY PERIODS—ADDITIONAL COSPONSOR OF BILL

Mr. KEFAUVER. Mr. President, I ask unanimous consent that the name of the Senator from Colorado [Mr. CARROLL] may be added as an additional cosponsor of the bill—S. 3654—to amend the act of July 27, 1956, with respect to the detention of mail for temporary periods in the public interest, and for other purposes, introduced by me on June 9, 1960.

The VICE PRESIDENT. Without objection, it is so ordered.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE APPROPRIATIONS, 1961—ADDITIONAL COSPONSORS OF AMENDMENT

Under authority of the order of the Senate of June 14, 1960, the names of Senators HUMPHREY, CLARK, and BUTLER, were added as additional cosponsors of the amendment, intended to be proposed by Mr. KERR (for himself and other Senators), to the bill (H.R. 11390), the Departments of Labor and Health, Education, and Welfare appropriation bill, 1961, submitted on June 14, 1960.

TO PRINT AS A SENATE DOCUMENT REPORT BY COMPTROLLER GENERAL ENTITLED "REFUSALS TO THE GENERAL ACCOUNTING OFFICE OF ACCESS TO RECORDS OF THE EXECUTIVE DEPARTMENTS AND AGENCIES" (S. DOC. NO. 108)

Mr. McCLELLAN. Mr. President, I submit herewith a report prepared by the Comptroller General of the United States on "Refusals to the General Accounting Office of Access to Records of the Executive Departments and Agencies," and ask unanimous consent that it be printed as a Senate document.

The information contained in this report was compiled by the Comptroller General in order that interested committees of the Congress might be fully informed relative to certain difficulties he has encountered in obtaining information from agencies of the Federal Government required in exercising his statutory responsibility to provide the Congress with information relative to the fiscal operations of Federal departments and agencies.

The report, consisting of only 13 pages, has been approved unanimously by the Committee on Government Operations.

The VICE PRESIDENT. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and it is so ordered.

NOTICE OF HEARINGS ON CERTAIN NOMINATIONS BY COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to announce that a hearing has been scheduled for 10:30 a.m., Thursday, June 23, 1960, in room 2300, New Senate Office Building, on the nominations of Edward C. Sweeney, of Illinois, to be a member of the Subversive Activities Control Board for the remainder of the term expiring August 9, 1960, vice R. Lockwood Jones, resigned, and a term of 5 years expiring August 9, 1965.

At the indicated time and place all persons interested may make such representations as are pertinent. The subcommittee consists of the Senator from South Carolina [Mr. JOHNSTON], the Senator from Illinois [Mr. DIRKSEN], and myself, as chairman.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. SALTONSTALL:

Address entitled "The Fullness of Life," delivered by Senator FONG of Hawaii, at Tufts University commencement exercises, Medford, Mass., June 12, 1960.

MESSAGE FROM THE HOUSE—ENROLLED BILLS AND JOINT RESOLUTION SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the President pro tempore:

S. 1185. An act to provide for the preservation of historical and archeological data (including relics and specimens) which might otherwise be lost as the result of the construction of a dam;

S. 1358. An act to authorize the Secretary of the Interior to provide a headquarters site for Mount Rainier National Park in the general vicinity of Ashford, Wash., and for other purposes;

S. 1892. An act to authorize the Secretary of the Interior to construct, operate, and maintain the Norman project, Oklahoma, and for other purposes;

S. 2327. An act to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes";

S. 2439. An act to authorize certain teachers in the public schools of the District of Columbia to count as creditable service for retirement purposes certain periods of authorized leave without pay taken by such teachers for educational purposes;

S. 2954. An act to exempt from the District of Columbia income tax compensation paid to alien employees by certain international organizations;

H.R. 10000. An act to amend further certain provisions of the District of Columbia tax laws relating to overpayments and refunds of taxes erroneously collected;

H.R. 10183. An act to amend the Fire and Casualty Act regulating the business of fire, marine, and casualty insurance in the District of Columbia;

H.R. 10684. An act to amend sections 1 and 5b of the Life Insurance Act for the District of Columbia;

H.R. 10761. An act to provide for the representation of indigents in judicial proceedings in the District of Columbia; and

S.J. Res. 42. Joint resolution to establish an objective for coordinating the development of the District of Columbia with the development of other areas in the Washington metropolitan region and the policy to be followed in the attainment thereof, and for other purposes.

NEEDED: MORE EFFECTIVE YOUTH DEVELOPMENT PROGRAMS AS "ANTIDOTES" TO DELINQUENCY

Mr. WILEY. Mr. President, today the Juvenile Delinquency Subcommittee of the Judiciary Committee issues its annual report. As a member of that subcommittee, I am particularly concerned with the revelation of the report reflecting a regrettable waste of human resources—in this case, youth, the Nation's most precious asset.

For the past 10 consecutive years, for example, there has been an increase in juvenile crime.

There are, of course, different views on the cause and cure of problems in this field. However, I believe there is a greater need for public understanding, as well as interest in and action toward resolving the problems confronting youth.

Overall, the report, I believe, will help to serve this objective.

Fundamentally, the study represents a factual, comprehensive report on the multitude of complex problems in this field. It is a unique assemblage of information, and includes coverage of:

The broad scope of complex problems of juvenile delinquency and the need for more comprehensive programs to deal with them;

A compendium of techniques now being utilized in communities throughout the country for coping with differing situations;

Recommendations for the care and feeding—that is, the handling and rehabilitation—of juveniles;

Of great significance, a review of youth development programs serving as antidotes to the spread of delinquency; and other invaluable information.

In reviewing the national picture of juvenile delinquency, legislative history, survey of current programs, and making recommendations for the future, the report, I believe, will helpfully serve Members of Congress in their efforts in this field.

In addition, the study will serve as a handy guide-manual for the many individuals, organizations, State and Federal agencies, and others of the general public who are attempting to cope with and resolve the difficult challenges.

Overall, the report reflects the far-reaching efforts of the subcommittee to obtain a comprehensive picture of the field through hearings in Washington and across the country; consultations with authorities on delinquency; broad research effort, including analyses of studies previously undertaken in the field; questioning of interviewees, including a great many youth out of step with society, falling into the category of delinquents; surveys through questions to obtain the views of judges, social workers, and other authorities in the field; and other efforts.

All of us realize, of course, that a study such as the annual report, issued, then perhaps forgotten and buried in file drawers or the archives, does not help Congress or the youths involved in this problem or the general public.

Recognizing these important factors, I wish to commend the distinguished chairman, the Senator from Missouri [Mr. HENNINGS], and the staff director of the subcommittee, Mrs. Frankie Childers, for a splendid annual report, as well as an outstanding job of focusing the public eye and mind on the report and its value.

By an enterprising technique of prereleasing major findings of the subcommittee—data now highlighted in the annual report—it has been possible to bring to public and nationwide attention the findings and recommendations of the subcommittee. The objective—to a remarkable degree successfully achieved—has been to maximize interest in and, we hope, encourage and inspire efforts to deal with these great challenges.

I ask unanimous consent to have printed at this point in the RECORD a 10-point program for better meeting the problems of juvenile delinquency.

In addition, I ask unanimous consent to have printed the following articles reviewing constructive efforts in Wisconsin to deal with problems of delinquency:

First. An article, published in the Janesville Daily Gazette, written by Bernice Warner and entitled "Probation Officer Says Juvenile Delinquency Is 'Product of the Times.' "

Second. An article, from the Green Bay Press-Gazette, written by Leigh Caldwell and entitled "Committee Studies Problems of Youth."

There being no objection, the statement and articles were ordered to be printed in the RECORD, as follows:

TEN-POINT PROGRAM FOR MEETING PROBLEMS OF JUVENILE DELINQUENCY

(By Senator WILEY)

The Nation cannot afford to waste its most precious asset—youth. To the contrary, constructive, creative programs are needed not only for dealing more effectively with delinquency but also for sponsorship of more youth development programs as antidotes to delinquency.

Fundamentally, and most fruitfully, I believe we must take a positive, not a negative-approach to the challenges in this field. Among other objectives, these include more effective programs designed to challenge the talents, energies, imaginations and ingenuity into creative—not destructive—activities.

As President Eisenhower stated at the recent National Youth Conference:

"We must beware of a tendency to generalize pessimistically about our youth—to attribute to the many, the failures of the few. Such terms as 'lost,' 'misguided,' or 'offbeat,' each have had their counterpart in earlier generations.

"Civilization is a matter of spirit; of conviction and belief; of self-reliance and acceptance of responsibilities; of happiness in constructive work and service; of devotion to valued tradition. It is a religious faith; it is a shared attitude toward life and living which is felt and practiced by a whole people, into which each generation is born and nurtured through childhood to maturity."

In our earnest efforts to deal with the problems of delinquency, we must not be so concerned with the problem child or youthful offenders that we forget that the great majority of our youth is devoted to the pursuit of positive values—to self-improvement, the betterment of education and the fuller exploitation of human and spiritual resources.

Recognizing that there has been a regrettable increase in delinquency, however, the Nation—at local, State and, as necessary, Federal levels—must take action to deal with this problem. Basically, I believe that a constructive approach includes the following factors:

1. First and foremost, antidelinquency efforts are the responsibility of the home—of parents of America;

2. If the problem gets beyond the home on a broad-scope basis, then naturally the social forces in the community should take hold of the situation. These include churches, schools, parent-teacher associations, fraternal services, and veterans groups and other organizations, many of which are already doing a fine job in this field.

3. Local-State social services—in delinquency-struck communities—should undertake further efforts not only to deal with the delinquent child but also to provide counsel for the parents, in necessary cases.

4. Our courts and penal and correctional institutions need to be modernized, modified, and adequately staffed with judges and other trained personnel, in order more effectively to meet the unique problems of youth in a fast changing age.

5. As necessary, Federal laws need to be strengthened, to prohibit traffic of materials—including weapons, narcotics, obscene literature, and other items—that contribute to delinquency. In addition, tougher laws need to be enacted to punish violators of laws.

6. Call a halt to "adult delinquency" which often results in abandonment, if not in all cases, of the children themselves, or at least of a portion of their physical, psychological, and emotional needs.

7. The children of today—contrary to the popular concept that society owes them a living—should have instilled in them the realization that they, themselves, have an obligation to their parents and to society.

8. Delinquency knows no social, economic, environmental, or other boundaries. Consequently, there is a need for each community to analyze its own special needs and to design special programs to cope with the problems.

9. As a nation, we need to encourage high standards of presentation by our information media, including television, "funny" papers, "funny" books, radio, and other mediums, which, if presenting the wrong kind of "stuff," can adversely affect the youthful mind.

10. Our society, too, must not fail to stress in its news reporting and community-recognition programs the fact that more than 95 percent of our youth are conducting themselves dutifully, constructively, and creatively as keystones in home and community life.

Overall, it is highly important for us to create the kind of environment in which our youth—the most precious asset of our Nation—can have opportunity to fulfill a great, promising destiny.

[From the Janesville (Wis.) Daily Gazette]

PROBATION OFFICER SAYS JUVENILE DELINQUENCY IS "PRODUCT OF THE TIMES"

(By Bernice Warner)

A "razor strop" approach to the problem of juvenile delinquency in the era of the electric razor just doesn't make sense to Robert MacMaster, who has been county juvenile probation officer long enough to know what he's talking about.

"The same men who recommend using the razor strop and the old-fashioned woodshed to reestablish much needed parental control are the ones who have bought the latest model electric razor and are heating their modern homes with gas or oil," MacMaster says.

Yet, while he decries the use of old-fashioned solutions for a modern problem, MacMaster's own personal prescription for curing juvenile delinquency ills is probably the oldest on record: "Live up to the 10 Commandments." Which, he admits, is much easier said than done.

Much of MacMaster's adult life has been spent working with the youth of the area, both in an official and unofficial capacity. County juvenile probation officer since July 1, 1944, he sees the present situation as a reflection of the times, with its tensions, its insecurities—and its prosperity.

BLAMES PROSPERITY

It's the prosperity, he feels, that is one of the greatest villains in the case.

The depression had its own problems, but it had the saving virtue of knitting families closely together, he points out. There was no money to spend on going out to find amusement, so many families made their own fun at home with the result that parents not only knew where the children were, they knew what they were doing.

That's just one of the angles which MacMaster likes to explore as a contributing cause of juvenile delinquency. There are many more, but they're all interrelated. In his opinion, other factors, not necessarily in the order of their importance, are:

Lack of parental control.

Failure of parents to accept total responsibility for their children.

Modern transportation.

"Easy" money.

Mental and emotional instability among young people.

Working mothers.

Fathers who work the night shifts.

Lack of strong religious principles, accompanied by a general lowering of moral standards.

The lack of parental control, which MacMaster puts high on the list, is an adult problem rather than a juvenile one. Those parents who teach their children a healthy respect for authority—and for property—whether in the home or outside it—almost automatically reap the benefits of parental control, he says. He is shocked by the general disrespect with which many young people treat those in authority, a disrespect which is often shown even in the courtroom.

"If a child doesn't learn respect at home, where will he learn it?" MacMaster asks. He himself learned it the hard way, he admits, but the habit of courtesy became so ingrained that to this day he uses the term "sir" automatically when talking to those in authority.

Orphaned at the age of 5, MacMaster was raised by an uncle and aunt, Mr. and Mrs. Charles Greene, in Chicago. His late uncle, associated with the Chicago Tribune for many years, was a stickler for courtesy and demanded that his young nephew address his elders as "sir" and "ma'am."

FORMER SALESMAN

As a boy, MacMaster attended Senn Technical School in Chicago and sold newspapers on the streets of Chicago to earn spending money. He attended Dunwiddie Institute, a technical training school for engineers, in Minnesota. Because of his health, he was advised to seek work that would allow him to be out-of-doors, and as a young man, MacMaster went on the road as a factory sales representative for the Maytag Co.

His traveling days came to an end when he married the former Elizabeth Caaps of Galesburg, Ill., and settled in Beloit. Always interested in young people, MacMaster soon became active in the YMCA and other organizations working with youth. He got into his present line of work through the side door directly as a result of his interest in young people. While MacMaster was bailiff of the Beloit Municipal Court, Judge Chester H. Christensen, then municipal judge, became familiar with his youth activities and asked if he would volunteer to help with the growing juvenile problem in Beloit. He sat in on conferences with the judge, met with the young people, heard their problems, and made suggestions to the court.

Soon he was devoting more and more time to working with juveniles who had gotten into trouble with the law. Eventually he was named probation officer and took over those duties on a full-time basis.

Then, with the outbreak of war, there was an alarming increase in juvenile delinquency. Mothers left their homes and families to work in defense plants, often earning more money than their husbands; fathers began going into service; there were many hasty war marriages with resultant divorces and broken homes, often involving children.

That, MacMaster feels, marked the period when family responsibility began to deteriorate. In an effort to keep up with the Joneses, many parents began seeking amusement away from the home, attempting to make up for their neglect of the children by giving them material advantages.

"Some of the worst parents are those who were children during the depression and had to get along without a lot of the things they thought were important," in MacMaster's opinion. "They make up their minds that their children are going to have all of the things their own parents couldn't afford to give them. They just don't seem to realize that children would rather have love, attention, and a sense of security."

By 1944, the Rock County Board of Supervisors, alert to the growing situation as to juvenile delinquency, voted to establish the post of juvenile probation officer to act as an arm of the Beloit and Janesville juvenile courts. MacMaster was appointed and for the next 6 years hundreds of delinquents, most of them boys, came under his guidance and jurisdiction.

MacMaster prefers to think of his work as coming under the heading of guidance rather than under its official name of county juvenile officer and spends much of his time working with the youthful offenders for their rehabilitation.

DEPARTMENT EXPANDED

By 1950, the number of girls placed on probation had grown to such an extent that the county authorized hiring an assistant, Mrs. Natalie Lyons, who is still with the department, in order to deal more effectively with that problem. The department now has another assistant, Peter Reese, an office secretary, Mrs. Priscilla Hamilton, and a student from Beloit College, Kay Kaminski. Under a recently inaugurated program, a college senior is selected by the department and by the college for a year's intraining service and this has worked out exceptionally well, the student receiving credit for his work and the department having the advantages of the student's services and youthful viewpoint.

"The students seem to be able to make contact with the youngsters very readily, probably because the age difference is smaller," MacMaster observes. "They can meet the boys and girls on their own ground and often succeed in gaining their faith and confidence. That's the important thing in working out their problems."

Often a juvenile must be removed from his own home and placed in new surroundings before anything can be accomplished, and in this area MacMaster finds his early training as a salesman comes in pretty handy. Finding foster homes for the youngsters constitutes one of the more difficult aspects of his job. It is also one of the most important, for often a youngster can be guided back into good, useful citizenship with the proper training and environment. MacMaster feels that Rock County has some wonderful people who have opened up their homes and their hearts to boys and girls who might otherwise never have the opportunity of knowing normal family relationships. In addition to private homes, juveniles from Rock County have been admitted to such institutions as the Lutheran home in Milwaukee, the Norris Farm School for Boys at Big Bend, the House of Good Shepherd, Milwaukee, and St. Michael's at La Crosse.

STRESSES INDIVIDUALISM

Rock County has an unusually low number of juveniles committed to State institutions, primarily because MacMaster feels that commitment is a "last ditch" measure. With State institutions overcrowded and understaffed, MacMaster thinks the situation is better handled on the local level whenever possible; as a matter of fact, he feels that each individual case must be solved individually and that there is no such thing as a mass answer to the problem.

Right now, MacMaster is concerned with detention facilities for juveniles, now quartered in the Rock County jail. When the old jail was declared unfit for the juvenile purpose by State officials, a detention home was established in a private home in Milton Junction and became such an outstanding project that it was widely publicized as being an effective means of rehabilitation. However, when the new jail was completed, separate quarters were provided in it for juveniles and the detention home was discontinued.

MacMaster would like to see a four-county detention home supported and used by Rock, Green, Jefferson, and Walworth Counties where juveniles could be given training and where rehabilitation work could be done effectively. Neither is possible under the present setup.

MacMaster is also perturbed about the increase of delinquency in the villages, small towns, and rural areas and with the indication that emotional and mental instability is becoming more apparent. Diagnostic center facilities are being used more frequently now than in the past, MacMaster says, laying the blame again on "the times" with the stresses and anxieties being transmitted to the young people.

PLENTY OF HEADACHES

While he admits that the department has had its failures, it has also had some successes in dealing with boys and girls under its jurisdiction and these are the cases that more than make up for the many headaches of being juvenile officer. And there are plenty of headaches, MacMaster admits, explaining that the only way one can continue in the work is to "leave the problems in the office."

Mondays he spends in the county at large; Tuesdays and Thursdays at Beloit, and Wednesdays and Fridays in his office in the Rock County Courthouse. His assistants also follow a varying schedule that provides complete county coverage.

An enthusiastic member of the Rotary Club, MacMaster was named governor of District 210, Rotary International, in 1954. Mr. and Mrs. MacMaster have three children, two daughters, Mary Elizabeth, 20, in her second year of nurses' training at Madison; Ruth Roine, 18, who will graduate from Beloit High School in June; and a son, John, 10, a fourth grader at Cunningham School in Beloit, where the family lives.

[From the Green Bay (Wis.) Press-Gazette of June 7, 1960]

COMMITTEE STUDIES PROBLEMS OF YOUTH—EIGHT OCONTO COUNTY PEOPLE CONSIDER FUTURE CITIZENSHIP

(By Leigh Caldwell)

OCONTO—"How can the youth of today be given the opportunities they deserve which will best prepare them for the future?"

That was the question uppermost in the minds of eight Oconto County citizens when they organized an advisory committee for youth in January 1959. "Can we as citizens make a better community for our children?" the committee asked itself.

Attacking the problem were these members of the committee: Herb Buseman Gillett, chairman; Pat Gauthier, Suring; Art Odau, Robert Shellman and E. A. Moede, Oconto Falls; Bernard Stodola, Coleman; Janice Heineman, Pulaski, and Mrs. Reuben Timm, Gillett.

The committee sought to establish what problems existed, what alternative solutions were available, and then to suggest procedures for solving the problems.

An early demand was to know the present situation by the use of facts. The Welfare Department was called upon to establish the degree of delinquency in the county. The Rev. Merlin Sasman, child welfare worker, and James Leschke, juvenile probation officer, gave background information on the national, State and county situation.

MAJOR PROBLEMS LISTED

After thoroughly discussing how important each youth opportunity is, and their varied reactions in the lives of young people, these major problems were identified:

1. Parents need education on the needs of youth and how to effectively satisfy their needs. (The youth situation in Oconto County is to be used to alert parents to the problems.)

2. Delinquency has increased and the number of cases requiring court action has increased in Oconto County as well as the Nation.

3. Teenagers have too much money to spend and not enough guidance in the use of their money. Advertising is suggested on such problems as drinking, smoking, and automobiles.

4. Teenagers are not given enough recreational opportunities that are wholesome and appealing.

PARENTS ARE LAX

5. Parents are lax in setting standards for youth.

6. Parents lose control of their children when the children are too young.

7. Youth are not properly informed about the reasons for a law being stated as it is.

8. Society has encouraged conformity among groups which has discouraged the "brain" as well as the correction among problem groups.

9. There is not enough parental leadership for youth groups.

10. Prospective members and parents of prospective members as well as parents of members of youth groups are not properly informed or convinced of the values of youth organizations and the role that they must assume.

PANEL IS PLANNED

The youth committee gained a good understanding of problems as viewed by people in different areas of the county. A panel discussion is being planned to discuss such questions as the part parents can play toward building good citizenship, public service and improving community activities that help to mold the future of their children and how are parents delinquent.

The panel to discuss these and similar questions will include a teacher, youth leader, church representative, welfare worker, and youth representaives. The panel will get the facts, compile the information and offer the program to any interested groups.

SERIES OF CLASSES

A second recommendation was to plan a series of classes on understanding the needs of youth. Topics for which training would be given include: How can parents, lay people, citizens and educators help improve the community, how can youth inform their parents of their failings, how do we understand youth, and how do we sell them on the fact that we are trying to help them.

Another suggestion was for the forming of study groups with references and bibliographies for studying child development.

The youth committee has made known that its sincere desire is to help parents and to build a better community in which Oconto County children can grow up.

PROBLEM OF OUR FOREIGN CURRENCIES

Mr. FULBRIGHT. Mr. President, in the May issue of the Atlantic, Prof. Edward S. Mason, of Harvard, has written an article entitled "Foreign Money We Can't Spend." This article deals with one of the most abstruse and difficult subjects with which this body has to deal, that is, the problem of our foreign currencies, especially those accumulating under the operations of Public Law 480. I believe there is much misunderstanding of this subject, and I urge my colleagues to take the time to read this article, which is the best I have seen on the subject.

I ask unanimous consent that it be printed in the body of the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FOREIGN MONEY WE CAN'T SPEND

(By Edward S. Mason)

During the early days of the Marshall plan in Europe, a comforting belief developed that a way had been found to make one dollar do the work of two. American dollars appropriated by Congress to promote European recovery were spent for U.S. exports of food, petroleum, and other goods to supply Europe's needs. When these goods arrived abroad, they were sold for pounds, francs, or lire, and the proceeds of these sales accrued to the governments in question as additional revenues. Thus, the countries being assisted acquired American goods, and their governments received the dollar equivalent of these goods in the form of local currencies that then became available to finance reconstruction and recovery.

The currencies received by foreign governments as a result of these transactions were called counterpart funds, and although they were owned by the governments in question, the United States retained a veto on their use. The support in this country for the veto power arose in part from the belief that the United States should participate in determining not only the use of the first dollar, spent for American goods, but also the use of the second dollar generated from the sale of these goods. If $2 worth in recovery was being accomplished for every dollar spent, why should the United States not participate to the full in what was, after all, a mutual recovery program?

Now it does not take much reflection—nor did it then—to discover that, in fact, one dollar cannot do the work of two. The only addition to European resources was the receipt of goods from abroad financed by the Marshall plan appropriations. To be sure, the sale of these goods increased the revenues of governments in pounds, francs, or lire. But the receipt of these currencies added nothing further to available resources. Moreover, these governments were, in general, free to acquire additional quantities of their own currencies by taxation, by borrowing from their citizens or from the central bank, or by printing money.

The most conspicuous exception was Germany. The havoc of war had so disrupted the fiscal and banking system that the German Government, initially in the hands of the occupying powers, was unable by taxation or borrowing to acquire control of adequate quantities of its own currency. The proceeds of sales of Marshall plan deliveries provided a useful supplement.

In Britain the fiction of double-duty dollars was from the beginning recognized as a fiction. The United States wisely never attempted to influence the use by the British Government of its revenue receipts. Elsewhere, and particularly in France and Italy, attempts to influence the Governments' use of counterpart were easily circumvented, and usually resented.

It is worth recalling this early experience with Marshhall plan counterpart funds because, in its current programs of assistance to underdeveloped areas, the United States seems to be engaging in a colossal piece of self-deception. The double-duty dollars are back on the scene in a big way, and as American holdings of rupees, kyats, rupias, and rials accumulate around the world, all sorts of grandiose schemes for saving humanity through the use of these currencies are being concocted.

Counterpart funds, whatever their basic irrelevance to the problem of European recovery, had at least the merit of being self-liquidating. Although the United States possessed a veto power with respect to their use, once an agreed use was found they were spent and thus were written off the books so far as we were concerned. By the end of fiscal year 1958, counterpart funds held by European countries had been reduced to $255 million and were declining rapidly. And although counterpart funds held by Asian countries were substantially larger, their disposition represents no insuperable problem.

This is not true of U.S.-owned foreign currencies, which in some countries are accumulating at a devastating rate. Currently we own slightly more than $3 billion in local currencies, mainly Asian, and our holdings are, or will shortly be, increasing at the rate of $2 billion a year. In another 4 years we shall probably own $10 to $11 billion, and if our aid program continues at the present rate for another 25 years we may well own all of Asia. Of course, this ownership is as phony as a $3 bill, but the potential political repercussions are not at all phony, either in Asia or the United States.

The large-scale accumulation of U.S.-owned local currencies may be said to have begun in 1954 with the enactment of current legislation to dispose of our agricultural surplus. This enactment more or less coincided with a rather pronounced shift in our foreign aid programs away from grants in the direction of loans. At present, Public Law 480, which governs the disposal of agricultural surpluses, and the Development Loan Fund are the principal generators of local currencies. Public Law 480 currently generates about $900 million a year, and the DLF generates $500 to $600 million more. But this is not all. Local currencies once accumulated by the United States are lent and re-lent to the receiving countries at 4-percent interest. Moreover, until recently Public Law 480 loans were accompanied by a maintenance-of-value clause, which said, in effect, that if the borrowing country depreciates its currency, the amount owed to the United States shall be increased proportionately. DLF loans still carry this provision. This combination of large annual accretions plus interest payments plus maintenance of value may be expected to increase American holdings of foreign currencies at an extremely rapid pace.

The insistence on selling agricultural surpluses and the shift in economic assistance from grants toward loans represented a rather strong political reaction in this country against giveaway programs. Once political leaders who recognized the importance of economic assistance to the foreign policy of the United States became convinced that appropriations could be most easily maintained and increased by accenting loans and sales rather than grants and gifts, the line hardened. By now Public Law 480 and the Development Loan Fund are, speaking generally, the most acceptable parts of our economic assistance policy. And strong political forces have coalesced around them.

It may be useful at this point to reflect for a moment on the meaning of "giveaway." The sale abroad of American goods for currencies that can be used to finance American imports is obviously not a giveaway. But the currencies now being accumulated by the United States in connection with economic assistance cannot be so used. A loan abroad in expectation of repayment of interest and principal in dollars is clearly not a giveaway. But DLF local currency loans are made with little hope of dollar repayment. Whether Public Law 480 sales and DLF local currency loans are giveaways

in the economic sense of the term depends on whether the local currencies acquired have any economic value to us.

In fact, we are lending and selling for currencies which, in a number of countries, are of little present or potential future value. Regardless of the words used or their political connotation, we are still, in the economic sense of the term, engaged in a giveaway program. And in pursuit of the impossible economic quid pro quo, we are adopting measures and pursuing methods that inevitably sabotage the real objectives of foreign assistance. We continue to lend at a 4-percent return in currencies that have no value to us, while the Russians lend at 2 or 2½ percent for currencies they can use. We are piling up our unusable holdings of these currencies on a scale that will inevitably cause alarm and resentment in the countries affected.

Rupees, kyats, baht, rupiah, and the like look like money and feel like money, but in the form of U.S. holdings abroad and under the conditions on which they are held, they are, in the main, not money for our purposes. We can use this money for Embassy expenditures, the local costs of economic and military missions, the acquisition of additions to our already redundant raw material stockpiles, and loans to American firms operating abroad. This may account for 35 percent of our holdings. What about the other 65 percent? American holdings of Indian rupees are now approaching the equivalent of $800 million. In the course of the next 3 years, these holdings can easily approach $2.5 billion. Now $2.5 billion in relation to the Indian national income is roughly equivalent to $35 billion in this country. Imagine the reaction in the United States if a foreign country, no matter how friendly, held $35 billion in our currency. The inevitable reaction to the currently much smaller holdings is already in evidence in Asia, not necessarily from governments, but from the Communists and from opposition parties.

Faced with this reaction, American representatives abroad make every effort to get these holdings off the book by lending them to the local government. It may be suggested in Delhi that, if the Indian Government does not borrow the local currency proceeds of surplus crop sales, agricultural commodities may not be available for local currency purchases next year. The Indians must know, considering the anxiety in the U.S. Department of Agriculture to get rid of these surpluses, that this is a fairly empty threat. But the representatives of Asian governments in Washington are generally aware of the necessity of playing the game. If they borrow what they are told to borrow, then current American holdings of local currencies will not be so embarrassingly large.

It should be obvious that, at best, this is a temporary expedient. Why, apart from playing the game, should a country having an adequate fiscal and banking system want to borrow its own currency at 4 percent and have to listen to American advice on how this currency should be used in the bargain? In Burma, a recent request that the Government borrow from the U.S. holdings that were getting uncomfortably large met with the reply that the Burmese Government could borrow from its own Central Bank at 1 percent.

The accumulation of American-owned local currencies not only causes anxiety abroad; it is the source of difficulties at home. When the administration goes annually to Congress for foreign aid appropriations, the question is invariably asked: Why do you need more, when you already have $2 billion plus uncommitted and unspent in foreign parts? Then begins the difficult task of unsaying what has been said on another occasion. It is explained that, although the agricultural surpluses were sold and not given away, the money acquired by the United States cannot be used to assist in further development. Local currencies accumulated are no substitute for dollars.

If we attempt to use our stock of, say, Pakistani rupees for a world health program, in effect it means that the very scarce supply of resources available for Pakistan's economic development is diverted to other purposes. This sort of diversion is tolerable within the context of a foreign assistance program only if it takes place on a very small scale, as, for example, in the Fulbright program. Here, small amounts of local currencies are used to cover the costs of American students and scholars abroad or the local currency expenses of foreign students coming to the United States, to purchase foreign books for American libraries, and for other purposes. This diversion of a country's resources is tolerable because it is small, but any attempt to use our currencies on a large scale for these or other worthy purposes would be a serious negation of a development program.

The disposal of agricultural surpluses abroad can, and frequently does, make a highly important contribution to maintaining minimum standards of living and promoting economic growth. Development programs in many countries are inflationary, and the injection into the economy of food shipments from the United States can have a moderating influence on the upward movement of prices. Countries like India and Pakistan which are deficient in food production find it possible, because of the U.S. disposal program, to save for development purposes scarce foreign exchange that would otherwise have to be used for food imports.

If we wish to make a further contribution to the development of the receiving country, we have a choice between financing, through local currency loans, either projects which the receiving country planned to undertake in any case or projects which lie outside the country's own development program. If we do the former, we may, it is true, permit the receiving country to retire some of the domestically held debt in favor of increased local currency obligations to the United States, or perhaps to moderate the level of taxation, but so far as real resources are concerned, the picture is unchanged. If, instead of supporting a planned development project, we insist that our local currency loan be used for purposes outside the development program, we are probably promoting inflation as well as diverting scarce foreign exchange away from uses that the receiving country considers more important.

The development programs of almost every underdeveloped country are large enough to produce inflationary consequences. Almost all of these countries are attempting to invest more than voluntary savings plus tax receipts will permit. There is therefore a continuous upward pressure on prices. If we were content to supply goods under our foreign aid programs without spending the local currency proceeds, we could exercise a helpful moderating influence on this upward movement. If we lend these proceeds for purposes to which the receiving country is already committed, the moderating influence is still exerted, though we will in time accumulate large volumes of local currencies. If we lend for purposes outside the development program, we not only overaccumulate but we prevent our assistance from moderating serious inflationary tendencies.

All things considered, the best disposition of the vast bulk of local currency accumulations would be for us to grant them back for debt retirement or any other purpose deemed proper by the receiving country. Alternatively, we could burn them, though this would involve the country in the additional expense of printing new currency notes. A recent suggestion by Undersecretary Dillon that U.S. counterpart in Greece be used for debt reduction met with a storm of protest. Why, it was implied, should currencies held or controlled by the United States be used for debt retirement abroad when the American Government is forced continually to add to its debt at home? This attitude is one of the consequences of treating local currency holdings or counterpart as something of value, as real money. Whether the Greek Government uses American counterpart to retire debt or not, the American debt position remains the same.

There are, however, two matters of legitimate concern to Congress and to American citizens that frequently arise in local currency discussions. Since political objectives are of primary concern in our foreign aid policy, it is both legitimate and important that we make what political capital we can from our assistance. And since the chief route to all our objectives in the underdeveloped world is economic growth, we have a deep interest in ensuring that our assistance is reasonably related to economic growth. There is every reason that the citizens of these countries should know about our assistance and, for far as possible, be permitted to see its tangible results.

This does not, however, seem to be the way we go about it. Instead, we make every effort to convince ourselves and everyone else that we are not giving assistance at all but are engaged in a hard headed program of sales and loans for value received. And we kid ourselves into the belief that with the local currencies we receive from these loans and sales we are in a position to exert great and favorable influence on public opinion and on economic growth.

Why can't we, it is asked, use our local currency holdings to build a series of up-to-date hospitals throughout southern Asia? This would be tangible evidence for all to see of American concern with the well-being of the downtrodden, a great propaganda gesture. Certainly Asia needs hospitals. But more considerations impinge on a decision of this sort than meet the eye. First, the resources required for the building and equipping of modern hospitals are not all available in most Asian countries. A substantial part of these requirements would have to be imported, and U.S. local currency holdings are, by agreement, not convertible into foreign exchange. Second, although Asia needs hospitals, it needs everything else too, and a large hospital program, desirable as this may be, does not necessarily represent the best use of resources. Third, the construction of hospitals, and of almost everything else, originates a continuous requirement for maintenance and staffing that the host country may be unwilling or unable to assume. Examples are not lacking in Asia and elsewhere of U.S.-encouraged enterprises that have fallen into disuse because the receiving country was loath to assume the burden of continued operation.

The point of all this is not that the United States should refrain from insisting on a use of its aid which is considered to be politically advantageous to us. But the assistance and the proposed direction of use should be manifested at the time that the host country is receiving something it considers of value. Furthermore, the bargaining position of the United States is likely to be better if our aid is recognized as aid and not disguised as a phony sale. In any case, the occasion on which the United States attempts to lend the receiving country its own currency is not the appropriate time for us to begin to throw our weight around.

We can, of course, refuse to lend for what we consider to be undesirable purposes, through the Development Loan Fund, Export-Import Bank, and such influences as we have on the International Bank. But it is always possible for the country in question to use our loans and grants for mutually agreed purposes and divert its own resources

into channels considered by us to be inappropriate. If we are to exercise any substantial influence on the overall direction of a development program, it can only be through the process by which goods and services are provided via loans, grants, or "sales." The local currencies accruing from these loans and sales provide us with no additional bargaining power.

Finally, the lending of local currencies is accompanied by legal restrictions that are frequently a source of extreme irritation. Since the fiction is maintained, at least in the United States, that these currencies have value, loans are made with all the usual conditions laid down by Congress and applied by the General Accounting Office. A sizable percentage of these loans are made to finance publicly owned enterprises. And since these enterprises are tied in closely with Government departments and ministries, a close exercise of the auditing functions is likely to lead U.S. investigators rather deeply into the affairs of the borrowing government—a situation which engenders further resentment.

It has been implied so far in this discussion that the United States can make little use of the local currency generated by aid shipments, either to help countries receiving assistance or to help us. In general, this is true. But there are exceptions. In a number of Far Eastern countries lacking adequate fiscal and banking systems, the local currency generated by the sale of U.S. goods is the principal support of government services. In Vietnam, for example, approximately three quarters of the minimum import requirements are covered by the shipment of U.S. goods. And the sale of these goods for Vietnamese currency provides the local government with about two-thirds of its revenue receipts. In the absence of this source of funds the government would collapse, with serious consequences to our security position in southeast Asia. The situation in Laos and Cambodia is roughly similar.

Assistance to these three countries and to certain others mainly takes the form of defense support. Here the local currency generated by the sale of assistance imports is granted as counterpart to the countries in question. But defense support, as a category of foreign aid, is meeting increasing resistance in Congress. The predilection for loans, even when repayment is out of the question, continues to grow. If its own currencies were lent rather than granted to the Vietnamese government, its source of revenues would be the same as at present. The only difference is that the United States would accumulate these currencies at the rate of about $250 million a year, with no hope of repayment now or in the future.

At the other end of the development scale are countries to which local currency loans offer some—albeit remote—prospect of repayment in dollars. These countries are few, and the amounts involved are small. Yet these highly untypical situations tend to be used as the general justification for local currency loans. The advantage of such loans, the argument runs, is their flexibility. Developing countries, it is true, are unable to service loans in dollars at present, but with development their ability to do so will increase. At some future time, the argument runs, we can reassess the whole situation, take our repayments of principal and interest in dollars where it is possible to do so without checking development, and write off the rest.

This might be a plausible course of action if the continuous accumulation of massive local currency holdings had no adverse repercussions at home or abroad, if the fiction of loans and sales were not an obvious impediment to the attainment of our political and security objects, and if the persistent process of lending and accounting for local currencies could be carried on without irksome intervention and surveillance in the borrowing countries. As it happens, however, none of these conditions can be fulfilled. The fact that certain small quantities of local currencies in certain countries can perhaps be recovered in dollars can no longer be used as a justification for the accumulation now looming on the horizon.

The first and most obvious corrective step that needs to be undertaken is to eliminate the phony sales of agricultural surpluses. Although this form of economic assistance needs to be used with careful regard to the interests of other exporting countries and to its impact on agricultural development in receiving countries, there are enormous opportunities here for an effective contribution toward meeting the problems of the underdeveloped world. A wise use of our agricultural surpluses can contribute not only to our long-run objectives, but can yield more immediate political capital. But a sale of these surpluses, followed by attempts to lend the local currency receipts, goes far to cancel most of these potential advantages while piling up large stocks of unusable money.

The other principal generator of U.S.-owned local currencies, the Development Loan Fund, can lend both for dollars and for local currencies, but four-fifths of the loans made to date are of the latter character. And they should be, if the Fund is to make its proper contribution to economic development. The Development Loan Fund is a relatively new institution, and, therefore, the process of repayment and relending of local currencies at 4 percent, which will inevitably accentuate our excessive accumulation, is not yet well under way. Consequently, if we take immediate steps to cancel the effect of the sales of Public Law 480 surpluses, we shall have time for a serious reconsideration of the terms on which economic assistance through the DLF can effectively be provided. But unless and until this is done, Uncle Sam's foreign funny money will continue to expand like a tub full of Asian steamed rice.

TRIBUTE TO FOREST SERVICE

Mr. GOLDWATER. Mr. President, it is easy to criticize, and finding fault with the different bureaus of Government and with their employees seems at times to gain the proportions of a national pastime. It is, therefore, very pleasant to be able to extend accolades to a division of our Government, and particularly to the people who run it. It is with great pleasure that I rise today to salute the Forest Service, and in particular a number of its officials who have by their understanding created, with the cooperation of a group of citizens in Arizona, a very unique playground out of land that was of little value to either the citizenry or the Forest Service prior to this venture.

Early in 1950 a group of individuals living in McNary and Pinetop, Ariz., two very small communities in northeastern Arizona, seeking to diversify the recreational attractions of that area, attempted to promote a golf course there. Because of lack of transportation, communication, and definite knowledge of requirements, they gave up this project, and it lay dormant until 1953. Again in that year these same people contacted one of Arizona's greatest sportsmen, Mr. Milton Coggins, of Phoenix, for his advice on reviving this idea. Mr. Coggins met with Mr. Hollis Palmer, of the Forest Service, and looked over a triangular area of approximately 1,000 acres, bordered on the south by the Apache Indian Reservation and on the east and north by the highway between Pinetop and McNary. This was forest land that had been cut over many times and was of very little commercial value. Because of the terrain and the tremendous amount of rock, the undertaking looked almost impossible, but the group was assured by the Forest Service of complete cooperation.

Late in 1953 another meeting was held with Mr. C. K. Spaulding and Mr. Hollis Palmer, both of the Forest Service, stationed in Holbrook, and Mr. John A. Sierker and Ed Cliff, out of the Washington office. They again assured the group that they would more than cooperate in any manner possible to promote this golf course and a summer home area.

It is well to point out that this area was generally known as the back country and while it has always offered fine fishing and hunting, there has been nothing for the fisherman's or hunter's family to do and no golf facilities for the attraction of the general public. This area, I might say, has a delightful summer climate, as one would expect it to have, nestled 7,000 feet above sea level on the slopes of the White Mountain. This feature alone, if facilities were available, would attract thousands of people from the hot dry deserts 150 miles to the south.

After the full cooperation of the Forest Service was assured, a nonprofit corporation was formed, known as the White Mountain Country Club. Some 300 memberships were sold, and early in the spring of 1955 construction began. With the full cooperation of the Southwest Lumber Mills, local residents, and several Arizona contractors, the club completed a nine-hole golf course estimated to be worth some $80,000. Homesites were surveyed around the course, and by the end of 1956 there were approximately 100 summer homes constructed and being occupied. By 1957 the number of homes exceeded 200, and in 1958, with the continuing assurance of the Forest Service, in the form of a visit by Mr. Fred Kennedy, the regional forester, and Mr. Zane Smith, of his office, further homesites were developed. So popular had this cooperative development become by the end of 1957 that the small nine-hole golf course was accommodating 12,000 rounds of golf a season, the season lasting roughly from May 1 through Labor Day.

In the interim, contributions from the members of the club had made possible a swimming pool and the clubhouse facilities had been increased. The club facilities, however, were badly overcrowded, and in 1958 a group of the members agreed to borrow the money necessary to complete the second nine holes of the course. The Forest Service arranged to lease 35 acres for the first 9 holes at 50 cents an acre, and the second 9 holes, or 50 acres, is leased on a percentage basis, which will give one an idea of how the value of the land has increased due to the development of this recreational area. Of course, being constructed on forest land, it is

semipublic in nature in that it is open to the people who are not members of the club.

My purpose in complimenting the Forest Service on this fine example of cooperation is to point out that if this same attitude prevailed throughout the United States, many acres of less valuable timberland could be similarly developed to the overwhelming benefit of those directly concerned, the public in general who will flock to these areas, and to the immediate towns located in the areas. This has been the stimulus that is developing the White Mountain region of Arizona into one of the greatest recreational areas in the entire United States, and I wish to express the satisfaction of Arizona citizens for the help, consideration, and cooperation of the U.S. Forest Service, and in particular those men in the regional and local offices who made this possible.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

MEDICAL CARE HOPES NOW REST SOLELY ON SENATE ACTION

Mr. PROXMIRE. Mr. President, letters continue to pour into my office asking what has happened to congressional action on medical aid for aged—and I must give these constituents a simple and honest answer, one that all of us in the Senate must face.

Adequate legislation for health insurance for the aged, on which millions upon millions of our senior citizens have pinned their hopes for adequate medical care in their declining years, has been seriously endangered by committee action in the House.

The last chance of all these people, and, indeed, the great and unavoidable moral responsibility for early and effective action now rests squarely with the Senate.

I ask unanimous consent, Mr. President, that a typical letter expressing the desperate hope of our senior citizens be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR SENATOR: With hospital rooms costing as much as $20 a day and doctors charging all the traffic will bear, what happened to the Forand bill which was to add medical and nursing compensation to social security.

If the Government can allot billions for foreign aid why should the American taxpayers be given only a few crumbs at a time when they are no longer wanted by industry or commerce, nor do their children want to share the responsibility of their care if they are unfortunate enough to get sick. Many oldsters face abandonment, neglect and despair at a time when they are no longer able to fend for themselves.

Don't forget most of them paid taxes for more than 50 years.

Sincerely,

——— ———.

MASS DEPORTATIONS OF MEN, WOMEN, AND CHILDREN FROM BALTIC NATIONS A CRIME OF GIGANTIC MAGNITUDE

Mr. PROXMIRE. Mr. President, in the year 1940 there occurred a crime of such magnitude that its full dimensions have never been grasped by the people of the world. I refer to the mass deportations of many thousands of men, women, and children to Siberia from Estonia, Latvia, and Lithuania.

Only for a short time in the course of their modern history were the unhappy peoples of the three Baltic countries allowed to live in peace and relative prosperity in their homelands. After suffering under alien yokes for centuries, at last they regained their freedom and independence at the end of World War I. Then for about two decades they lived at peace, seeking happiness in their work of rebuilding their war-ravaged homelands and in strengthening democratic institutions there. But international forces over which they had no control brought tragedy to the Estonian, Latvian, and Lithuanian peoples.

Soon after the outbreak of the last war Stalin's Red army treacherously attacked and occupied these three countries, and then deported hundreds of thousands of the inhabitants, in June of 1940, to desolate parts of the Soviet Union. It is the sad anniversary of that event that is being observed today, and I join these brave peoples in the commemoration of that tragic event, the forced deportation of the Baltic peoples by the Soviet authorities from their historic homes.

FLAG DAY, 1960

Mr. SCHOEPPEL. Mr. President, I ask unanimous consent that remarks which I prepared for delivery yesterday and was unable to present, be incorporated in the body of the CONGRESSIONAL RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

FLAG DAY 1960—STATEMENT BY SENATOR SCHOEPPEL

While Flag Day rightfully is an occasion for colorful orations, I would like to confine myself for a few moments to a discussion of a portion of the history of the American flag.

Our Continental Congress appointed a committee to design a banner for the then young Republic, and a member of that committee is credited with writing the following description of the significance of the different parts of that flag.

It would do us all well in these troubled times and at a period when our President is in the Far East, to ponder over the words which that gentleman wrote back in 1777:

"The stars of the new flag represent the new constellation of States rising in the West. The idea was taken from the constellation of Lyra, which in the land of Orpheus signifies harmony. The blue in the field was taken from the edges of the Covenanter's banner, in Scotland, significant of the league—covenant of the United Colonies against oppression, incidentally involving the virtues of vigilance, perseverance, and justice.

"The stars were disposed in a circle symbolizing the perpetuity of the Union; the ring, like the serpent of the Egyptians, signifying eternity. The 13 stripes showed, with the stars, the number of United Colonies, and denoted the subordination of the States to the Union, as well as equality among themselves. The whole was the blending of the various flags of the army and the white ones of the floating batteries.

"The red color, which in Roman days was the signal of defiance, denoted daring; and the white purity."

It is small wonder then, that, as senior Senator from Kansas I take great and justifiable pride in the knowledge that the star of Kansas, my native State, has been a part of this flag for nearly 100 years.

Kansas became a State on January 29, 1861, and the star was added on July 4, 1861, at a time when our Nation was in the throes of internal conflict.

Today we are a united Nation, not an aggressive one, but ready at all times to defend the right.

Let us all thank God that we have prospered as we have and that, because of our constant belief in the true principles of Christianity, have been able to withstand the pressure that would wreck not only the United States, but the civilization of the world.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. PROXMIRE in the chair). Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

RECENT TRIP TO MIDDLE EAST

Mr. FULBRIGHT. Mr. President, for several years I have sought an opportunity to visit the Middle East.

Long an admirer of the many religious, cultural, intellectual, and scientific contributions of the peoples of this area, I have searched my mind for explanations of why it is that today so many citizens of the Atlantic Community consider the Middle East an underdeveloped area, a tinderbox, a ripe ground for the growth of communism or other totalitarian forms of government.

My interest was kindled again in 1955 when the United States offered to assist Egypt in the construction of the high dam at Aswan. The subsequent withdrawal of that offer, the seizure of the canal by the Egyptians, the attack on Egypt by the French, the British, and the Israeli, and the enactment of the Eisenhower doctrine, led me to propose a thorough examination of our policies in the Middle East.

Some colleagues will recall that at the end of that examination, I presented my views to the Senate.

Having recently reviewed those conclusions, I believe they have stood the test of time; and I ask unanimous consent, therefore, that the principal conclusions set forth in my remarks in the Senate on August 14, 1957, be inserted in the RECORD at this point.

There being no objection, the conclusions were ordered to be printed in the RECORD, as follows:

On the basis of the secret and top secret documents which the Department of State has provided—which, as I have said, apparently provide a satisfactory basis on which to judge U.S. policy—I have reached the following conclusions:

First. The Aswan Dam project was a sound project from the point of view of engineering feasibility, and it was a reasonable risk for economic development loans. Sources of capital other than those involved in the offer which was made to Egypt, both private sources and other Government sources, were definitely interested in pursuing the project.

The reason the United States first offered to make a contribution to the project was because it was recognized that the Aswan Dam or some other Nile River development program on a comparable scale was vital to the future of Egypt. The Aswan Dam is a symbol of Egypt's potential development. Without such a development, Egypt, with its increasing population, may be expected to suffer a constantly lowering standard of living. This is likely to cause much social and political unrest in Egypt and may endanger the unstable peace of the Middle East.

Second. After many surveys and long negotiations, which were participated in by the International Bank for Reconstruction and Development, the United Kingdom, and the United States, a comprehensive plan for financing the Aswan Dam was substantially agreed upon with the Government of Egypt. This plan was based on estimates that the dam would cost $1.3 billion, a sum which would include the cost of irrigation and drainage works, powerlines, and other accessorial costs. The plan contemplated that Egypt, from its own resources, would pay for the full cost of the dam except for $400 million in foreign exchanges. The International Bank was willing to lend Egypt $200 million. The United States and the United Kingdom jointly were to grant Egypt the remaining $200 million, of which the United States was to contribute 75 percent and the United Kingdom 25 percent. These payments were to be made over the period of construction of the dam, which was estimated to be between 10 and 15 years.

For the United States this offer would have meant making contributions to the project averaging $15 million a year for 10 years. On December 16, 1955, the United States offered to furnish $54.6 million toward the first stages of construction of the dam and to consider sympathetically additional financial support later. It was this offer which was withdrawn by the administration 7 months later on July 19, 1956.

Third. The administration's decision to withdraw the offer to Egypt was made against the advice of the U.S. Ambassador to Egypt, and the President of the International Bank for Reconstruction and Development. President Eisenhower appears, according to the State Department documents to have participated very little in the decision, except to approve Secretary Dulles' recommendation. There was apparently no consideration of the question by the National Security Council.

Fourth. The reasons given to the public for the withdrawal of the offer were not, in my opinion, valid reasons. They were as follows:

First, that other Nile riparian states had not agreed to the project. The fact is, however, that there is no evidence that such agreement was not possible, or even probable. Moreover, the lack of agreement on this score was not a valid reason for withdrawing the American offer because Egypt itself had agreed with us not to go forward with construction until agreement was reached with the Government of the Sudan, the principal other country involved.

The second reason given for withdrawing the offer was that the ability of Egypt to devote adequate resources to the project had become uncertain since the time of the offer 7 months before. The fact is, however, that the major drain on Egypt's resources—namely, the mortgaging of part of her cotton crop in exchange for Communist arms—had occurred prior to the time of the United States offer on the dam. Contrary to the statement of the Department of State, there was no substantial evidence of a radical worsening in Egypt's economic condition at the time of the withdrawal of the offer. Certainly the International Bank had not urged that the arrangement be called off. Furthermore, there appears to have been no consideration of the imaginative use of U.S. surplus food supplies to counteract the inflationary effect which the commencing of construction would have had in Egypt.

Fifth. In public statements made subsequent to the announcement of the withdrawal of the offer to help with the Aswan Dam, Secretary Dulles has given as an additional reason the fact of congressional opposition to the project. There is no evidence, however, that the administration ever made any serious effort to persuade the few Members of Congress, who had expressed opposition, that the Aswan Dam project was sound. On the contrary, the evidence is that the administration itself began to reconsider the offer only a few weeks after the offer was made.

Sixth. The administration's judgment, based on facts known to the administration at the time of the withdrawal of the offer, seems to me to have been faulty for the following reasons:

First, the Russians had made an offer to help finance the Aswan Dam on terms more attractive than those offered by the United States, the United Kingdom, and the International Bank. There was no evidence that the administration believed that the Soviet Union was not prepared to follow through on its offer. The Secretary of State was nevertheless willing, by withdrawing the U.S. offer, to take the risk of massive Soviet penetration in Africa with no compensating advantage to the United States in taking such a risk. I might say here parenthetically that it is not possible to be sure, on the basis of the documents furnished by the Department of State, whether Secretary Dulles deliberately sought to force a showdown with the Soviet Union on their offer. In this connection, we do have the evidence in Mr. Beal's biography of Secretary Dulles in which Mr. Beal states: "It was necessary to call Russia's hand in the economic competition."

Mr. President, I ask unanimous consent to have printed at this point in my remarks two newspaper items discussing John Robinson Beal's treatment of this question in his biography of Mr. Dulles.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

"[From the Washington Post of April 1, 1957]

"MATTER OF FACT—THE DULLES WHITE PAPER

"(By Stewart Alsop)

"It is not the usual function of a political reporter to review books, but occasionally a book comes along which is also important news. Such a book is John Foster Dulles: A Biography, by John Robinson Beal of Time magazine.

"The book is news for two reasons. First it contains a fascinating account of what had previously been only rumored or suspected—a calculated decision by Secretary Dulles to force a showdown in the Middle East. The account of this startling episode is undoubtedly based on interviews with Dulles himself. Second, the book will no doubt have important international repercussions, since it not only opens all the old half-healed wounds caused by the Suez crisis, but also pours great dollops of salt in them.

"The Beal book is thus likely to cause as much uproar as the account based on an interview with Dulles of the Dulles brink-of-war theory, by another Time man, James Shepley.

"In his introduction Beal, while absolving Dulles of responsibility for the book, states that 'it benefits from personal interviews with him which provided insight into his official actions, for which I thank him.'

"Repeatedly, Beal described Dulles' views with an authority which could only have come from such personal interviews. The book will certainly be regarded, therefore, as a kind of personal Dulles white paper on his Middle East policies, unofficial but authentic.

"Beal confidently describes the manner of Dulles' withdrawal of American offer of aid to Egypt in building the Aswan Dam as a calculated slap in the face for Egypt's President Nasser, consciously designed to bring on a showdown. The Beal account should be read in full, since it is an authoritative report of one of the most amazing exercise in diplomacy in recent history. But the following excerpts give the gist:

"For Dulles, a moment of cold-war climax had come. It was necessary to call Russia's hand in the game of economic competition. It was necessary to make the demonstration on a grand scale. Nasser combined the right timing, the right geography and the right order of magnitude for a truly major gambit in the cold war. Why did (Dulles) turn down Nasser so brutally, without a chance to save face? Since the issue involved more than simply denying Nasser money for a dam, a polite and concealed rebuff would fail to make the really important point. It had to be forthright, carrying its own built-in moral for neutrals in a way that the ormolu of applied propaganda would not cheapen.

"In short, Dulles withdrew the American offer as insultingly as possible, not in a moment of temporary aberration, as many thought at the time, but because he planned it that way.

"Beal's version of the Dulles decision to force a showdown parallels almost word for word the version of the decision previously offered by still another Time-Life man and Dulles admirer, former Presidential Adviser C. D. Jackson.

"When the Jackson version of the Dulles decision was made public, it was widely assumed that it was in fact the Dulles version. Now there can be no reasonable doubt of it—an experienced reporter like Beal could not conceivably describe the Secretary of State's reasoning and motivation in such authoritative detail simply by guesswork.

"Beal makes it clear, moreover, that Dulles was aware of the dangers involved in forcing a showdown: As a calculated risk the decision was on a grand scale, comparable in the sphere of diplomacy to the calculated risks of war in Korea and Formosa. But his experience at sailing in diplomatic waters convinced him that the breeze would be better if he took a new and independent tack.

"The chapters which follow, which also clearly benefit from insight into his official actions, are designed to prove that the Dulles

decision to force a showdown was a brilliantly successful diplomatic coup. This proves a trifle difficult, even for so able an advocate as Beal, since it is uncomfortably obvious that the Middle Eastern breeze has not been better, but a great deal worse since Dulles forced his showdown.

"The difficulty is overcome by the simple device of blaming everything that has gone wrong on our allies—while the Dulles policy was moral, and consistent and purposeful, our allies' policies were both stupid and dishonest. This theory of the crisis, which deserves further examination, will be studied with pained attention abroad, in view of the authority with which the author clearly speaks."

"[From the Washington Post of April 2, 1957]

"OVER THE BRINK

"Just when you begin to think that Mr. Dulles has moderated his brinkmanship, along comes another article or book based on conversations with the Secretary of State to prove you wrong. There are many passages in John Robinson Beal's adoring biography, John Foster Dulles, that will cause heated controversy and indignation through the free world, but the most provocative is the assertion that Mr. Dulles carefully planned the manner in which last summer he withdrew the offer to help Egypt build the Aswan Dam. As Mr. Beal describes the situation. 'It was necessary to call Russia's hand in the game of economic competition. * * * Nasser combined the right timing, the right geography, and the right order of magnitude for a truly major gambit in the cold war.'

"This is a shocking indictment, although Mr. Beal patently did not intend it as such. Communist arms going to Egypt in large quantities, and an increasing number of anti-Western moves on the part of Colonel Nasser, made the decision to withdraw the aid offer logical enough in itself. Yet up until recently the general assumption had been that Mr. Dulles' insult to Nasser in his conversation with the Egyptian Ambassador was more or less accidental, and that the Egyptian reaction was not anticipated. The British, for example, knew of and supported the decision to cancel the offer; they understood, however, that the dam project would merely be indefinitely postponed.

"But no. According to Mr. Beal:

"'Since the issue involved more than simply denying Nasser money for a dam, a polite and concealed rebuff would fail to make the really important point. It has to be forthright, carrying its own built-in moral for neutrals in a way that the ormolu of applied propaganda would not cheapen. As a calculated risk the decision was on a grand scale, comparable to the calculated risks of war taken in Korea and Formosa.'

"It is of course always possible that Mr. Beal overstates the case, if not as to the facts, at least as to motivations (no one would quarrel with the basic judgment that Nasser was intractable). Nevertheless, the account squares with a recent speech by C. D. Jackson, also of Time and Life and a former White House special assistant. It fits into the pattern of Mr. Dulles' three other brinks in Korea, Indochina, and Formosa. Mr. Beal adds a significant footnote to Formosa policy by telling of a hitherto secret letter from President Eisenhower to Chiang Kai-shek 'satisfying him that the United States would help defend Quemoy and Matsu'—a tacit commitment in which Congress ought to be intensely interested.

"All of this serves to paint Mr. Dulles as the most reckless sort of gambler. Always before it has been possible to regard the Aswan-Suez episode as an accident. Now Mr. Dulles is portrayed as the champion of purposeful irresponsibility, the inventor of the calculated blunder. The tale places on Mr. Dulles an additional share of the blame, not only for Nasser's nationalization of the Suez Canal Co., but also for the increasing desperation in Britain and France, the Suez invasion and the drastic erosion of Western interests.

"It is hard to believe that Mr. Dulles could be so totally Machiavellian. But he will have a difficult time climbing out of this hole; and there will properly be increasing demands for a white paper on the whole story of relations with Nasser. If the Beal account is correct, is it any wonder that Mr. Dulles is mistrusted abroad?"

The second reason why the administration's judgment was poor, even on the facts known at the time of the withdrawal of the offer, was that it did not appreciate the significance to the United States of the vigor of the nationalist and neutralist drive in Egypt. I believe the Secretary of State confused Egyptian nationalism and neutralism on the one hand with communism on the other. Despite the judgment of able State Department career officials indicating that Nasser had some appreciation of the dangers of dealing too closely with the Soviet Union, Mr. Dulles seemed to believe that Nasser had become a Soviet puppet. He did not recognize that Egyptian nationalism was a powerful force which could, if recognized for what it was and carefully handled, be directed toward political freedom instead of communism.

Thirdly, the Secretary of State failed to appreciate the importance of the Aswan Dam to the economic future of Egypt. He also failed, in my opinion, to appreciate the tremendous emotional importance which all Egyptians attached to the building of the dam. He did not appreciate the effect the building of the dam would have had upon the entire Arab world as an example of our willingness to help them help themselves. The Secretary of State failed to appreciate these facts, although he had adequate reports on these points from the field.

Seventh. The administration's decision to withdraw the offer to help with the Aswan Dam was not, in my opinion, in the best interests of the United States for the following reasons:

First, the withdrawal of the dam offer was the direct cause of the seizure by Nasser of the Suez Canal. This action led, in turn, to the Israeli-United Kingdom-French attack, to the serious deterioration in our relations with our leading allies, to the severe oil shortages in Europe, and to economic dislocations in other parts of the world. So far as cost is concerned, it was recently reported in the press that $174 million has been spent under the authority of the Eisenhower doctrine, more than our contribution to the dam would have been in 10 years.

Second withdrawal of the offer served to increase the influence of the Soviet Union. The Soviet toehold in Egypt has become a hammerlock on a country which otherwise might well have stayed relatively free from influence by the Communist orbit.

Third, settlement of the conflict between the Arab States and Israel, without which no peaceful economic and political progress in the Middle East is possible, has been rendered much more difficult. To have helped Egypt concentrate on internal development instead of foreign adventures would have helped to create stability throughout the area.

Fourth, the withdrawal of the Aswan Dam offer has created an impression which is hard to erase that we as a nation are interested in the economic development of other nations only if that assistance serves to put the recipient nation under the political bondage of the United States. It suggests we are not interested in the economic and political freedom of other peoples unless they are willing to adapt their policies to suit our political needs.

Fifth, withdrawal of the offer has foreclosed what may be the primary salvation of Egypt's economic problems in the long run. The Aswan Dam—an essential element of stability in the Middle East—has been indefinitely postponed. The day when the Egyptian people might seek to build a democratic government on a solid economic base has been delayed.

Sixth, withdrawal of the Aswan Dam offer and the consequent war in the Middle East diverted world attention from the revolution in Hungary. This, of course, is a second guess. Nevertheless if the world had not been absorbed by the danger in the Middle East and if the Western Powers had not been on opposite sides in that conflict, the Soviet Union might never have intervened in the Hungarian revolution, or the response of the West to the Soviet intervention might have been more effective. We lost a golden opportunity to promote freedom in the world of the Communist orbit and we handed communism a key to the Middle East.

Mr. President, these are my conclusions. I believe that the documents which have been supplied to the committees of the Senate by the Department of State support these conclusions.

PROBLEMS OF MIDDLE EAST

Mr. FULBRIGHT. Mr. President, the situation in the Middle East is a matter of deep concern for us.

There is the problem of the refugees from Palestine, now over 1 million men, women, and children, living in poverty and dependent upon continued grants—mostly from the United States. There is the situation in Iraq, where President Kassim walks a tightrope between Communist influences that have penetrated his government and forces of pan-Arabism which likewise threaten his rule. There is the situation in Jordan—a country so nonviable that its very survival is dependent upon annual foreign subsidies. There are the occasional clashes between the forces of Israel and those of neighboring states. There is an uneasy truce, but no peace, with the consequent impact on transit through the Suez Canal with economic penalties hitting hard at Israel, but scarring relations with all seafaring nations with interest in the untrammeled use of the canal.

Despite these problems, I could not but be impressed to see the real and substantial efforts being made to improve the living conditions of the people—Arab and Jewish alike. It is in this simple fact—that peoples and governments in the area are working hard for a better life in the future—that I find my basic hope. Given time, as well as assistance and understanding by the developed nations, there may be a gradual improvement in economic conditions in the area. And on that base, there may be created political institutions capable of promoting peaceful settlement of the many problems that plague the Middle East.

NATURE OF MY VISIT TO MIDDLE EAST

Despite my long and deep interest in the Middle East, it was not until late this spring that I had opportunity for a short visit to the area. I had expected to visit the United Arab Republic last January, but the press of Senate business prevented that until Senate action

had been completed on the Mutual Security Act.

I might add that had my interest in the area tended to slacken because in recent months there had been a detectable improvement in relations between the Arab States and the United States—without at the same time a corresponding worsening of our relations with Israel—the *Cleopatra* incident and the action of the Congress in adopting the Douglas-Keating amendment to the Mutual Security Act, once again roused my interest.

Colleagues will recall that during consideration of the Mutual Security Act I expressed myself on the dangers to which the conduct of our foreign policy was exposed when private groups in the United States sought by economic means to force the United Arab Republic to change its policies with respect to transit of the Suez Canal. Furthermore, although I expressed my support for freedom of transit through the Suez Canal, I strongly opposed adoption of the Douglas-Keating amendment on the ground that it constituted taking sides in a bitter strife between Israel and the United Arab Republic. I felt that by tying a political string to our economic aid program to the United Arab Republic, we would exacerbate antagonisms and render even more difficult a rational and peaceful settlement of the basic conflicts of the area.

Needless to say, despite my opposition to the picketing of the *Cleopatra* and to the Douglas-Keating amendment on a basis which I felt served the foreign policy interests of the United States, my views had an impact upon my reception in the Middle East. I was viewed somewhat as a hero in the Arab countries and somewhat as an opponent in Israel. I am sure that Senators DOUGLAS and KEATING would have found the situation reversed had they visited in the area with me.

During my visit to the Middle East I spent 4 days in the United Arab Republic, 1 day in Jordan, and a day and a half in Israel. In the United Arab Republic I visited the site of the high dam at Aswan, the power station and new fertilizer plant near the old Aswan Dam, Port Said, and portions of the Suez Canal. I also held lengthy conversations in the United Arab Republic with President Nasser, Foreign Minister Fawzi, and with other officials there. I was favorably impressed by the vigor and determination of these officials, and by the magnitude and difficulty of the task they have undertaken. In Jordan I met briefly with Foreign Minister Nasir and with the Governor of Jerusalem. I also visited refugee camps in Jerusalem and its vicinity in the company of the United Nations Relief and Works Agency Director, Mr. John Davis.

In Israel I visited the Lahish colonization area, Kirya-Gat—a new immigrant area—and training center at Kalmania in which technical assistance is being given Burmese families in Israel. These projects appear to be intelligently planned and vigorously directed. I also had lengthy conversations with Prime Minister Ben-Gurion and with Foreign Minister Golda Meir, intelligent and dedicated leaders of their people.

I am under no illusion that short visits of this kind provide one with information adequate to reach profound and assured opinions. At best, such visits may simply confirm opinions reached on the basis of information gained in other ways, or may, on the contrary, create doubts about one's earlier conclusions.

Nevertheless, in the hope that my observations and comments on U.S. policy in the Middle East may be of interest, I make this oral report.

BASIC U.S. ATTITUDES

It seems to me that as Americans consider the multitudinous problems of the Middle East it is important that we try to set forth basic facts upon which most of us could probably agree. With that thought in mind, I suggest the following:

First, although we recognize that there is a basic conflict between Israel on the one hand, and the Arab States on the other, we desire to have friendly relations with all states in the Middle East.

Second, we do not seek relationships with any state in the area on any basis other than that of mutual respect. We recognize the right of each state to determine its own policies, domestic as well as foreign. In other words, we do not believe that any action of the United States should seek to put any nation in a dependent status. We do not seek satellites. We believe peace in the area is dependent upon political independence.

Third, in our relationships with states in the Middle East we do not ask that they adopt political or economic forms of organization similar to those that have developed in Western Europe or the United States. We recognize that forms of government or economic concepts that flourish in one environment may perish in another.

It is our hope, however, that the economic or political concepts developed in this area may promote maximum individual freedom and dignity.

Democracy as a political concept originated in the Mediterranean area. Given time, stability, and economic development, it is our hope that the peoples of the Middle East will decide that democratic forms of government are more suitable for their development than totalitarian forms of government.

Fourth, and in summary, as stated in the Mutual Security Act, we recognize "the basic identity of interest which exists between the people of the United States and the peoples of other lands who are striving to establish and develop politically independent and economically viable units and to improve ways of living by methods which reflect the popular will" and we have declared it to be a "primary objective" of the United States and consistent with our "tradition and ideals, to share these strivings by providing assistance, with due regard to our other obligations, to peoples willing to work energetically toward these ends."

U.S. policies cannot, however, be formulated solely on the basis of generalities in which we believe. Equally important are the situations in the Middle East with which we must deal.

Without doubt the most all-pervasive situation which influences the formulation of U.S. policy in the Middle East is the conflict between Israel and her neighbors. Many of the citizens of Israel are convinced that the Arab nations will not rest until Israel has been destroyed, and frequent statements in the Arab States provide basis for such fears. On the other hand, many of the citizens of the Arab States are convinced that Israel contemplates expansion at the expense of her neighbors, and the continued influx of refugees into Israel and her attack on the U.A.R. in 1956 provide a basis for such fears.

Until there is acceptance on the part of the Arab States that most of the nations of the world could not stand idly aside if world peace were endangered by any attempt to drive the Israeli into the sea, and until there is acceptance on the part of Israel that efforts to expand her borders by forceful means will not be tolerated, the main ingredients of peaceful economic or political development of the Middle East will be lacking.

Furthermore, so long as this condition exists, U.S. relations with states in the area will be most difficult. With Middle East emotions closely bordering those which exist in time of war, almost any positive act of U.S. foreign policy, or, for that matter, almost any statement of individual Members of Congress relating to the Middle East, will be tortiously interpreted by one side or the other as evidence of support or opposition.

I was frequently amazed, during my short visit, to find some statements I have made in the United States torn out of context to prove that I was partisan in my views or magnificently lacking in objectivity. Statements by other Members of Congress with whom my views have not coincided have also been misunderstood or given an importance totally unwarranted by their tenor and context.

While I have suggested that the emotional overtones of the Israeli-Arab conflict have affected the ability of governments and peoples there to understand our policies, one of the ironies of U.S. policies in the Middle East is that, over the last decade and a half, our relations with the area have been characterized by extremes, sometimes, I fear, more motivated by emotion than by logic. While our relationships with Israel have been relatively constant and friendly, except for the brief period during the attack on the Suez Canal, our relations with the Arab States and with Egypt in particular have not been nearly as constant and friendly.

RECAPITULATION OF U.S. RELATIONS WITH THE MIDDLE EAST

Consider, briefly, the ups and downs of our relations.

The intense anti-American sentiments that ran throughout the Arab world for a period after the United States supported the creation of the State of Israel, and in May 1948 recognized Israel—as did the Soviet Union—gradually waned until shortly after the Egyptian revolution and the election of President Eisenhower. In 1951, technical cooperation

agreements were signed with various Arab States, and, all in all, a genuine rapprochement with Egypt seemed in the making when Secretary Dulles in early 1953 presented Colonel Naguib with a silver pistol from President Eisenhower. In September of 1954, Egypt's Revolutionary Command Council issued a policy statement emphasizing its support of the West and declaring that the only major threat to the area would be an invasion by the Soviet Union. An agreement was signed for economic assistance.

In August of 1955, however, Secretary Dulles announced that he had heard of Soviet arms offers to Egypt, and in September, after the United States had refused to supply arms to Egypt on terms deemed equitable by the Egyptians, a cotton-Czech arms barter arrangement was agreed to by Egypt.

Despite arms shipments from bloc countries to Egypt, negotiations for Western assistance in construction of the high dam at Aswan continued through late 1955, until July 19, 1956, when the United States withdrew its offer to assist Egypt in construction of the high dam. The grounds for withdrawal were that other Nile riparian states had not agreed to the project and that Egypt apparently would not be able to devote sufficient financial resources to it.

The withdrawal of this offer was, in my opinion, the proximate cause of President Nasser's seizure of the Suez Canal on July 26, 1956.

At this point, U.S. influence in Egypt reached an all time low.

Three months later, in October and early November 1956, there occurred the attack on Suez by French, British, and Israeli forces. The United States, honoring its earlier commitments to oppose any aggression in the area, took the lead in encouraging United Nations intervention to bring about a cease-fire and to force withdrawals from Egypt.

By this action, U.S. prestige in the Arab States rose appreciably, but not for long. Adoption of the Eisenhower doctrine in early 1957, continued blocking of Egyptian funds, Radio Cairo attacks on the United States, and the virtual isolation of the U.S. diplomatic community, all attested to the fact that our relations with the United Arab Republic were on the downswing.

Soviet commitments to assist in the construction of the Aswan Dam, the fall of the pro-Western Government of Iraq, and the landing of Marines in Lebanon, all contributed again to a decline of U.S. prestige in the Arab countries.

During the past year, however, our relations with the Arab States seemed gradually to improve, despite apparent United Arab Republic unwillingness to be more accommodating in permitting canal transit. A temporary setback in our relations developed as a consequence of the *Cleopatra* incident and the adoption of the amendment to the Mutual Security Act, which was construed in the Arab world as Israeli-inspired.

I am under no illusion that the ups and downs of our relations with the United Arab Republic, in particular, over the last decade are solely attributable to fluctuations in U.S. policies toward the area. Certainly the United Arab Republic has not always been temperate in its press and radio comments. Certainly there have been instances when reactions to official or unofficial expressions of U.S. views have been less than understanding. Arab obsession with World Zionism has on occasion distorted Arab reactions toward U.S. policies.

At the same time I would be less than candid were I to fail to note that censorship in Israel, as well as in the United Arab Republic, and a less than balanced coverage of Middle East news, may color U.S. public opinion.

NEED FOR CHANGED EMPHASIS

Having said these things, however, it does seem to me that U.S. policies toward the problems of the Middle East have not always been characterized by clear vision, tempered by understanding, and uninfluenced by economic and political forces interested in the Middle East.

Take, for example, our fear of Soviet military intervention in the Middle East which gave rise in 1951 to an abortive attempt to establish a Middle East Command—with Egypt—to the creation of the Baghdad Pact in 1955—without Egypt—and to the promulgation of the Eisenhower doctrine in 1957. It seems to me that our overemphasis on the dangers of Soviet military intervention in the area tended to blind us to the dangers of Soviet economic penetration.

We had opportunity to supply arms to Egypt, and hence orient her needs for spares and replacements toward the West. We had a genuine opportunity to assist in the construction of the Aswan High Dam, with the consequent economic impact on Egypt. We failed to grasp these opportunities for a variety of reasons—a failure to distinguish between communism and nationalism, a failure to appreciate the possibility that states can be neutral without being anti-United States, an obsession with the necessity of military pacts, a lack of understanding that the failure of a country to develop immediately in a democratic pattern, or to promote a capitalist economic system, does not mean friendship is not possible, and last, but not least, we failed to understand that Egypt faces toward the West.

We have had tendencies in the past to confuse nationalism with communism, neutrality with anti-Americanism, and to believe that the regimes with which we may currently have relations are better than anything different. These tendencies have led us into unnecessary troubles in the Middle East, and unless we check them, they may serve us ill in the future.

In this connection, it would do us no harm, and it might be good, if we were to cogitate a bit on our own historic past. Our brand of 18th century nationalism, which culminated in the Revolutionary War, was viewed by England as pure and simple revolution. Our brand of American neutrality provoked the War of 1812 and the burning of this Capitol Building, led to the enunciation of the Monroe Doctrine, and found legislative expression as late as the Neutrality Act of 1937.

I leave it to my colleagues to apply these lessons to the concepts of nationalism and neutrality which often affect our relations with newly developing nations in general, and with the countries of the Middle East in particular.

I cannot help but believe that a marked improvement in our relations with the Middle East would result from some changes in attitude. A greater recognition of the dignity of newly independent nations and a small dose of humility would be deeply appreciated by most new nations.

Perhaps as a southerner I am in a better position than some of my colleagues to appreciate the need for such qualities. We of the South have, until recent years, been the undeveloped portion of the United States. In my own State of Arkansas, as late as 1940, our annual per capita income was approximately $250, a figure which has now risen to about $1,300—still well below the national average.

We in the South were an occupied territory for a time, and the scars of war are still found in the emotions of the American people—in the widely held conviction, for example, that no man from the Deep South can aspire to the Presidency, no matter what his qualities or virtues.

I refer to these facts only to make the point that our experiences in the South give us some background for more than a national average insight into the sensitiveness of the states of the Middle East to feelings that they have been exploited by foreign ownership of the canal, by oil and mineral concessions, by absentee ownership of means of production, and suspicion of foreign capital.

We have felt a deep resentment when the changing mores of our communities have been violently disrupted by attempts to fix the beady eye of sanctimonious charges of discrimination on the South, as if discrimination existed nowhere else in the Nation. We would indeed have appreciated a bit more humility in dealing with the problems of the South just as, I am sure, the peoples of the Middle East would appreciate less preoccupation on our part with assertions of our own righteousness and fewer self-judging conditions tied to our aid.

REFUGEES FROM PALESTINE

I turn now, Mr. President, to one problem in the Middle East that has occupied the attention of the Senate annually for more than 10 years; namely, the plight of the Arab refugees from Palestine.

Most students of Middle East affairs are in agreement that if some progress could be made toward the settlement of this problem, which is a source of constant irritation to international relations in the area, there might then be movement toward the economic and political stability essential to peaceful development in the Middle East.

As long ago as 1953, the Committee on Foreign Relations created a subcommittee under the chairmanship of the late Senator Taft to examine the problem of Arab refugees. At that time, over $150 million had already been authorized for assistance.

Senator Taft concluded his report with these words:

> The American people are moved by strong humanitarian motives, but they cannot be expected to bear indefinitely so large a share of the burden involved in this situation when Israel and the Arab States show so little initiative in helping to settle the matter among themselves. There is a very real danger that the longer the United States continues to supply relief money, the less desire there will be on the part of the states in this area to make any real efforts on their own to liquidate the problem.

The facts show that Senator Taft was absolutely correct in predicting our contributions would continue. We have now provided nearly $300 million of hard currencies—enough to have provided the hard currency component for construction of the Aswan Dam, or enough to have developed the basin of the Jordan River to bring water to vast areas of the desert.

Despite these expenditures, the number of people on relief has increased. The problem seems no nearer solution today than it was 10 years ago.

The basic reason no progress has been made is that neither the Arab nations nor Israel have been willing to take the first step. The Arabs insist that every refugee has a right to return to Israel or to receive compensation. The Israeli have argued that the refugees left Israel voluntarily and fear that, if repatriation offers were made, there might be such an influx of Arabs as to constitute a security threat to Israel.

I do not propose to examine the refugee problem with all its ramifications, since the subject recently received careful and objective treatment in a study prepared by the staff of the Committee on Foreign Relations.

What is needed now is less recrimination about the past, and more planning for the future. To get the problem in proper perspective for settlement, it is essential that the Arabs reconsider the view that the refugees are a political asset to be used against Israel, but an economic liability in Arab lands. The Arabs must realize that to seek to make refugees serve a political purpose will in time become counterproductive. Moreover, to continue to view these refugees as an economic liability is to ignore their potentialities as human resources for the cultivation of the land and for help in the economic development of the Arab countries. The start now being made in training some of the younger generation in trades and handicrafts is a move in the right direction.

So far as the Israeli are concerned, it is essential that they realize the very existence of refugees from Palestine will appeal to the humanitarian instincts of peoples all over the world—just as did the Jewish refugees from Hitler. I cannot help but feel that the longer this problem remains unsolved, the greater the likelihood that responsibility for the problem will be viewed as resting on Israel, regardless of what one may conclude with respect to the facts.

The time has come for real political sagacity and leadership to be evidenced by both Arabs and Jews. I am hopeful, because my conversations led me to believe that leaders on both sides of this issue are considerably more rational in their private statements than they are in their public pronouncements.

I know the refugee problem has been studied to death. I cannot help but wonder, however, whether it might not now be possible for quiet, off-the-record conversations to be held so that some agreement might be made which would move the problem off dead center. Perhaps the Israeli could agree to repatriation or compensation, as the United Nations has recommended, with the understanding that the numbers who might accept repatriation would be of manageable size over a period of years. Perhaps the Arabs could indicate a willingness to help resettle those who might decide against repatriation if reasonable compensation is agreed upon.

If states within the area can make no progress on this problem, they might enlist the assistance of neutral, nonpolitical elements in the world community, agreeing in advance to give most serious consideration to such settlement proposals as might be submitted. Might it not be possible, for example, to seek the aid of competent social scientists, economists, retired diplomats, and educators from countries having no political or economic interest in Israel and the Arab States?

Mr. President, I have not begun to exhaust the Middle Eastern subjects which merit consideration by the Senate—the canal, oil, water, cotton, Communist penetration, propaganda—almost every subject of this kind has aspects of controversy. Yet if one returns to what I described as the most pervasive situation which influences U.S. foreign policy in the area, he will find that the present state of conflict between Israel and the Arab States is crucial.

The most hopeful aspect of our relations with the area is found in the statement in the recent Senate study on the Middle East:

> In their present mood, neither the Arab nor the Israeli leaders desire war. On both sides, there is preoccupation with economic matters, recognition that armed conflict could—probably would—militate against all concerned.

The two most powerful potential antagonists in the area are the United Arab Republic and Israel. President Nasser and Prime Minister Ben Gurion are both able, dedicated men, who command respect within their own nations. Probably each would object to my audacious or indelicate inclusion of their names in the same sentence. Nevertheless, I do so because I believe that each of these men has the ability to lead his own people, as well as those qualities which enable true statesmen, by reason, to overcome irrational emotion.

PARTICIPATION IN INTERNATIONAL CONVENTION OF CITIZENS FROM NORTH ATLANTIC TREATY NATIONS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate for consideration.

The PRESIDING OFFICER. Without objection, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the joint resolution (S.J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such convention, and for other purposes.

The PRESIDING OFFICER. Under the unanimous-consent agreement 2 hours have been allotted for debate on the joint resolution and 1 hour on each amendment, to be divided equally.

Mr. MANSFIELD. I yield 5 minutes to the Senator from Indiana [Mr. HARTKE].

Mr. HARTKE. Mr. President, the collapse of the summit conference, toward which many millions in many lands had looked with hope, makes it more imperative than ever that we take effective action to strengthen and unify the Atlantic Alliance.

Mr. Khrushchev has blocked the progress in negotiation which many had expected at the summit. He has the power to halt negotiations, to vituperate, and to threaten. But Mr. Khrushchev is quite powerless to prevent us and our NATO allies from reinforcing the solidarity of the West. Indeed, since a central policy of the Communists is to bring about the disintegration of NATO, immediate action to solidify NATO will demonstrate conclusively to Mr. Khrushchev that the kind of summitry he pursued at Paris has boomeranged against this central Communist policy.

The Congress of the United States can take such action to strengthen and unite NATO by passing Senate Joint Resolution 170 this session. Although the Convention of NATO citizens to explore means by which the greater unity, for which it provides, can be developed, and careful preparation will be required before it can meet, the passage of this resolution alone would be a telling answer to Mr. Khrushchev. And this new initiative toward greater unity within NATO will encourage our allies and strengthen our ties with them as well as exert a far-reaching psychological influence throughout the free world. Too often has it been said that our action is usually a reaction to the moves of the Kremlin. Here we have an opportunity to initiate action that is both positive and constructive.

Mr. President, a year ago I served as one of the delegates from the United States to the Atlantic Congress. This meeting of 650 citizens from the NATO nations was unprecedented in the history of the Atlantic community. Though it met for only 5½ days, it accomplished much good, as has been widely recognized.

I came away from the Atlantic Congress convinced of the great value of such meetings of NATO citizens. And I am convinced now that the smaller convention provided for in this resolution, which would meet not just for 5 days, but for as long as necessary to

perform its task, has exceedingly great potentialities for good. The more extended its consideration of our problems, the sounder its recommendations will be.

One of the main resolutions of the Atlantic Congress, one considered so important by the delegates that it was added by action from the floor to the short final declaration of that body, called for a meeting similar to the convention. It requested the NATO governments to bring about "a special conference composed of not more than a hundred leading representative citizens, directed to convene for as long as necessary in order to examine exhaustively, and to recommend as expeditiously as possible, the means by which greater cooperation and unity may best be developed within the Atlantic Community."

Mr. President, last November I served on the U.S. delegation to the fifth NATO Parliamentarians' Conference here in Washington. The original recommendation for such a conference or convention of NATO citizens "directed to convene as often as necessary in order to examine exhaustively and to recommend" how greater unity may best be developed had been unanimously adopted by the third NATO Parliamentarians' Conference in 1957. Last November the fifth NATO Parliamentarians' Conference renewed this recommendation. Referring to the action of the Atlantic Congress and to this joint resolution as originally introduced into the U.S. Congress, it unanimously recommended "that this special conference be brought about as early as possible in 1960."

This resolution has wide bipartisan support. The administration strongly supports it, as was indicated in the following statements in the testimony of the Department of State before the Foreign Relations Committee:

> The Department considers that meetings such as the one proposed in this resolution might well serve a good purpose. We in the Department of State would certainly welcome any constructive and practical ideas which might emerge * * *. We particularly welcome the thought expressed in the resolution that the delegates to the proposed convention should be free to explore the problem fully as individuals.

Mr. President, this resolution would carry out these three unanimous requests of representative bodies of legislators and citizens of the NATO countries. As I have indicated, it is one constructive step we can take immediately which Mr. Khrushchev is powerless to block. It is also a step where the cost is insignificant but the potentialities for good are exceedingly far reaching.

In recent weeks every American, of every degree of political difference, has joined forces behind our President in a show of moral strength and national unity seldom witnessed in any other nation of the world.

Let us pass this resolution, Mr. President, and extend the fiber of this moral strength and unity to the entire Atlantic Alliance.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator suggest that the time for the quorum call be taken from the time of both sides equally?

Mr. MANSFIELD. Yes; from the time of both sides, on the joint resolution.

Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE PROGRAM—ORDER FOR THE SENATE TO MEET AT 9:30 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, I yield myself 2 minutes.

After the Senate completes action on the NATO resolution, we will proceed to the consideration of S. 2929, the loyalty oath bill.

Immediately after we finish consideration of the loyalty oath bill, we will proceed to the consideration of the Defense appropriation bill.

The chairman of the Committee on Foreign Relations [Mr. FULBRIGHT] has asked the leadership to schedule the Japanese treaty for consideration tomorrow.

Because of these important bills, the leadership would like to inform all Senators that we must come in early and stay late for the balance of this week.

The housing bill will follow the Defense appropriation bill.

I ask unanimous consent that when we meet tomorrow, we meet at 9:30 o'clock in the morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

PARTICIPATION IN INTERNATIONAL CONVENTION OF CITIZENS FROM NORTH ATLANTIC TREATY NATIONS

The Senate resumed the consideration of the joint resolution (S.J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such convention, and for other purposes.

Mr. MANSFIELD. I yield 2 minutes to the Senator from Kansas.

Mr. CARLSON. Mr. President, as a member of the Senate Foreign Relations Committee, I heard much of the testimony in support of Senate Joint Resolution 170, calling for a convention of delegates from the Atlantic countries.

First, I wish to commend the junior Senator from Idaho [Mr. CHURCH] for his active work in behalf of this resolution.

The Senate Foreign Relations Committee heard many witnesses on the proposed resolution, and wrote into it many changes from the original resolution. After hearing this testimony, and after much discussion in executive session, the committee has reported a resolution which would create a United States Citizens Commission on NATO, consisting of not more than 20 private citizens.

This Commission would invite legislators of other NATO countries to appoint their own corresponding delegation to meet and discuss ways of achieving greater cooperation among these nations on matters that are important to their security as well as their economic welfare.

The selection of the delegates from the United States participating in this Convention would be made on the suggestion of the President of the Senate and the Speaker of the House, in consultation with the Senate Foreign Relations Committee and the House Foreign Affairs Committee.

The Commission appointed to represent the United States would not in any way officially speak or represent the U.S. Government. It would be a Commission appointed for the purpose of meeting with other like commissions from other NATO countries to discuss programs of vital interest to these nations and report informally to their respective governments.

This would be strictly a meeting of what might be recognized as a citizens' group, and in my opinion could be helpful in making suggestions that would be important if we are to protect ourselves against the Communist threat.

It will be argued that there are, presently, many organizations, official and unofficial, that are meeting on these problems.

The State Department in testifying before the Senate Foreign Relations Committee stated:

> The Department considers that meetings such as the one proposed in this resolution might well serve a good purpose. We in the Department of State would certainly welcome any constructive and practical ideas which might emerge * * *. We particularly welcome the thought expressed in the resolution that the delegates to the proposed convention should be free to explore the problem fully as individuals.

In these difficult and trying times, it seems to me that we should secure the services of citizens who are willing to devote some of their time in behalf of the welfare of our Nation and other nations who have similar problems. It is for that reason that I am supporting this resolution.

Mr. MANSFIELD. Mr. President, I yield 5 minutes to the distinguished Senator from Iowa.

Mr. HICKENLOOPER. Mr. President, I always regret the necessity of opposing the position of many of my good friends, especially those on the Committee on Foreign Relations who see otherwise than I do on some of our problems. However, I am definitely opposed to the pending joint resolution.

It is all right to be for peace, and it is all right to seek methods of establishing peace and perpetuating peace. We are all for that. Nevertheless, it seems to me that in the last few years there has developed a great flood of pressure groups that want to get on committees; that want to get some kind of official standing; that want to get Federal appropriations in order to have their meetings here, there, yonder, and everywhere else, but which really, in the long run, have no official standing, accomplish no

particular concrete result, and spend substantial amounts of Federal money in the aggregate.

I have been familiar, as a member of the Committee on Foreign Relations, with this joint resolution in its various lives. It has had about nine lives. It has been altered, changed, amended, and substituted so that the resolution we are at present considering is in no real way like the original resolution which was proposed. This leads me to the opinion that all that was wanted, in the first place, was a resolution, because the contents have been changed so definitely and so substantially.

The resolution provides for an unofficial board of persons—some 20 in number—to be appointed by the President of the Senate and the Speaker of the House of Representatives. Then they are to consult with the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House. It is to be called the United States Citizens Commission on NATO.

Well, we have the NATO Parliamentarians Organization, which meets every year. It has some official standing. No doubt it produces some beneficial results. Also, there are various NATO consultative groups. We have officials in our diplomatic corps, and elsewhere, who take care of the NATO situation.

But now comes a proposal for the United States Citizens Commission on NATO. The joint resolution provides that the commission cannot bind the United States; that is stated in the resolution. It will not, of course, bind the United States. However, regardless of what is said, this so-called unofficial group, meeting abroad with unofficial groups of other nations, can indeed, in the eyes of many people of the world, commit the United States to a moral position, which is not an official position or which is not a calculated or studied position of the United States.

The purposes of the Commission are altruistic; yes. They are to seek for peace and to seek formulas on which peace can be based. But a citizens' committee can do this without spending $300,000 or $400,000 of public funds, and without consulting under the guise of an official commission, when it is not, in fact, an official commission. A citizens' committee can now go to Europe or anywhere else it wishes to go, under its own steam, without benefit of this particular resolution.

Mr. President, I believe we are simply piling up committees, piling up groups, piling up unofficial organizations of people who, in the long run, will probably confuse the issue—because the committees are created by a resolution of this sort—rather than clarify it.

Citizens' committees can do much good if they operate truly as citizens' committees. I do not object to a group of 20 or a group of 40 private citizens doing everything they can to assist in achieving peace, or to the formation of 50, 100, or any other number of groups.

The PRESIDING OFFICER. The time of the Senator from Iowa has expired.

Mr. HICKENLOOPER. May I have 1 more minute?

Mr. MANSFIELD. I yield 2 additional minutes to the Senator from Iowa.

Mr. HICKENLOOPER. I think such groups may be able to bring people closer together. I think groups like International Rotary and International Lions have done much good and have assisted in creating international understanding.

What I object to is putting the stamp of official approval on an unofficial group and sending them abroad at Government expense to discuss international affairs. In the eyes of many people of the world, such a committee will commit the United States to a course of action which is not, indeed, an official course of action, and is not, indeed, a course of action sponsored by Congress, by the Department of State, or by the administration, but is purely the action of a private organization.

I have been opposed to the resolution in committee for these reasons. I think it is unwise. I do not think we should adopt it. I hope the resolution will not be passed by the Senate.

I thank the Senator from Montana for yielding time to me.

Mr. CHURCH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Idaho will state it.

Mr. CHURCH. Do I have control of the time of the proponents of the pending measure?

The PRESIDING OFFICER. Under the terms of the unanimous consent agreement, the majority leader and the minority leader have control of the time.

Mr. MANSFIELD. Mr. President, I yield the time in the control of the majority leader to the Senator from Idaho for him to use as he sees fit.

Mr. CHURCH. I thank the distinguished Senator from Montana.

Mr. President, I yield 10 minutes to the distinguished Senator from Pennsylvania.

Mr. CLARK. Mr. President, I do not suppose any Senator would rise on the floor and state that he is opposed to the NATO alliance. I do not suppose there is a Senator who would not willingly admit that the NATO alliance is a greater protection to the free world in general, and to the United States in particular, than any other international agreement now in existence. So I take it that the only question before the Senate is whether the joint resolution will help to strengthen the NATO alliance. If it will, it is clear that we must pass it. If it will not, we should reject it.

I am quite confident that every Senator wants to strengthen the NATO alliance. What is the purpose of having a citizens' group meet to discuss with other citizens' groups, from other NATO countries, how our alliance can be strengthened? The purpose, I take it, is very clear. It is to help to hammer out, on the anvil of discussion, through the workings of the democratic process, ways and means of strengthening freedom. It ill behooves those who live in a democracy to suggest that citizens have no role to play, either in our foreign policy or in strengthening our alliance.

What are we afraid of? Are we afraid of the workings of democracy? Why are we concerned to have distinguished citizens, appointed by the Vice President of the United States and the Speaker of the House of Representatives, meet with distinguished citizens of other countries in order to devise ways and means of strengthening our most precious alliance?

Are we afraid of the processes of democracy itself? Who are the pressure groups which, it is alleged, would attempt to convert to their own glory the convention called for by the joint resolution? Do my friends on the other side of the aisle not trust the Vice President, or do we on this side of the aisle not trust the Speaker of the House of Representatives, to assure that our representation at the convention will be composed of dedicated and distinguished citizens who are concerned only with the good of the country? It is difficult for me to believe that there would be such doubts.

Some seem to be afraid of the results of the meeting called for by the joint resolution. Mr. President, the sponsors of the resolution want to have a meeting of interested citizens held, and the sponsors of this measure have been ready and willing to amend the terms of the original joint resolution in order to meet any legitimate objections which might have been raised to it. Their purpose is to make possible the holding of the proposed meeting.

Mr. President, are we so sure that all wisdom resides in the parliamentary groups of NATO? Are we so sure that all wisdom resides in the State Department and in the foreign offices of our allies?

Some who oppose the joint resolution say that all such matters should be handled only through the United Nations; and they prefer to have action through the United Nations to meet the challenge which NATO is the greatest bulwark in resisting. Mr. President, we need more than governmental action; we also need an informed citizenry. This is the entire basis of our exchange program, by means of which the brains of the free world are exchanged and ideas are fertilized.

I suggest that the opposition to the joint resolution—impliedly, of course, not explicitly—stems from a feeling that we cannot trust the best brains of the free world to go to work on free world problems.

Mr. President, it is impossible for me to conceive how anyone can seriously contend that the representatives of the United States at the proposed convention would represent anyone except themselves—free, dedicated, distinguished citizens of the United States of America.

In the joint resolution itself and in the speeches which have been made in support of it, it has been made abundantly clear that the proposed body will not be an official one. The world is full of unofficial bodies. Every NATO country has them. We have scores of them.

Mr. President, again I say that the proposed group is to be a civilian group to help select the best brains of the free

world to strengthen our most important single alliance; and this group cannot do an adequate job if it is not adequately staffed. The members will serve without compensation.

They will donate, without charge, the most valuable thing they can possibly donate—namely, they will give to the meeting the benefit of their excellent, highly trained minds. Cannot we at least provide an adequate appropriation, in order to make sure that they will be adequately staffed, housed, and fed? In my judgment, the requested appropriation is indeed modest.

So, Mr. President, I shall conclude as I began: What are we afraid of? Do we not believe in the processes of democracy? Do we believe that the Vice President and the Speaker of the House of Representatives will let our country down? If be believe that, then this is a sad day for the United States.

I hope very much the pending joint resolution will be passed by an overwhelming majority.

Mr. President, let me inquire how much time remains under my control.

The PRESIDING OFFICER. The Senator from Pennsylvania has 3 minutes remaining.

Mr. CLARK. Mr. President, I yield back the remainder of the time under my control.

Mr. CHURCH. Mr. President, I believe it would be appropriate at this time for one of the opponents of the resolution to speak, in order that not all of the time available to our side will be used at once.

Mr. CASE of New Jersey. Mr. President, I am in favor of the joint resolution, but I am in control of the time in opposition to it.

Mr. ERVIN. Mr. President——

Mr. CASE of New Jersey. Mr. President, I am happy to yield now to the Senator from North Carolina whatever time he may require.

Mr. ERVIN. I shall need perhaps 7 minutes.

Mr. CASE of New Jersey. Mr. President, I yield 10 minutes to the distinguished Senator from North Carolina.

The PRESIDING OFFICER. The Senator from North Carolina is recognized for 10 minutes.

Mr. ERVIN. Mr. President, I realize that any person who opposes a joint resolution of this nature renders himself subject to the charge that he is not in favor of using all methods of promoting peace. Nevertheless, I cannot refrain from rising in opposition to the joint resolution, notwithstanding the fact that I readily concede the good motives which prompt those who favor it.

Mr. President, when I became a Member of this body, I took an oath to support and defend the Constitution of the United States. I find it impossible to reconcile this joint resolution with my oath to support and defend the Constitution of the United States. I have reached this conclusion for two reasons. The first is based upon clause 7 of section 9 of the first article of the Constitution, which provides:

> No money shall be drawn from the Treasury, but in consequence of appropriations made by law.

It has been well settled by numerous decisions of the Supreme Court of the United States that under this section of the Constitution Congress does not have the power to make appropriations of public moneys, save and except for public purposes.

The proponents of the joint resolution say the group of people, who would travel and act under the terms of the joint resolution, would not be public officials, but would merely be private citizens, and would not be representing the Government of the United States. If that be true, then the joint resolution conflicts with the constitutional provision I have just now read, because the joint resolution would undertake to authorize the appropriation of tax moneys to pay the private expenses of private citizens engaged in a private mission; and I cannot reconcile this joint resolution with that constitutional provision.

Furthermore, I cannot reconcile the joint resolution itself with the interpretation placed upon it by its proponents. Notwithstanding the language of the joint resolution and the arguments of its proponents, the Congress has no authority under the Constitution to name agents to represent the private citizens of the United States. The persons proposed to be appointed under the joint resolution would have no authority from the private citizens of the United States to do anything for them. They would receive all their authority from the Congress of the United States. When we consider that interpretation of the joint resolution—and it is the only interpretation I can give to it consistent with the truth—we run into another constitutional provision.

Clause 2 of section 2 of article II of the Constitution provides:

> He—

That is, the President—

> shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he—

That is, the President—

> shall nominate, and by and with the advice and consent of the Senate, shall appoint Ambassadors, other public ministers and consuls.

Under this provision of the Constitution, the sole power to conduct the foreign affairs of the United States belongs to the President of the United States. The Congress is aware of that fact. The Congress is so aware of that fact that it has passed what is popularly known as the Logan Act, which makes it a crime for any private citizen to attempt to carry on negotiations with any foreign country.

The pending resolution provides that private citizens—so its proponents say—deriving no authority from any private citizens of the United States, but deriving whatever authority they have from the Congress of the United States, shall consult at public expense with persons of other NATO nations to see whether or not they cannot make arrangements for an international convention to the end that the United States may get greater unity between those countries and itself by economic and political means.

Here is a group of persons, having no political power under the laws of the United States, who are to be sent abroad by the Congress to try to bring NATO allies closer together by economic and political means. So we have this situation: Although the Constitution of the United States provides that the only person who has charge of the foreign affairs of the United States is the President of the United States. The pending measure constitutes an effort to bypass the constitutional authority vested with the power to deal with the foreign affairs of the United States and to permit some private citizens to receive authority to do so from the Congress, which itself has no power, under the Constitution of the United States, to deal with matters of this kind.

Mr. President, I believe in peace. I believe that we should strengthen the NATO allies. But I believe we should strengthen the NATO allies by procedures which conform to the Constitution of the United States. And the pending measure is an effort—call it what you may, Mr. President, call these persons to be appointed by congressional authority private citizens, which they are not, and say they are representing other private citizens, which they are not—call it what you may, Mr. President, this is an effort on the part of the Congress of the United States to appoint its own Ambassadors, its own foreign ministers, to deal with the foreign affairs of the United States, insofar as they relate to the NATO countries.

And all of the sophistry and all of the talk about peace cannot wipe out the plain fact that this is an effort on the part of the Congress of the United States to take charge of the foreign affairs of the United States, in violation of the plain letter and the living spirit of the Constitution. All it can do is to cause confusion and cast doubt in the minds of Europeans upon the authority of those who are now in power to represent the United States, both diplomatically and militarily, in connection with the NATO treaty.

Although the resolution has a high-sounding name, and although its proponents have lofty motives, I cannot reconcile the resolution with the Constitution of the United States; and for that reason I shall vote against it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CASE of New Jersey. Mr. President, does the Senator from Idaho now desire to have someone speak in the time under his control?

Mr. CHURCH. I had made a commitment to the Senator from Connecticut to yield 5 minutes to him, in order that he might speak in support of the joint resolution.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 5 minutes.

Mr. DODD. Mr. President, I am grateful to my distinguished colleague, the Senator from Idaho, and I thank him for affording me the privilege of speaking on this important resolution. I thank him

more particularly for his interest in this matter and for his leadership on behalf of it. I was not able to be present last night when he spoke on the resolution. I am sorry, because I always like to hear him speak on any subject, and particularly on matters of this kind. I have been in the Senate just long enough to observe his great interest in international affairs, and I have always known him to make wise, sensible, and thoughtful comments. I had an opportunity this morning to read hurriedly the remarks he made yesterday. I wish to say publicly and in this forum that I think he made a great speech in support of the resolution, and he deserves our gratitude for that speech and for having sponsored the resolution.

Mr. President, I rise in support of the resolution. In the few minutes I have, I should like to make clear why I support the resolution, and why I hope it will pass.

The distinguished Senator from North Carolina [Mr. ERVIN], who has just spoken, and for whom I have the greatest respect and admiration—as a great lawyer and as a great legislator—made reference to the Logan Act, which hits a very sensitive place with me, because I made some reference to it not too long ago, in relation to another individual who I thought then, and I think now, was and is in violation of the Logan Act, because of his meddling in foreign affairs. I refer, of course, to Cyrus Eaton. However, I say, with the greatest respect to my colleague and friend from North Carolina, that I think he misunderstands or misapplies the concept of the Logan Act as related to this resolution. I should like to explain why.

The Logan Act, in my judgment, prohibits anyone not authorized from carrying on negotiations or discussions of any kind with officials of foreign governments in matters having to do with the foreign policy or foreign relations of the United States. Under the pending joint resolution, private citizens, who would make up the U.S. delegation, would be authorized by Congress and selected by the leaders of Congress to meet only with private citizens of other NATO countries, and they would not, in any sense, be unlawfully interfering in foreign affairs. I do not think the Logan Act applies to the present situation; and I say that with great respect to the Senator from North Carolina.

Mr. ERVIN. Mr. President, will the Senator yield?

Mr. DODD. Yes; I am happy to yield.

Mr. ERVIN. I did not say that the Logan Act applied in this instance. I cited the Logan Act as being a recognition by the Congress that the power to deal with foreign affairs of the United States belongs to the President and to no one else, not even to the Congress itself.

Mr. DODD. I thank the Senator for clarifying a misunderstanding in my mind.

In any event, I think the Senator will agree with me—that the spirit of the Logan Act really is not involved in considering of this resolution. What we are trying to do is to make some progress toward the attainment of an ultimate ideal situation in the world.

The PRESIDING OFFICER. The time of the Senator from Connecticut has expired.

Mr. DODD. Mr. President, will the Senator yield to me 2 more minutes?

Mr. CHURCH. Mr. President, I am glad to yield 3 more minutes to the distinguished Senator from Connecticut.

Mr. DODD. I thank the Senator from Idaho.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for an additional 3 minutes.

Mr. DODD. Mr. President, what we are trying to do is to take a small step toward that situation we must reach, and which I am confident we shall reach, when all of the peoples of the world, through their properly selected representatives, can meet together and decide disputes in the world, without recourse to the violence of war or aggression of any kind. That is what we are trying to do. We cannot do it all at once, for a number of reasons. The Church resolution provides a means to further this kind of process among our friends and allies of the free world.

I have no hesitancy in saying to my colleagues that I am a world federalist. World federation at the right time and on the right basis is the answer to peace or war. I do not think world federation is now attainable because of Communist deceit and treachery and because of uncompromising Communist hostility to the free world and its institutions. But I think it is ultimately the only sensible solution to the problem of peace and war in the world.

The resolution we are considering seeks to take another step forward in that direction by at least getting people together, by getting private citizens of the NATO countries to get together to talk about common problems and to find out how we can strengthen the alliances we now have, which are not worldwide but which are really regional and founded on free world principles. We can succeed here because we start out with a broad area of shared common principles. That is all we are trying to do.

This will cost a little money, $300,000 or $400,000. I know the value of the dollar, but $300,000 or $400,000 in these days of millions and billions of dollars is a drop in the bucket. If we can make any progress at all toward the ultimate goal of peace on earth, because men are able to sit down and talk out their problems rather than fight them out, then I say we ought to be willing to spend this small sum and to devote our time and the time of our representative citizens in that effort.

We do this at home. We have citizens' committees for all kinds of activities, as the Senator from Idaho pointed out last evening. The Hoover Commission is an outstanding example, and there have been many others, in all of which private citizens organized into committees have frequently led the way forward. I hope the joint resolution will be passed.

Mr. CHURCH. Mr. President, I thank the Senator very much for his remarks.

Mr. MANSFIELD. Mr. President, will the Senator yield me 1 minute?

Mr. CHURCH. Mr. President, I am happy to yield 1 minute to the distinguished Senator from Montana.

Mr. MANSFIELD. Mr. President, regardless of what the result is with regard to passage of the joint resolution, I wish to take this occasion to commend and to congratulate the distinguished junior Senator from Idaho for the initiative he has shown and the responsibility he has undertaken.

I wish to point out that in the hearings on Senate Concurrent Resolution 17, in the first instance, and later Senate Joint Resolution 170, there are statements by various Members of this body in favor of this proposal. As to whether the Department of State is in favor of the passage of the resolution, I would suggest to the Members that they should read the communications from the Assistant Secretary of State, William B. Macomber, Jr., to the chairman of the Committee on Foreign Relations.

The resolution also has the support of a good number of outstanding citizens, such as Gen. William Draper, W. L. Clayton, of Houston, Tex., and our former colleague in the House, Robert Hale, of Maine, as well as others too numerous to mention.

My purpose in rising at this time and in asking for this brief minute is to pay my respects to the distinguished Senator from Idaho, and to again commend and to congratulate him for the initiative he has shown and the responsibility he has undertaken.

Mr. CHURCH. I thank the Senator very much for his remarks. I appreciate them more than I can say.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. CHURCH. I yield to the Senator from Minnesota.

The PRESIDING OFFICER. How much time does the Senator yield?

Mr. CHURCH. Mr. President, I am very pleased to yield 5 minutes to the distinguished Senator from Minnesota, who has long been associated with this proposal, and who has sponsored it in previous Congresses, as well as in the present Congress.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for 5 minutes.

Mr. HUMPHREY. Mr. President, I wish to join the acting majority leader [Mr. MANSFIELD] in commending the Senator from Idaho [Mr. CHURCH] for his diligence in pursuing the objectives of the joint resolution and in obtaining the concurrence of a majority of the Senate Committee on Foreign Relations, thereby having the resolution reported to the Senate favorably.

It has been my privilege over several years, along with a number of other Senators, to sponsor a resolution—Senate Joint Resolution 17—with the same objective. I believe this resolution—Senate Joint Resolution 170—is a better one. It meets many of the objections which were raised to previous resolutions.

I invite the attention of the Senate to the fact that in March of 1959, along with the Senator from Tennessee [Mr. KEFAUVER], the Senator from Kentucky [Mr. COOPER] and the Senator from New

Jersey [Mr. CASE] I sponsored Senate Concurrent Resolution 17, and the sponsorship was later joined by the Senator from Idaho [Mr. CHURCH] and other Senators. That resolution contained some flaws in language, I believe, which have been properly corrected, as the result of hearings, in the resolution which is now before the Senate. Senate Joint Resolution 170 is Senate Joint Resolution 17 revised and amended.

Mr. President, there is no doubt that Atlantic unity, the North Atlantic Community, is vital to the security of the United States. In fact, the NATO alliance has been properly termed our most significant alliance.

There have been many expressions of thought to the effect that NATO ought to be expanded. It not only should rest upon the military features of the alliance, but also should be undergirded, strengthened, and expanded in terms of the possibilities of other cooperation among the NATO nations. There could be economic cooperation and scientific cooperation, as well as greater cooperation on trade. There could be cooperation in the development of underdeveloped areas, economic assistance overseas, and a host of activities which are presently being carried on by the independent nation states. These programs could well be carried on by the alliance called NATO.

The failure of the summit conference has made more effective unity within NATO more urgently necessary than ever.

Passage of this resolution by Congress—one forward step which Khrushchev is powerless to block—would immediately create new solidarity and hope for the future among the NATO peoples.

The NATO governments have sought more effective unity since 1949, but with only partial success.

A fresh and independent survey of this problem is now urgently needed.

In fact, I have considered it to be needed fcr several years.

When we want such a fresh and independent survey of a national problem, we appoint a national commission of experienced citizens—such as the Hoover Commission or the Harriman Commission.

The Hoover Commission and the Harriman Commission performed their work well; the Hoover Commission in regard to reorganization of the executive branch of the Government, and the Harriman Commission in respect to the foreign aid program, at that time the Marshall plan.

The convention provided for in the resolution would be similar to a national commission operating on an international NATO basis.

Its members would similarly be officially appointed yet act as individuals, free to express their views but unable to commit their governments.

Its function—inquiry, report, and recommendation—would be the same.

Like a national commission also, the convention would meet long enough to conduct a serious examination of our problems.

Such a serious examination has not been possible in meetings of NATO citizens—like the Atlantic Congress—lasting less than a week.

While the NATO Parliamentarians' Conference serves a valuable purpose, it also meets for less than a week each year.

I wish to underscore the fact that we do have a NATO Parliamentarians' Conference, which, despite the few days of its meetings, has produced recommendations and results that have been beneficial to the Congress. The Senate Foreign Relations Committee has studied carefully the recommendations of the NATO parliamentarians, and those recommendations have been helpful to us in designing our foreign policy. In some aspects of foreign policy, the Congress of the United States is a coordinate or cooperative branch.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CHURCH. I am happy to yield 2 minutes further to the Senator from Minnesota.

Mr. HUMPHREY. A convention of NATO citizens for this purpose has twice been unanimously recommended by the NATO Parliamentarians' Conference, in 1957 and 1959.

It was recommended unanimously in 1959 by the approximately 650 NATO citizens at the Atlantic Congress.

It is welcomed by the executive branch of the Government, which stated in its testimony on this resolution:

> The Department considers that meetings such as the one proposed in this resolution might well serve a good purpose. We in the Department of State would certainly welcome any constructive and practical ideas which might emerge.
>
> We particularly welcome the thought expressed in the resolution that the delegates to the proposed convention should be free to explore the problem fully as individuals.

This resolution would carry out these three unanimous requests of representative bodies of NATO legislators and citizens.

I conclude my plea for the passage of this resolution on the basis that while it is indeed a responsibility of the President of the United States and the executive branch to conduct foreign policy, there is no prohibition in or out of the Constitution against the citizenry advising and consulting on the formulation of foreign policy. In fact, the Congress has a special responsibility in this day and age, in which economic assistance, trade, tariffs, scientific research, education, and information are so much a part of foreign policy. The passage of the resolution creating a U.S. Citizens Commission on NATO can strengthen our security and foreign policy.

Therefore it seems to me the Commission that is recommended fulfills a long-needed aspect of congressional activity. The Commission will report its findings and recommendations to the Congress, and therefore the funds that are proposed to be allocated under the resolution are within the spirit of the Constitution. The proposed function of the Commission surely meets the requirements of the Constitution.

Mr. CHURCH. Mr. President, in order that the opponents of the resolution may have a full opportunity to present their arguments, and inasmuch as considerably more of the time allocated to the proponents has been consumed than is the case of the time allocated to the opponents, I suggest the absence of a quorum.

Mr. KEATING. Mr. President, will the distinguished Senator from Idaho withhold his request for one moment?

The PRESIDING OFFICER. Does the Senator from Idaho withhold his suggestion of the absence of a quorum?

Mr. CHURCH. I withhold the request in order that the Senator from New York may make a statement.

Mr. KEATING. Mr. President, I do not wish to interfere in any way with the plans in reference to the resolution, but I should like to speak for approximately 7 or 8 minutes on another subject. I ask unanimous consent to proceed on another subject without reference to the time element on the resolution, if that is satisfactory.

Mr. CHURCH. Mr. President, that is very satisfactory.

The PRESIDING OFFICER (Mr. MCGEE in the chair). Is there objection?

Mr. CHURCH Reserving the right to object, may I inquire whether the distinguished Senator from New York has placed his request in such form that the time he consumes will not be charged against either side in this debate?

The PRESIDING OFFICER. The Chair rules that his request has been placed in such form.

Mr. CHURCH. I have no objection.

MUTUAL SECURITY

Mr. KEATING. Mr. President, I am shocked at the recent action of the House Appropriations Committee in slashing nearly three-quarters of a billion dollars from the mutual security bill.

The air is still ringing with Khrushchev's offensive attacks on this country and on President Eisenhower. The shattering collapse of the summit conference has revealed with painful clarity how deeply hostile, how dangerously unpredictable are Russia's leaders.

Yet, at this moment of renewed crisis for the whole free world, the House Appropriations Committee is cutting away at one of the pillars of its defense. This action will come as a shock to America's allies all over the world. It will weaken the influence of pro-American leaders the world over. It will strengthen the voices of neutralists and professional anti-Americans who claim that this country is not sufficiently responsible for world leadership. If these cuts are not restored, either here or by the House, then American prestige as well as free world security will take a nose dive.

The cuts that have been made in the President's program seem to be deliberately chosen to injure U.S. long-term aims most deeply. I am particularly disturbed by the arbitrary elimination of any U.S. assistance for the Indus River development project. For 10 years the United States and U.S. citizens have been struggling, both officially and unofficially, to bring India and Pakistan together in cooperative development of

the Indus waters. It was the supreme achievement of World Bank President Eugene Black that agreement had been reached on a program which will play a crucial role in the economic growth of India and Pakistan.

The project is important because it will bring India and Pakistan together on a matter of vital concern to both, which is of supreme importance to the entire free world. The tensions which exist in that area can be realized only by those who have lived in the area of India and Pakistan, as I did for 3 years. It is extremely important that those two nations be brought closer together and that the tensions between them be relaxed.

The project is important also because it provides for cooperative financing by six other nations of the free world and by the World Bank. Australia, Canada, Germany, New Zealand, and Britain had planned to participate as well as the United States. American aid to the billion-dollar project would have amounted to about half spread over 10 years. But only a small portion of that, only $177 million, would be in grants, the rest in interest-paying loans.

In other words, the Indus River project as envisaged by the State Department and as approved in the original authorization bill, is one of the most hopeful steps in international economic development that has emerged for a long time. It would strengthen the position of the whole free world in Asia and it would pave the way for a wider sharing among industrialized nations of the costs of helping less developed countries. All this the House committee has chosen to disregard.

Elsewhere the cuts seem to be aimed at those parts of the world that are already most vulnerable to Communist infiltration. In a meddlesome and wholly unwarranted interference with the conduct of foreign affairs by the executive branch of the Government, the committee is trying to require advance congressional approval of every single project. This could easily hold up U.S. aid to the newly emerging countries of Africa for over a year.

Meanwhile, flocks of so-called Soviet experts and technicians are arriving in Africa every day, full of promises for unlimited Russian help.

Incomprehensibly, the committee has put another restriction on assistance to Africa. None of the $20 million appropriated for technical assistance in Africa south of the Sahara is to be used for construction purposes. Thus while the Soviet Union is boastfully constructing a big new school in Guinea, United States experts are expected to teach the Africans outdoors under the trees.

Altogether, it is clear that the committee's action, either unwittingly or wittingly, will hamstring the administration in the conduct of foreign aid. By requiring advance congressional consent before any project is undertaken, the committee would make it almost impossible for the country involved to make any suggestions of its own for development aid. ICA negotiators would have no flexibility whatever in the negotiating of project contracts. They would be terribly handicapped in efforts to meet sudden crises like floods, earthquakes, and harvest blights. And, still a further obstacle is put in their way by refusing to allow the use of contingency funds to make up some of the cuts.

The committee's cuts represent a false economy if ever there was one. By eliminating flexibility from the program, they make waste and inefficiency almost inevitable. The committee has even cut to the point of seriously handicapping the budget of the office of comptroller of the foreign aid program. This office was only set up last year at the insistence of the Foreign Affairs Committee to keep an eye on the very type of extravagance that the Appropriations Committee is attacking.

Moreover, a word about the committee's cuts on the military side of mutual security. If we do not help our allies to maintain their own defenses now against the advancing technology of the Russians, we will have to pay a whole lot more later to defend them ourselves. The Korean war should be a grim reminder of what happens when we do not make it clear that we mean business in the defense of our allies. The money spent now on mutual security within our alliance system will mean a future saving not only of dollars and cents but also and, even more important, of the precious lives of American servicemen. As President Eisenhower pointed out, our own security as well as the defense of the free world is jeopardized by these cuts.

I am as anxious as anyone to save the American taxpayers money. And I agree that there is a certain amount of waste and inefficiency in the aid program that can and should be cut out. There have been some indications that the procurement processes of the military are not all they should be. Military transportation policies appear to allow a good deal of unnecessary extravagance. And some of our diplomats are developing an expensive habit of substituting easy giveaway deals for the more arduous negotiations of diplomacy. In all these areas there is room for improvement. And congressional vigilance is the proper way to cut down on many such excesses.

But, and I cannot emphasize the point too strongly, the House Appropriations Committee has substituted for the careful pruning which is desirable, a policy of axing away at the whole concept of mutual security. We must not play politics with the Nation's safety. Just because the mutual security program has no constituency within the country, because it serves the country as a whole and does not bring particular benefits to any one state or region, it is vulnerable to political hacking.

This attempt to loosen American bonds with the free world at the very time that the President may be facing Communist-inspired mobs in Asia who have the same object, is extremely dangerous. In the words of an editorial in this morning's New York Times, it is a "knife in the back" of our President. It is also a cruel blow to our allies. It will undermine our future security as a great Nation. I hope the Senate will repudiate this sabotage of the mutual security program and restore the drastic cuts that have been made.

Mr. CASE of New Jersey. Mr. President, will the Senator yield?

Mr. KEATING. I yield.

Mr. CASE of New Jersey. I thank the Senator for his penetrating and persuasive speech. I associate myself with him utterly. The action taken by the committee in the House, if it prevails in the House and substantially affects the final outcome of the appropriation bill, will be disastrous. The Senator from New York is to be commended very highly indeed for bringing this matter to our attention.

Mr. KEATING. I appreciate the remarks of the Senator from New Jersey.

PARTICIPATION IN INTERNATIONAL CONVENTION OF CITIZENS FROM NORTH ATLANTIC TREATY NATIONS

The Senate resumed the consideration of the joint resolution (S. J. Res. 170) to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment of U.S. delegates to such convention, and for other purposes.

Mr. CASE of New Jersey. Mr. President, I understand that the Senator from Ohio [Mr. LAUSCHE] is ready to proceed. I shall be glad to yield to him such time as he may desire.

Mr. LAUSCHE. Mr. President, how much time does the Senator have remaining?

The PRESIDING OFFICER. Thirty-three minutes remain on the Senator's side.

Mr. LAUSCHE. I shall not need anything like that amount of time.

Mr. CASE of New Jersey. To start with, I yield 10 minutes to the Senator from Ohio.

Mr. LAUSCHE. Mr. President, as a member of the Committee on Foreign Relations, I voted against Senate Concurrent Resolution 17. In the casting of that vote, I joined other Senators in declaring that the adoption of the joint resolution would not be in the best interest of our country. The vote finally cast was eight in favor of the resolution and seven against it.

That division very clearly demonstrates the doubt that exists in the minds of the members of the committee about the possibility of making the concurrent resolution effective in law.

I directed a number of questions to the witnesses who appeared before the committee. At the very beginning, my thinking in opposing the resolution was rooted in the proposition that under the resolution there would, in effect, be created a third agency which would participate in the formulation of foreign policy. The resolution contemplates the creation of a commission made up of private citizens, who would meet, would analyze what NATO was doing, and then, if it so desired, make recommendations of courses of action to be followed by NATO other than the courses of action it was

following. That statement of fact immediately threw me into a quandary concerning the situation that would exist in the event the President and the State Department felt that one course of conduct was necessary to best promote the national interest of the United States, and the commission of private citizens declared policies and made recommendations which were in conflict with the position taken by the Government.

On page 28 of the hearings I asked Mr. Draper this question:

Now, let us assume that our U.S. Government at NATO dissents while the other 14 agree. Assume that you have this agency in existence, and they meet, and the delegates appointed by this legislative body of the United States, take a position contrary to what our duly constituted authorities under the Constitution took in passing on a question. You believe that will be healthy?

Mr. DRAPER. I do not know that that would happen, but that would be an expression of their own views. I would not think that that would be harmful if they gave their views publicly and the American people and Congress can draw their own conclusions.

Senator LAUSCHE. Our Constitution contemplates that the foreign relations shall be conducted by the President of the United States, through his duly appointed officials, subject to whatever restrictions the Constitution places upon that power, and vests in the Senate; is that correct?

Mr. DRAPER. That is correct.

I then posed the question:

Are you not proposing now the establishment, for the first time in the history of our country, of a separate citizens' group that will begin conducting foreign relations and which may conduct them in a manner that will be completely inconsistent with what the President contemplates the foreign relations should be?

Those questions and answers are reflective of the reasons why I believe the joint resolution should not be passed. I care not whether the appointees to the commission are of the best and most prudent in the Nation. The fact is that they are to be responsible to no one. They will owe no responsibility to the President or to Congress. When once they are appointed, they, in assembly, can make declarations of what ought to be done, and make recommendations, even though such declarations are hopelessly and indefensibly in conflict with the course which the duly constituted authorities are following.

In a democracy, nothing is more essential than to have public officials answerable to the people. The members of the proposed commission will not be answerable to the people. In accordance with the answers given, they will be responsible only to their consciences. Consciences are very elusive things. Some are good; some are bad.

I remember when I was studying the subject of equity, in the early history of the law of equity the query was made: "How does a chancellor decide issues?"

The counsellor before the court said: "He decides them on the basis of conscience."

One of the chancellors declared: "That is a peculiar law. The consciences of individuals differ just as do the size of toes. Some are large; some are small."

The primary point at issue is to make certain that whoever is attempting to declare policy and make recommendations shall be answerable to the people of the United States. I am quite certain that none of the proponents of the joint resolution will challenge my statement that after the commission enters upon the performance of its duties, it will not be limited in any degree in what it does by a power or authority exercised over it, either by Congress or by the President. When once the members of the commission are appointed, they will continue in office. The President cannot remove them; Congress cannot remove them; nor will the people have anything to say about the matter.

At the risk of repeating, if my arguments are disregarded, there can be no indifference shown to the fact that seven members of the committee voted against the favorable recommendation of the joint resolution. While I am not certain, there is a strong possibility that one member of the committee voted in favor of the resolution solely to get it before the Senate for final disposition.

Mr. President, I believe it would be a mistake to create the commission. I can see no useful purpose it would serve. Already there is too much confusion with regard to our foreign policy. The creation of the advisory commission would merely contribute further to it.

I pose this question: The President declares one course to be the policy. The commission advises a different course. How do we stand before the world? How do we stand in the minds of the people of our own country?

I think the safe thing to do is to adhere to the traditional approach, as declared by the Constitution; namely, that the foreign policy shall be conducted by the President and by the officials of the State Department. If there is to be a change in the manner in which our foreign policy is to be conducted, it should be done, in my judgment, only through a change in the Constitution. It should not be done by the backdoor method you proposed.

I urge Senators to vote against the joint resolution.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, the time for the quorum call to be charged to both sides.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHURCH. Mr. President, I am happy to yield to the distinguished Senator from New York [Mr. JAVITS] 5 minutes from the time available to the proponents of the joint resolution.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. JAVITS. Mr. President, I desire to speak in support of the joint resolution.

Perhaps I will be pardoned if I say that I have had very considerable experience with the operations of NATO, especially inasmuch as I had the honor to be a representative, designated by the Vice President, to the NATO Parliamentarians Conference. This is the 3d year I have served in that capacity. I also had the privilege last year of attending the Atlantic Congress, which has been prominently mentioned in this debate.

Mr. President, I believe the world has entered a new era, following collapse of the summit conference in Paris and the exacerbation of international tempers. There is also the great concern of the entire world over the violence of the language and the approach which accompanied the blowup at Paris.

What has caused singular unanimity of opinion in our country, regardless of party, has been a realization of the fact—which Khrushchev has proved—that today the free world must combine and unify to a far greater extent than previously had been considered as necessary.

It seems to me we are witnessing an extremely effective reaction to that situation. For example, I noticed with very great interest that in the long and detailed speech made in this Chamber yesterday by a leading Democratic Senator, the junior Senator from Massachusetts [Mr. KENNEDY], who is very prominently mentioned in his party for possible nomination to be its candidate for President of the United States, he emphasized that very point—namely, that whatever may be the differences of opinion between the administration and himself in regard to what should be done, or whatever may be the differences of opinion and the differences of approach between the two political parties, certainly it is agreed by all that we must increase our cooperation with the rest of the free world.

Economic matters are also of great importance in connection with this situation, Mr. President, because it appears that the gross national product and productive power of the 15 other NATO countries amount to approximately 15 percent of the gross national product and productive power of the United States. In fact, the gross national product of those 15 NATO countries amounts to approximately one-quarter of a trillion dollars.

In addition, enormous trade responsibilities are now being considered and negotiated among the NATO countries. For instance, all of us are familiar with the problems being reconciled between the Inner Six and the Outer Seven.

I believe I can state authoritatively, as chairman of the Economic Committee of the NATO Parliamentarians, that, in the immediate future, economic cooperation of the most intensive character between ourselves and our European allies is absolutely indispensable in order to achieve real success in the cold war. For instance, we are faced with very grave problems in connection with the kind of economic warfare the Soviet Union could wage upon the free world, especially in individual primary commodities, including such items as tin,

flax, and fuel oil. We are familiar with many of those problems, especially in connection with the new underdeveloped countries of Africa. All of these problems will have to be handled in a collective manner between ourselves and the European countries which are the principal consumers of the commodities.

In addition, the Atlantic Community controls the overwhelming proportion of the world trade, and certainly must take steps to deal adequately with the problems of trade competition. We are beginning to realize in a very definite way, in all branches of our economic system, the importance and the effects of the problems presented by both imports and exports, insofar as the United States itself is concerned.

The proper handling of all these problems requires far more in the way of contacts and interrelationships with our European allies than has heretofore been accepted as the norm; at this time we are considering membership in the Organization for Economic Cooperation and Development, to replace the Organization for European Economic Cooperation, which was the European organization for cooperation in regard to the Marshall plan.

The PRESIDING OFFICER. The time yielded to the Senator from New York has expired.

Mr. CHURCH. Mr. President, I am happy to yield 2 additional minutes to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized for 2 additional minutes.

Mr. JAVITS. Mr. President, these developments will result in greatly increased intimacy of relationships as regards trade, aid, prices, and other economic problems between ourselves and the European countries.

Finally, Mr. President, we are looking forward to partnership with the European countries in order to help aid the less developed areas of the world—areas which, despite all we have done, including the work of the International Development Association, are still insufficiently developed to meet what everyone concedes to be the legitimate desires of their peoples to improve their standards of living. All of us recognize that the extent to which we take action to meet these needs will be the gage as to which way these underdeveloped countries will turn—either to the free world or to the Communist bloc.

Mr. President, under all these circumstances, it seems to me that a technique as beneficial as the one called for by the pending joint resolution, which employs the grassroots spirit—which is the way I define the joint resolution—will definitely help in connection with the desire to attain world peace. It is necessary in terms of the security of the United States, the security of the entire free world, success in the cold war, and success in the post summit period, when such great emphasis is placed upon the necessity for coordination and unification of the free world to the maximum extent possible.

Mr. President, it seems to me that the joint resolution offers us an ideal approach, as a first step in dealing with what must be—if we are to succeed—the greater role of the entire NATO organization in enabling the entire Atlantic Community to cooperate more closely, and yet in practicable and completely constitutional ways.

So I hope very much the Congress will not forgo the opportunity to support this measure given by our colleagues who sponsor it.

The PRESIDING OFFICER. The additional time yielded to the Senator from New York has expired.

Mr. JAVITS. Mr. President, I thank the Senator from Idaho for his courtesy in yielding to me.

Mr. CHURCH. I thank the able Senator from New York for his fine presentation.

Mr. President, at this time I am happy to yield to the distinguished senior Senator from Tennessee [Mr. KEFAUVER], such time as he may require. He has long been associated with this cause, and he is well known for his outspoken support of the objectives of the joint resolution.

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. KEFAUVER. I thank my distinguished colleague very much for his courtesy in yielding to me.

Mr. President, I rise to add my voice in support of Senate Joint Resolution 170 to create a U.S. Citizens Commission on NATO and to authorize its members to participate, on an international basis, in meetings with similar conventions from other countries, to explore means of promoting greater cooperation among NATO countries.

The events at the summit conference have convinced me that the No. 1 goal of Khrushchev is to destroy the North Atlantic alliance. This would seem quite natural on his behalf, as this alliance stands as the most potent defense against the U.S.S.R. today.

Mr. President, most of us have long been engaged in seeking out ways to strengthen our NATO alliance. We know this to be most necessary for peace and security. Along with a number of other Senators on both sides of the aisle, I sponsored the resolution which made the United States a member of the NATO Parliamentarians Conference. I have served as chairman of one of the major committees of the Conference.

I joined in writing and working for the resolution in the NATO Parliamentarians Association which brought about the Atlantic Congress in London last year. I have served as chairman of one of the major committees of the conference. I believe that a great deal of good came of this meeting of citizens of all of the free nations.

Both the NATO Parliamentarians and the Atlantic Congress have strongly recommended the establishment of a smaller body which can meet for longer periods of time, and which can give intensive study to the possible means of strengthening our NATO ties.

To this end, I joined with a number of other Senators, in 1959, in sponsoring Senate Concurrent Resolution 17. Hearings were held on this resolution early this year, and the final decision was to replace this resolution with Senate Joint Resolution 170.

The purposes of this resolution are summarized clearly and succinctly in the following paragraph which is taken from the report of the Foreign Relations Committee which accompanies this resolution:

> Senate Joint Resolution 170 would create a Commission of not more than 20 private U.S. citizens to be appointed jointly by the President of the Senate and the Speaker of the House after consultation with the Foreign Relations and Foreign Affairs Committees. The Commission would be directed to seek to arrange and participate in a convention attended by similar citizens' commissions from the other NATO countries for the purpose of developing paths toward greater political and economic cooperation within the alliance. Members of the Commission would serve without compensation, but would be authorized to employ and remunerate a staff of not more than 10 members. While in no way enabled to represent the United States officially, the Commission would report, and account for its expenditures, to the Congress. Not to exceed $300,000 would be authorized to be appropriated for the resolution's purposes; not more than $100,000 of that sum would constitute the Commission's share of expenses in any international conference. The Commission would cease to exist on January 31, 1962.

It has been argued that a convention of national commissions on NATO would mean duplicating the work of the NATO Parliamentarians' Conference and the Atlantic Congress. I believe that this argument is without merit.

The NATO Parliamentarians' conferences, as valuable as they are, consist only of legislators, last only a week at a time, and lack a certain amount of continuity.

The Atlantic Congress, as valuable as it was, consisted of a single session, and had an unwieldy membership of 650 delegates.

The proposed NATO Convention of National Citizens' Groups would consist of approximately 100 leading citizens, who would confer together for whatever period of time might be necessary to study NATO problems and to develop new solutions for them.

In my view the Convention would serve, in the international field, a purpose very similar to that served by the Hoover Commissions and similar commissions with respect to national governmental organization.

I think it should be emphasized again that the U.S. Citizens Commission on NATO would not speak for or represent the U.S. Government, and that its members would be appointed from among leading private citizens.

Such a commission would possess a most varied background and would bring a most valuable experience to bear upon the questions of what is sound and what is possible.

During its early years, NATO was held together primarily by the Soviet military threat.

We all know that that threat still exists, but the best military arrangements depend on political and economic

discussions and agreements. The machinery for holding such discussions and making such agreements must be perfected.

The nature of the Communist effort for world domination has shifted to a considerable extent to the economic, political, and propaganda fields. The democracies can meet this new challenge with success only if they have workable mechanisms for consultation.

They must also have community of action. The adoption of this resolution will be a vital step in the creation of this action.

The continued success of the NATO alliance may very well depend on what we do here today.

The United States, and particularly the Senate today, is called upon to take the lead in this step for which other NATO nations have shown their support.

The President of the United States, the Secretary of State, and the Chairman and most of the members of the Foreign Relations Committee think that we should take this forward step.

I hope that the Senate will give it enthusiastic backing.

I wish to commend and congratulate the distinguished Senator from Idaho [Mr. CHURCH] and the distinguished Senator from Arkansas [Mr. FULBRIGHT], Chairman of the Foreign Relations Committee, for reporting this resolution. I also congratulate Senators on both sides of the aisle who have joined so wholeheartedly with the Senator from Idaho and the sponsors of the resolution in presenting it so effectively to the Senate today.

Mr. CHURCH. Mr. President, I am happy to yield 2 minutes to the distinguished Senator from Alabama [Mr. SPARKMAN].

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SPARKMAN. Mr. President, I doubt that I can add anything to the discussion which has been going on now for some time, but I am in favor of the joint resolution which is under discussion. This proposal is not something new. It has been around here for a long time. Certain suggestions were made by the administration. It has been worked out in its final form in a way that was acceptable to the administration, and, in fact, to me.

For several years I have felt we needed something to bring together more closely the NATO countries. I have heard our military leaders in NATO say that one thing badly needed was a greater underpinning, politically and economically, of the countries; that they are very well unified from a military standpoint, but that they could never attain their full strength until they were brought together more closely with better political and economic understanding.

There is another thing that impresses me. Over the last year or two there has developed some talk of a trade war. I do not know whether it is right to call it a trade war, but certainly it is correct to refer to trade conditions as between two different groups of European countries. Anything we can do to help prevent a trade war, which could be destructive to the well-ordered trade of the world, as well as the good understanding which prevails among the various NATO countries, we ought to do.

After all, the resolution simply provides for an exploratory role, and it comes on the heels of recommendations made by those who have attended the various NATO parliamentarian conferences. The people who attended got together last year in London. The proceeding is exploratory in nature. It would utilize the service and thinking of some of the best brains in the country. I think it is a good undertaking and that the Senate ought to approve it.

Mr. CHURCH. Mr. President, how much time remains to the proponents?

The PRESIDING OFFICER. Twelve minutes remain to the proponents.

Mr. CASE of New Jersey. Mr. President, how much time remains to the opposition?

The PRESIDING OFFICER. Twenty-one minutes remain to the opposition.

Mr. CASE of New Jersey. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. CHURCH. Mr. President, in view of the fact that so much more time remains to the opposition, I would ask, if it is agreeable to the opposition, that the time for the quorum call be taken from the time remaining to the opposition.

Mr. CASE of New Jersey. Mr. President, I want to be fair. I have had no additional requests for time in opposition. Therefore, I accede to the suggestion of the Senator from Idaho.

Mr. MANSFIELD. Mr. President, may I ask the Senator from Idaho if he intends to use any more of his 12 minutes?

Mr. CHURCH. It is my understanding the Senator from Kentucky desires to speak in support of the resolution; and then I should like to make some concluding remarks.

Mr. CASE of New Jersey. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUSCHE. Mr. President, will the Senator yield that I may ask for the yeas and nays?

Mr. CHURCH. I yield to the Senator from Ohio 1 minute from the time of the opposition.

Mr. LAUSCHE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CHURCH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CHURCH. How much time now remains to the proponents of the joint resolution?

The PRESIDING OFFICER. Thirteen minutes.

Mr. CHURCH. Mr. President, I am happy to yield to the distinguished Senator from Kentucky [Mr. COOPER] 3 minutes to speak on behalf of the resolution.

Mr. COOPER. Mr. President, as one of the original sponsors of the resolution, I am glad to support it today in the Senate. We must recognize that it is indispensable that members of the North Atlantic Treaty Organization and their peoples should be more closely bound together than ever before. This is not a new interest. It has existed since the formation of NATO.

But certainly the events surrounding the summit conference make it imperative that the people of the NATO countries understand the policies of the NATO and that they support them.

In 1950 I had the unique experience of attending two meetings of the Council of the North Atlantic Treaty Organization in company with the then Secretary of State, the Honorable Dean Acheson. I remember the debate which occurred at the second meeting of the Council, held in London, with respect to the means by which Germany might be brought into the North Atlantic Treaty Organization. The process was commenced by making Germany a member of the OEEC.

At the third meeting, in Brussels in December 1950, the decision was made that it was necessary that American troops should be committed to the defense of Europe, and General Eisenhower was chosen as supreme commander of the NATO forces. The Brussels meeting was followed by the great debate in Congress in 1951 on the issue of committing troops to Europe. I believe that if such an organization as is contemplated by the resolution before us had been in existence at that time, and the questions to which I have referred could have been discussed by private citizens of the NATO countries, the governmental decisions could have been made more quickly and accepted and understood by the peoples of the countries which are members of the North Atlantic Treaty Organization.

I see this Organization as one in which there can be established a better understanding of the policies of the North Atlantic Treaty Organization. But my chief reason for giving the joint resolution my support is that from the discussions and considerations of able men and women who will be delegates there will be brought to bear upon the countries that are members of the North Atlantic Treaty Organization new ideas and the best thoughts of their people.

Those who were delegates to our Constitutional Convention were not bound by the views of any political party. They were free to bring to bear upon the Convention their best thoughts, their ideas, and their genius. Governments by their very nature are limited. We should not be afraid of the full scope and the best ideas of the peoples of our countries. The resolution will give opportunity to the best minds of our country and of other countries which make up the North Atlantic Treaty Organization to advance ideas, perhaps better ideas than may be held by those who are in power at a particular time—to join our countries more powerfully—economically, militarily, and in values which affect the opinion of the world.

The PRESIDING OFFICER. The time of the Senator from Kentucky has expired.

Mr. COOPER. May I have an additional minute?

Mr. CHURCH. I yield 1 additional minute.

Mr. COOPER. I was interested in reading the speech of the Senator from New Jersey [Mr. CASE] and I direct my remarks to those who are on this side of the aisle. The distinguished Senator from New Jersey [Mr. CASE] said:

> A number of us have been working on this problem. Among them is the Vice President of the United States, who, when he was in the Senate, had a great interest in this whole area, and still retains it. I am authorized by him to say that he welcomes this initiative on the part of Members of the Senate; that he strongly believes it is extremely desirable for the countries of the Atlantic Community to engage in cooperative efforts of every sort to draw closer together.

I concur in Senator CASE's statement. I earnestly hope that the joint resolution will be passed.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield 2 minutes to the distinguished Senator from Connecticut.

Mr. BUSH. Mr. President, I am happy to associate myself with the views expressed by the able senior Senator from Kentucky [Mr. COOPER] and the able senior Senator from New Jersey [Mr. CASE]. The subject before the Senate is one I have discussed on and off over a period of the past 10 years with a very distinguished citizen of my own State, Mr. Elmo Roper, who testified in support of the joint resolution before the Foreign Relations Committee. I believe that it would be well for us to pass this joint resolution today. I believe that a good case has been made for it.

The Senator from Kentucky has made a good case for it. I was very much interested to note in Mr. Roper's testimony before the committee that the much-maligned Director Emeritus of the Budget Percival Brundage is quoted as saying: "I support enthusiastically Senate Concurrent Resolution 17, consider very important budgetwise."

I believe that our friends on the other side of the aisle should, when the Budget Bureau is not opposed to it, give the Bureau of the Budget a little round of applause.

I was very much impressed by the fact that the Vice President of the United States has firmly and enthusiastically endorsed the resolution.

As I say, having considered the subject generally over a period of 10 years, I believe the resolution has now gotten into the shape where the Senate should adopt it. I therefore join the distinguished sponsor, the Senator from Idaho [Mr. CHURCH], in urging the Senate to adopt the resolution this afternoon.

Mr. CHURCH. Mr. President, may I inquire whether there are further speakers to be heard in opposition to the resolution?

The PRESIDING OFFICER. The Chair knows of none.

Mr. CASE of New Jersey. That being so——

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. CHURCH. I yield to the Senator from New Jersey for such comments as he desires to make.

Mr. CASE of New Jersey. There being no request pending for time in opposition, I am glad to yield back the time in opposition.

Mr. LAUSCHE. Mr. President, will the Senator from New Jersey refrain from doing that at this time?

Mr. CASE of New Jersey. I shall be glad to suspend my request.

Mr. CHURCH. How much time remains?

The PRESIDING OFFICER. The opponents have 3 minutes. The proponents have 7 minutes.

Mr. CASE of New Jersey. I should like to ask if the Senator from Ohio wishes me to yield to him some time now?

Mr. LAUSCHE. No. There may be some assertions made that ought to be answered.

Mr. MANSFIELD. I believe the reason why the Senator from New Jersey made his suggestion was to permit the sponsor of the joint resolution to conclude the debate, which is a legitimate request.

Mr. CASE of New Jersey. That indeed was the purpose. If there is no objection, I yield back the balance of my time.

Mr. CHURCH. Mr. President, I yield myself such time as may be necessary to summarize the arguments in favor of the adoption of the resolution.

The arguments which have been raised against the pending resolution seem to me to fall into two categories. There have been those who have said that the joint resolution somehow interferes with the constitutional power vested in the President to conduct American foreign relations. I believe that, with all due deference to those who have made this argument, the facts simply do not support it. Certainly, if there were any shred of substance to this contention, the joint resolution now before us would be opposed by the President, who is naturally jealous of the powers of his office, and there would be objection to it also by the State Department. Yet the very contrary is true. The resolution has the blessing of the administration and the approval of the State Department.

Why does the resolution constitute no interference with the power of the President to conduct American foreign relations? It seems to me that the answer is simple. It is because no power is conferred upon the delegates who will attend the proposed convention. They merely will be sent to exercise their prerequisites as free citizens of the countries which comprise the NATO alliance, to deliberate and to reach conclusions with respect to how this alliance can be strengthened and how the unity of the free nations can be enhanced. This is a fundamental right of free citizenship.

The delegates cannot bind the governments which send them. The resolution states that our delegates will not represent, nor speak for, the Government of the United States; they may merely deliberate and bring forth recommendations which seem to them to be suited to the objective sought, the strengthening of the NATO alliance. Then those recommendations, carried back to the respective governments, can and will be evaluated on their intrinsic merits, and accepted or rejected as the governments see fit.

The State Department, in commenting upon the resolution, has made it clear why it feels that recommendations emanating from a convention of this kind might be very fruitful. I quote the language of the Department of State:

> The Department considers that meetings such as the one proposed in this resolution might well serve a good purpose. We in the Department of State would certainly welcome any constructive and practical ideas which might emerge * * *. We particularly welcome the thought expressed in the resolution that the delegates to the proposed convention should be free to explore the problem fully as individuals.

Therefore, I submit there is no support for the argument that the resolution in any way interferes with the constitutional prerogatives of the President to conduct our foreign affairs.

The second argument which has been advanced is that the resolution is somehow unprecedented, that it opens up new doors, and therefore we should be cautious about approving it. I submit this is not so. Citizens' commissions are precedented, and we have used them to good advantage right here in the United States. The Hoover Commission was a citizens' commission. It made recommendations that were highly useful and productive. The Government of Great Britain has used royal commissions with excellent results.

All we do in the resolution is to lift our sights and apply the precedent that we have used so well in other fields to the common problems faced by the NATO nations in strengthening the NATO alliance.

I submit that the resolution is in the best tradition of free societies. Our individual citizen is the finest product of Western civilization. Let us use him to the best advantage. Let us remember that the most important advances which have been made in our long quest for freedom have not been the acts of duly constituted governments, but have been the actions taken by free citizens in conventions assembled. Therefore, inasmuch as the joint resolution is supported by the administration, the State Department, the Vice President, and has been endorsed by the NATO parliamentarians' conference, and unanimously endorsed by the Citizens' Atlantic Conference in London last year, and has the majority support of the Committee on Foreign Relations, it ought properly to be approved by the Senate as a whole. I hope it will be so approved in the coming vote.

The PRESIDING OFFICER. The joint resolution is open to amendment. If no amendment is to be offered, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 170) was ordered to be engrossed for a third reading, and was read the third time.

Mr. RUSSELL. Mr. President, I suggest the absence of a quorum.

Mr. MANSFIELD. Mr. President, will the Senator withhold that request?

Mr. RUSSELL. I withhold it.

The PRESIDING OFFICER. All time for debate has expired.

Mr. RUSSELL. I withdraw my suggestion of the absence of a quorum.

The PRESIDING OFFICER. The question is on the passage of the joint resolution. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Wyoming [Mr. O'MAHONEY] is necessarily absent.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that the Senator from Missouri [Mr. HENNINGS], if present and voting, would vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is necessarily absent.

The Senator from South Dakota [Mr. MUNDT] is absent on official business.

The Senator from Wisconsin [Mr. WILEY] is detained on official business. If present and voting, the Senator from Maryland [Mr. BUTLER] and the Senator from South Dakota [Mr. MUNDT] would each vote "nay."

The result was announced—yeas 51, nays 44, as follows:

[No. 217]

YEAS—51

Bartlett	Hartke	Magnuson
Beall	Hayden	Monroney
Bush	Hill	Morse
Carlson	Humphrey	Morton
Carroll	Jackson	Moss
Case, N.J.	Javits	Murray
Church	Johnson, Tex.	Muskie
Clark	Keating	Pastore
Cooper	Kefauver	Proxmire
Dodd	Kennedy	Randolph
Douglas	Kuchel	Scott
Engle	Long, Hawaii	Smathers
Fong	Long, La.	Sparkman
Fulbright	Lusk	Symington
Gore	McCarthy	Williams, N.J.
Gruening	McGee	Yarborough
Hart	McNamara	Young, Ohio

NAYS—44

Aiken	Dirksen	McClellan
Allott	Dworshak	Mansfield
Anderson	Eastland	Martin
Bennett	Ellender	Prouty
Bible	Ervin	Robertson
Bridges	Frear	Russell
Brunsdale	Goldwater	Saltonstall
Byrd, Va.	Green	Schoeppel
Byrd, W. Va.	Hickenlooper	Smith
Cannon	Holland	Stennis
Capehart	Hruska	Talmadge
Case, S. Dak.	Johnston, S.C.	Thurmond
Chavez	Jordan	Williams, Del.
Cotton	Kerr	Young, N. Dak.
Curtis	Lausche	

NOT VOTING—5

Butler	Mundt	Wiley
Hennings	O'Mahoney	

So the joint resolution (S.J. Res. 170) was passed.

Mr. CHURCH. Mr. President, I move that the vote by which the joint resolution was agreed to be reconsidered.

Mr. CASE of New Jersey. Mr. President, I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

COMMITTEE MEETINGS DURING SENATE SESSION TOMORROW

Mr. McCLELLAN. Mr. President, about a week ago—I think it was a week ago today, or yesterday—I gave notice that on tomorrow, at 10 o'clock, the Subcommittee of the Judiciary, to which Senate bill 3548, to amend the Norris-La Guardia Act, the National Labor Relations Act, and the Railway Labor Act, had been referred, would begin a series of hearings on that bill. I did not know at that time, of course, that it was contemplated—if it was contemplated then—that the Senate would go into session tomorrow at 9:30 a.m. In view of that development, it appears necessary for the subcommittee to get consent of the Senate for it to proceed with hearings tomorrow, if the hearings are to proceed.

I may state this is a bill of considerable interest to many people, both those supporting the measure and those opposing it. I had hoped we could make a little progress in the hearings.

For reasons stated, Mr. President, I ask unanimous consent that the subcommittee of the Judiciary Committee to which I have referred may proceed tomorrow with the hearings as scheduled, notwithstanding the fact that the Senate will convene at 9:30 o'clock a.m. tomorrow.

The PRESIDING OFFICER (Mr. McGEE in the chair). Is there objection?

Mr. MORSE. Mr. President, I object.

The PRESIDING OFFICER. There is objection.

DEVELOPMENT OF WILDLIFE, FISH AND GAME CONSERVATION

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, which will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations.

ELIMINATION OF AFFIDAVIT OF DISLOYALTY

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar 1411, Senate bill 2929.

The PRESIDING OFFICER. The bill will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 2929) to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

LEGISLATIVE PROGRAM—DEFENSE DEPARTMENT APPROPRIATIONS

Mr. JOHNSON of Texas. Mr. President, the Senate has just voted to proceed to the consideration of Senate bill 2929; and I hope we may be able to act on that measure before we conclude our deliberations this evening. I would expect the Senate to stay in session this evening, if necessary, in order to vote on that bill.

I expect our consideration of Senate bill 2929 to be followed by consideration of the Department of Defense appropriation bill, Calendar 1614, House bill 11998. It is a very important bill, and it will need to go to conference. If there is any unreasonable delay, we might have to set aside any pending business in order to proceed to the consideration of that bill.

Mr. President, I ask unanimous consent that during the consideration of House bill 11998, the Department of Defense appropriation bill—and let me say that I have talked about this matter to the chairman of the subcommittee [Mr. CHAVEZ], to the minority leader [Mr. DIRKSEN], and to other members of the Appropriations Committee—there be a time limitation of not to exceed 40 minutes, on each amendment and not to exceed 3 hours on the bill, to be equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. CASE of South Dakota. Mr. President, reserving the right to object——

Mr. JOHNSON of Texas. I yield.

Mr. CASE of South Dakota. Is it expected that the Department of Defense appropriation bill will be called up yet today?

Mr. JOHNSON of Texas. No; unless we proceed much faster than we anticipate. But we do not think so.

Mr. CASE of South Dakota. Then I withdraw the reservation.

Mr. PROXMIRE. Mr. President, reserving the right to object, do I correctly understand that the Senator from Texas has requested unanimous consent that the time available for debate on the Department of Defense appropriation bill be limited to a total of 3 hours, and that there be a limit of 40 minutes on each amendment, with the time available to be equally divided?

Mr. JOHNSON of Texas. Yes. The chairman of the committee suggested a total of 2 hours on the bill and 30 minutes on each amendment. We talked to various members of the committee, and we thought that if we provided more time on the bill, we would be able to yield some of the time available on the bill in order to provide additional time for the consideration of certain amendments for which further time might be desired.

So, at the suggestion of the members of the committee, we propose to increase to 3 hours the time available for debate on the bill, and to increase from 30 minutes to 40 minutes the time available for debate on each amendment.

Mr. PROXMIRE. Do I correctly understand that the bill calls for appropriations of approximately $41 billion?

Mr. JOHNSON of Texas. Yes.

Mr. CHAVEZ. $40,384 million.

Mr. LONG of Louisiana. Mr. President, I do not believe we should enter into a time limitation in regard to debate on that bill before we see what Senators will offer amendments and before we understand what the amendments amount to. I do not have any amendments in mind, but at this time I feel constrained to object.

The PRESIDING OFFICER. Objection is heard.

ELIMINATION OF AFFIDAVIT OF DISLOYALTY

The Senate resumed the consideration of the bill (S. 2929) to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief.

Mr. DIRKSEN. Mr. President, has Calendar 1411, Senate bill 2929, been made the pending business?

Mr. JOHNSON of Texas. Yes.

The PRESIDING OFFICER. That is correct.

Mr. DIRKSEN. I understand it is the so-called loyalty oath repeal bill, to repeal the disclaimer provision in connection with the loyalty oath under the National Defense Education Act.

Mr. JOHNSON of Texas. That is correct.

Mr. DIRKSEN. I understand that measure is now the pending business, and I also understand there is no time limitation on the debate on the bill.

The PRESIDING OFFICER. That is correct.

Mr. JOHNSON of Texas. I should like to say that we hope to conclude our action on that bill this evening, if we can do so, or as early as we can.

There is no certainty we shall not lay it aside from time to time for any conference report that might come before us, if it is urgent, or any matter of the highest priority, but we do want to get to a discussion of this bill as soon as possible.

Mr. DIRKSEN. I might say, insofar as my own information goes, there are at least a half a dozen speeches to be made, several of them rather extended, and this debate may run on for quite a while today, and, depending entirely on how late the Senate works tonight, could extend into tomorrow.

While I am about it, I should like to ask the majority leader whether an hour for convening tomorrow has been set.

Mr. JOHNSON of Texas. Yes.

The PRESIDING OFFICER. An order has been agreed to that the Senate meet at 9:30 in the morning.

Mr. CHAVEZ. Mr. President——

Mr. JOHNSON of Texas. I yield to the Senator from New Mexico.

Mr. CHAVEZ. Mr. President, the Defense Department Subcommittee of the Committee on Appropriations has been working practically from the first of February until now on the Defense Department appropriation bill. It is the largest appropriation bill that ever comes before the Senate. As chairman of the subcommittee, and I believe I have the support of the members of the subcommittee on both sides of the aisle, I wish to say it is necessary that we pass this bill at the earliest possible moment. It is a national security bill, and no other bill that comes before this body has more to do with our security than this appropriation bill. So I should like to beg the indulgence of the Senate to get to work on it. I do not care how long it takes, or how many Senators want to speak on it, but I should like to have the Senate start on its consideration.

I am sure the Senator from Massachusetts [Mr. SALTONSTALL] will support me in my statement.

Mr. SALTONSTALL. Mr. President, if the Senator will yield, the Senator from New Mexico is entirely correct. The sooner we get to it, the better.

MEDICAL CARE AND THE PRIVATE ECONOMY—ADDRESS BY SENATOR JAVITS

Mr. SCOTT. Mr. President, I ask unanimous consent to have inserted in the body of the RECORD, following my remarks, an address by the distinguished senior Senator from New York [Mr. JAVITS], at the centennial commencement of the New York Medical College and Flower Fifth Avenue Hospital on June 7.

I wish to call attention to this fine presentation for two particular reasons:

The senior Senator from New York has seized an excellent opportunity to tell an important segment of the medical profession the facts about and the need for legislation on health insurance for the aged. It is necessary that we have the understanding and cooperation of the medical profession in working out a solution to this problem.

It also gives me an opportunity, as one of the cosponsors of S. 3350, the Javits health insurance bill, to repeat my plea, from the floor of the Senate, for hearings before the Senate Labor and Public Welfare Committee. The eight cosponsors of S. 3350 have repeatedly asked for hearings so that we may have an exploration of the different proposals and their relative merits.

I trust this request will be granted by the distinguished chairman, the senior Senator from Alabama [Mr. HILL], who has assigned these bills to the subcommittee chairman, my friend the senior Senator from Michigan [Mr. MCNAMARA], who has so well demonstrated his devoted interest in the welfare of our senior citizens.

The Senate should have its own bill up for discussion, particularly in view of the fact that the revised House bill for such purpose is tied in with social security amendments legislation, although in themselves the health insurance features have no connection with the social security tax. What the prospects for this proposal are in the House, or before the Senate Finance Committee, are conjecture at this point.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

MEDICAL CARE AND THE PRIVATE ECONOMY

(Address by Senator JAVITS)

We stand on the threshold of a revolution in health care not only for our senior citizens but also for all adult Americans. I believe we are on the way to the highest medical standards on earth. We can achieve that objective by the expansion and extension of our country's medical school and hospital facilities to keep pace with the growth of our population; by increasing the size and scope of our medical research effort; and by Government-private cooperative action to achieve effective health care for our older citizens.

Part of this revolution is being brought about by the Federal Government's recognition of its share of the responsibility for the well-being of the people. In the last 30 years public spending for health care has risen to more than 13 times the 1929 level while private spending has increased only 5 times.

Today $1 out of every $20 in the Federal budget is allocated for health and health-related purposes; the total amount of Federal funds in this for fiscal 1961 is $3.8 billion. Out of this total, $531 million is being spent for medical research, and 12 Federal agencies are engaged in this medical research. In addition to this activity on the home front, the United States is also a member of three intergovernmental organizations which have major worldwide health programs and a member of 11 other organizations with limited health programs. In these international efforts the United States spends a total of $130 million a year.

These are startling statistics, but they represent only a beginning on the job we must do if we are to provide for the health care requirements of our country and establish a level of health services in keeping with our standard of living and our national goals.

Chief among these needs is a health care program for our senior citizens. This is "must" legislation that Congress must adopt before the close of this session. The voluntary plan which I have introduced with Senators COOPER of Kentucky, SCOTT of Pennsylvania, AIKEN and PROUTY of Vermont, CASE of New Jersey, FONG of Hawaii, and KEATING of New York, is the only bill now before the Senate on which it can take action because it is not a tax measure like the bills which use the social security approach and therefore must be initiated first in the House of Representatives. My bill is before the Senate Committee on Labor and Public Welfare ready for action.

Never before has there been such widespread recognition that support from the Federal Government is essential for any adequate program of health care for the older citizen. I do not believe that this inevitably leads to socialized medicine or Government domination of the doctor-patient relationship. On the contrary, I have demonstrated through my bill that it can be accomplished on a voluntary basis by the use of existing cooperative health plans, group practice units, prepayment insurance and other private plans with full accommodation to the doctor-patient relationship.

The needs of the people can best be met by cooperative programs between the States and the Federal Government and the beneficiaries. This is the sound principle espoused by the administration's program as proposed by the Secretary of Health, Education, and Welfare, Arthur S. Flemming. I prefer my bill because it makes possible greater benefits and practically no deductibility due to subscriber participation more in

accord with subscriber's means. My health insurance bill provides for the establishment of State programs to which the Federal Government will contribute on a matching basis and the benefited individual will also contribute if financially able to do so. It puts the emphasis on preventive care, as sound medical practice dictates, and thereby offers a way out of the danger of overutilization of hospital and other institutional facilities by making physician's care practical and simple to obtain. The bill does not compel physicians to send their patients to hospitals in order to get the benefit of the law.

Let me cite for you briefly the reasons why I believe the bill which I have introduced with my seven colleagues can become law at this session of the Congress:

First, my bill provides medical security rather than social security for persons 65 years of age and over—as well as their spouses no matter what their age. It is based on the differing medical facilities available in each of the 50 States. Availability of doctors, nurses, hospitals, nursing homes, laboratories and other health facilities varies greatly from State to State—compare medical costs and facilities in New York with Oklahoma, Arizona or Mississippi and you will readily understand why it is impossible to specify by law in Washington, D.C., exactly what medical aid should be equally available in the necessary quantity and quality in all the States from coast to coast. The bill, therefore, gives to State agencies—and they know local conditions—the primary responsibility for health care provided that the State plan includes certain minimum services and standards subject to the approval of the Secretary of Health, Education, and Welfare.

Second, there is no other proposal before the Congress which meets all the desirable conditions and would provide all the benefits to as many people and as quickly as this bill. It is estimated that good basic coverage of health care for people over 65 can be provided on a nationwide group basis annually for not more than $156 per person even in the high-cost parts of the country. At least one-third basic health coverage under this program will include care in the physician's office or in your own home. This is the kind of coverage senior citizens need more than any other, because modern medicines can do a great deal preventively to keep aging persons well enough to make institutional care unnecessary. Doctors can treat many conditions better and less expensively in the home.

Moreover, hospitalization or the equivalent cost care in the nursing home or homes for the aged, surgery, laboratory tests, diagnostic X-rays, drugs, visiting nurse service, and other benefits will also be available under this bill.

Third, this is a voluntary plan—no one is compelled to take just one plan of insurance coverage or to participate in any plan at all. This freedom of choice is the American way and we should guard it zealously in all that we do. Moreover, this plan permits the State to become its own insurance carrier or to build on existing agencies, companies, and facilities within each of our 50 States or any combination of these—and it does this without establishing a large bureaucracy to do the job. By permitting the State itself as well as private groups, nonprofit cooperatives, group practice units, and prepayment health insurance companies—all under State supervision to come in under the plan, it makes use of the practical experience and existing facilities developed to deal with this problem.

Now, there has been a good deal of talk about how difficult it will be to get 50 States to set up their health care plans, and how long it will take to get the program going. These critics ought to take a good look at the record of Federal-State cooperation. What this bill proposes is nothing new. It is patterned on the Hill-Burton Hospital Construction Act of 1946, one of the most successful health programs we have had. The record shows that within 2 years after it became law, all but one of the States were operating within the program under their own plans. You can't do much better than that with any program of this size and scope. The record of the new health care program for over 2 million Federal employees and their estimated 2 million dependents is also a major illustration of the practicality of my bill and of the Flemming program.

Where a program is so urgent, and the emergency so generally recognized, how can anyone assume that the individual States will not be as responsive to the needs of their citizens as the Federal Government?

Since the founding of the Public Health Service in 1798, the Federal Government has recognized its responsibility toward promoting the health and welfare needs of the general public. Through the Public Health Service the Federal Government has pioneered in many areas of research, hospital construction and other areas where major needs could not have been met without such assistance. Today, however, we face an emergency situation which calls for accelerated action based on hard facts and considered judgment.

With the enactment of a major health care bill by the Congress, almost immediately an enormous burden will be placed on this Nation's medical resources and its personnel, no matter what safeguards against overutilization are included. Congress will have to anticipate and make provision to meet this situation.

My bill to establish a Health Services Study Commission, which is pending before the Senate Committee on Labor and Public Welfare, would study our health service needs, determine the effect of health care insurance on our medical personnel and facilities and pinpoint the areas which must be expanded. For example, there is need for a continuing study of hospital costs and hospital utilization. Medical science has made tremendous strides in the last decade, there is greater availability of various specialized services, and our medical institutions have kept pace. At the same time, however, costs have gone up and in spite of the fact that hospital salary levels are notoriously low, payroll expenditures have increased substantially. Despite all efforts to reduce the cost of illness to patients, we can expect that the per diem cost of hospital care will continue to increase in the years ahead.

There is also great need for more professional personnel. We need more doctors, we need more nurses, and we need more money for construction of medical facilities of all kinds. The growing recognition of this is attested to in a report issued by the Surgeon General's Consultant Group on Medical Education, entitled "Physicians for a Growing America." It calls for a $1 billion, 10-year program to expand and extend our country's medical school facilities. At least 20 to 24 new medical schools are contemplated under this program, and at least 22 new dental schools are also recommended. The cost of this program would be met over a 10-year period with the Federal Government providing $500 million and the remainder to come from States, industry, private foundations and other philanthropic groups.

I have introduced legislation in the Congress to provide an additional $250 million in loans for construction of college, student-nurse, and intern housing. The Federal college housing loan program has been enormously popular, and under my bill, $25 million would be earmarked for new housing facilities for nurses and interns and another $25 million for related facilities.

In addition to Federal and State efforts to close the gap in medical needs, concerted drives must be made to raise the present level of individual giving and private philanthropy to support hospitals and related facilities. About 3 percent of our total medical bill is paid for by voluntary contributions, but that represents an increase of less than 1 percent in giving from these sources in the three decades since 1929. There have been vast changes in the construction of our society since that time and a tremendous increase in our standards of living. But it is obvious that the awareness of the need to support voluntary health organizations has not kept the pace. This awareness must be increased in every segment of our population, and a much larger share of the responsibility must be assumed by the community if we are to sustain our traditional practice of relying on local and State agencies as well as private groups for the largest part of the Nation's health needs.

The rich benefits which the health, medical, and related sciences can provide toward a better life should be made available equally to all ages of people and all economic groups. Top priority should, of course, be given to the prevention of disease and disability, but we must also make medical care and hospital care of the highest quality available to all who need it.

For more than a decade, I have been vitally interested in health legislation which would provide adequate health care, medical research, and construction of facilities to keep pace with the growing needs of our population. I have supported sound planning to increase the effectiveness of our health service system and to improve and expand public health services and research.

I strongly believe that the three major areas which I have outlined in this address call for urgent action at this session of the Congress. I want a Federal law that will help provide health care for our older citizens—not a political issue.

I want a Federal law that will step up our building of new health service facilities and provide more medical personnel to meet the need which our population will face in the immediate future.

And I want a Federal commission to be set up which will have the responsibility of making a continuing study and assessment of what we have and where we are going in health care so that our people will be provided with health services compatible with a nation that enjoys the highest living standards in the world.

ESTABLISHMENT OF PEACE CORPS

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, a bill to establish a Peace Corps of American young men to assist the peoples of the underdeveloped areas of the world to learn the basic skills necessary to combat poverty, disease, illiteracy, and hunger.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 3675) to establish a Peace Corps of young men to assist the peoples of underdeveloped areas of the world to learn the basic skills necessary to combat poverty, disease, illiteracy, and hunger, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Foreign Relations.

Mr. HUMPHREY. Mr. President, I realize that the introduction of this bill is very late in the session. I wanted the bill to be printed and appropriately re-

ferred so that it could be the subject of discussion and the subject of intensive study during the coming months, prior to the convening of the first session of the 87th Congress. It is my hope I may be here to further the objectives of the bill.

The purpose of this bill is to develop a genuine people-to-people program in which talented and dedicated young American men will teach basic agricultural and industrial techniques, literacy, the English language, and other school subjects, and sanitation and health procedures in Asia, Africa, and Latin America.

A respected American diplomat said recently before the Senate Subcommittee on National Policy Machinery that the Soviet Union does not understand words at diplomatic conferences quite so easily as it understands situations. In other words, the specific situation of the United States enjoying good relations with non-Communist countries and helping them along to economic self-sufficiency is much more persuasive to the Soviet Union than the most articulate statement prepared for a foreign ministers' or summit conference.

One of the most explosive situations today is that the rich nations are getting richer and the poor nations are getting poorer. Communism is nurtured not so much by poverty as it is by frustration. The peoples of the underdeveloped countries have seen our magazines and our movies, and they say, "Why cannot we live like that?" They see the gap growing greater rather than less, and they desperately desire to break through the sound barrier of modernization. In this type of a situation, communism can often look attractive. It is for this reason that we must offer them a suitable alternative.

And yet, Mr. President, I wish to make it very clear that the bill I am introducing is not meant primarily as an anti-Communist measure. If Marx and Engels had never lived, there still would be just as much need for action to develop the potential of the underdeveloped nations. We in the West must not only think about negative policies to stop communism—but also about creative efforts which reflect our own elevating visions of the kind of world in which we would like to see mankind live.

We are living in the most revolutionary epoch in the history of mankind. Events which used to take centuries to develop are now taking place in a few years. The imagination and boldness of our plans must be consonant with the greatly accelerated pace of our age. It is with this in mind that I have introduced this bill.

Before discussing the bill's provisions, let me say that a Peace Corps is something that I have discussed publicly for 2 years. Whenever I have mentioned the proposal, it has received an overwhelmingly favorable response. I have received a steady flow of letters on this subject, and I have yet to receive one letter in opposition to this proposal.

Several months ago, Representative HENRY REUSS, of Wisconsin, and the late Senator Richard Neuberger introduced a bill, which has subsequently been passed as an amendment to the Mutual Security Act, which calls for a study looking toward such a Peace Corps. I applaud their vision and statesmanship in introducing such a bill. I am in complete accord with its principles. My bill differs in that, instead of asking for a study of the Peace Corps, it asks for the Peace Corps itself. There is sufficient evidence now in hand to justify moving directly to the formation of such a corps now, rather than waiting for a study to be made.

As to the provisions of the bill, the Peace Corps will be a separate agency, but will work in the closest cooperation with the Department of State, the U.S. Information Agency, and especially the International Cooperation Administration. Discretionary provisions are included so that the President could place the agency within an existing department or agency for administrative purposes. This would allow the President flexibility in the administration of our overall foreign aid program. However it is administered, I wish to emphasize the fact that the whole orientation of the corps and Director must be toward the people-to-people approach. The basic people-to-people orientation is sometimes missing in the way our foreign aid program is carried out.

A maximum of 500 would be enlisted into the corps the first year. Thereafter, the corps would be gradually increased so that there would be no more than 5,000 the fourth year.

It is desirable to begin with the smaller number of 500 so that the inevitable kinks can be worked out the first year. If, after 4 years, the Congress deemed that the corps could usefully be expanded, then the Congress could amend the act.

The term of enlistment would be 3 years. The first year would consist of an intensive area and language-study program. Members of the corps will learn from Government officials, foreign lecturers, and members of the academic community about the economic, social, cultural, and political factors of the particular areas where they will be stationed. Further, they will receive a thorough grounding in American public policy and contemporary thought. If our young people are to be good representatives of the United States, they must have a sound knowledge of American policy and the principles which underlie that policy. Finally, the members will undergo an intensive language training in the particular tongue of the area in which they are to serve. It is of the utmost importance that our people be able to communicate, if this is to be a people-to-people program in the best sense of the word. Approximately the first 6 months of the orientation course will be in the United States. The second 6 months will be in the areas where the particular members will serve. During the second 6 months, the Youth Corps member will concentrate more on language study and practical field training.

The administrator of the corps should endeavor to gain the cooperation of institutions of higher learning in granting academic credit for participation in the orientation course.

The year's orientation is a most essential part of the whole program. It would be better not to have the program at all than to send out people who are ill-prepared and unfamiliar with the job which lies ahead. The necessity for a 3-year enlistment should also be clear. As the orientation takes a year, they should spend at least 2 years in the field.

Entrants into the corps would be chosen with great selectivity.

Every bit of evidence at hand suggests that there will be many applicants for every one opening. The International Voluntary Services, a private organization with somewhat the same type program—but on a more limited basis—can only take 1 out of 10 applicants.

Aspirants selected must not be less than 21½ years of age at the time of induction. They must be highly qualified in a particular skill and must demonstrate enthusiasm and dedication to the objectives of the Peace Corps program. They should be willing to serve in relatively primitive areas. They must be essentially adaptable persons, be physically fit, and emotionally and intellectually mature.

For every team of Peace Corps members, there would be an older and more experienced group leader.

One of the critical projects the members would undertake would be to teach literacy. Surely, there is no greater need in the world today than that of teaching people to read. Over two-thirds of the people of Asia, Africa, and Latin America are illiterate. There is no nation on the face of the earth which can compete in today's world without a literate population. One cannot read the simplest instructions on a seed packet or directions on how to run an uncomplicated machine without being literate. The half of the world today which is in poverty and hunger and disease also happens to be the illiterate half.

Further, democracy itself rests upon the premise that there is a literate, well-informed electorate.

There is a terrific hunger all around the world to learn how to read and write. Thus, many of the Peace Corps members could teach literacy. Nine-tenths of the world's languages are easier to teach than English, and it is an established fact that one need not even know a particular language in order to teach people how to read it.

Another great need is for English-speaking teachers. School systems in, for example, former British colonies in Africa need qualified American college graduates to teach until such a time as those countries educate enough of their own people to be teachers. Especially, there is a burning need for teachers to instruct in the English language. For example, the former French colony of Guinea is the one country in Africa in which the Soviet Union has made substantial incursions. The only ace we have in the deck is that the Guinean Government wants to make English the country's second language, and they desperately want English teachers. As of this moment, the American Government has been able to supply exactly one English teacher for the whole country. The

country of Liberia has asked us for 60 English teachers.

Besides the necessity of supplying teachers and literacy instructors, there is also, of course, the compelling need for training in basic agricultural and industrial techniques. This is so manifestly obvious that I do not think the point needs elaboration. I should only point out that our helping the people to help themselves can have dramatic effects on their increase in industrial productivity and agricultural yield.

There are other programs on which the Peace Corps could embark, including community development, youth organizations, social welfare, vocational education, and sanitation and health programs. Members of the corps who had obtained degrees in public health or who had graduated from medical schools could suggest ways in which even simple improvements might drastically reduce the disease rate of particular areas.

A 3-year term of service in the Peace Corps would be considered as fulfilling peacetime military obligations except for Reserve requirements. And, of course, corps members would be liable to the draft in times of war or national emergency. A comparatively small percentage of the men of selective service age are now being inducted into the armed services, and since, at the most, 1,650 a year would be inducted into the corps, this would be no great drain on the available manpower reserve of the military.

Anyone seeking to avoid peacetime military service would be further discouraged from joining the corps, because: First, the term of service is 3, instead of the normal 2 years for the Army; secondly, there are no veterans' benefits involved; thirdly, members will often live in primitive areas and have more arduous tasks than they normally would in peacetime service; four, if the members are discharged from the Peace Corps for disciplinary reasons, they are then liable to the provisions of selective service; and, fifth, salaries would be roughly equivalent to those paid the enlisted rank.

Members of the Peace Corps would only serve in a particular country on the invitation of a foreign government. A bilateral commission consisting of persons from the United States and the host government would be established so that the participating nation could advise the United States of the major needs of the country. In this way, the other country would be participating in this program as a partner, not as a charity case.

Before concluding, Mr. President, I wish briefly to allude to the International Voluntary Services, the organization which has the experience most directly relevant to the proposed Peace Corps. IVS is a private nonprofit organization, and it takes contracts from ICA and foundations. IVS employs young men 22 years or older to work in agricultural and other projects in the newly developing areas. These idealistic, talented young men are oriented toward the people-to-people approach, and according to every account, they have enjoyed extraordinary success. Two examples will suffice.

A team of eight IVS agricultural specialists set up an experimental station in Laos. In a country where the per capita annual income is less than $100 a year, they developed a fiber which would bring in $1,500 per acre. The Lao Government was so impressed that it has requested 11 more teams just like that one, one for each province.

Two IVS young men operated a 33-acre experimental farm in Egypt. When the Suez crisis broke out in 1956, our Government evacuated them. One of the first requests that the Egyptian Government made of ours after the crisis had subsided was, "Get those 2 men back there, and give us 10 more just like them. Their fame has spread up and down the Nile."

The IVS men, being young and without families, spend most of their spare time with the local populaces. In most cases, they have been invited to participate in community cultural affairs. In their off hours, they have been besieged by people to teach them the English language. In short, they have been goodwill ambassadors of the best sort.

IVS has been able to operate at a cost of $6,000 per man, including overhead, as compared to a cost of $25,000 per man in ICA. This is partly because of the lower salaries. Thus, there is every assurance that the Peace Corps program would get a maximum mileage from a minimum amount of cost.

I conclude with these thoughts, Mr. President. There is a great body of idealistic and talented young men in this country who are longing to have their energies harnessed. The Peace Corps would tap those vital resources. There is nothing which will build greater people-to-people and government-to-government relationships than to have fine young American men helping the people of the emerging countries to help themselves. They will not only act as instructors but also will show that they are not afraid to dirty their hands in their common endeavor.

There is also the fact that the graduates from the Peace Corps will form a large pool of experienced young men, trained in some of the more remote languages and knowledge of the emerging areas, from which our Foreign Service, ICA, and USIA can draw.

Mr. President, in this turbulent decade of the 1960's we need imaginative and constructive plans for action which are consonant with the greatness and humanitarian ideals of this Nation. It is for this reason that I have proposed the Peace Corps.

Mr. President, I ask unanimous consent to have printed at this point in my remarks a commentary by the noted radio commentator of the American Broadcasting Co., Mr. Edward P. Morgan, in his analysis of the proposal made by Representative REUSS and my own proposal to establish the Peace Corps.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

In a Senate speech last week, Chairman WILLIAM FULBRIGHT of the Foreign Relations Committee described the administration's mutual security program, on which final action is pending in Congress, as a "plate of warmed-over grits." Defending the principle of foreign aid as being as necessary to the country as a life insurance policy to a family, FULBRIGHT scored the administration for lack of initiative and long-range planning which he held essential to the program's successful continuity. Still, he conceded, there is nourishment in warmed-over grits and reluctantly he endorsed the legislation as better than nothing.

In this package, however, there is at least one germ of a promising idea. It is to give eligible young Americans a chance to work on foreign aid projects in the field as an alternative to the military draft. The Senate bill includes a $10,000 item to study the feasibility of recruiting 10,000 youths for a 2-year hitch on technical assistance jobs. This approach was cosponsored by Congressman HENRY REUSS, of Wisconsin, and the late Senator Richard Neuberger, of Oregon, both Democrats. Minnesota's Senator HUBERT HUMPHREY argues a study is unnecessary, says we already know what the problems are, and he is preparing a bill for direct action—a 3-year tour (a year longer than the draft but at basic Army pay without veterans' benefits) beginning with 500 the first year and building eventually to 10,000.

The response on various campuses which have caught wind of it has been enthusiastic but the unofficial State Department and International Cooperation Administration reaction so far is something as follows: "It's a nice idea but, gee, we already have all these other problems."

Interestingly enough, the exciting experiences of a small private outfit in this field called International Voluntary Services, may eventually bring the bureaucrats around. IVS, run largely by ex-missionaries on a nonsectarian basis, has contracted with foundations and ICA to man such projects as agricultural experiment stations in Laos and Egypt. Already both Governments have requested more of these young unugly Americans. The two trying new crops along the Nile are beseeched by Egyptians to teach them English in their spare time. Apparently this person-to-person contact on the grassroots level is one of the secrets of success for IVS, whose candidates are carefully selected not only for their skills but for a kind of pioneering spirit; only 1 in 10 qualifies.

In an article in the current issue of Commonweal magazine on his plan for a "Point 4 Youth Corps," Congressman REUSS writes that "too often we seem to emphasize military alliance with corrupt or reactionary leaders; furnishing military hardware which all too frequently is turned on the people of the country we are presumably helping." (Shades of Turkey and Korea.) REUSS speaks of "grandiose and massive projects" and hordes of American officials living aloof in enclaves in the country's capital." And he asks: "Would we not be farther along if we relied more heavily on a group of some thousands of young Americans willing to help with an irrigation project, digging a village well, or setting up a rural school?"

One of the things which steamed up Senator HUMPHREY's enthusiasm originally was this kind of modern pioneering concept. Applicants would have to have three main assets: real skill, real enthusiasm, and a certain political and social maturity with a minimum age of 22. The recruits would take a 1-year training course, half in the United States, half in the country where they were assigned. Their jobs? Teaching literacy, teaching English, basic agricultural and industrial skills, sanitation and health techniques and many other functions.

Carefully applied, this approach to foreign aid could do a great deal to transform the program from a plate of warmed-over grits to a large nourishing helping of frontiersmanship in a rich American tradition.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. PROXMIRE. This is an excellent proposal. It is constructive. I should like to ask the Senator from Minnesota some questions in regard to the proposal. I think it raises some interesting questions.

As I understand the proposal, it would provide an alternative for a few very carefully selected young men, who would be otherwise subject to the draft, who would be enabled to serve for a period of time instead in the Foreign Service of the United States. Is that correct?

Mr. HUMPHREY. Only for peacetime service. It would not exclude anyone from military service in case of national emergency or in case of hostilities, nor would it exclude anyone from Reserve requirements.

Mr. PROXMIRE. Would the Senator from Minnesota mind repeating what are the provisions which would prevent this proposal from becoming an opportunity for young people to dodge the draft, to obtain a softer service and escape their obligations to their country?

Mr. HUMPHREY. Yes, indeed. I shall read from the description of the bill.

First, I point out that there is a 3-year term of service in the Peace Corps, instead of the normal 2 years for the Army.

The participants would be liable for the provisions of Selective Service in time of war or in time of national emergency. Likewise, they would be liable for Reserve requirements upon completion of their service in the Peace Corps.

There are no veterans' benefits involved.

Members might be required to live in primitive areas.

If these men were discharged from the corps they would be immediately liable under the provisions of the Selective Service Act.

Finally, the salaries would be roughly equivalent to those paid to enlisted men in the armed services.

In other words, we are proposing to take only 1,650 men a year, which is a very limited number, in Selective Service. If the need were stepped up and if there should be a national emergency, then these men in the Peace Corps would be immediately liable for any call of their country for military service, as well as anyone else.

Mr. PROXMIRE. Would the Senator please indicate what kind of a specific need there is for the services these young men would perform in the underdeveloped countries such as in Africa and in Asia?

Mr. HUMPHREY. Well, one great opportunity we have is to let these young people go particularly into the areas where there is a great degree of illiteracy, as teachers and trainers, so to speak, of the native populations, at a cost which does not encompass the figures involved in the present ICA program.

As I have indicated, it requires approximately $25,000 a year now to support a person in the ICA in the technical service program. The proposed program is estimated to cost about $6,000 a year per person, which is a saving of a substantial amount.

Additionally, the program is designed as a people-to-people program, and one that has limited functions to perform, such as in public health, education, and in community development, and not in the broad economic aspects, such as the ICA.

Mr. PROXMIRE. The Senator is then saying the proposed program cannot in any sense replace or displace what the ICA is doing; it would supplement that program; is that correct?

Mr. HUMPHREY. The proposed program does supplement the ICA program, and it should not be looked upon as something to supplant. It is not something "in place of." It is something to add to what we are presently doing. In the first year of operations 500 trained men would be selected from the entire United States. They would be trained in public health, trained in education, or trained in some skill. They would be selected on the basis of qualifications. Those 500 men would be told, "If you are willing to give 3 years of your time, we are willing to assign you to certain areas of the world."

Such a program of long-term commitments to certain areas of the world is exactly what is needed.

Mr. PROXMIRE. The quid pro quo would be that for this service of 3 years they would discharge their obligation to the Federal Government to serve in the Armed Forces.

Mr. HUMPHREY. Subject, however, to serving in the Reserve.

Mr. PROXMIRE. I understand.

Mr. HUMPHREY. During a national emergency or wartime, however, they would be subject to being called up for active duty just as other young men are. If there was any disciplinary action taken, those disciplined would be immediately liable for military service.

At present a young man in college is exempt from military service for the period of time he is in college. Many students are relieved from military service because of the limited calls under the current Selective Service program. So, for all practical purposes, the proposed program would not remove the obligation of military service. Members of the corps, upon completion of 3 years of service, would in time of peace still be subject to serve in the Armed Forces Reserve. And in time of war they would be subject to the call to duty under Selective Service the same as anyone else.

Mr. PROXMIRE. Is it not true that there is a great deal of enthusiasm for this kind of opportunity on college campuses all over the country, and that there are literally thousands of young people who are very eager to have an opportunity to serve their country in this particular way? As the Senator from Minnesota has pointed out, the bill would not eliminate their obligation to serve their country in the event of war or in the event of emergency. They would still be liable for that kind of service.

Mr. HUMPHREY. That is correct.

Mr. PROXMIRE. As I understand, the proposed legislation provides that instead of peacetime training in the military forces, or peacetime service, young men under the program would have 1 year of training, particularly in foreign languages, or a specific language, which would give them a particular kind of usefulness abroad. Then for the wage of any Army private they would serve as teachers or in other vitally necessary jobs in some underdeveloped country.

Mr. HUMPHREY. Exactly.

Mr. PROXMIRE. May I complete the thought which I started by saying that I have found the desire on the part of young people to engage in such a program as is proposed to be great. Idealism is common to youth. This kind of idealism and desire to serve one's country, to do so in a practical way, to do so in a way which would permit them to return to America, to marry, to settle down, and to engage in the kind of career that most Americans have, is a great national resource. The bill provides an unusual and wonderful opportunity to tap and use this resource by permitting our young people to serve their Nation and mankind. It seems to me the idealism we have is not being tapped. It is seeking an outlet in a constructive, practical, and economical way. It seems to me that the proposal of the Senator from Minnesota very usefully and sensibly takes advantage of this desire for and on behalf of our country.

Mr. HUMPHREY. My observation is that young people are very desirous to obtain this program and to engage in this kind of work. However, the number involved is minimal. We would not have a peace corps of 2 million men, such as we have in the armed services. The total which is contemplated in the first year would be only 500. The proposed legislation would increase that number to as high as 5,000. Those who would come under the program would be highly selected. I limit the number because I think the Congress will wish to review the program no matter what may happen under the terms of the proposed legislation.

The bill would in no way weaken the military security of our country. It would strengthen it. It in no way would remove the obligation of military service in time of critical need for the participants. The bill merely provides that in peacetime we would wage war on disease, hunger, illiteracy, and poverty, and that to do so we enlist a certain number of talented, capable, trained young people to wage war on the real enemies, the real enemies being ignorance, fear, prejudice, hatred, hunger, and disease.

We say to those young men, "We offer you a program with an obligation for 3 years. You are under strict discipline. You have to prepare yourself. You must be over 21 years of age. You must have a skill that is needed. You must be willing to go into the primitive areas of the world and live under native conditions. You must fulfill your full term of service. If you do not complete such term of service, you will leave immediately for peacetime military service, and even after you have fulfilled your term of service overseas in the peacetime corps, you are

placed in the Reserve and subject to active military service in time of national emergency or war."

I suggest to the Senator that such a program would put manpower to work in the real war, in the struggle that we need to win in Indonesia and elsewhere.

Mr. PROXMIRE. If the Senator will yield on that point, I shall conclude my part of the colloquy by saying that the purpose of serving in the Armed Forces, of course, is to help us achieve peace. The pursuit of peace, a just peace with freedom is the reason these young men in the Armed Forces are being trained. The Senator from Minnesota is proposing a direct way for some young men to serve exactly the same purpose by working for their country by seeking peace with justice and freedom in foreign service. If we talk to young people, we discover that this kind of program is what they feel we should have, that we should maintain America's strength so we can provide for peace.

The Senator from Minnesota proposes that our young people be provided an opportunity to work positively, constructively, and directly for peace, eliminating the ignorance, poverty, and misunderstanding which are the causes of war, and in doing so, to provide colonies of dedicated, idealistic, young Americans who can be the best possible kind of missionaries or salesmen, depending upon one's viewpoint, for this country.

Mr. HUMPHREY. The Senator is correct, and I thank him.

ACTIVITIES OF THE FEDERAL AVIATION AGENCY

Mr. SCHOEPPEL. Mr. President, during the past several weeks, I have received many letters from physicians in Kansas and elsewhere who are protesting a Federal Aviation Agency regulation, effective June 15, 1960, requiring private pilots to take their qualifying physical examinations only from physicians designated by the Agency. This very matter is one of the subjects considered in hearings just completed by the Aviation Subcommittee of the Committee on Interstate and Foreign Commerce.

Also, recently, I have been receiving a barrage of communications protesting the requirement of the Federal Aviation Agency that during in-flight inspections of jet operations, the FAA inspector sit in the seat immediately behind the pilot and copilot. Some of the pilots on Eastern Airlines, in particular, assert that by contract, that particular seat must be occupied by a third pilot, even though the aircraft is certificated for operation without him.

The communications I have received from the physicians and pilots have certain qualities in common. They are unusually well written. They are carefully reasoned. They express genuine woe about activities of the FAA's Administrator, Elwood Quesada. But they also contain evidence that they have been cleverly inspired by sophisticated lobbyists. Those lobbyists have slanted the information furnished to the people who have been in touch with me.

No man's opinion or judgment can have higher quality than the information from which that opinion or judgment rises. In consequence, I expect to find bias in communications from people whose principal information about the FAA comes from biased sources.

I regret that I have not been able to attend all of the hearings of the Aviation Subcommittee during its review of the Aviation Act of 1958. However, the transcripts of the hearings have been available to me and I know the points made by the various witnesses. In my judgment, the hearings have failed to demonstrate that Administrator Elwood Quesada is an arrogant tyrant, as so many of my correspondents claim. Neither have they shown that he is lawmaker, prosecutor, judge and jury, as is likewise asserted.

What the hearings have shown is that the Administrator of the FAA, as head of an Agency with some 36,000 employees, has used them well in carrying out the mandate of the Congress. That mandate included a direction to make flying safe—for passengers, for people on the ground, and for the air crews themselves. It implied support for whatever action might be necessary to control the flier who thinks it is nobody's business if he wants to risk his own neck. If Administrator Quesada has erred, it is in a public-relations way; he has hurt the feelings of the executives of certain organizations by declining to accept them as exclusive spokesmen for all who fly or as the sole arbiters of the public good.

I have been disappointed that organizations with an honorable record of dedicated service to aviation now present a public image of churlish resentment against constituted authority. They are entitled to consideration and redress of sound grievances, but they ill prepare the way for such consideration when they engage in vest-pocket revolts against Federal authority or snipe at Federal officials.

The Aviation Act of 1958 was a major undertaking designed to meet the needs of an aviation industry that has grown almost explosively. The act gave the Federal Aviation Agency a single head because decisiveness was and is a prime requirement. As a result, actions have come fast. But there has been nothing to indicate that any regulation has been promulgated solely to harass, punish, or annoy anybody, or that bureaucracy needlessly has been throwing its weight around.

There may be ways in which the Aviation Act of 1958 needs amending. Our Aviation Subcommittee hearings have revealed some rough spots on which our committee may want to work next year. Unfortunately, the hearings have also revealed a studied effort on the part of a few people to propagandize their way to domination of the Agency that is supposed to regulate them. In the process they have been intemperate to the point of abusiveness and have sought to badger Administrator Quesada into resigning. Fortunately for all of us, he has had the courage to resist and to answer calumny with reason.

THE 1959 CITIZEN OF THE YEAR AWARD TO SENATOR YOUNG, OF OHIO

Mr. CLARK. Mr. President, on Saturday evening, June 11, our distinguished colleague, the Senator from Ohio [Mr. YOUNG] received the 1959 Citizen of the Year Award from the American Veterans Committee. In what seems to me to be one of the very best speeches I have read in at least a year, Senator YOUNG outlines his views about patriotism, about America of today, and about some of the foibles and fancies which a number of our so-called patriotic organizations are only too apt to fall into. I ask unanimous consent that Senator YOUNG's speech may appear at this point in my remarks. I commend it to all my colleagues in the Senate.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR YOUNG, OF OHIO

This evening I meet with you feeling a happy glow over the magnificent honor you have given me.

This organization is a very special sort of association. Every man in this room has worn the uniform of his country in time of grave national peril. There is reason to hope that future generations of Americans will receive a greater impulse of patriotism because of the loyalty and sacrifices of men such as you, who left comfortable homes and loved ones and responded to a national duty.

We hope, as a result of your war service, shared with millions of other fine Americans, and of your continuing service for your country in time of peace, coming generations of Americans may more zealously safeguard the free institutions you defended.

Some of you men participated overseas in great offensives that will be long remembered.

Many of us lived through days and nights when we thought the last vestige of decency, humanity, and kindness had disappeared altogether from the face of the earth.

People from far places will remember those who helped turn back the forces of dictatorship aggression and restored to oppressed people the world over their simple dignity as creatures of God.

On occasions like tonight, it is well for us as citizens to rededicate ourselves in the determination that there must be a good future for everyone. There was no future in the combat zone. However, oversea service gave perspective. The shortcomings of our Government stood out in bold relief.

With your background, experience and training it would be well for each of you to participate aggressively in all things to promote the general welfare of our country, and to help provide for all our people—freedom, security, contentment and permanent peace.

In this space, missile and jet age of challenge, there is need for all Americans to protect and assert their civil liberties. We must manifest the pioneering spirit of free and courageous men and women intent on maintaining our way of life and adhering to the guarantees of our Constitution.

There is need for reawakening of sound judgment and courageous action to preserve American institutions and American ideals.

Late last year, a county council of the American Legion of Ohio had the effrontery to issue a news release in the following offensive language:

"The Hamilton County Council of the American Legion of Ohio expresses its disapproval and censures Stephen M. Young for his scheduled appearance as guest speaker

in New York City on December 15 under the sponsorship of the Emergency Civil Liberties Committee."

The jerk who evidently took leadership in formulating this un-American resolution, signed his name "Neil E. Wetterman, Americanism chairman." His concluding statement is as follows: "We strongly urge the Senator from Ohio to reconsider and withdraw from such participation so as not to become a tool of the Communist apparatus."

I don't like people who seek to play God with other people's patriotism. Also, I don't like it that these self-proclaimed super-duper professional veterans secured widespread publicity on their resolution on December 3d, but failed to have the decency to furnish me a copy until December 9th. I wrote Wetterman as follows:

"I repudiate your resolution, Buster, and your pompous, self-righteous, holier-than thou title of 'Americanism chairman.' Why don't you as 'Americanism chairman' read and try to understand that cornerstone of our liberties, the Constitution of the United States?

"If, in your press release, you asserted, or implied, that I am likely to become a tool of the Communist apparatus, you are a liar.

"Another thing—why don't you puffed up patriots write my American Legion post demanding my expulsion? Or, do you self-appointed vigilantes demand that I submit list of speaking engagements for clearance by your outfit before I, as a Senator of the United States, open my mouth in public?"

Well friends, these fellows have, in fact, submitted a resolution to the Department of Ohio demanding that I be expelled from the American Legion. If they succeed, I hope I receive back $6 of the $8 I recently sent my post as dues.

Of course, I made that speech in New York.

Also, at about that time, Congressman GORDON SCHERER, of Ohio, jumped into the act, saying that he "could not understand how any loyal American could address a group such as the Emergency Civil Liberties Committee." Congressman SCHERER in another reckless statement, accused Representative JIMMY ROOSEVELT of following the Communist line. JIMMY ROOSEVELT was second in command of Carlson's Raiders and was in sticky situations in the South Pacific while GORDON SCHERER was safe as safety director of Cincinnati.

Incidentally, friends, the Emergency Civil Liberties Committee is not listed on the Attorney General's list of 306 organizations as being Communist-front, or subversive.

Frankly, although I do know that some Fascist-minded directors of the National Association of Manufacturers and the U.S. Chamber of Commerce are, in reality, enemies of our free enterprise system and our way of life, I would accept, if invited, an opportunity to address one of their banquets.

May I read also the concluding paragraph of an editorial in the New York Herald Tribune? The editorial stated: "Not only did YOUNG deliver the speech, which included a denunciation of the evils of communism, he also called his adversaries 'loud-mouthed publicity-seeking veterans,' 'puffed up patriots,' and 'self-proclaimed super-duper 100 percent America-firsters.'"

The editorial concluded: "Whatever other significance may be found in this little episode, it means that a U.S. Senator has spoken out sharply for the right of a citizen to speak his mind when he pleases and to whom he pleases. And if the Bill of Rights means anything, it certainly means that."

The Berkshire, Mass., Eagle stated: "The Senator's outburst was on target. It cleared the air. It drew attention to the vestiges of McCarthyism still abroad in national life. And it served as a warning to name-calling 'puffed-up patriots' that with YOUNG around, they would get as good as they gave."

The Toledo Blade stated editorially: "It is rare that a U.S. Senator resorts to such blistering rhetoric in communication with constituents. Senator YOUNG'S choice of words may have been intemperate, but in this case there is justification. The Legion's resolution was not only uncalled for, but was insulting."

Friends, unfortunately, the debris of the witch-hunts, the so-called McCarthyism, still is with us. Much of the debris of that period has been cleaned up, but it may take a generation to remove all this rubbish. We have recovered somewhat from that era, which we should like to forget, of pointless suspicion, fear, character assassination and ruined careers.

However, some practices of this period are still in existence.

Just recently we learned of the existence of an Air Force training manual linking communism with our churches and among the clergy, and questioning the right of Americans to know, and I quote, "What is going on." This outrageously false manual went so far as to say that Communists have successfully infiltrated our churches and that clergymen, unnamed of course, of certain of our churches are card-carrying Communists.

It is disturbing to learn that the technique of condemnation by innuendo is still with us.

Friends, we must be always on guard that none of our liberties granted to us in the Bill of Rights is sacrificed for the sake of unreasoning fears.

We must repudiate the fearmongers, those men of little faith plotting the inquisition, investigations into our schools, colleges, and even churches—into all institutions of a free society.

Loyalty cannot be coerced or compelled.

It may be dangerous to permit certain opinions to be expressed, but it is more dangerous to attempt to suppress the expression of such opinions.

To attempt to prevent an explosion in a boiler by sitting on the safety valve is obviously foolish. It invites disaster. That was the method of the Czars of Russia and the Bourbons of France. They failed miserably. You cannot exterminate ideas with clubs; you only scatter them.

Fear of speaking our minds can do much more harm to our Nation than the Communists or Fascists could ever hope to do.

Communists form one-twentieth of 1 percent of the people of the United States. The odds, therefore, are 1,999 to one in favor of free institutions. Assuming the Cleveland stadium was filled with 80,000 people witnessing a football game, on this basis 40 would be Communists and 79,960 would not. What should we do to prevent these 40 from destroying 79,960 of us who have on our side also the city and State police, the FBI and the entire Armed Forces of our country—Army, Navy, Air Force, and Marines—shades of Valley Forge and Normandy Beach. Are we no longer the land of the free? Are we no longer the home of the brave?

Without free speech—without free debate—all other liberties which Americans cherish would be in jeopardy. Let us protect all the people all the time in the exercise of all their right; and if we do that, eye hath not witnessed nor finite mind conceived the future grandeur and glory of our country.

While we must be ever vigilant to protect our civil rights and liberties at home, we must pursue every means to assure permanent peace and liberty abroad. Today, the issue of peace towers over all others.

It is a fact that man has outgrown war. He has made it both impossible and impractical. The wonders of science have made it worse than folly, worse than calamity, worse than tragedy. They have made it insanity.

Disarmament is the only answer.

The leap-frog game of the arms race—where first one nation is ahead, then another—certainly cannot be the answer indefinitely.

History of the 20th century to this good hour demonstrates that armaments races between nations led to World Wars I and II. We must end the armaments race with the Soviet Union and Red China by definite agreement with adequate safeguards, else the most terrible of all world wars might be precipitated.

Despite the collapse of the summit conference in Paris, we must continue to pursue every possible means toward disarmament and peace by diplomatic negotiation and face-to-face conferences with dictators of the Soviet Union and Red China.

My view is that the common people everywhere seek peace and want disarmament. They hope to devote energies and resources to improving their own condition.

But to speak disarmament is easier than to achieve it. We must be prepared for long, tedious — often discouraging — face-to-face negotiations, as well as protracted diplomatic conferences. Years of negotiations, if they achieve the goal, will repay us with relief, with security, with safety, and with the comforting assurance that mankind will endure and will not commit the final and irrevocable insanity of total self-destruction.

Friends, until and unless an effective disarmament program with adequate safeguards is agreed to between this Nation, the Soviet Union, and Red China, we in America must live in a war economy and spend billions for our Armed Forces.

The Soviet Union has been outstripping us in production of operational intercontinental ballistic missiles and rockets with nuclear warheads, and in space exploration.

We must close the missile gap with the Soviet Union. We must go forward with the greatest urgency. Being second best in a cold war, or in a shooting war, is costly and dangerous. You who are poker players know that a second best poker hand leads to trouble.

It is a fact that our Government is not made great by those comparatively few of us in positions of authority in Washington. Our Nation is made great by the intelligence, courage, enterprise, and industry of you from whom that authority comes.

Today there is a pressing need for all of us to be aware of the problems which confront us in this space age of challenge.

As we enter the 1960's, America is adrift. Much of our enormous reservoir of energy, power, and good will is untapped. We must release that energy for the benefit of our people.

We must direct our efforts not only to the production of consumer goods to make our lives more comfortable, but to enterprises that will make our lives more fruitful.

Our so-called present prosperity is a trickle-down affair which has fattened the few, with the leftovers going to the many. In the midst of this so-called prosperity, nearly one-fourth of our people are living at, or near, the poverty level—unable to afford good health care, good housing, good food, or good clothing.

These are the facts about personal poverty. They must be faced and dealt with. We must deal, too, with the poverty affecting all Americans—the poverty reflected in inadequate schools, highways, housing, medical care, and social service programs; our blighted cities, our depleted and abused natural resources, our polluted rivers and streams.

Is it unreasonable to assume that the first duty of the Federal Government is to provide for the general welfare of our people, and to encourage our country's growth and progress?

Americans today are restless because they know that America cannot stand still and

continue to grow. We may honor the monuments of the past, but we must build beyond them to an ever-expanding future.

We must proceed with the greatest urgency and devote our strongest efforts to the grave tasks which lie ahead. This is a time of privilege and dedication.

You, and all of us, are trustees of the confidence of free men and women the world over.

America has an abundance of scientific talent. We have the pioneering spirit to take leadership in this space age of challenge. We also have the wealth, but we must use it wisely.

We want to get on with forward-looking programs. We want America to breathe again, to advance mankind's hopes for justice and peace.

The graveyard of history is crowded with the remains of nations that had good intentions but lacked the imagination and drive to transform them into reality.

It is not enough for a nation to wait for events to happen and then react to them. A truly great country must march at the forefront of events and, by foresight, produce all the events that it wants.

We look forward to the day when men and women the world over live in peace, dignity, and comfort.

The winds of freedom are blowing throughout the world in a manner and to an extent almost beyond belief. Across the China Sea, in Indonesia, on the African Continent, and everywhere the toiling masses and the underprivileged are striving to achieve economic and political freedom—just as in generations gone by we achieved political and religious freedom.

Though Senators of the United States are not technical men, it is fair to say this: in our own way, a very large part of our membership has sensed the revolutionary character of the times and the great role which scientific research and development are to play in determining our fate.

It is not enough that scientists, engineers, and the people of government are concerned about our future. In this age of space, missiles and rockets, you, from whom our strength flows, must also be concerned and must be fully informed.

We are only at the threshold of a new world age. Years will come and go before there will emerge a world civilization based upon the eternal principles of law, justice, brotherhood, and human rights.

We are seeking that sense of direction and skill to carry to fulfillment a policy to provide economic security and contentment, and to maintain permanent peace.

We seek to preserve the fundamental concept of America and to improve upon the structure of government.

Friends, your public officials must have the courage to be liberal when the public well-being requires it.

We must have the courage and integrity to be conservative when responsibility demands it.

For the tomorrow of America, we must all speak our purposes plainly, for Americans are eager to hear again the straightforward language of a confident, prepared America.

We seek peace through vigilance, and to maintain our freedom through strength.

We respect our allies.

We cherish our neighbors.

We stand for an America at work; an America marching forward.

We seek expanding opportunity for all; a nation where farmers, businessmen, and working men and women may trust and love their Government and be trusted by it; a nation where no one is forgotten, where the young have faith and the aged have hope; where all stand equal without discrimination and possessed of all civil liberties.

COMMENCEMENT ADDRESS DELIVERED BY THE GOVERNOR OF PENNSYLVANIA AT LINCOLN UNIVERSITY

Mr. CLARK. Mr. President, on Tuesday, June 7, 1960, the distinguished Governor of Pennsylvania, David L. Lawrence, delivered the commencement address at Lincoln University, Oxford, Pa.

Lincoln University, an integrated institution of learning but founded and to a very large extent supported by members of the Negro race, is one of our fine educational institutions.

Governor Lawrence made an outstanding address with respect to the problems which will confront us in this year of decision, 1960. I ask unanimous consent that the Governor's address may be printed in the RECORD at this point in my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY GOVERNOR DAVID L. LAWRENCE AT THE LINCOLN UNIVERSITY COMMENCEMENT EXERCISES, OXFORD, PA., TUESDAY, JUNE 7, 1960

Let me begin today with a confession. In some measure, I am guilty of that common transgression to which we all succumb at one time or another, and that is envy.

I envy you, the class of 1960. I am envious of your splendid record of intellectual achievement here at Lincoln University, of your proud heritage which boasts the company of such great alumni as Thurgood Marshall, Langston Hughes, Hildrus Poindexter, and Solomon Hood.

Most of all, I envy you for the great adventure each one of you is about to undertake.

This is a great year in which to graduate. Never before, I would say, has college training held out so many expectations. Seldom has a baccalaureate diploma taken on such meaning—not only to yourselves and your family but to your countrymen and to the world at large.

Barely 5 months gone, the year 1960 has given us a series of dramatic happenings that might challenge the imagination of our most daring thinkers.

I leave the chronicle of events to the official record but generally we may concede that 1960 bears the marks of both pain and promise.

The pain is derived from the timeless struggle of oppressed against oppressor. For us there has been the severe shock of learning that such struggles are not taking place entirely in that half of the world where oppression is a natural condition, nor solely in countries of doubtful devotion to democratic principles but, worst of all, in regions of our own homeland.

The war in Algeria, the massacres in south Africa, the rioting in Turkey and Korea, the sitdown demonstrations in the South are all part of a reaction against a way of life that is becoming increasingly intolerable for millions of human beings.

As a result, America's role or, in a remote sense, her moral attitude toward each of these situations serves to complicate and disrupt an already complicated world situation.

The question continually emerges: By whom do we stand?

When the Middle East, where I recently visited, continues to divide into warlike camps, Jew against Moslem and Moslem against the world, do we continue to seek favors from both, holding spiritual kinship on a par with crude petroleum?

Day by day, as the tension between Washington and Moscow grows, a side issue such as this has a ponderous bearing on the eventual outcome.

There can be no doubt that the collapse of the summit conference in Paris has struck into the average American an awareness of his international responsibilities such as he has never known before.

The man in the street no longer blurts out, "I don't know," when asked how he feels about the State Department's handling of the U–2 incident. In either support or condemnation, his answer is direct and forthright.

At one time or another in the quiet of his thoughts he must ask himself the question: "How close are we to going over the brink?"

This, then, is a most pivotal year. Between now and the end of December we will have judged the wisdom and ability of two men and have chosen one of them to be our next President.

I venture to declare that for a great number of you this will be your first occasion to cast a ballot for a President. Once again I say I envy you. In most cases you will come to the task of selecting your man without an excess of prejudgment.

Few segments of our citizenry are better prepared to make that selection than the class of 1960 now emerging from campuses like Lincoln's. After 4 years of higher education, you should be in an intellectual position to think—carefully, thoroughly, purposefully. Even when that education has been directed toward mastery of a vocation, it has failed if it has not trained the intellect in the making of important decisions.

It is this core of intellectual responsibility, sometimes called judgment, that led philosopher Mortimer Adler to define "liberal education" as "the education of free men."

As free men—and free women—the class of 1960 has some very serious decisions to make between now and the time it steps behind the curtains of a polling booth in November.

There is certainly no want of issues. Platform carpenters in both political parties will be kept hammering well into dawn's early light in an attempt to cover all the points. But regardless of the numerical count, the issues fall into three major categories.

The first I have touched upon a moment ago. It is America's role in world affairs.

To my mind there is no issue of greater importance now than the U.S. conduct toward the other nations of the earth. Failure in any quarter of our dealings, whether with our adversaries or our allies, can mean swift and unrelenting catastrophe.

This is the deadly game. This is the pistol at the heads of us all. Whatever the outcome of the confusion and the furor, the United States of America, in the eyes of her adversaries and her allies, is not the same Nation it was a year ago. To whatever degree you wish to measure it, our ability to inspire confidence has been diminished.

I have often said that disagreement on America's foreign policies should stop at the water's edge. And I still say it. But I do not agree with those who hold that this issue should not be debated at all. Most certainly it should be debated—loud and clear, with fervor and energy.

This is the year when Americans make their choice, not only of a man but of his plans and his hopes and his philosophy. We want to know in sharp and precise terms what are the principles by which our Nation shall be guided in her relations with others; with whom we stand and why. I am sure that you young men and women, soon to resolve this issue in your minds, want to know these things. And you, with the largest stake in the future, have every right to know.

The second great issue to weigh upon our judgment is the direction we shall take here at home. There are two aspects of our domestic policy. One affects the economy; the other affects our society.

Swirling around the Nation's domestic economic policy is a quiet but nonetheless highly important debate. It involves what the economists like to term "the public sector" and "the private sector." The public sector is that area of economic responsibility assumed by Government; the private sector, that assumed by corporate enterprise. The issue of the debate is simply this: "How much of its present wealth should our prosperous Nation dedicate to public service?"

Here is how the question applies: Today it costs just about the price of a medium-size automobile to give a Pennsylvania child a basic education through high school. If we cannot have both, to what extent do we want to sacrifice the one to foster the other? For the simple fact of the matter is this: Our public plant is falling into a deplorable state of disrepair. Older portions of our center cities are becoming dilapidated and in danger of becoming the home of those rich enough to afford it, or those too poor to escape it. Municipal and urban problems which strike at the vitals of society go unsolved.

As our hospital waiting list grows longer, our supply of nurses and technicians grows shorter.

Our roads are choked and overused and our public transportation is rusted and underused.

Our schools are overcrowded and understaffed.

We are faced with dwindling water resources and inadequate recreation facilities.

And we are plagued by juvenile delinquency, depressed areas, and slum growth.

If we can't solve these problems when the horn is full, when can we?

The promise of prosperity goes unfulfilled. Its challenges clamor for solution and go begging for response. We may have learned how to sustain prosperity, or at least its trappings. We certainly have not learned how to use it well. We have produced consumer goods with reckless abandon and made the private sector of our economy fat and sleek. But we have neglected the public sector until it has become lean and hungry.

There is an increasingly unequal allocation of resources between the private and public sectors of our economy. If it continues, we shall inevitably dribble our plenty away until we are once again brought face to face with want, depression, and despair.

These are the problems of the sixties, just as want, privation, and economic insecurity were the problems of the thirties. These are the problems of prosperity, or better, of the fuller yield of prosperity.

Thus I would say to the class of 1960 that one domestic issue on which every presidential candidate must stand revealed is precisely that: How to balance our economy between the public sector and the private sector. It is an economic question. It is intricate and infinitely complicated. It requires much thought. Fortunately, you are used to thinking.

The other aspect of our domestic issue concerns moral values, which are at the very core of our national conscience. Just as 100 years ago Abraham Lincoln was elected to office in the conviction that this Nation could not survive half slave and half free, so we Americans must resolve whether this Nation is to continue half free and half "almost" free.

It is a bitter and disgraceful fact that 6 years after the Supreme Court ruling on the integration of public schools, only 3 percent of all such schools in Southern States have been integrated.

It is a bitter and disgraceful fact that millions of native-born Americans, with a heritage and culture extending into colonial times, are still unable to vote.

It is a bitter and disgraceful fact that millions of Americans are systematically exploited through their labor, through their housing facilities, through their opportunities for self-improvement and education.

These facts are not America's skeleton in the closet. They are known the world around—in Asia, in India, in Africa, in the Latin countries. So long as our movement to correct these moral wrongs is even slower than the present rate of "all deliberate speed," we are subject to charges of hypocrisy by those we seek as friends and allies.

In this year of 1960 the American people will make their decision on the course our Nation will pursue, not for just 4 years, but for decades to come. It is a year like 1932 when new and vital economic measures brought us to maturity. It is a year like that just one century ago when America found its soul and set the principles of union and justice and freedom higher than any it would seek to attain.

I envy you, class of 1960. I envy your spirit of adventure, your courage, your enthusiasm. This is your year and you shall make the best of it, strong in the liberal education you have been given, the education of free men. Use it, as your college mate Langston Hughes has suggested in his poem, "Freedom's Plow," to make a furrow across the field of history:

"Into that furrow the freedom seed was dropped.
From that seed a tree grew, is growing, will ever grow.
That tree is for everybody.
For all America, for all the world.
May its branches spread and its shelter grow,
Until all races and all people know its shade."

REDEVELOPMENT OF EASTWICK

Mr. CLARK. Mr. President, we will shortly be dealing with the housing bill which was reported by the Committee on Banking and Currency yesterday. I believe it is pertinent to call to the attention of my colleagues in the Senate, in connection with the urban renewal program, which is a part of the bill, the redevelopment of the Eastwick area in Philadelphia. This is the Nation's largest urban renewal project. It is about to go into construction. The development of Eastwick will be one of the greatest developments in Philadelphia's history.

Most of the credit for this development should go to the present mayor of Philadelphia, Richardson Dilworth, for his inspiring leadership in putting flesh on the bare bones of the Eastwick plans, which were barely apparent while I was mayor of Philadelphia. The result will be a very fine public improvement indeed.

A modern community of 60,000 will replace an area which has long presented problems to the city of Philadelphia. Much of the area was swampland; many structures were little more than shacks; junkyards and auto graveyards abounded, not to mention sewage-laden streams running through the area because it was too low for an underground sewage system.

Last June, hydraulic fill began to be poured into large sections of Eastwick. In August the first demolition contracts were let, and work on razing existing structures began. Only a handful of buildings in stage I are left to be cleared.

Philadelphia's Redevelopment Authority has just announced that it has chosen an aluminum company, Reynolds Metals, and two Philadelphia builders, Samuel and Henry Berger, to undertake the redevelopment. They will have the responsibility of translating into brick, mortar, and metal the plans for this community.

There will be more than 10,000 homes in the new Eastwick—carefully placed in settings of parks, boulevards, greenways, shopping centers, schools, churches, and playgrounds, as well as an industrial park covering more than a third of the 2,506-acre tract, but shielded from it by a green belt. The redevelopment plan was produced by Dr. Constantinos Doxiadis, one of the world's great community designers.

The Doxiadis plan envisions a series of residential sectors of "superblocks" connected by a central greenway along which community facilities will be conveniently spaced. Pedestrians will be able to travel on foot to all parts of their "superblocks" without running the danger of heavy traffic. Spine streets will carry major traffic around the residential sectors, and small streets will lead into the interior. The smallest streets along which residents will drive to and from their homes will end in cul-de-sacs, thus effectively keeping out through traffic.

The first new houses in Eastwick are expected to be built in 1961. It may be a decade before all 10,000 new homes are completed, and the community reaches its estimated total population of 60,000.

Eastwick represents a gross cost of $96 million to the city and Federal Governments, with private investment expected to bring the total outlay to more than a third of a billion dollars. The city of Philadelphia expects to recoup its $35 million share of the initial cost through the creation of new tax sources returning millions of dollars annually in real estate, mercantile and wage taxes, in addition to benefits arising from the well-being of its citizens through good living conditions and jobs in the new industries. It is estimated that the city can ultimately expect an increase in revenue of more than $4 million a year in real estate taxes alone, and a boost of nearly $3 million a year in school taxes. Industrial, commercial, and institutional enterprises are expected to provide about 23,000 jobs with an annual payroll of more than $105 million a year. This does not take into account the increased revenue resulting from general stimulation of business.

Contrast this outlook with the fact that in 1958 there were so many tax-delinquent properties in this area that the city collected only $200,000 in tax revenues.

The redevelopment of Eastwick will be one of the greatest achievements in Philadelphia's history. Future generations of Philadelphians will have cause to be thankful for the foresight and courage of the city government in conceiving and undertaking the task.

MUTUAL SECURITY APPROPRIATIONS

Mr. CLARK. Mr. President, we will shortly be dealing with appropriations for the mutual security program.

The comment has been made that our mutual security appropriations adversely affect the balance-of-payments question. I do not believe this to be the case. A group of distinguished citizens in Pittsburgh, Pa., known as Action for Foreign Policy, comprising business and professional men and educators, of both political parties, who meet regularly to study current issues in the foreign policy field where legislation is projected, have sent me a memorandum on the subject, which I feel is so helpful that I commend it to my colleagues, and I ask unanimous consent that it may be printed at this point in my remarks, together with the signatures of those who concurred.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

Appropriations bills for the mutual security program will soon be considered by the Congress. Opponents of these bills argue that these programs should be curtailed because of a dangerous increase of the imbalance of payments. They point out that in 1959 the imbalance rose to $3.7 billion from the 1958 high of $3.4 billion.

We respectfully submit that the balance of payments problem is being adjusted by other appropriate measures and that reduction of the mutual security program, in any event, will not in fact substantially reduce the U.S. payments imbalance.

Without any substantial change in the mutual security program for the fiscal year 1959–60, the Commerce Department reports that during the first quarter of 1960 the deficit was cut by about $400 million. It is estimated that the deficit in the balance of payments may be reduced this year to approximately $2 to $2.5 billion, a sharp drop from $3.7 billion in 1959 and $3.4 billion in 1958.[1]

Even if there were the prospect of no alleviation of the problem of the balance of payments we believe that the mutual security program should be supported for reasons of national policy independent of the current balance of payments deficit situation. MSP is a vital instrument of U.S. foreign policy in strengthening and developing the free world, and it should not be emasculated for fiscal reasons short of a national emergency which in itself will threaten national security.

Significantly, the contribution of the mutual security program to the deficit is relatively minor. The vast portion of foreign aid which is recorded under the balance of payments accounting system as foreign payments returns in the short-term as receipts to the United States. For fiscal year 1960 it is estimated by Mr. John O. Bell, of the State Department's Office of Deputy Coordinator for Mutual Security, that only $150 million of the nonmilitary part of the MSP payments abroad will fail to return as balance of payments receipts to the United States in the short term. The reason for this is that foreign beneficiaries of MSP funds buy substantial quantities of goods and services in the United States and remit MSP funds or credits created in turn by those funds, in payment.

One of the reasons for the balance of payments deficit has been a decline in U.S. exports. Realizing this, President Eisenhower and the executive branch announced on March 17, 1960, the establishment of a national export expansion program by which the Departments of State, Commerce, and the U.S. Export-Import Bank initiated a series of coordinated measures to enlarge American export business and thus to overcome the balance of payments problem by the affirmative steps of increasing the amount of American business overseas and amount of American jobs thus created. Over the long term it should be noted that the MSP develops foreign markets and thus should increase American exports and thereby our payments position.

Another aspect of the balance of payments deficit should be noted in the words of Mr. Carl P. Blackwell, Director, International Economic Analysis Division, U.S. Department of Commerce, who says that "It is essentially a matter of short-term deficit for long-term gain."[2] Thus in 1958, $1.1 billion in U.S. direct private investment abroad was recorded as outgoing payments. Actually this amount classed as an expenditure is a long-term capital investment abroad which will some day return substantial dividends and royalties to the United States as balance-of-payments receipts. Meanwhile, this outflow of capital is of great strategic and humanitarian value to the United States and the free world.

CONCLUSION

For the foregoing reasons we urge that the Congress take all appropriate action to reduce the balance of payments deficit by measures designed to strengthen and enlarge American exports; and we oppose as unwise and shortsighted alleged solutions of balance of payments problem by curtailment of the mutual security program.

Respectfully submitted.

Stanley Ruby, Stephen Blickenstaff, Robert E. Mertz, Oscar S. Gray, William J. Barton, Chandler G. Ketchum, Thomas M. Kerr, Samuel K. McCune, Putnam B. McDowell, Stanley Shep Ungar, John K. Tabor, John B. Henderson, Kenneth S. Smith, Albert M. Pitcher, Jr.

THE RULE OF LAW

Mr. CLARK. Mr. President, a little while ago the distinguished Senator from Maryland [Mr. BUTLER] made some comments in the RECORD about the activities of Prof. Louis B. Sohn, of Harvard Law School, who has been active both in support of the repeal of the Connally amendment and in support of the principle of world peace through world law. He, with Mr. Grenville Clark, a distinguished New York lawyer, are the authors of a book entitled "World Peace Through World Law," which I have had the pleasure of recommending to many people throughout the country and also to my colleagues in the Senate.

The distinguished Senator from Maryland took a rather dim view of this work and also Mr. Sohn's activities.

I ask unanimous consent that a letter which I have received from Professor Sohn, commenting on what Senator BUTLER said, and on his views with respect to the international situation, may appear at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LAW SCHOOL OF HARVARD UNIVERSITY,
Cambridge, Mass., March 24, 1960.

The Honorable JOSEPH S. CLARK,
U.S. Senate, Washington, D.C.

DEAR SENATOR CLARK: Thank you for sending me a copy of the statement by Senator BUTLER about my efforts to advance the rule of law.

I doubt very much that I have had any influence on the decision taken recently by the house of delegates of the American Bar Association. On the other hand, I support wholeheartedly that resolution and, in general, the repeal of the self-judging clause in our declaration accepting the obligatory jurisdiction of the International Court of Justice.

While I have rendered some assistance to the special committee of the section of international and comparative law of the American Bar Association, this assistance was limited to the historical background and the conclusions of the committee are entirely its own.

As far as my personal views on the subject are concerned, they are stated in an article entitled "International Tribunals: Past, Present, and Future" published in the American Bar Association Journal in January 1960. I enclose a copy of that article and a copy of the editorial in the same issue which comments upon my article. Both seem to indicate, I think, that my influence was a moderating one and did not give support to any radical approach to the subject.

As for Senator BUTLER's references to my book with Mr. Clark entitled "World Peace Through World Law," I would like to point out that this book relates to an entirely different situation. It envisages an agreement between the United States and the Soviet Union that the dangers of the rule of law are smaller than the dangers of a continuing armament race. In the long run, the security of the United States requires a disarmed Soviet Union and China, even if the price to pay for it is disarming the United States at the same time. But any such agreement must provide for strict supervision and control, and such supervision would require the establishment of special United Nations courts able to enforce the disarmament regulations against any offenders. I am sure that anyone who thinks the matter through would agree that special international tribunals would be necessary to ensure that, on the one hand, any vio-

lators of the disarmament agreement are properly punished and that, on the other hand, proper protection is granted against any abuse of power by the international disarmament authority. We would need a bill of rights to protect the individual against any such abuse and we would also need courts to enforce this guarantee.

My book with Mr. Clark is not a blueprint for utopia. It is a realistic appraisal of the requirements for the survival of the human race. Many thinking men in the United States and abroad are now trying to analyze the problem and to find an adequate solution. Our book is intended to stimulate further discussion, but we would be the first to admit that it is not intended to be the final text. What we need now is not a complete disregard of these problems but a thorough investigation of them by the most competent people in the country. For that reason, I endorse wholeheartedly in the proposal made by Senator HUMPHREY (S. 2989) for the creation of a national peace agency. The problems of peace are even more complicated than the problems of war and we need even greater efforts to win the peace than we are making in preparation for a future war. For if this war ever occurs, it will not be won by any one nation, but will be lost by the human race as a whole.

Sincerely yours,

LOUIS B. SOHN,
Professor of Law.

U.S. RELATIONSHIPS WITH RUSSIA

Mr. CLARK. Mr. President, I ask unanimous consent to have printed at this point in the RECORD two articles which I believe to be pertinent to and to contain stimulating comments on the present debate with respect to our relationships with Russia. One is entitled "Mr. K. and the Democrats," written by Walter Lippmann, and published in the Washington Post and Times Herald of June 9, 1960. The other is entitled "Some Folks Spying Just Isn't Cricket," written by Art Buchwald, and published in the Washington Post and Times Herald of June 12, 1960.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 9, 1960]

MR. K. AND THE DEMOCRATS

(By Walter Lippmann)

Mr. Khrushchev's sustained fury against Mr. Eisenhower is more than a case of bad temper and bad manners. It is, it seems to me, a calculated campaign, addressed primarily to the Communist world. Its object is to destroy the image of President Eisenhower—of the benevolent Ike who is the bringer of peace to mankind—and to purge Mr. K. himself of his association with it.

The President's own image of himself has been that of the victorious general who became a peacemaker. Until May 16 this was also Mr. NIXON's and the Republican Party's image of the election campaign of 1960. The outlines were sketched in a year ago beginning with Mr. NIXON's visit to Moscow. The full picture was to be completed this month, when it would become incandescent with a triumphal tour of peace and good will to Moscow and to Tokyo.

To the making and the promotion of this image of Ike the peacemaker, Mr. K. has during the past year been a powerful contributor. The Soviet Union is at a point in its internal development where it has a vital interest in a detente. Mr. K. chose to base the tactics of his policy to achieve the detente on the belief that he could reach a personal understanding with Mr. Eisenhower. And, in the face of skepticism, criticism, and opposition from the orthodox Communists, he played Eisenhower as his trump card.

His prolonged fury against Mr. Eisenhower personally must be related directly to the size of his investment in the personality of Mr. Eisenhower. Mr. K. had done something which is most un-Marxist, something that no other Communist leader has ever done before. He had staked his prestige upon the personality of the anti-Communist head of an anti-Communist state, a deeply conservative general presiding over a highly capitalistic administration. After the U–2 affair—when the President had justified the overflights as necessary national policy—Mr. K. was in a position which is intolerable for a dictator. He had been made to look ridiculous, gullible, and weak, in the presence of the Communist world.

Accordingly, I do not share the view of those who say that the U–2 was merely a pretext, that the Western decision to stand pat in Berlin was the real reason why Mr. Khrushchev broke up the summit meeting. For him the U–2 affair was a far more serious threat to his power and his prestige than would have been an inconclusive negotiation about Berlin followed by an agreement to continue the negotiation at another summit meeting. In my view, after the U–2 affair, Mr. K. did not dare to negotiate with Mr. Eisenhower. He had been his chief sponsor to the Communist world, and without an enormous loss of face, he could not sit down with him and negotiate.

Strictly speaking, what Mr. K. has done is to break relations with President Eisenhower personally, and to suspend serious negotiations during his term of office. Mr. K. has done nothing about Berlin except to proclaim a moratorium good at least for another 8 months. He has refused to accept the President's personal assurance that the overflights are suspended. He has delivered an ultimatum to all our allies that he will attack any base from which an illegal flight takes off. He has focused his quarrel on Mr. Eisenhower personally and on his heir, Mr. NIXON.

Mr. Khrushchev's quarrel with the Republicans is embarrassing to the Democrats. For he has said that there can be no serious negotiation until there is a Democratic administration. No political party likes to be endorsed by a foreign government, least of all by a Communist government. No party likes to be endorsed during a propaganda campaign in which by the insults to the man, the office which he holds is defamed.

But the embarrassment of the Democrats at being preferred by Mr. K. is superficial and of no consequence. For the basic position—as defined by Stevenson, Kennedy, Symington, and in some measure by Johnson—is quite invulnerable to the charge that they are "softer" on communism and more "appeasing" than the Eisenhower Republicans. The thesis of the Democrats in this election is that the Eisenhower administration, because of a false economic philosophy, has been failing to meet the Soviet challenge in national defense and in all the main elements of national power.

The promise of the Democrats is that they intend to meet the Soviet challenge. They mean to increase the Nation's military power. They mean to invest more heavily in the Nation's vital and neglected public needs, in education and in the specialized training of scientists and technicians, in the advancement of research, in the protection of health, in the redevelopment of the cities, in the use of natural resources. To support all this, they intend to promote and encourage an increase in the rate of growth, which is now much too low, of the national production.

An administration which has that purpose will in relation to the rest of the world, primarily the Soviet Union and China, be able to negotiate from a position of growing strength. It is the weak, those whose relative power is declining, who find they must choose between surrender and standing pat. The strong, having confidence in themselves and commanding respect, can negotiate. For to negotiate it is necessary to be firm, and it is necessary also to be flexible.

[From the Washington Post, June 12, 1960]

SOME FOLK'S SPYING JUST ISN'T CRICKET

(By Art Buchwald)

We were sitting in the Sun Ya Restaurant in Hong Kong last week nibbling on bear claw, when a man in a tweed suit, smoking a pipe, sat down at the next table. He ordered a bowl of bird's nest soup, and when it arrived he started to develop a roll of microfilm in it.

When he saw us staring at him, he said very quietly, "Beeswhipple, British intelligence."

We stuck out our hand. "Buchwald, Lockheed Aircraft."

"I knew you were one of us the minute I sat down," he said confidentially.

"How could you have possibly known?"

He smiled. "Your oxygen mask is sticking out of your undershirt."

We looked down and hastily shoved the mask back in.

"I see where one of your chaps got his hand caught in the cookie jar the other day," he said.

"Yup," we said. "But it could have happened to anybody."

He ordered a bowl of braised fish lips. "I dare say not. It could have never happened to us."

"Why not?" we asked, sticking a chopstick into a shark's fin.

"We have a different attitude toward such things. You Americans don't seem to understand too much about this business. If one of our chaps had been caught, we would have played it entirely different."

"How's that?"

"Well, the first thing we would have done is announce that somebody stole one of our weather planes from a Turkish airport and Her Majesty's Government was offering 100 guineas reward for the return of the plane and the pilot."

"But that would be lying," we said, trying to keep the shock out of our voice.

"Precisely, my dear fellow."

"But, we're not allowed to lie in the American intelligence system. It encourages bad character. The State Department would never stand for it."

Beeswhipple poured some jasmine tea on the tablecloth and the linen suddenly turned into a map showing every military airfield in southwest China. He pocketed the tablecloth, popped a tuna fish eyeball into his mouth and said, "We're not saying you should lie. We're not saying you should say anything. But after all, you could show a little indignation when someone steals one of your aircraft."

"But he didn't steal it," we said. "He was told to fly over Russia and take pictures. We've been doing it for 4 years. Frankly, we were afraid no one would ever hear about it. Now the air is cleared. All of this is part of President Eisenhower's open spies policy."

Beeswhipple picked up a fortune cookie and when he broke it open he took out the order of battle for the North Korean Army. We couldn't help feeling a pang of jealousy.

"My dear fellow," Beeswhipple said, "no one admires candor more than the British, but we treat the stealing of unmarked airplanes as a very serious offense. And we certainly take a dim view of someone making his escape over the Soviet Union."

"You just don't seem to understand," we protested. "Lying in spying is the coward's way out. If we tell lies, then the Russians will tell lies. You've got to call a spy a spy.

"This is only the begininng. It's our hope that in the not too distant future we'll have spy exchange fellowships, and the Russians will send us their spies and we'll send ours on a Fulbright fellowship. Until this exchange can be worked out, we'll just have to keep flying over their territory."

Beeswhipple unscrewed the top of the soy sauce bottle and pried out a blueprint of the latest Russian spaceship.

"I can hardly agree with you," he said. "If the chap was really working for the CIA, as the Russians ridiculously claim, how do they explain the candy bars they found on him? It's obvious he was mixed up in a lollipop racket and this was not a case for the State Department but for Interpol."

We were becoming angry. "There is no sense talking to you. You just weren't brought up in the American tradition of fair play. When we get caught doing something, we believe in making a clean breast of it. Charles Van Doren has showed us the way."

We gave the waiter our CIA Diner's Club credit card, paid the check, and left Beeswhipple trying to get a model of an atomic submarine out of a sweet and sour lobster. What he didn't know about espionage could fill a book.

COMMENCEMENT ADDRESS BY JOSEPH RUSSIN, OF LARAMIE, WYO.

Mr. McGEE. Mr. President, this month marks the conclusion of the annual series of commencement appearances, commencement addresses, and programs recognizing the attainments of scholarship around the country. Many of us have participated in all forms of these very fascinating and rewarding ceremonies. Sometimes it is the custom to assume that pedestrian remarks are related on such occasions, particularly if those remarks are invited from the students themselves, and more especially if they come from high school students.

I call the attention of the Senate to the address of a high school student on a commencement occasion which is the most perspicacious I have had the privilege of listening to and then of reading, so far as I can recall. This address was delivered at the commencement exercises of University High School, in Laramie, Wyo. I was in attendance at those exercises because my son was among the graduates that night. It is the address delivered by the outstanding scholar of the class, a young man named Joseph Russin.

Joe Russin has been back to Washington at almost regular intervals this year because of his attainments in the realm of competitive academics, in provocative speech promotion, in spelling out new ideas for our youth, and in other ways recognized by many of our national organizations. But of all the dissertations characteristic of Joe Russin, I know of no set of remarks so worthy of the attention of the Senate as his on that commencement evening.

I believe the most penetrating thought to be derived from his remarks is that they made his elders uncomfortable on the night of the ceremonies; uncomfortable because one does not expect deep-rooted thought on a commencement occasion, all too often. Yet here was a young lad who raised questions which his elders sometimes found it convenient not to raise, or else to sweep under the rug.

For the scope of his remarks and the depth of the ideas they contain, I commend his address to the attention of the Senate. I ask unanimous consent that they be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

KNOWLEDGE—NOW OR NEVER

(By Joseph Russin)

Recently, an unarmed American plane was shot down over the territory of the Soviet Union. The plane was flying an espionage mission to detect any preparations for a surprise military attack on the free world. An attack to world peace came, but in the form of a volcanic eruption at the summit, the plane being only a convenient catalyst for the eruption.

The summit explosion and the subsequent tidal waves of threats were in some way to be expected. We live on an earth that is neither safe for democracy nor for peace. Instead of floating simple minefields in the oceans, we now contemplate portable nuclear missiles on floating launching pads. Twenty years ago, the American President had over 2 years from the time that Hitler fired his first shot in which to prepare the Nation's course of action. Today we may have a vast span of 15 minutes in which to act to save our world.

We feel all the tensions of the world acutely. Because we are so aware of these troubles, it is sometimes felt that trouble is unique to our age. I do not think this is so. The human forces that do trouble us today—nationalism, totalitarianism, dictatorship, desire for world domination, poverty, prejudice, and ignorance—have been with us for a long time. We have never been forced to be so concerned with them. No, the problems are not basically different—just the urgency for their immediate solution.

The world that we, the class of 1960, grow into is a troubled one; and one which cannot sustain itself in this condition much longer. We literally cannot afford many more blunders by today's world leaders, leaders who have shown an inability to cope with the problems which confront them—many of their own creation. More than ever in history, effective diplomacy, imaginative leadership, an informed public, and, most important of all, a genuine application of the principles of democracy all over the world are necessary. We maintain that no detection system or bomb will ever be as effective in solving the problems that face us as these more important human resources.

An appropriate question then might be: Are we preparing ourselves in these vital areas? Peace is too important to be left to the generals of the world. The president of Columbia University, Dr. Kirk, says he has the "haunting feeling that our educational system is not now producing men and women adequately equipped to maintain in the future the leading position in world affairs that we have had in the recent past."

As a fresh graduate (and fortunately no longer a freshman) of one of the better secondary schools, I must confess that I tend to agree with Dr. Kirk. My views are, of course, conditioned by intimacy, but perhaps for this reason they are also somewhat pertinent.

During my high school years I have been privileged to go to Washington four times and participate in national and international conferences of student leaders. These leaders felt that they and their contemporaries were not receiving the challenge they needed, in fact, wanted. These students were uncertain as to whether the training they were receiving was really sufficient to prepare them for the problems they would have to solve. Nearly all of the young people to whom I talked said that they had noticed a marked improvement in their school since the first Soviet sputnik, but they all felt that there still was much to be done. Most of the improvement was in the sciences.

While science is certainly important to our well-being, science is not necessarily a guarantee of peace. The Nazis and the Communists have been tragically proficient in the sciences. Obviously more is needed. The high school leaders of today want curriculums with significant depth and scope. They want classes that will give them the tools to understand and handle the complex machine of democracy. This plea was the strongest of all. As leaders, it seemed clear to them that our schools' weakest areas—the humanities and social sciences—were precisely the ones that are most needed to obtain the knowledge for true peace.

At a time democracy must fight for its life, many students amazingly are quite apathetic about such things as civil liberties. A recent Purdue University poll has shown that, while most students say they believe in the Bill of Rights, they really do not endorse its guarantees in day-to-day life. Large percentages see nothing wrong with strong-arm police methods. Many advocate strong restrictions on the freedoms of speech and religion.

But what else can be expected? How can students be expected to practice real religious freedom when many schools violate the doctrine of the separation of church and state? Some students have never even heard of the concept. It sounds like a radical notion to them. And why not—it is not always practiced in the realm of their experience.

The poll further showed that many students favored some kind of censorship of political thinking for the so-called average man. To me, the danger of our citizens' losing sight of the true values of our democracy through ignorance and misuse is a far more dangerous threat to our society than any Soviet propaganda.

We, the youth of our Nation, feel it is imperative that our schools become real teachers of democracy and the values that ideally operate in a democratic community. It is in the schools that our society must develop its basic strengths.

We want schools where everyone is allowed to attend. We do not think, for example, that color is a just criterion of intelligence. We want schools where academic excellence is held above all else in emphasis, expenditure, and real importance.

We want schools where the Bill of Rights makes sense, so, for example, the meaning of the first amendment is truly understood in a real separation of religion from the school.

We want schools where a love of democracy is fostered by the encouragement of student government organizations.

We want schools that offer curriculums that can prepare us to meet the challenge of the world. We do not quite see the place of such course work as table setting and studies of "One Handed Push Shots in the High Schools of Southern Indiana."

We want schools where individual study and thorough reading are considered of prime importance.

We want schools where students may gain an acquaintance with the fine arts and music, so that they may live richer lives.

We want schools where the humanities are encouraged on a par with, if not even more than, physical science; for it is in the humanities where the arts and techniques must be learned for the obtainment of real peace.

In short, we want schools that emphasize the values of democracy, and provide us with the skills to practice it.

With our limited experience, we of the class of 1960 can offer no sweeping solution or way to achieve these objectives; we can only pose the problem. The answer is as difficult to reach as it is simple to postulate; unless the human race learns sufficient wisdom to really practice democracy, it will vanish from the earth in the spiraling cloud of a thermonuclear bomb.

The great hope of the world is the example of the practice of true democracy by America. Where better can America build democracy than by constantly observing and practicing it in its schools? America and the world can no longer afford the luxury of mistakes; the price of error has risen beyond the ability of mankind to pay and survive.

ELIMINATION OF AFFIDAVIT OF DISLOYALTY

The Senate resumed the consideration of the bill (S. 2929) to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief.

Mr. KENNEDY. Mr. President, the issue before the Senate is the repeal of that portion of the National Defense Education Act which requires every student who applies for a loan under that act to sign an affidavit declaring that he does not believe in and does not support any organization that believes in the overthrow of the U.S. Government by illegal or unconstitutional methods.

The bill before the Senate would continue the requirement that the student take the usual oath or affirmation to bear true faith and allegiance to the United States. This is the oath we all take when entering upon public service.

The bill would eliminate the disclaimer affidavit, or, as it is sometimes called, the affidavit of nonbelief. There is little reason for its inclusion in the law. The colleges of the contrary, through their representative organizations are virtually unanimous in opposing its inclusion in the National Defense Education Act. The President of the United States has recommended its repeal. Both the Secretary of Health, Education, and Welfare and the Budget Bureau have reiterated the President's recommendations. And the committee has found that the provision offers no protections not already in other statutes.

No one can quarrel with the principle that all Americans should be loyal citizens and should be willing to swear allegiance to our country.

But the disclaimer affidavit singles out students—and only those students who need to borrow money to continue their education—as a group which must sign, in addition, a rather vague affidavit as to their beliefs.

There is a very real danger that this unnecessary, futile gesture toward the memory of an earlier age will defeat the purposes of the National Defense Education Act. Twenty-one universities—and they are some of the most outstanding colleges and universities in the United States—feel so strongly about it that they refuse to participate in the program. Unlike the Soviets, we cannot take steps to keep our brightest minds in scientific careers, but we might take steps that keep them out. Surely this is not the way to "catch up" with the reputed Russian excellence in education, science, and research.

Finally, this requirement imposes an intolerable burden upon the institutions which must administer it. They are responsible for its enforcement. And few, if any, are equipped to assume this responsibility.

I hope the Senate will support the repeal of this provision.

Mr. PROUTY. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. PROUTY. Does not the Senator believe that the mere fact that the universities have refused to participate in the program has prevented many persons who wish to abide by the law from taking the oath and signing the affidavit, persons who would be entitled to an education in those institutions? Is not that in itself an abridgement of academic freedom?

Mr. KENNEDY. This is their judgment, because very special responsibilities are placed upon universities under the law, in the first place.

In the second place, this provision has placed universities in a very difficult situation. On the one hand, they are reluctant to deny students the opportunity to participate in the program, as the Senator from Vermont has suggested; on the other hand, they regard this provision as totally obnoxious; as really a limitation on the purposes of a university and the purposes of free education.

That is because they feel it is against scholarship by singling out students, from all Americans who receive assistance from the Government, requiring them to take an oath before a notary that they are not members of the Communist Party or do not hold disloyal beliefs or opinions. I think the colleges and universities regard that requirement as obnoxious. They have, therefore, refused to participate in the program. They are operating within their rights.

Mr. PROUTY. Mr. President, will the Senator further yield?

Mr. KENNEDY. I yield.

Mr. PROUTY. I intend to offer an amendment later, and to develop my position at some length. I shall try to prove that under the Senator's bill a bona fide card-carrying member of the Communist Party can qualify under the National Defense Education Act. I shall not discuss that matter now, but I shall develop it later. I feel certain the Senator does not want that kind of activity to happen.

Mr. KENNEDY. No. I think the problem before us is to weigh the courses of possible action we might take. One is to continue the law, and possibly—although there is some disagreement on the question—make it more difficult for a Communist to enter a college as a freshman and receive a loan. It might be very possible that the Senator from Vermont is correct.

On the other hand, there are already at least 21 distinguished universities, including Harvard, Yale, and Princeton, stretching all the way across the United States, which refuse to participate in the program.

I believe hundreds of students who are loyal Americans are not participating in the program because of the strong feeling on the part of universities and faculties. It is very possible that Communists—card-carrying Communists—are participating in other programs which the Government sponsors. They may be receiving assistance under programs of Federal grants in aid; they may be dependent mothers; they may be farmers who are receiving subsidies; they may be newspaper publishers. There may be thousands of Americans who are receiving subsidies and who are members of the Communist Party. But I do not take the view that the United States is soft on Communists.

Mr. PROUTY. This provision is a part of the National Defense Education Act.

Mr. KENNEDY. I speak today with the full support of this statement by the President of the United States:

> This affidavit requirement is unwarranted and justifiably resented by a large part of our educational community which feels that it is being singled out for this requirement.

The repeal of the affidavit has been recommended by the Vice President of the United States. Its repeal has been recommended by the Republican Secretary of Health, Education, and Welfare. They are loyal Americans, as are all of us.

I hope the Senator from Vermont will consider the effect which this provision is having. If he will turn to page 4 of the report, he will see the list of the colleges which have already withdrawn from the program. They are some of the most outstanding colleges in the United States—Amherst, Antioch, Bennington, Brandeis, Goucher, Grinnell, Harvard, Oberlin, Radcliffe, Reed College in Oregon, St. John's College, Maryland, Sarah Lawrence, Smith, the University of Chicago, Wilmington College in Ohio, Wesleyan University in Connecticut, and Yale university.

Then there are institutions which have declined to participate in the student loan program because of the disclaimer affidavit. They are Beloit, Bryn Mawr, Haverford, Mills, Princeton, Swarthmore, the University of Richmond, Va., and Wellesley.

Then there is a list of institutions whose presidents or boards have publicly stated their disapproval of the disclaimer affidavit, but which continue to participate in the student loan program, for reasons which were stated by the Senator from Vermont. The list is almost endless. It continues for several pages. It includes the University of Washington, the University of Pittsburgh, Notre Dame, the University of Pennsylvania, the University of North Carolina, the

University of Hawaii, and universities and colleges stretching across the United States.

I believe the weight of opinion and the responsible course of action call for continuing the oath and repealing the affidavit.

Mr. PROUTY. I intend to cover the entire situation very thoroughly, insofar as it relates to the security program generally and as it confronts such students individually. My amendment will not require the taking of the loyalty oath or the signing of an affidavit. However, I believe my amendment will be much stronger than the existing law.

Mr. KENNEDY. If the Senator is to offer an amendment which he believes will be stronger than the Security Act, why does not he favor applying it to all Americans who receive assistance from the Government?

Mr. PROUTY. I shall point out how many Americans are subject to that requirement at the present time. The Senator voted for the Labor-Management Act the last time; and that act provides that a Communist cannot hold office in a union, and that a person who has been a Communist in the past cannot hold office in a union. However, union officials are not involved in the Federal Government in any way, shape, or manner.

At the proper time I shall point out several examples.

The pending measure is a national-defense measure. The ROTC students sign a loyalty oath during their first 2 years of college; and during their junior and senior years they are required to answer very detailed questions which are much stronger than the affidavit.

I may say to the Senator that without the affidavit now in the law, the present law would be meaningless. I shall point that out in some detail at the proper time.

Mr. BUSH. Mr. President, will the Senator from Vermont yield for a question?

Mr. PROUTY. Certainly.

Mr. BUSH. Was there any substantial opposition to inclusion of the affidavit in the labor-management bill, to which the Senator has referred?

Mr. PROUTY. Not that I recall.

Mr. BUSH. But there is a great deal of opposition to its inclusion in the education bill, is there not?

Mr. PROUTY. I am afraid that too many of those in some of our schools and colleges are so much engaged in philosophic abstractions, perhaps, that they seem to feel—although I do not think they mean it—or they seem to suggest that they are actually proposing the destruction of the Bill of Rights, and of doing so in the name of freedom. The Bill of Rights is not a national suicide pact; and I think we must recognize that fact.

Mr. KENNEDY. I doubt that the purpose of those in the academic field to whom the Senator has referred is to destroy the Bill of Rights, in the process of engaging in philosophic abstractions.

Mr. PROUTY. I do not think that is their purpose; but I think that is the effect.

Mr. KENNEDY. But let me say that it is exactly the suspicious attitude the Senator expresses, as reflected in the affidavit, that is causing such discontent and division, whereas there should be unity and harmony. Certainly our universities and our citizens who are active in the academic world will grow in importance during the next 10, 20, and 30 years. I believe it would be inimical to the national interest to continue this affidavit, which has caused such great concern among so many patriotic Americans in our academic institutions; and I believe that the national defense effort and the national interest would not be served by continuing the oath. The Senator from Vermont thinks otherwise; and he will have to make his own presentation.

Mr. PROUTY. Let me say that my amendment will not outlaw the Communist Party. But my amendment will prevent any person who is knowingly a Communist or any person who supports the purposes or the objectives of the Communist conspiracy from receiving one cent of money provided by the American taxpayers.

I believe the inclusion of such a provision is wholly justified.

In due course I shall submit the amendment.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. RUSSELL. Mr. President, if this matter had been presented in its present form when the bill was originally before the Senate, I am frank to say that I would have thought the oath that is provided in the pending bill would have been adequate. However, conditions are not the same now as they were then. Since the original bill was proposed this matter has been widely discussed throughout the entire length and breadth of the United States. It is one of those things that cannot be taken back to the American people, in an ordinary news article or in a radio broadcast or in a brief television appearance or news release, and be explained in detail.

In the last analysis, Mr. President, the vote we shall cast on this bill will be understood by the American people as action by the Senate of the United States on the question of repealing a loyalty oath which is required of students who participate in a loan program financed by appropriated funds. That is the way the issue will stand before the American people.

Mr. President, in the light of that circumstance and that fact, I shall not undertake to split hairs here today in dealing with the difference between this Kennedy bill and the original Kennedy bill, which the Senate considered last year and recommitted to the Labor and Public Welfare Committee.

In this critical hour of American history, I shall oppose the taking of any affirmative action by the Senate of the United States which could be considered anywhere on the face of the earth as constituting a protest by the young people of this country against reaffirming their faith in the American system and against stating their abhorrence of the system of collectivism and communism that prevails behind the Iron Curtain.

Mr. CLARK. Mr. President, will the Senator from Georgia yield?

Mr. RUSSELL. Yes, I am glad to yield.

Mr. CLARK. I am sure the Senator from Georgia inadvertently stated that this bill would repeal the loyalty oath.

Mr. RUSSELL. I did not state that.

Mr. CLARK. I think the Senator did not mean to.

Mr. RUSSELL. And I did not do so.

Mr. CLARK. But I believe he did. Of course the record will speak for itself.

Mr. RUSSELL. I am sure it will. But I made no such statement. I said it would be construed as action to repeal the loyalty oath.

Mr. CLARK. But surely the Senator is aware that if this bill is passed, each student who participates in the program will have to take, and to subscribe to, an oath or affirmation as follows:

> I do solemnly swear that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all of its enemies, foreign and domestic.

Mr. RUSSELL. Yes, I am well aware of that.

Mr. CLARK. I thank my friend.

Mr. RUSSELL. Mr. President, the bill now is in substantially the shape it finally reached last year, after it had been amended, and just before it was recommitted, as I recall.

Mr. KENNEDY. Mr. President, will the Senator from Georgia yield?

Mr. RUSSELL. I am glad to yield to the Senator from Massachusetts.

Mr. KENNEDY. As I recall the point the Senator made last year—and he has covered it in his first statement—it was that it was extremely important that we include in the bill the oath which we now have included in it.

Regardless of how it may appear—of course anything may appear to be something it is not—in weighing the difficulties which this provision has encountered among the academic institutions in the United States, as opposed to the danger that Communists will obtain such loans for education, where does the Senator feel the national interest lies?

Mr. RUSSELL. Let me say that I have not undertaken to weigh that on any scales, and I have not considered that. The academic community, the leaders of some of the colleges—though not all of them—the college faculties of the country, are not in any wise unanimous in this opinion. Undoubtedly great institutions like Harvard, where the distinguished Senator from Massachusetts trained, and Princeton, if the Senator from Pennsylvania may have graduated there——

Mr. CLARK. I object.

Mr. RUSSELL. I apologize, but not to any Princetonian who might be present. I regret I made the error. But the Ivy League, let us say, has headed a movement which has caused other colleges to discontinue taking these loyalty oaths. But, in answer to the Senator, I have not weighed it. I do say this: I do not believe any considerable number of young Americans who might receive fi-

nancial assistance to help them in their college training—under a program that is officially designated as a national security measure—and that is the title of the act which provides these loans, it is the National Defense Education Act—feel that they are being imposed upon by being required to reaffirm their faith in the American system or their opposition to the Communist system. I do not believe they have any objection to reaffirming their loyalty to this Nation.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. CLARK. The Senator is aware, is he not, that among the associations which have protested the disclaimer affidavit is the National Student Association, which represents student councils in the universities across the length and breadth of the land?

Mr. RUSSELL. No; I was not aware of that. I doubt that the action was in any wise unanimous. Despite the fact that students seem to be running governments of a great many nations today—some of them to their great detriment—I do not think that is any expression of a last-ditch opposition to this requirement by students. It is more or less of a reaffirmation of their confidence in the presidents of the institutions which inaugurated the attack upon the so-called loyalty provision.

Mr. President, at one time, as I have said, I was inclined to go along with the so-called compromise bill that was brought to my attention, I believe, during the latter days of the last session dealing with this question; but I have repeatedly stated that I cannot, for the life of me, see any substantial objection to either one of these oaths. The more I have thought about it, the more I have begun to wonder, indeed, to marvel, at some of the arguments that have been advanced for the repeal of all or part of the oath requirement.

I cannot understand, and I totally reject the idea, that there is any impropriety in asking a loyal American to affirm his allegiance and to avow his loyalty to his country. I say that whether it be a benefit to a farmer, a doctor, a merchant, or a small loan to a manufacturing enterprise.

Mr. President, in today's world, it behooves all of us who believe in the American system, which has given us the greatest culture and the highest standard of living the world has even known, to welcome the opportunity to express our faith in that system. And it will be a sad and sorry day in this country if it ever becomes generally considered improper for one not only to pledge allegience to the Stars and Stripes, but to avow one's faith in the American system.

I hope, Mr. President, that I never see the day when the majority of the American people believe that it is improper for an American citizen to denounce the Communist system and to extol the American system of government. If that day ever comes, we will have certainly lost the contest which is being waged today for the minds and hearts of men and women all over the world.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. RUSSELL. Yes.

Mr. BUSH. It seems to me, if I may say so to the Senator from Georgia, that the bill in its present form does extol the American system when the oath that is suggested says:

> I solemnly swear that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and the laws of the United States against all enemies, foreign and domestic.

I do not know how one can pledge his devotion to the American system in any better language.

Mr. RUSSELL. What, then, is the Senator's objection to the other part of the oath?

Mr. BUSH. The objection is that thousands and thousands of educators and students in universities are being singled out on the basis that their devotions is questioned, and that they, in the field of education, as distinct from all others who receive a subsidy from the United States in one form or another, or a handout in one form or another, through the social security system, through the farm handout—which, Heaven knows, is very big—should be singled out. That is the principal source of objection to this requirement.

Mr. RUSSELL. That is not the case at all. It should be pointed out here that for almost 10 years the National Science Foundation Act has operated under the identical loyalty oath provisions that are contained in the Defense Education Act. It is my understanding, in fact, that these provisions were lifted bodily from the Science Foundation Act and placed in the Defense Education Act.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. RUSSELL. In just a moment.

I understand that about 50,000 applicants under the Science Foundation program have taken the oath of allegiance and have filed the non-Communist affidavit since the program was inaugurated in 1952. Nothing is heard about that being unfair. Nothing is heard about this being an undue imposition on those who are seeking benefits from the National Government. A large number of scholars, many of whom have already obtained their degrees in the ordinary arts and sciences, have applied for advanced study and research in scientific fields. I have not heard, of all those who have written to me, from one who feels he has been placed under the pall of suspicion or who feels he has been singled out for all kinds of unequal treatment or has had advantage taken of him because he was compelled to comply with the loyalty oath requirements. Doubtless some of them have come before the committee, but I know of none from examining my own mail.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. RUSSELL. Yes.

Mr. CLARK. The Senator, of course, is correct that this disclaimer affidavit still remains——

Mr. RUSSELL. If the Senator is going to make this change, why not reach into the National Science Foundation Act and do the same thing there? It is because those who direct the universities did not raise the issue. The applicants did not have to come to them to handle the oaths or affidavits; they were filed with the Government instead of with the university officials.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. RUSSELL. Yes.

Mr. CLARK. I cannot, of course, agree with the reasoning of my friend, but this is something on which we can agree to disagree.

Mr. RUSSELL. I hope in good temper.

Mr. CLARK. I am sure it will be in good temper, as is always true with my good friend from Georgia.

Mr. President, it occurs to me that the National Science Foundation affidavit can hardly be considered a precedent for extending a similar disclaimer affidavit, which I personally think is unwise in that instance, to the entire student body of the United States, who, by and large, with some exception, represent the best brains of young America. We should not single out these students as against the farmers of America, the mortgagors of America, the borrowers at the banks of America—all those who get every other kind of Federal handout and Federal funds. We do not ask all of those people to subscribe to the disclaimer affidavit. Why do we require the disclaimer affidavit only for the brains of the country?

Mr. RUSSELL. Mr. President, I for one do not agree that all of the brains of this country are found either in the faculties or in the student bodies——

Mr. CLARK. Nor did I say so——

Mr. RUSSELL. Of all the educational institutions in the country.

Mr. CLARK. Nor did I say so.

Mr. RUSSELL. I say to the Senator, if I had my preference I would apply the loyalty requirement to all of them, instead of repealing it in this instance and sending the word around the world that the young men and young women of America are ashamed to take this position and to stand back of the American form of government as opposed to the Communist system.

Mr. PROUTY. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. PROUTY. I wish to point out that the members of the committee had an opportunity to vote for such an amendment—namely, an amendment to make this apply to all groups—and that amendment was turned down.

Mr. RUSSELL. I am glad to have that information from the Senator.

Mr. CLARK. Mr. President, will the Senator yield to me so that I may reply to that statement?

Mr. RUSSELL. Mr. President, I did not intend to become involved in extended debate on this matter. I merely wished to make a brief statement of my views. However, I am glad to yield to the Senator from Pennsylvania.

Mr. CLARK. I promise the Senator I shall not interrupt again.

Did I correctly understand the Senator from Vermont to say that the extension of this provision to everybody else was turned down by the Senate last year?

Mr. PROUTY. I think the amendment required an affidavit on the part of everybody who received Federal funds.

Mr. CLARK. I happen to be the author of that amendment, and I proposed it in a lighter vein, more than in any other way, because it was so obviously silly. The proposal was debated upon the floor for a substantial amount of time, and then I asked the Senator from South Dakota [Mr. MUNDT] whether he would accept my amendment, and the Senator said "no," so I withdrew it, having, I thought, made the proposal seem a little silly.

Mr. PROUTY. I am not talking about the Senator's amendment. I am talking about the amendment offered in the committee. I believe the Senator was there at the time.

Mr. RUSSELL. Mr. President, I was not in the committee, and I do not recall the Senator's amendment. But I will say that before I sound the retreat and make even the slightest confession of doubt, on the part of large numbers of our people, that the American system is the best on earth, I will vote to apply this to any person receiving any kind of benefit, be it silly or not. I think that would be a better precedent.

I have great respect for the leaders of our academic communities, the administrators and members of the faculty of our institutions of higher learning. I have known many of them over many years. I have seen them as mistaken and as wrong in their positions time and time again as even a Senator of the United States can be. [Laughter.] They can be mistaken, exactly the same as anyone else can be.

Some of these arguments against the affidavit I think are almost specious. We are told that students are being singled out and set aside and made to avow their allegiance to this country. It has already been said that this provision is found in an act which is supposed to be one of the pillars of our national defense. I see no reason why any student should hesitate to take the oath in either one of its forms, though I admit, as I said at the outset of my remarks, if the original bill had contained only the oath which is required of officers and those going into the ROTC and programs of that nature, I think it would have been adequate. However, I do not propose at this time and under these circumstances to undertake any action by my vote which will indicate not only a lack of faith in the American system, but also a lack of faith in the constancy, fidelity, and patriotism of the thousands of young people who will avail themselves of these loans.

Mr. President, I cannot see that this oath in any wise interferes with academic freedom. If I did, I would stand foursquare in favor of repeal of the entire provision of the law.

I must confess that academic freedom, while it is not specifically mentioned in the Constitution of the United States, is undoubtedly involved in all of the freedoms which are spelled out in the Bill of Rights, as a part of them.

I regret that some 20 institutions—universities and colleges—have already announced their refusal to cooperate in the student loan program. I think, Mr. President, those institutions are the ones which are wronging the young people of this country. I say that in full knowledge of the fact that within this list of 20 we find some of the most renowned and distinguished institutions of learning in this Nation. These are names which have been connected with education over a period of time. I recognize the greatness of these institutions. I accept it as their full right to refuse to participate in the student loan program, if that is their desire. However, I find it very difficult to square their refusal to participate in this program with their devotion and dedication to the principles of academic and intellectual freedom.

I say that, Mr. President, because of these impecunious students of whom we hear so much. We will find a lower percentage of students in those circumstances on the campuses of these institutions than on the campuses of other institutions in this country. There is not a large number of impecunious students wandering around the halls of Harvard, of Princeton, and of Yale. Those institutions all have great foundations and benefactors of tremendous wealth who can help them with their scholarship programs.

Mr. President, I say this with respect even to those institutions: By their arbitrary action, these schools have denied to their students the right to decide for themselves whether they wish to participate in this loan program and whether they find the loyalty provisions of this program offensive. When the president of Harvard calls together his executive committee and says, "We refuse to participate in the program," what has he done to the few impecunious students who are on his campus? He has told them, "I take away from you the right to decide whether you are willing to or welcome the opportunity to sign both of these affidavits."

This action has created a double standard in these institutions. On the one hand they defend the freedom of thought; and on the other hand they deny to their students the right to exercise that freedom of thought and to apply it in the case of these loans. If that statement can be successfully controverted, I should like to have someone do so. It is a strange contradiction. It has shocked some members of the academic community, including no doubt some of those who conscientiously are opposed to the present loyalty requirement of the law.

I was very much impressed by a letter to the New York Times magazine from Dr. Richard Martin Lyon, of Notre Dame University. I do not recall whether Notre Dame is one of the schools which has withdrawn from the program.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. CLARK. Notre Dame has not withdrawn, but it is one of the institutions which has protested and has advocated repeal.

Mr. RUSSELL. I am glad to know that Notre Dame respected academic freedom enough to refuse to deny its students the right to apply for loans if they wished to do so, and not to follow in the footsteps of Yale, Harvard, and Princeton, which have taken away from impecunious students the right and opportunity to apply.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. KENNEDY. It may be interesting to note that the president of Notre Dame, Father Hesburgh, was one of the three college presidents who waited on the Vice President in Chicago in February and asked the Vice President his position on the affidavit, and it was on that occasion that the Vice President announced that he opposed the continuation of the provision in the bill. So I say for the Senator's information that at least the president of the University of Notre Dame, speaking in his authority as president, opposes the affidavit.

Mr. RUSSELL. I did not say that Notre Dame was not opposed to the affidavit. Likewise I am not particularly impressed, may I say to the Senator from Massachusetts, in respect to the position of the Vice President of the United States. I am speaking now of a double standard of academic freedom that is being applied in Harvard, Yale, Princeton, and other institutions that have said to their students, "We will not even permit you to exercise your desire to sign these affidavits and apply for the loan." Any impecunious student, as referred to in the report, would be required either to depart from those halls or else to obtain a loan elsewhere.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. CLARK. The Senator has been gracious indeed in the publicity he has afforded my alma mater—Harvard.

Mr. RUSSELL. They may claim no notoriety from me.

Mr. CLARK. I hope that as he continues his remarks he will include among those universities which refused to permit students to engage in the program because of the disclaimer affidavit of the Interdenominational Theological Seminary of Georgia.

Mr. RUSSELL. Yes, I heartily condemn each and all of them, and their decision in this matter. I think it is unwarranted. I think it is a denial of the freedom of any young man or woman who may be in any of these schools of their rights as American citizens to say, "I do not object to either of these loyalty requirements, and I wish to obtain a loan."

The institutions that have taken this action undoubtedly think it would be their one last chance to get into the Ivy League, and to be able to join the class of Yale, Harvard, or Princeton.

Mr. President, the letter from Dr. Richard Martin Lyon to the New York

Times magazine is important enough to be read and not merely printed in the RECORD.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. BUSH. I wish to ask him about his apprehensions regarding the effect that a repealer might have upon Europe and other countries in the world. As the Senator from Georgia stated the matter, would it not appear that we were backsliding in our loyalty? I ask the Senator if he does not consider this point of view a valid one. In other countries, notably in Europe, respect for education and for educators is at a high level, probably at a higher level than it is in the United States.

I believe that there is better discipline in their schools, generally speaking, and in general greater respect for education and all that goes with it. Such respect is very high in friendly countries of the free world.

Accordingly, I rather incline to the view that the action which I hope the Senate will take on this bill will increase our stature in the eyes of the educators in the free countries of the world. Far from demeaning us, our stature would be enhanced if we recognized the tremendous emotional and spiritual interest which the educators of this country have in the pending measure. I feel the Senator is a little harsh on us when he feels that the proposed measure would demean us in the eyes of the world. I rather hold to the view that it would increase our prestige.

Mr. RUSSELL. The Senator says our prestige would be increased in the minds of the members of the faculty of foreign institutions.

Mr. BUSH. They are the opinion makers and the thought leaders of the great countries in the free world to a very large extent.

Mr. RUSSELL. I doubt very much if there is any educational institution in any country of Europe which plays as large a part in the affairs of the government of those nations as certain institutions in this country play in the Government of the United States. However, that is a question which is beside the point here.

Mr. BUSH. I agree.

Mr. RUSSELL. I am talking about what people in the streets, in homes, and on the farms think, not merely what the members of the academic communities think.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. CHAVEZ. I did not attend Princeton, Yale, or Harvard. The first words of English that I learned were taught to me at a Presbyterian mission school in New Mexico. They taught me about America, and I believe that is what the Senator is now talking about, our system of government. Is that not correct?

Mr. RUSSELL. That is correct.

Mr. CHAVEZ. The Senator from Georgia is trying to continue the system of government as it is. Likewise, I am happy with it.

Mr. RUSSELL. This is what I had in mind. A great struggle between communism and the American way of life and the American system has been greatly accentuated by events of the past few months. The tragic collapse at Paris of the summit meeting to which peoples of the world had looked with hope to bring about an end to the threat of the destruction of civilization has brought instead an intensification of the cold war.

In the face of these developments we have now laid aside the Defense appropriation bill, which we should be considering, and are debating the measure before us because of the clamor that has arisen in these halls. We are told that we must repeal a provision that requires a person who applies for a loan under the National Defense Education Act to take a loyalty oath.

Mr. President, I now desire to read the letter from Dr. Richard Martin Lyon, of the faculty of the University of Notre Dame. It appeared in the New York Times Magazine of January 10, 1960:

> President Griswold ably defends the position of many universities and colleges which have refused to participate in the Federal scholarship program under the National Defense Education Act. University opposition is based on the loyalty affidavit required of the applicant for an educational loan. It may have been arbitrary, discriminatory and unwise for Congress to insert this condition in the act. Is it not equally arbitrary, discriminatory and unwise, for university administrators to deny the individual student the right to decide for himself whether he desires to apply for Federal aid under the conditions provided by the act?
>
> For university officials to make such a fundamental decision on the tenuous ground that under the law the university is required to invest 10 percent of its scholarship funds—normally contributed by alumni—in each loan, raises two questions: (1) Whether it is proper for university administrators to act as a superlegislature and deny qualified students the opportunity to seek the benefits under a public law designed to aid them individually; and (2) whether such officials are not by administrative fiat depriving the students of the very freedom they seek to preserve.

Senators who are content to accept the argument that is made, which would deny to the impecunious student the right to decide for himself whether he will subscribe to such an affidavit should ask themselves whether they are not adopting a dual standard in striking down one academic freedom, in the name of establishing and defending another academic freedom.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. KENNEDY. It seems to me that the writer of the letter which the Senator has quoted makes it clear that in the opinion of the writer the affidavit itself was unwise, not that the universities were unwise.

Mr. RUSSELL. The Senator from Massachusetts can get that impression out of the letter, if he wishes. I do not get it.

Mr. KENNEDY. Did not the writer use three adjectives?

Mr. RUSSELL. He said it may have been arbitrary, discriminatory, and unwise. Oh, yes, of course, that is his fear. I do not say that the man is not opposed to the affidavit. Perhaps the Senator knows this gentleman.

Mr. KENNEDY. I do not know him.

Mr. RUSSELL. The Senator travels among intellectuals much more than I do.

Mr. KENNEDY. I am in the company of one now.

Mr. RUSSELL. I thank the Senator. I am totally disarmed. [Laughter.]

I have respect for these great educators. I have respect for Dr. Griswold and all the other college presidents.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. BUSH. The Senator has twice mentioned Dr. Griswold.

Mr. RUSSELL. Yes. He wrote this article. He has been the leading spokesman of his point of view. I did not mention him in any invidious manner.

Mr. BUSH. I understand.

Mr. RUSSELL. I believe he is from Yale, which is located in the Senator's State.

Mr. BUSH. I wish to ask a favor of the Senator from Georgia. Inasmuch as the Senator has twice referred to President Griswold, I should like to know if he would object to my asking unanimous consent to insert President Griswold's statement on this subject, which appeared in the New York Times book review section some months ago, at the conclusion of the Senator's remarks, and after he has yielded the floor.

Mr. RUSSELL. That would be quite all right. I should think the Senator would wish to use it in his own statement.

Mr. BUSH. I intend to do so.

Mr. RUSSELL. If it will reassure the Senator to do it twice, I shall be very glad to have the Senator make that insertion.

Mr. BUSH. I believe that those who will read the Senator's eloquent remarks and his references to President Griswold of Yale University should have the benefit of Dr. Griswold's statement.

Mr. RUSSELL. President Griswold has been the spokesman of those who feel as the Senator feels. I congratulate the Senator. Yale has not been doing too well with Harvard and Princeton, and Yale has naturally put its man out front.

Mr. BUSH. The Senator, I believe, is talking about a mundane thing called athletics. The faculty of Yale has always been at the top.

Mr. RUSSELL. Some of the greatest claims to fame of some graduates of these institutions have been based on their athletic prowess while they were students at those institutions.

Mr. BUSH. That is probably correct.

Mr. RUSSELL. I hope no one will charge me with a lack of respect for education or for Dr. Griswold. Dr. Griswold has been the principal spokesman for those who have advocated the program of denying to impecunious students in educational institutions the

right to decide for themselves whether or not they will apply for these loans. Dr. Griswold did it in the name of academic freedom. I care not what his name may be or what institution he may preside over. I say that it is inconsistent to deny, in the name of academic freedom, a student in an institution the right to decide whether he wishes to take the loyalty oath, and thereby perhaps deny a poor student an opportunity to receive an education in those hallowed halls.

As much as I respect these great educators, I have even more respect for the future that I believe lies with the hundreds of thousands of young men and women who comprise the student bodies of our colleges and universities.

It is they, after all, who are directly affected by the program and by the refusal of some educational institutions to participate in it. I am advised that approximately 125,000 individual loans have already been made during the brief time that this program has been in operation. It is quite obvious that there have been large numbers of young people who have not felt that it was any imposition on them to say: "I swear that I will not try to overthrow the Government of the United States by force and violence." When it is boiled down, that is what this amounts to.

I cannot believe that a majority of the young manhood and young womanhood of America have joined the cult of cynicism of those few who deplore old-fashioned patriotism. I believe that the heart of our youth is sound. I believe that the majority of our young people are ever ready to prove their patriotism again and again, as they have done in the past, and to cement their loyalty to the Nation with their own blood. I do not believe that the great masses of our young people are disturbed by or are resentful of these provisions of law.

I do not believe the great majority of them are demanding that they be relieved of this provision. I think they consider it an honor to express—on any occasion—their love, devotion, and allegiance to the flag and to the Constitution, and to declare their abhorrence of any cell, group, or organization which professes to overthrow the Government by force and violence.

Mr. BUSH obtained the floor.

Mr. GOLDWATER. Mr. President, I was trying to get recognition so that I might ask a question or two of the Senator from Georgia.

Mr. RUSSELL. Mr. President, does the Senator from Connecticut object to the Senator from Arizona asking me a question?

Mr. BUSH. I do not object, provided I do not lose my right to the floor.

Mr. GOLDWATER. Had I been a little more attentive, I would have observed that the Senator from Georgia was preparing to end his remarks.

I simply wish to ask the Senator from Georgia if he recalls that last year the identical bill was recommitted to committee for further study.

Mr. RUSSELL. Yes. I adverted to that fact earlier in my remarks.

Mr. GOLDWATER. I ask the Senator from Georgia if he does not recall saying, on July 23, of last year, as appears in the CONGRESSIONAL RECORD, volume 105, part 11, page 14097:

> The bill should be recommitted, to give the committee an opportunity to bring back to the Senate a bill which will more adequately deal with the subject.

Does the Senator further recall, on the same day, July 23, the following statement by the distinguished Senator from West Virginia [Mr. RANDOLPH], who is a member of the Committee on Labor and Public Welfare, which appears in the CONGRESSIONAL RECORD, volume 105, part 11, page 14098:

> I, for one, as a member of the Committee on Labor and Public Welfare, would welcome the opportunity for the further consideration of the pending matter. There is always an area of understanding and effective compromise by which Senators can create a new awareness of citizenship responsibility which is in no manner offensive to our youth or to our people as a whole.

I further ask the Senator from Georgia if he does not recall the following statement by the Senator from Oklahoma [Mr. KERR], on July 23, 1959, which appears in the CONGRESSIONAL RECORD, volume 105, part 11, page 14098:

> I should think that we could make no mistake—rather that we would have all to gain and nothing to lose—by recommitting the bill and letting the committee study it further, in the hope that if they report it to the Senate again it will be in a form in which Senators will not be in confusion as between making a selection between chains and fetters which do not exist, and preserving our country, which I know is the determination of every Member of the Senate.

I ask the Senator from Georgia if he does not recall, on the same day, July 23, 1959, a statement by the Senator from South Dakota [Mr. MUNDT] to the same effect, and which appears in the CONGRESSIONAL RECORD, volume 105, part 11, page 14099:

> So I urge my colleagues—and I urge it with all the force at my command—to vote to recommit this measure, so that the committee will be able to reexamine it and, if the committee so decides, it will be able to report the measure to the Senate at a later time, when the Senate will be able to vote on it with much better information at hand and with more specific facts before it.

The last statement I shall read was made by the Senator from Louisiana [Mr. LONG]. I ask the Senator from Georgia if he does not recall this statement, made on July 23, and reported in the CONGRESSIONAL RECORD, volume 105, part 11, page 14100. The Senator from Louisiana made the motion to recommit, and said:

> I submit that if the bill is recommitted, thereafter the committee will be able to report to the Senate a better bill than this one, and certainly one with which we would be better satisfied when we passed it.

My purpose in reading those remarks was to ask the Senator from Georgia, who certainly has no peer in this body as it relates to the intent of motions to recommit—in fact, the Senator's entire knowledge of the parliamentary procedure in this body is unsurpassed by anyone—if it would not be his clear understanding that it was the absolute intent of the Senate that the bill be recommitted for further study.

Mr. RUSSELL. I said earlier in the day that when the bill came before the Senate originally—last year—it proposed to repeal both the loyalty oath and the non-Communist affidavit—the disclaimer of intent to overthrow the Government by force and violence; that it was then amended so as to strike out the repeal of the ordinary oath which is required of ROTC students and others; and then was recommitted to the committee for further study.

I may say that, having made a few remarks when the bill was on the floor last year, a compromise bill was brought to me toward the end of the last session. I had thought that that was what the committee was to consider. But the bill now before the Senate is substantially the bill which was recommitted last year.

Mr. GOLDWATER. I am glad the Senator from Georgia has recognized that fact, because that would have been my next question.

I do not know whether the Senator has read the minority view. If he has, he will find, on page 13 of the report, the statement of the minority. I shall read it in part now and shall discuss it more fully later.

> It is interesting to note that the new bill was introduced on January 28 of this year, and only 5 days later, on February 2, without any hearings being held or any other consideration being given to it, the full committee, after limited discussion, ordered it favorably reported.

Mr. RUSSELL. I regret to say that I had not read all the committee report or the minority views, but I certainly accept the statement which the Senator from Arizona has made. The Senator is an outstanding member of the Committee on Labor and Public Welfare, which has been handling the bill. He should be familiar with it.

Mr. GOLDWATER. I desired to bring to the attention of the Senator from Georgia, early in the discussion, the fact that the committee totally disregarded the instructions of the Senate, instructions which, to me, were so clear that we could not avoid seeing the intent.

The bill as it has been reported to the Senate is substantially the bill which was recommitted last year for further study. Yet not one witness was called, and no hearings were held. There was no discussion other than a very limited discussion within the committee 5 days after the bill was introduced.

I suggest to the Senator from Georgia that this is, indeed, a rather peculiar byplay upon the prerogatives of the Senate and upon its rules. It was the desire of the Senate to have a further study made of the bill, so that we might be able to act intelligently upon it. I am at a loss to understand why the majority and minority members of the Senate committee were denied the right to interrogate witnesses.

I simply desired to bring this matter before the Senate, so that we might have a very clear understanding of the instructions which the Senate issued on July 23 of last year.

Mr. RUSSELL. I had thought that perhaps additional hearings might be held. However, the Senator from Arizona understands the embarrassment which would have come to those who were promoting the bill if hearings had been held. This is an inspired bill, and a demand has been made that this provision be stricken because it is an infringement on academic freedom in this country. The overwhelming majority of the Senate was determined not to strike both provisions. So the committee, I suppose in order to permit just a little infringement on academic freedom, decided to strike the disclaimer and to leave the loyalty oath. Some of those who generated the fight against the requirement perhaps were demanding that both go down—the loyalty oath and the disclaimer of Communist sympathy or the determination to overthrow the Government by force and violence.

Mr. GOLDWATER. I thank the Senator from Georgia for permitting me to ask these questions, and I thank the Senator from Connecticut for having allowed me to interrogate the Senator from Georgia at this point, so that there could be continuity in the debate.

Mr. BUSH. Mr. President, I may say, in the light of what has just been said about the hearings, and so forth, that I, too, wish hearings had been held. I do not know why they were not held; but I feel very confident that if there had been hearings, the bill would be in better favor before the Senate than it is right now. I believe the weight of opinion which would have been brought to bear in favor of the bill would have been very great, indeed, and that there would be a much better understanding among Senators who are opposed to the bill as to why educational institutions and the great leaders in the field of education feel so deeply and strongly about the matter. Unfortunately, they cannot come to the Senate floor. So I agree with the Senator from Arizona that we would be better off; but I agree with him for different reasons.

I agree that we would be better off if hearings had been held so as to point up the matter. But the subject has been rather widely debated in the public press during the past 6 months. It is not as though we were taking up an issue with which the Senate has not been familiar; because, as has been pointed out, the subject was very fully debated last year.

The other thing I should like to say is that the able Senator from Georgia [Mr. RUSSELL], in his remarks, paid many tributes to the Ivy League and to the great colleges which are endowed as private institutions.

I am glad there are some institutions that are so endowed, so that all the educational institutions will not have to be sustained by the taxpayers.

But among the institutions whose presidents or boards of directors have publicly declared their disapproval of the disclaimer affidavit, even though they continue to participate in the student loan program, are those listed on page 6 of the report—some 20 State universities; and I now read from the list: Arizona, Colorado, Connecticut, Delaware, Hawaii, Illinois, Iowa, Kansas, Michigan, Minnesota, New Hampshire, North Carolina.

The University of Notre Dame is also listed, but I presume it is not included in that group.

Also in the group are Pennsylvania, Pittsburgh—the University of Pittsburgh—Rhode Island, the University of Rochester, the University of the South—in Tennessee—Washington, and Wisconsin.

So it is hardly fair to reach the conclusion—and possibly the Senator did not mean to do so—that this is an Ivy League bill or anything of the sort, because it is not.

Mr. RUSSELL. I do not think I used the expression more than once. The Senator said I used it a number of times, and it is possible I may have.

But this movement had its beginning in the colleges which are referred to as the Ivy League colleges. I do not understand the term "Ivy League" to be a term of opprobrium; I regard it as an appellation of reverence. The Ivy League institutions are supposed to be the last word in academic institutions of very high standing. I did not know there was any sensitiveness at all about the use of the term "Ivy League."

Mr. BUSH. No; and evidently I did not clearly express my meaning. Possibly that is my fault.

But the bill is not sponsored chiefly by the privately endowed institutions, by any means, because I have just read from the long list of State universities whose heads are in full agreement with the position taken by President Griswold, of Yale, and other university presidents, all of whom strongly support the bill.

Mr. RUSSELL. Will the Senator from Connecticut yield?

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Does the Senator from Connecticut yield to the Senator from Georgia?

Mr. BUSH. I yield.

Mr. RUSSELL. Why did the Senator decide to give them only half the loaf they requested? They wanted both repealed; but the Senator's bill repeals only one of them. They felt that both the loyalty oath and the disclaimer of Communist Party membership or membership in an organization dedicated to overthrowing the Government of the United States by force or violence were an infringement upon academic freedom. Certainly the Senator from Connecticut, who is a product of one of the great Ivy League universities, one of which is located in his own State, would be expected to support the position taken by those universities.

Mr. BUSH. Of course the whole issue is why is there objection to the Communist disclaimer. It is offensive because it says to the universities, "You are suspect, and you are singled out, from all others who receive benefits from the United States. You are singled out because you are educational institutions and because you teach students and because the educational institutions in this country are suspect." They do not like that, and I do not blame them for not liking it.

Mr. RUSSELL. But the decision to include both the loyalty oath and the Communist disclaimer was a political decision which was made in the Senate, by the Members of the Senate who hold political office. On the other hand, some of those who hold educational office have denounced both the requirement for the taking of the loyalty oath and the requirement for the Communist disclaimer, and they wish to have both of them removed from the law. But the decision to include both of them in the law was a political decision which was made on the floor of the Senate after the bill was brought before the Senate. However, at this time the Senator from Connecticut favors letting one of them remain in the law, but deleting the other one from the law.

Mr. BUSH. Mr. President, in answer to the Senator's inquiry, let me say the universities' position is fully stated by President Griswold in the insertion which I have received approval to make in the RECORD. But the point is that one is an affirmative statement that "I will defend the Constitution of the United States," whereas the second is an affirmation that one has never been subversive and never has been a member of the Communist Party, and never has engaged in any enterprise favoring the overthrow of the Government of the United States. Those are two very different things.

Mr. BRIDGES. Mr. President, will the Senator from Connecticut yield to me?

Mr. BUSH. I yield.

Mr. BRIDGES. The Senator from Connecticut has stated his position very clearly. But if the two requirements are separate and distinct, why did the same group favor striking both provisions from the first bill, S. 819, which we recommitted last year? When S. 819 was first before us, as sponsored by the Senator from Massachusetts [Mr. KENNEDY], it called for striking out both of these requirements; and it was said at that time that the proposal to eliminate both the oath and affidavit had the support of several Ivy League colleges and a handful of other institutions.

Mr. BUSH. My answer is that they consider both unnecessary, because each singles out educational institutions for this treatment. However, they do not find objectionable an affirmative declaration of loyalty. They do find the anti-Communist affidavit objectionable, because it singles them out as possible suspects of having been members of the Communist Party or members of an organization dedicated to the overthrow of the Government of the United States. That is the difference.

Mr. BRIDGES. How does it single them out? The Senator from Connecticut takes an oath, and so does every employees of the U.S. Government.

Mr. BUSH. But the farmers do not take it, and those who receive the social security payments do not take it, and the airlines who are subsidized do not take it.

Mr. BRIDGES. But the farmers and the airlines are not being educated for the defense of the United States of

America. This measure is the National Defense Education Act.

Mr. BUSH. Certainly the airlines are helping to prepare for the defense of the United States; and the farm bill is represented as having a defense angle to it, in order to get it by this body.

Mr. BRIDGES. This measure is the National Defense Education Act, and it is so labeled. In view of this why should not an oath of allegiance and a disclaimer affidavit be included in an act, the purpose of which is stated in its title. Why did the opponents of these provisions of the National Defense Education Act wait for a year before they began to find fault? And when they began to find fault, they wanted to do away with both the loyalty oath and the antisubversive affidavit.

I think they received such an unfavorable reaction from across the country regarding their opposition to the loyalty oath that they now feel it is wiser to favor the loyalty oath. I think they were wrong then, when they opposed both provisions; and I think they are wrong now, when they oppose only one—the disclaimer.

Mr. BUSH. The Senator asked me why we should make the change. I think the best reason is that the affidavit is highly offensive to a highly responsible group of thousands of educators, the heads of many of our great institutions, clear across the land. To me, that is a very good reason.

Mr. BRIDGES. But more than 1,300 colleges and universities have accepted these requirements and are participating in the student loan program. Why should a few educators be so sensitive when the great bulk of the educators of the country have accepted these requirements.

Are the Ivy League colleges particularly sensitive?

Mr. BUSH. No. There are 26 State universities, as listed in the report, that strongly object to it.

Mr. BRIDGES. They are wrong, too.

Mr. BUSH. But they do object to it.

Mr. McCLELLAN. Mr. President, will the Senator from Connecticut yield to me?

Mr. BUSH. I yield.

Mr. McCLELLAN. In all good conscience, what is wrong with requiring such persons to take an oath that they are not against the government of their country? What is fundamentally wrong with that?

Mr. BUSH. There is nothing wrong with it, and the bill contains a requirement for the taking of the oath of allegiance.

Mr. McCLELLAN. But the Senator from Connecticut objects to a requirement that such persons take an oath that they do not favor the overthrow of the Government of the United States by force or violence. What is fundamentally wrong with the requirement that such persons take that oath, when they seek to benefit from this Government? What is fundamentally wrong with the requirement that such a person take that oath before we reach into the pockets of the American taxpayers and spend their money to give that person a personal benefit? I simply cannot understand the opposition. What kind of patriotism have we, today?

Mr. CLARK. Mr. President, will the Senator from Connecticut yield?

Mr. BUSH. I yield.

Mr. CLARK. Mr. President, as a member of the Committee on Labor and Public Welfare, I should like to set straight a few facts, for the RECORD.

In the first place, there are only eight Ivy League colleges. It is true that all of them support the present proposed legislation. There are 131 educational institutions whose presidents, faculties, or boards of trustees have objected to the disclaimer affidavit requirement.

Second, the vote by which the bill was recommitted last year was far from overwhelming. It was by a vote of 48 to 42.

Third, the recommittal motion, as I recall—and the Senator from Arizona will correct me if I am wrong, because he has the RECORD before him—was a straight recommittal motion.

Fourth, the Senate Committee on Labor and Public Welfare, and its various members, in many an informal discussion, in which I participated, including several which I had with the distinguished Senator from Arizona, gave this question careful thought during the remainder of the last session, discussed the subject with many educators, receiving voluminous amounts of correspondence on the subject, and brought the matter, under the leadership of the junior Senator from Massachusetts, to a full committee meeting, where we had a quite extensive discussion as to what should be done. I can remember the points raised at that discussion by the Senator from Vermont, the Senator from Arizona, and the other 2 members of the minority, who did not agree with the 11 members of the majority in sending back to the floor a far different bill than the one that was rejected last year.

I regret that I cannot agree with the Senator from Arizona that the Committee on Labor and Public Welfare did not give careful consideration to the bill which has been brought out and is now on the Senate floor. I think it did.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. BUSH. In just a moment.

In answer to the question directed to me by the distinguished Senator from Arkansas, I should like to point out the difference once more between the oath of allegiance and the affidavit, because the Senator apparently is not quite familiar with the difference between the two oaths under question.

Mr. McCLELLAN. I read them. I saw them in the report. I think I know the difference.

Mr. BUSH. I should like to point out to the Senator and for the RECORD that there is a very important difference. Some persons cannot see it; some can. Those who can, feel it very deeply, and they are just as patriotic and loyal to this country as those who do not see it. I think it is due to a difference in attitude. It may be due to a difference in background. But it is not due to a difference in loyalty to the United States.

In the one case the money is denied unless an individual has executed and filed with the Commissioner an affidavit, a signed statement, that he does not believe in and is not a member of and does not support any organization that believes in or teaches the overthrow of the Government of the United States by force or violence or by any illegal or unconstitutional method.

In other words, he has to say, "I am suspect. I have to sign an affidavit. Nobody else has to do it who gets funds from the Federal Government, but because I am at an educational institution, I have to sign an affidavit saying that I have never been a member of any party or belonged to any organization that advocates the overthrow of the Government."

But the difference between that affidavit and the oath of allegiance is very great. The oath of allegiance is affirmative. It says, "I am devoted to the United States. I do swear that I will bear true faith and allegiance to the United States and will support and defend the Constitution and the laws of the United States against all enemies, foreign and domestic." It seems to me that is an affirmative position for a man to take, and that is all he ought to be asked to take. If he is a Communist or has been a member of a Communist organization, he is going to lie about it if he wants to get his scholarship. But why should we want to offend the heads of institutions and faculties? Hundreds of them have sent in petitions for this repeal, because they say the affidavit is extremely offensive to them.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. BUSH. I yield to the Senator from Arkansas.

Mr. McCLELLAN. Following the logic of the statement the Senator has made, is there not an implied assumption that every time we ask anyone to take an affirmative oath, or every time I am asked to take the oath of office, I am suspect, because I have to take the oath of office?

Mr. BUSH. No.

Mr. McCLELLAN. What is the difference?

Mr. BUSH. There is a great deal of difference.

Mr. McCLELLAN. There is not a difference in the world.

Will the Senator yield further?

Mr. BUSH. I yield.

Mr. McCLELLAN. Is the Senator willing to tax the American people to educate any youth or anyone else for the purpose of defending the U.S. Government when that person is sensitive to taking an oath that he is not a member of and does not support an organization which has as its purpose the overthrow of this Government?

Mr. BUSH. The difference is that between an affirmative position and being offended by being suspected of having been connected with the Communist Party. These persons are sensitive about being singled out from all others getting funds from the U.S. Government and being told, "You must sign an affidavit saying you are not a member of

the Communist Party or any other organization which advocates the overthrow of the U.S. Government."

Mr. McCLELLAN. I am willing to do it. I am willing to take an oath in the Senate, and before God, that I do not subscribe to and do not believe in the overthrow of my Government by force or violence. But I am unwilling to say that I will tax the American people to support someone in education, in the defense of this country, who is unwilling to say that he is a patriot to the extent that he is not a member of any organization and does not support any organization that believes in the overthrow of this Government by force or violence.

Mr. BUSH. Certainly, nobody will question the loyalty of the Senator from Arkansas.

Mr. McCLELLAN. I do not see how we can reconcile our patriotism by taxing the American people to educate, for the national defense, those who are unwilling to take an oath that they do not belong to such an organization.

Mr. BUSH. I suggest that they are willing to take an affirmative oath of allegiance to defend the Constitution and this form of government.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. BUSH. Yes.

Mr. JAVITS. This argument did not appeal, not only to the heads of colleges, but to the Senate, I may point out. What has not been brought out is that the Senate voted, by a vote of 46 to 45, to amend the measure exactly as we offered. The only reason why the amendment went by the boards was, when there were further arguments, very much of the type we are hearing this afternoon, the Senate voted to recommit, 46 to 45. The Senate thought it was a fair solution of the problem.

In addition, Mr. President, so has the President of the United States thought this way. In addition, so has the Vice President of the United States.

Mr. President, I should like to make these facts very clear for the RECORD. This happened after the Senate debate and after these votes. On December 12, 1959, the New York Times headlined the story, "Eisenhower Hits Student Aid Oath." On November 26 the New York Herald Tribune headlined the story, "NIXON Opposes Disclaimer in Student Loans." And the Governor of my own State, Governor Rockefeller, took the same position on this matter last year, in December 1959. The newspaper story is headed "Rockefeller Urges Red Oath Repeal."

Mr. BRIDGES. Mr. President, will the Senator yield?

Mr. JAVITS. I do not have the floor. I am not through.

Mr. BUSH. Mr. President, I yield to the Senator if I may do so without losing the floor.

Mr. BRIDGES. The Senator from New York has quoted President Eisenhower, Vice President NIXON, and Governor Rockefeller. Does not the Senator think they can be wrong once in a while?

Mr. JAVITS. They certainly can be wrong once in a while.

Mr. BRIDGES. Will the Senator——

Mr. JAVITS. If I may answer the question, yes, they can be wrong once in a while. They are human beings, like the Senator from New Hampshire, who can be wrong every once in a while also.

The point is that this whole matter has been put upon the narrow basis that some highbrow, esoteric college presidents or college professors have decided they do not like this, and some fussy students have decided they will not take the money in this way.

The President of the United States may be wrong, but he is a pretty good authority. He is cited as being a pretty good authority on both sides of the aisle. So is the Vice President. So is the Governor of my own State.

I am simply buttressing the authority which has already been cited by the Senator from Connecticut with some authority which is entitled, certainly, to receive respectful attention from the Senate. The authority could be wrong, but it is entitled to receive respectful attention from the Senate.

Mr. BRIDGES. Mr. President, I desire to ask the Senator from New York another question. Who does the Senator think stirred up this controversy, anyway? Does the Senator think the President of the United States, the Vice President, or Governor Rockefeller, raised this uproar after we passed the act in good faith and it worked perfectly for a year. Does the Senator think it was stirred up by some "fussy" professor and some "fussy" students, or does the Senator think it developed out of thin air?

Mr. JAVITS. I think this is one of the essences of our society. People who are dissatisfied with a certain thing stir up the question, and if their position appeals to reason it begins to appeal to us, to other officials of the Government, and to people generally, and then something is done about it.

I wish to point out, Mr. President—and I am sorry to intrude upon the Senator's time, but I think it is pertinent to the argument—that the National Defense Education Act was passed not for the benefit of individual young fellows who are meritorious. The act was passed to obtain the best talent in the United States to help fight the cold war. This is in the national interest and in the national service.

I say that the disclaimer affidavit is not worth losing a whole bunch of these young people, who are bright and able, because their stomachs turn at this particular oath. It is not worth it to lose them, for we have on the statute books the Smith Act, and the Smith Act says that any person is guilty of a felony if he advocates the overthrow of the Government by force.

Why should we write the provision in this law, where it may deprive us of the very talent which we are trying to win to our side? I think that is the essential argument which has induced me to join in favor of the bill, as it was amended.

I thank my colleague for yielding.

Mr. GOLDWATER. Mr. President, will the Senator yield to me?

Mr. BUSH. I yield for a question.

Mr. GOLDWATER. Mr. President, I merely wish to set the record straight.

We have been talking about the number of colleges and universities which have opposed this provision. I am sure the Senator would not object to my questioning him in regard to the matter.

Is it not true that as of May 12, 1960, which is the latest date I have seen for a list—there may be a revamped list which would bring the figures more up to date—the institutions which have withdrawn from the student-loan program because of the disclaimer affidavit total 18?

Mr. BUSH. Yes.

Mr. GOLDWATER. The institutions, which have declined to participate in the student-loan program because, the disclaimer affidavit, total eight.

Mr. BUSH. That is correct.

Mr. GOLDWATER. The institutions whose presidents or boards have publicly stated disapproval of the disclaimer affidavit, but which institutions continue to participate in the student-loan program, total 85?

Mr. BUSH. I will say to the Senator, when we add all those up, we get a very high percentage of the college and university population of the United States.

Mr. GOLDWATER. I was about to come to that question. This totals about 10 percent of the total university population in the United States. [Laughter.]

Mr. BUSH. I would like to see the Senator's proof of that statement.

Mr. GOLDWATER. If my memory serves me correctly, there are some 1,300 institutions of higher learning in this country.

I had not finished my questioning. If we add to the number I have already discussed the 20 institutions whose faculties have expressed disapproval of the disclaimer affidavit, we have a total of 131, which in my book is approximately 10 percent of such institutions—10 percent is not an overwhelming percentage, no matter whether one is in politics or in the field of colleges objecting.

I desire to make that perfectly clear. I am sure the Senator would not object to it, because the actual number of colleges and universities which have taken what we might call the extreme action in this case is 26, out of some 1,300. There are 85 which simply detest the daylights out of the disclaimer affidavit, but they surely do like the money, and they continue to take it.

There are 26, I will say—and these include some great colleges and universities—which have the courage of their convictions and which have turned it all down.

If the Senator is not too impatient and will indulge me, I have another question.

Mr. BUSH. I shall be glad to yield to the Senator, but I should like to reply to the comments the Senator has posed as a question in regard to the college and university population and so forth.

I do not think the Senator has made a very good case for the 10 percent. At any rate, the Senator has neglected also to point out that other organizations protest this affidavit and support the bill, and those include some pretty big constituencies. The Senator will observe

that those are listed at the top of page 7 of the report. They include the following:

The American Association for the Advancement of Science.

The American Association of Land-Grant Colleges and Universities.

The American Association of University Professors.

The American Civil Liberties Union.

The American Council of Learned Societies.

The American Council on Education.

The American Jewish Congress.

The Association of American Universities.

The Association of Graduate Schools.

The National Council of Churches of Christ.

This does not sound like such a narrow area of support, I will say to my very dear friend. It sounds to me like a very broad area of support.

Finally, there is the New England Society of Newspaper Editors. I do not know what is the matter with the American Society of Newspaper Editors, but they probably did not get around to this, since they were so busy politicking in Washington, D.C.

It seems to me the area of support is very, very broad indeed among the people who are the heads of these organizations, as well as the members of these organizations. Certainly these are intelligent people.

Mr. President, I do not desire to monopolize the floor. I shall be glad to answer one more question for the Senator.

Mr. GOLDWATER. Mr. President, will the Senator yield at that point?

Mr. BUSH. I yield.

Mr. GOLDWATER. I did not include the associations and organizations purposely, because if I had done so I would have had to mention, on the opposite side, the American Legion and the Veterans of Foreign Wars. Those may not be very large organizations, but I think the American Legion alone probably has two or three times the membership of all the groups my friend has mentioned. If the American Legion does not have, we can add in the Veterans of Foreign Wars, as well as a large number of religious organizations and other associations.

Mr. BUSH. I will say to the Senator, like the Senator from Arizona, I am a member of the American Legion and of the VFW. I do not expect to be thrown out for taking the position I take today, nor do I believe that the officers of those organizations necessarily speak for the large constituencies.

Mr. GOLDWATER. I suggest, then, we could eliminate this whole area of argument by saying that none of the heads of these organizations speak for 100 percent of their membership.

Mr. BUSH. That is probably true.

Mr. GOLDWATER. Any more than any college presidents or college professors speak for any large number of students.

I have knowledge of an organization in Washington, D.C., which represents students all over the country who fervently support the disclaimer affidavit and the oath.

I think we have to consider not simply what the college presidents or the college students desire to do, or what the American Legion or the American Civil Liberties Union desires to do, but we must consider what is best for the United States of America, as determined by the Senate in the debate.

Mr. BUSH. I am impressed when I see a petition signed by 98 percent of the members of the faculty of Wesleyan University of Middletown, Conn.—98 percent of the members of the faculty signed the petition, which gives me some conviction that the faculties generally in that area, at least, are sympathetic with the bill which is before us now.

I believe the colleges and universities we talk about in the report represent a very high percentage of the population in the academic community.

In conclusion, I can understand the difficulty that some of my friends have with this question. The question is one of the spirit and of the mind. It is very difficult to explain why a man in the academic world feels as he does about that which is so precious to him, called academic freedom, but it is wrapped up in the argument that we are having this afternoon. He does not want to be singled out or to have his associates or his students singled out as suspect because they are members of an educational institution of higher learning. They resent that, and on their behalf I resent it. That is the reason that I take the position that I take this afternoon. I do not believe that the United States will be one bit more in danger if we pass the bill. On the other hand, I believe we shall be better off because we shall bring back into this program some of the institutions which are very able to contribute to it through their faculties.

So I conclude by expressing the very strong hope that the bill will pass today.

Mr. President, I ask unanimous consent that the order authorizing the insertion of the article by President A. Whitney Griswold, of Yale, be rescinded, and I ask unanimous consent that the article be inserted at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LOYALTY: AN ISSUE OF ACADEMIC FREEDOM

(By A. Whitney Griswold)

(President Griswold, of Yale, explains why many universities, including his own, have refused Federal funds for student loans in protest against loyalty affidavits.)

A debate of large dimensions is going on over the issue whether loyalty oaths and affidavits shall be required of college students seeking Federal loans. But the central issue is not always entirely clear to those directly involved, and is blurred and confused in the public mind. It is not a question of being for or against the Constitution, for or against loyalty. It is a case of two different groups of Americans talking at cross purposes about the same thing—namely, the security and welfare of the Nation and the means of strengthening both through higher education. These are the only terms in which the central issue of the controversy can be accurately identified and understood.

Since the National Defense Education Act went into effect a year ago last September, the great majority of the Nation's colleges and universities have raised their voices in criticism of one particular provision. This is the disclaimer affidavit that accompanies the oath of allegiance, and that is required of all recipients of the act's benefits. The affidavit requirement appears in title X, section 1001(f), the full text of which reads as follows:

"No part of any funds appropriated or otherwise made available for expenditure under authority of this Act shall be used to make payments or loans to any individual unless such individual (1) has executed and filed with the Commissioner an affidavit that he does not believe in, and is not a member of and does not support any organization that believes in or teaches, the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods, and (2) has taken and subscribed to an oath or affirmation in the following form: 'I do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic.' The provisions of section 1001 of title 18, United States Code, shall be applicable with respect to such affidavits."

Individually, and through such representative organizations as the Association of American Colleges, the Association of American Universities, the American Association of Land Grant Colleges and State Universities, the American Association of University Professors, and the Association for Higher Education of the National Education Association, the colleges and universities have protested this affidavit and have urged its repeal.

The Government has not been unresponsive to their views. Last winter the Secretary of Health, Education, and Welfare, Mr. Flemming, testified in their support, and Senators Clark, of Pennsylvania, and Kennedy, of Massachusetts, introduced a bill repealing section 1001(f) in its entirely. Hearings on this bill, which had the approval of the Department of Health, Education, and Welfare, were held before the Senate Committee on Labor and Public Welfare in April and May, and the committee reported the bill favorably by a vote of 12 to 3.

After debate in late July, however, the bill was amended to eliminate the disclaimer affidavit but retain the oath of allegiance, and then sent back to committee. Finally, on December 2, on the eve of his departure for his trip abroad, President Eisenhower spoke out categorically in favor of the affidavit's repeal. There the matter rests awaiting reconsideration by Congress when it assembles next month.

The colleges and universities are not protesting the oath of allegiance. They do question its appropriateness as a condition to financial aid for college students, as distinct from its traditional usage in conection with the assumption of a public office or trust; and they also question whether more general use may not wear it thin.

Too, they are mindful of the historic fact that any oath required by the State can be misused. Nevertheless, they accept the oath of allegiance. By itself the oath is no more than an affirmation of the duties every citizen owes to his country, whether he takes the oath or not. It is thus coextensive with and expressive of the basic law of the land. The disclaimer affidavit, on the other hand, extends beyond the basic law of the land into the realm of belief and conscience, where definitions are vague and actions become matters of debate. What the colleges and

universities are objecting to is this disclaimer affidavit.

Unfortunately, these are not the terms in which the issue is commonly presented. Although the position of the colleges and universities is extensively documented in the printed hearings on the Clark-Kennedy bill and in the CONGRESSIONAL RECORD, and has attracted widespread press attention, what comes through to the public is an oversimplified impression of fastidious intellectualism finding fault with the law, of the egghead refusing to accept the common lot of the citizen and the patriot.

What's wrong with loyalty oaths? We have all pledged allegiance to the flag as schoolchildren. Everyone who takes out a passport swears to uphold the Constitution. Why should anyone hesitate to take such an oath in any circumstances? Why should any American object to disclaiming beliefs abhorrent to all Americans? These and less temperate questions imputing subversiveness and disloyalty are evidence of a wide gulf of misunderstanding between the public and the colleges and universities.

A natural reason for the position of the colleges and universities is that no one enjoys being doubted when everyone else is trusted. Yet this is the way the colleges and universities are made to feel by the disclaimer affidavit. The affidavit originated in the Taft-Hartley Act. From this act it was written into the National Science Foundation Act of 1950, and then into the National Defense Education Act of 1958. Farmers, veterans, and beneficiaries of social security (to say nothing of other recipients of Federal benefits, such as the officials and employees of railroads, steamship lines, and airlines) have never had to make a disclaimer affidavit. In 1959 it was dropped out of the Taft-Hartley Act. This means that the only recipients of Federal benefits to whom it now applies are students and teachers in colleges and universities.

To the latter, this seems like the short end of the stick. They do not see why their students and faculties should be treated differently from any other individuals, groups, professions, or occupations that receive Federal subsidies or loans. And it is all the harder for them to appreciate the justice of this when they reflect on the role they are being asked to perform and the manner in which they are being asked to perform it. In one and the same breath they are told that they are the Nation's first line of defense—and the Nation's poorest security risk. They are called upon to put forth their best effort in the name of national security; yet they alone are obliged to submit to certain qualifications concerning their loyalty.

To them, this seems worse than discrimination in the ordinary sense of the word. It seems like a vote of no confidence from the very party that is asking them to come to its aid, at the very moment and in the very circumstances in which that aid is most urgently needed.

Is this the result of a native anti-intellectualism that stubbornly survives even the most serious crises? Whatever its origin, the fact is that the most important act of Congress to identify education with the national interest since the Land Ordinance of 1785 and the Morrill Act of 1862 singles out higher education from all professions and occupations as a dubious loyalty risk—which goes far to explain the objections of the colleges and universities.

Feeling as they do, the colleges and universities are all the more averse to being parties to the discriminatory practice. Yet this, too, is forced upon them by the terms of the National Defense Education Act. In the student loan program the institution is required to invest 10 percent of its own funds in each loan, and to administer the disclaimer affidavit and oath of allegiance to each recipient.

Thus the institution not only becomes an active agent in administering an affidavit of which it does not approve; it also is forced to adopt a double standard for its students, as only those who need financial assistance are required to take the affidavit and oath. This places the institution in a moral dilemma which none enjoys, and which a number have decided they could resolve only by refraining from or withdrawing from participation in the loan program.

It is true that repeal of the affidavit will not wholly relieve the colleges and universities of the discriminatory practices of which they complain. Students and faculty accepting benefits under the terms of the National Defense Education Act will, presumably, still be required to take the oath of allegiance, while others will not. But, as already pointed out, the colleges and universities regard the oath of allegiance as a far less onerous requirement than the disclaimer affidavit, and one that, in present circumstances, is supportable.

Another and purely practical reason for the objection of the colleges and universities to the disclaimer affidavit is their belief that it is inherently futile. They know that similar affidavits have led to some convictions for perjury. But they do not think the affidavit can be relied upon either as a safeguard against disloyalty or as a means of inculcating loyalty.

That no truly subversive or treasonous person would hesitate to use it—or the oath of allegiance, for that matter—as a cloak for his intentions has been proved, rather than disproved, by the perjury convictions.

On the other hand, the affidavit cannot create loyalty. Loyalty cannot be coerced or compelled. If men are born loyal, the only kind of loyalty that survives infancy in any thinking person is the kind that survives curiosity and withstands criticism and even doubt. Such loyalty may and usually does have an instinctive base; but if the opportunity to satisfy curiosity and answer criticism is limited, or qualified, or made conditional upon the acceptance of restraints, the instinctive base of loyalty is undermined.

The only loyalty upon which true reliance can be placed is the kind evoked by the inherent virtue of the cause or institution or individual toward which the loyalty is felt. In creating this kind of loyalty, oaths of any sort are of little value compared to the devotion of a man who has been free to examine and evaluate the evidence and, on the strength of that experience, in Cromwell's words, "knows what he fights for and loves what he knows."

While the oath of allegiance may have the effect of recalling or stimulating such a sense of loyalty in the person who takes it, that effect is hardly strengthened by the accompanying affidavit. When a man pledges his allegiance to the Government and the Constitution, either we take him at his word (in which case the disclaimer affidavit becomes tautological) or we doubt his word and say to him (as the affidavit seems to say), "Even though you have just affirmed your allegiance to the Government and the Constitution, you are still not to be trusted." In the latter case the affidavit implies perjury in taking the oath of allegiance. In either case it is difficult for the colleges and universities to see how it will inspire loyalty in the rising generation.

The question now presents itself, Why are the colleges and universities objecting to the affidavit in the National Defense Education Act, when for nearly a decade they have acquiesced in it in the National Science Foundation Act?

The answer is that, although they have not liked it in either act, in the National Science Foundation Act the affidavit was the responsibility of the individual receiving the benefit. But in the National Defense Education Act, through investment in the loan program and administration of the affidavit, the institution itself is involved.

Again, the broader scope of the National Defense Education Act, its trailblazing character, and its weightier impact on the younger generation make the affidavit stand out more prominently as a matter of principle. It was also felt that the National Defense Education Act might be establishing the pattern for Federal support of higher education and setting the example for governmental relations with the colleges and universities for the indefinite future; and in this context matters of principle assumed special importance. When the framers of the National Defense Education Act followed the precedent of the Taft-Hartley and National Science Foundation Acts, and the disclaimer affidavit seemed about to be frozen into the system, the colleges and universities decided the time had come to make their opposition known.

But the case of the colleges and universities rests on more than mere discomfort at being objects of and parties to discriminatory practices. One possible remedy for any such practice is to generalize it. If every recipient of Federal benefits and all students in higher education were required to make the affidavit, the colleges and universities could no longer plead that they were suffering from discrimination.

The truth is they would find this cure no better than the disease. Justice Holmes once said that questions like this were better answered by a page of history than a volume of logic. The fundamental position of the colleges and universities is rooted in history, and it is only through an understanding of that history that we can fully understand what they are driving at today. The gravamen of their case against the affidavit is that, in juxtaposition to the affirmative oath of allegiance, it distorts the combination and imbues it with the nature of a political test oath.

This is the historic way in which such oaths have been constructed. They invariably begin with simple declarations or affirmations of allegiance, like the ancient oath of fealty or the present oath of allegiance. They are then expanded (as by the disclaimer affidavit) to include more and more avowals or disavowals of beliefs, doctrines, and associations, as well as denials of unpopular or criminal acts. Thus they project the authority of the state into the realm of belief and conscience where, according to our political tradition, it has no business; and the individual may be forced to acquit himself of crimes and offenses left so vague that he can be convicted on the mere appearance of evil if he cannot be convicted of its practice.

Experience has taught us lessons about political and religious test oaths which are all too easily forgotten. It was under the scourge of these oaths that our Protestant ancestors emigrated from England to settle in America; that our Catholic ancestors lost their lands and lives; that Sir Thomas More died telling his daughter, "It was a very hard thing to compel me to say either precisely with it against my conscience to the loss of my soul, or precisely against it to the destruction of my body"; that Puritan dissenters and Quakers went to jail, sat in the stocks and had their ears cut off.

The oaths that caused these sufferings grew to be over a page long, and, in the words of Sir Frederick Pollock, became "swollen with strange imprecations and scoldings," until in 1868 they were at last abolished in favor of the simple oath of allegiance.

"I, , do swear that I will be faithful and bear true allegiance to Her Majesty

Queen Victoria, her heirs, and successors, according to law. So help me God."

These things are easily forgotten, but colleges and universities, where history is studied and the past is ever present, remember them. They were fresh in the minds of the framers of our Constitution, fresh enough for Alexander Hamilton to denounce test oaths as "a subversion of one great principle of social security, to wit: That every man shall be presumed innocent until he is proved guilty."

Their effect, said Hamilton, "was to invert the order of things, and instead of obliging the state to prove the guilt, in order to inflict the penalty, it was to oblige the citizen to establish his own innocence to avoid the penalty. It was to excite scruples in the honest and conscientious, and to hold out a bribe to perjury." All this, Hamilton concluded, was "repugnant to the true genius of the common law" and "unknown to the Constitution. * * *"

The colleges and universities recall more recent experiences with test oaths than those which began with the marital troubles of Henry VIII. They recall the oaths of religious conformity that bound the early American colleges in the 18th century and were not finally sloughed off until the 19th (by Oxford and Cambridge in the middle of the 19th)—oaths that militated against Catholics and Protestant sects dissenting from the established religion of the institution.

They recall, too, the loyalty oaths imposed by Congress in the Reconstruction period after the Civil War, of which Lincoln declared: "I have found that men who have not even been suspected of disloyalty are very averse to taking an oath of any sort as a condition to exercising an ordinary right of citizenship."

In the words of the Supreme Court (in *Ex Parte Garland*), "All enactments of this kind partake of the nature of bills of pains and penalties, and are subject to the constitutional inhibitions against the passage of bills of attainder, under which general designation they are included."

For the benefit of a generation which, fortunately for it, has less knowledge of them than the men who drafted the Constitution, bills of attainder were arbitrary bills which extinguished the civil rights of an individual and enabled the state to impose upon him such penalties as loss of property, prison, and death, without benefit of trial by jury. Bills of attainder and test oaths grew up together in the same country, in the same period of history and, although they are not identified with one another in modern law, they partook of the same essence in their day and served the same brand of justice.

That oaths of allegiance, even without the objectionable features of the historic test oaths, can be misused as instruments of oppression was proved by Hitler. He merely required that civil servants and professors swear allegiance to him. That was all he needed to give the semblance of legality to whatever coercive steps he chose to take to compel their adherence to the Nazi Party line.

It was in no small measure his use of the oath that drove many German university professors into exile—among them many of the leading nuclear scientists who enabled the United States to produce the atomic bomb instead of Germany. They and their fellow exiles in other fields of learning, finding posts in American universities, have testified to the dangers of all oaths, however innocuous their beginning, in a way that has undoubtedly made their American colleagues sensitive to those dangers.

The colleges and universities do not believe that the oath of allegiance in the National Defense Education Act will be used as Hitler used his oath of allegiance. Indeed, as I have already said, they have accepted it. But the German experience, with its peculiarly direct and intimate significance to our college and university community, and that community's continually fresh memory of the political and religious test oaths in Anglo-American history, make it that much more anxious lest the disclaimer affidavit bend the present oath of allegiance in the direction of either. Hence it is that much more critical of the affidavit and more strongly in favor of its repeal.

Underlying this concern with test oaths, in fact underlying the whole position of the colleges and universities in this controversy, is their concern for freedom. For centuries, in Europe as well as in England and America, they have struggled for the right to pursue learning for its own sake without interference by church or state. They have done so not because they thought society owed them this right as a mark of respect or a special privilege, but because they have regarded it as a functional necessity identical with freedom of the press and similar to freedom of speech, freedom of religion, and freedom of assembly.

In this historical perspective, they see a consistent use of oaths like the disclaimer affidavit as instruments of coercion, conformism, and oppression, which are enemies of learning as much as they are opposites of freedom. If, now, our colleges and universities are to serve the cause of freedom and discharge the solemn duties with which the public, through the National Defense Education Act, has vested them, they can do so effectively only through procedures consistent with both freedom and learning.

Again and again history affords object lessons of what happens to learning when it is denied the freedom that is its natural medium. Nazi Germany is a glaring example. A nation that cannot trust its intellectuals cannot trust itself. A people that is afraid to expose its political and social institutions to the curiosity and criticism of the rising generation is not free; by whatever method it whispers this fear to itself, it shouts its insecurity to the world.

It is not the disclaimer affidavit that will make our colleges and universities bulwarks of our security, nor even the oath of allegiance, which they accept. It is our trust in them to pursue the course the Nation has set for them—a course they can pursue in freedom and in no other way.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12117) making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes, and that the House receded from its disagreement to the amendments of the Senate numbered 4 and 6 to the bill, and concurred therein each with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL PLACED ON CALENDAR

The bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes, was read twice by its title and placed on the calendar.

DEPARTMENT OF AGRICULTURE AND FARM CREDIT ADMINISTRATION APPROPRIATION BILL—CONFERENCE REPORT

Mr. RUSSELL. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12117) making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of June 15, 1960, p. 12725, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the report was considered and agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 12117, which was read as follows:

Resolved, That the House agree to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12117) entitled "An act making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes",

That the House recede from its disagreement to the amendment of the Senate numbered 4, and concur therein with an amendment, as follows: In lieu of the figure "1962" in said amendment insert "1963".

That the House recede from its disagreement to the amendment of the Senate numbered 6, and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment insert:

"CONSTRUCTION OF FACILITIES

"For construction of facilities and acquisition of the necessary land therefor by donation or exchange, $2,550,000, to remain available until expended."

Mr. RUSSELL. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate numbered 4 and 6.

The motion was agreed to.

Mr. RUSSELL. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a comparative table of appropriations for 1960, and estimates and amounts recommended in the bill for 1961.

There being no objection, the table was ordered to be printed in the RECORD.

Comparative table of appropriations for 1960 and estimates and amounts recommended in bill for 1961

REGULAR ACTIVITIES (TITLE I)

[9] Includes $20,000,000 contingency authorization provided in 1960 Appropriation Act, but not requested in budget, 1961.
[10] In addition, contingency of $40,000,000 authorized for 1961.

ELIMINATION OF AFFIDAVIT OF DISLOYALTY

The Senate resumed consideration of the bill (S. 2929) to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief.

Mr. GOLDWATER. Mr. President, I should like to keep the record straight, and we are going to try to keep it straight as we go along. I should like specifically to refer to other areas where education is provided with Federal funds and where oaths are required. I read from the Congressional Digest of April 1960, volume 39, No. 4:

> At the request of the Senate Committee on Labor and Public Welfare, the Legislative Reference Service of the Library of Congress performed a survey of all the departments and most of the agencies of the Federal Government to determine which ones require loyalty oaths or disclaimers of subversive affiliation.

I am not going through all of these statements, but only enough in order to keep the record straight. We will put more in as the record is bent a little.

> II. OATHS AND DISCLAIMERS SPECIFICALLY REQUIRED BY STATUTE
>
> NATIONAL SCIENCE FOUNDATION
>
> The only requirement of this nature administered by the National Science Foundation is contained in section 16(d) of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861–1875), which requires a loyalty affidavit and oath of allegiance from persons receiving payments under foundation scholarships or fellowships.

Mr. BRIDGES. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. BRIDGES. Is it true that the National Science Foundation has been in operation for 10 years?

Mr. GOLDWATER. Just about 10 years.

Mr. BRIDGES. And does the United States of America, through the National Science Foundation, provide education for certain young people?

Mr. GOLDWATER. That is correct.

Mr. BRIDGES. In all that period of time has the Senator from Arizona heard any great objections to that program?

Mr. GOLDWATER. The Senator has never heard any complaint about it.

Mr. BRIDGES. As a matter of fact, following the subject a step further, the National Science Foundation requirements are very similar to those of the National Defense Education Act. There is no legislation introduced relating to these provisions in the National Science Foundation Act, which was enacted in 1950. And the National Defense Education Act was in effect about a year before all the furor started. Is this not correct?

Mr. GOLDWATER. The Senator is correct.

Mr. BRIDGES. I compliment the Senator. He is always forthright and courageous. I am glad that he mentioned the fact that a national organization of college students exists in this country with headquarters here in Washington and with representatives in colleges throughout the country. This organization is composed of young men and women who stand up without fear and do not hesitate to take the oath of loyalty to the United States or to sign an anti-Communist affidavit or disclaimer. I salute the membership of this organization.

Mr. GOLDWATER. Mr. President, to proceed a little further, when the year 1960 ends I will have visited with 55 different educational organizations at the student level, either in a classroom or in my own office, and such a small number of those people express dissatisfaction with this program that it would be impossible for me to give the complaints any value which would approach 1 percent.

In reading through this list I see the name of my own school. It is not my alma mater because I never graduated from a college. I refer to the University of Arizona. I recall speaking at the annual meeting of the Arizona Pioneer Historical Society at the university last year, and the president sat next to me. I had gone through my library, remembering that I had it in my possession, and I found a loyalty oath and disclaimer that had been sworn to by that illustrious American, John C. Fremont, before he became Governor of Arizona. In fact, it was before 1880. I jokingly said to the president, who is a good friend of mine, that if it was good enough for a Governor of Arizona, it was good enough for a student.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. CLARK. Did the affidavit which John C. Fremont took have reference to the Communist Party?

Mr. GOLDWATER. I do not recall that it spelled out Communists, but it talked about advocating the overthrow of the U.S. Government. I am trying to find it. When I find it I will put it in the RECORD and the Senator can see it. It is a much more substantial oath than the one we are asking students to take.

To continue my remarks concerning the study that was made by the Legislative Reference Service of the Library

of Congress under the heading "Department of Defense," we find the following:

Section 624 of the Department of Defense Appropriation Act, 1959 (recurring appropriation act provision) reads:

"No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, reserve officers training corps, who has not executed a certificate of loyalty oath in such form as shall be prescribed by the Secretary of Defense."

Under the Department of Health, Education, and Welfare regulations under the Vocational Rehabilitation Act it is provided that in order to be eligible for a traineeship award under section 7(a)(3) of the act, an individual must "have executed and filed with the Office of Vocational Rehabilitation an affidavit that he does not advocate, and, is not a member of any organization that advocates or teaches, the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods."

Under the regulations of the Public Health Service Act there is a requirement for a loyalty oath and disclaimer in order to be eligible for regular Public Health Service Research fellowships and for National Institutes of Health traineeship awards.

My whole purpose in reciting the few cases that I have recited is to point out that not only are there precedents under acts which carry the words "national defense" in their titles, but that it is also the historic procedure used in government all through the country. It is nothing new to require students to take such an oath. I cannot for the life of me understand why some of our educators—and I might say some of them are among our most learned and highly respected educators—have taken the attitude that they have taken on this particular subject. That is the extent of the remarks I care to make on this subject. I suggest the absence of a quorum.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. GOLDWATER. I withhold my suggestion. I yield to my friend the Senator from South Carolina.

Mr. THURMOND. I should like to ask the distinguished Senator if it is not true that every member of the staff and every Member of the Senate and House signs an affidavit which is substantially the same as the non-Communist affidavit provided in the National Defense Education Act?

Mr. GOLDWATER. I think it is substantially the same. We swear to defend the Constitution against all enemies, foreign and domestic. I certainly believe that covers it.

Mr. THURMOND. The language of the affidavit which is subscribed to by every staff member in the Senate is as follows:

No person shall accept or hold office or employment in the Government of the United States or any agency thereof, including wholly owned Government corporations, who—

(1) advocates the overthrow of our constitutional form of government in the United States;

(2) is a member of an organization that advocates the overthrow of our constitutional form of government in the United States, knowing that such organization so advocates;

(3) participates in any strike or asserts the right to strike against the Government of the United States or such agency; or

(4) is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or such agencies, knowing that such organization asserts such right.

Is not this oath substantially similar to the oath required under the National Defense Education Act? If that is the case, if every person who works for the Government of the United States, including every secretary who works for a Member of Congress, takes such an oath, why should there be any question about anyone who is to get a grant or a loan to go to school to pursue further learning in an institution making such an affidavit? Why should there be any question about any student or any teacher making such an affidavit?

If a person is not a Communist, and if he does not advocate the overthrow of our Government by force or violence, why does he not have the courage to say so? Why should he wish to hide behind something? There may be the insinuation that he is a Communist. Frankly, I believe that some of them are Communists. I believe that is the reason why some teachers and students refuse to take the oath.

I do not say that all the students and teachers who oppose the oath are Communists, but it is my firm opinion that some of the leaders in this movement in some of these institutions who are trying to get the oath requirement repealed are Communists. I believe some of them are fellow travelers. I believe they are pushing this program in order to foster the cause of communism in this country.

I know there are a great many good people who believe in the contention that is made with respect to the affidavit on the ground of academic freedom. They feel that academic freedom and freedom of speech are involved. They believe that the rights of an individual should not be violated.

However, in this day and age, when we are threatened with communism, which is the greatest threat that our country has ever faced, it is no time to quibble, it is not time for the American people to show any patience toward anyone who is not for 100 percent Americanism in the making of a loan or grant to a person. Otherwise, we would be merely furthering the education of such a person, who has a warped mind or is a Communist or a fellow traveler, and who will use his further knowledge to harm this country.

I do not believe there is any excuse for changing the affidavit. I am amazed that the proponents of the bill should come back this year after we recommitted the bill last year. I am completely surprised that they should come back again and ask the Senate to repeal this non-Communist affidavit.

It makes no difference to me if the proponents cite every college and university in the country as being opposed to the affidavit. They have gone to great pains to break down into different categories the opposition to the affidavit. They list institutions which have withdrawn from the student loan program because of the disclaimer affidavit; institutions which decline to participate in the student loan program because of the affidavit; and institutions whose presidents have stated that they disapprove of the disclaimer affidavit but which continue to participate in the student loan program. Then they show colleges and universities whose faculties have expressed disapproval of the affidavit. They also list associations and organizations reported to protest the disclaimer affidavit.

I believe it is about time for Congress to take a strong and unyielding stand for Americanism. It is a good time for us to show our colors. It is time for us to set an example in this country by saying to the young people of this country, and to the older ones, too, who want to get these grants and loans: "If you are not willing to take an oath that you do not favor overthrowing the country, and that you are not a Communist, the Government of the United States has no grant or loan to give you."

Mr. GOLDWATER. In answer to the Senator's question and statement I wish to recognize him as a Senator who displays a natural showing of patriotism. It is a display of patriotism which we seldom see in this country. I am extremely proud that the Senator from South Carolina is a friend of mine and I am a friend of his.

The act contains almost the exact words read by the Senator when he quoted from the affidavit which every employee of ours in the Senate must make and swear to before he can be paid out of Federal funds.

The language that is used in the act, under section 1001(f) reads:

No part of any funds appropriated or otherwise made available for expenditure under authority of this Act shall be used to make payments or loans to any individual unless such individual (1) has executed and filed with the Commissioner an affidavit that he does not believe in, and is not a member of, and does not support any organization that believes in or teaches, the overthrow of the United States Government by force or violence or by any illegal or unconstitutional methods.

That is the portion of the act to which certain educators have objected most strenuously. I feel rather certain that if that provision were eliminated, many of the objections would be removed, because when I read the second proviso, I am certain the Senate will understand why.

But I cannot understand what is the motivation of the protest. Does it come under the guise of fear of abuse of freedom of speech? I cannot believe that. Does it come under the guise of destroying freedom of association? I cannot believe that, because I do not believe it was ever the intent of the framers of the Constitution to encourage the membership of any American in an organization which would advocate the overthrow of the American Government.

Are the educators afraid of Federal control? No, I cannot believe that these particular educational institutions which protest most violently would be afraid of Federal control. If I am not mistaken, the most zealous advocates of Federal control come from those colleges, either in the form of professors or past students.

I am at a loss to know what goes through the minds of those persons. I know some of them. I know, for example, the president of my university. He is one of the most dedicated Americans. He is a southerner by birth and by instinct. He holds American traditions high. But for some reason, known only to him, he opposes this provision.

If we retained only the second part, I think this would be a different story. Let me read what the second proviso is.

"I do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic." The provisions of section 1001, title I, United States Code, shall be applicable with respect to such affidavits.

Certainly, in answer to the Senator's basic question, the answer would have to be, Yes, the provisions of both are the same.

Mr. THURMOND. I should like to ask the distinguished Senator from Arizona this question. I notice on page 2 of the report the following statement:

S. 2929 simply removes the redundant, ineffectual, and undesirable disclaimer of disloyalty.

Is it the opinion of the distinguished Senator from Arizona that the present act is not effectual? Last year, when the debate was taking place, I invited the attention of Senators to section 1001, title 18, of the Code of Criminal Procedure, which reads as follows:

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, factitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than 5 years, or both.

That provision of the United States Code, section 1001 of title 18, provides punishment for a person who makes a false or fraudulent statement. So there is a way to enforce the provision which the committee wants to eliminate. Yet it is claimed that it is ineffective. Why is it ineffective, if there is a way to punish a person with a $10,000 fine or imprisonment of 5 years, or both? Is the Senator from Arizona in accord with that statement?

Mr. GOLDWATER. I am in accord with that statement. If the Senator from South Carolina will read the minority views submitted by the Senator from Illinois [Mr. DIRKSEN], the Senator from North Dakota [Mr. BRUNSDALE], and myself, he will find our agreement with the question he just put to the junior Senator from Arizona expressed all the way through.

We feel that stronger penalties should be provided in the act than are provided. We feel that the penalties provided in the existing act are not strong enough. We should like to see them strengthened. We feel that this is our opportunity to amend the proposal so that it will have teeth. I shall read what the Senator from Louisiana [Mr. LONG], who was the author of the motion to recommit, said last year. He summed up the arguments for recommittal as follows:

The country is entitled to something better, and the Senate is entitled to something better than the delusion that we have done something to restrain Communist activities, when all we have done is to give a wide open invitation to Communists by passing a futile, meaningless gesture favoring patriotism. I should hope that the committee might find some substitute offering a slight hope of putting a Communist in jail for being disloyal to America.

That statement appears in the CONGRESSIONAL RECORD, volume 105, part 11, page 14097.

I repeat, because the Senator from South Carolina was not in the Chamber when I spoke earlier to this point, that while no specific instructions were issued by the Senate at the time of the recommittal of the bill to the committee, nevertheless one must gather from the rather voluminous debate preceding the vote on which action was taken that it was the intent of the Senate that the committee give the subject further study.

As I related earlier, no hearings were held on the subject. The committee had a very short, informal discussion of the bill prior to reporting it. In fact, the bill before the Senate today is identical with the bill which was recommitted to the committee last year.

Mr. THURMOND. Last year, it seems, there were those who favored the repeal of the provision and who were merely looking for some excuse to repeal it, without there being any merit in their case. They alleged that it did not constitute an effective national security measure. But as I have pointed out, it is effective, because there is a way to enforce it.

Another point that was made was that the provision cast unfounded doubts upon the loyalty of members of the educational community. As I have pointed out, anybody who works for the Government takes a similar oath. Why should the educational community be singled out for exclusion from an oath when millions of employees on the Government payrolls can get on them in the first place only by taking such an oath?

Mr. GOLDWATER. Again, I cannot understand the reasoning behind the objection. I pointed out earlier, and I can point out to the Senator from South Carolina, if he will peruse the document he has in his hand, the results of the study made by the Legislative Reference Service of the Library of Congress with respect to other acts which require such oaths.

For 10 years applicants for fellowships and traineeships under the National Science Foundation have been required to execute both the disclaimer and the oath.

The Vocational Training Act, which is one of the oldest educational acts on the statute books—if I am not mistaken, it dates back to 1916, and applies to persons of all ages—requires some type of oath and disclaimer before the applicants can benefit under the act.

So there is nothing new about this proposal. It goes back a good number of years to establish a precedent. If there had been objection to it, I think the objection could well have been raised many years ago, rather than at the present moment, when we are locking horns, so to speak, with the Bear of Russia, and find ourselves in need, so some think, of a stepped-up educational program.

Yet when we provide a stepped-up educational program, we cannot be too choosy about it; we cannot say to a person, "If you are not willing to make it adequately clear that you are a complete American, you cannot benefit under the act."

As I pointed out earlier, too, these objections come from a very small minority of American universities, colleges, and other institutions of higher learning. The total, as I pointed out earlier, unless the figure has been corrected since May 12, of this year, is 131. If my memory is correct, there are about 1,300 institutions of higher learning in the United States. Twenty-six have taken no positive action, such as refusing to take funds. The others are willing to object, but are still willing to take the money.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield to the Senator from Pennsylvania.

Mr. CLARK. Does the Senator from Florida wish me to yield to him?

Mr. HOLLAND. I rise merely to say that I think one of the things which is being done in the debate is to attribute to large numbers of young Americans an attitude which they do not support or defend, and which it is unfair to impute to them.

I do not like to bring my own connection with education too much into the picture, but I have been for many years, and am now, a member of the board of Emory University, which has some 3,500 or 3,600 students.

I am now, and I have been, off and on, for years, a member of the board of trustees of the Florida Southern College, which has approximatly 2,000 students.

I am now, and I have been for more than 30 years, a member of the executive council of the alumni of the University of Florida, which has approximately 13,000 students.

I have official relations with some other colleges which I shall not mention.

I know literally hundreds and, I believe, several thousand of the young men from my area and other areas who attend these institutions. I have not received a single letter that I can recall from any of those young men, and many of them are receiving these loans—com-

plaining of either the disclaimer or the loyalty oath. I have received from them many letters in which they complain that some educators and some students are taking a position which attributes to them and to other students a position which they would not take, and which they think should not be imputed to the young people of America.

Mr. President, I am glad to extend my remarks to apply to young people other than those of my own area. I do not know how many Senators have heard from the National Students Committee for the Loyalty Oath, which has its office here in Washington, D.C. I know that the chairman of that committee, Mr. Douglas Caddy, is of Georgetown University, one of the fine, old, highly regarded institutions of learning here in the Capital area. The executive secretary is Mr. David Franke, of George Washington University, another large and highly reputable institution of learning.

I shall not read all of the letter into the RECORD; but I wish to read two paragraphs which make the same point which has been made to me in dozens of letters from young men of my own area who resent the fact that there is being imputed to the students and the student youth of the Nation a desire to evade or escape responsibility for taking this oath and disclaimer.

The letter is addressed to me; it is dated February 15, 1960, and is signed by Mr. Caddy. It reads, in part, as follows:

> As you are well aware, the Senate Labor and Public Welfare Committee recently voted to report out favorably Senator JOHN KENNEDY'S bill, S. 2929, to repeal the nonsubversive affidavit presently required of college students participating in the National Defense Education Act. It now appears that the Senate will act upon the bill in the near future.

I continue to read, but not consecutively:

> Supporters of S. 2929 cry out that college students are being discriminated against by the current NDEA affidavit. This is not true. There are 155,871 college students currently enrolled in Reserve Officer Training Corps (ROTC) units on their campuses who have taken the same affidavit. Only 68,152 students are currently participating in the NDEA and have taken the affidavit. Yet the cry has never been raised that ROTC students were being discriminated against. The 12,000 college students who have participated in the National Science Foundation Act of 1950 have also been required to take the affidavit. Federal employees and private citizens who volunteer for civil defense work must also take the affidavit at the present time.

Mr. President, I digress to say that during World War II, at a time when, as Governor, I was head of the civil defense organization in my own State of Florida, 338,000 of our citizens were rendering that service.

I continue to read from the letter:

> Can it truthfully be said, then, that college students are being singled out by the NDEA affidavit?

Mr. President, I have quoted a part of the letter; and the statement which I have made is, in its entirety, designed simply to have the RECORD show what I believe to be a fact—namely, that the vast majority of the young people of this Nation do not take the position that either of these requirements—either the loyalty oath, which was included last year in this same act, or the disclaimer affidavit—should be repealed; but, to the contrary, they have gone ahead and have executed these documents, and are, by the thousands, enjoying the generosity of their country, which is extended for one reason only, and that is to better qualify them and better assure our country of good service in the event of our being faced with heavy emergency in the fields of security and defense.

Mr. President, I think all of us must recognize the fact—as just now stated by the Senator from Arizona—that the present request is based upon the attitude of a very few of the individuals who are affected. I repeat that in my area of the country not a single patriotic organization of men and women or a single civic organization of men or women has, to my knowledge, taken a position endorsing this bill, as regards these two requirements; but, to the contrary, their position is reasonable and fair and properly recognizes the sense of loyalty and patriotism of the young people of America who, in the very great majority, believe just as the more mature citizens do.

I thank the Senator from Arizona.

Mr. CLARK. Mr. President, will the Senator from Arizona yield to me?

Mr. GOLDWATER. I am happy to yield to the Senator from Pennsylvania.

Mr. CLARK. I thank the Senator from Arizona for his courtesy.

Of course I completely disagree with what my friend the Senator from Florida has said. But at a later date, and in my own time, I shall reply to what he has said.

Let me ask whether the Senator from Arizona has available a list of the institutions of higher learning which have written in or have expressed support for the present disclaimer affidavit.

Mr. GOLDWATER. I must say that I am not aware that any such list exists. I have no such list of my own. The only list I have is a list of patriotic organizations—including the American Legion, and others—which support our position, and the number of students—and I am trying to find the number now—who have expressed a desire to retain these requirements. These students are in the organization the Senator from Florida has mentioned, but I have no idea how many there are.

Mr. CLARK. I understand that perhaps one or two or four or five institutions have expressed support for the affidavit. I have not been able to identify them, and I thought perhaps the Senator from Arizona could do so.

I suggest to him, in all friendliness, that perhaps the fact that none of the institutions which he has mentioned as not having opposed the affidavit has written in in support of it, is one which the Senate should consider in the course of the debate.

Mr. GOLDWATER. I can understand perfectly how my friend would reach that conclusion, but I could not agree with him.

I find that the American people who are particularly happy with things the way they are, as they pertain to themselves, do not take the trouble to write to us; and I think the same is true of all institutions. I have not made an effort to solicit the opinions of universities which have not written in. I only say that of the 1,300-odd institutions of higher education in the United States, only 26 have by any positive action indicated that they really mean business on this matter; and a total of 131—which is approximately 10 percent—have indicated dissatisfaction with it. In the absence of any expressions of disapproval, I must assume that a great majority of the remaining 90 percent find nothing wrong with the requirement that the students take the oath.

It is unfortunate that we did not hold hearings this year, because that in view of the excitement which has been generated in this country since the passage of this act, I believe we could have brought out, in the course of adequate hearings, the objections to and the support of the various positions. But the committee held no hearings; and the bill was reported within a few days from the time when it was introduced on the floor of the Senate; and only the customary argument between the majority and the minority took place within the committee itself.

I think it most unfortunate that that was done. As the Senator knows, I have discussed this problem with him on numerous occasions, as I have with the distinguished Senator from Massachusetts. I feel there is a way in which we can work out a satisfactory approach to this problem, but I must say that both the Senator from Pennsylvania and the Senator from Massachusetts have been adamant in insisting that we completely remove the disclaimer and loyalty oath. With that attitude, I am afraid we cannot come to an amicable agreement. I feel we could have settled this problem weeks or months ago had the brilliant mind of the Senator from Pennsylvania been held ajar enough so that it might have accepted some of our arguments.

Mr. CLARK. Mr. President, I appreciate the kind remarks of the Senator from Arizona. Obviously, two persons looking at the same scene from different points on the landscape are apt to draw different conclusions. I certainly feel acute distress at the suggestion of my friend that I have been inflexible or firm. I would not want to have the pot calling the kettle black in this regard. I think the Senator from Massachusetts and I have been sweet reason itself in an effort to compromise. The Senator from Arizona, I am sure, has the same feeling. I think that is probably the best way to leave it.

Mr. GOLDWATER. In the hearings before the Subcommittee on Education of the Committee on Labor and Public Welfare to amend the act of 1958——

Mr. CLARK. Does the Senator have the page?

Mr. GOLDWATER. If the Senator will look through the appendix, I think he will find a number of institutions listed there. I would not say the list is

large in number, but I have glanced quickly at it. I might mention some of them. The Veterans of Foreign Wars——

Mr. CLARK. I was concerned with institutions of higher learning.

Mr. GOLDWATER. Alliance College, in Cambridge Springs, Pa.; Norwich University; Wheaton College; Eastern Michigan College.

Mr. CLARK. I shall be happy to take a look at the list, as my friend has suggested.

Mr. GOLDWATER. I think the Senator could tell much more quickly if he would read this list. It is not an imposing list. But I still get back to my thesis that since we have not heard from approximately 90 percent of the universities, and I know they have been prevailed upon to write by the various organizations who are listed in the report, we must assume, I think correctly, that they have no interest in it one way or the other.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. GOLDWATER. Yes.

Mr. CLARK. My own judgment on that question would not be in accord with that of the Senator from Arizona, because it would occur to me that the members of the associations and organizations which did protest to the committee against the disclaimer affidavit, whose names are set forth on page 7 of the report, many of whose members are set forth on page 32 and following of the hearings before the subcommittee, would naturally assume the position taken by the association to which they belong as the one with which they concurred, unless they wished to violently dissent.

I think the Senator from Arizona will find that among the organizations which have expressed their objection to the disclaimer affidavit are organizations representing the overwhelming majority of the higher institutions of education.

Mr. GOLDWATER. I would not want to leave the RECORD stand this way. I, myself, am a member of several organizations. Sometimes I agree with what they do, and sometimes I do not.

One thing that has been very amusing to me during my career in the Senate is the inability of liberal organizations to be consistent. I notice on the list the Civil Liberties Union. I know it believes very strongly in civil liberties and the right of people to use their liberties. I think it was yesterday, when the Texas Democratic Convention was held in Austin, that one of the great victories obtained by the majority leader of the Senate was over the liberal wing of the Democratic Party, which demanded a signed pledge from each State delegate to support the Democratic Party's nominees in the November election. Here they are insisting upon a pledge and they are insisting upon an oath, but these same liberals will turn around and say, "Oh, no, we cannot require Communists to take an oath or a young American to declare his loyalty to his country." One of the interesting things I have noticed in my 8 years in the Senate is that the people who speak the loudest about rights, about stepping on other people's toes, are the very first to demand the very same prerogatives when it is advantageous for them to do so.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield to the Senator from Florida.

Mr. HOLLAND. I merely wanted to call the attention of both distinguished Senators engaged in the present colloquy to the fact that a sizable number of colleges and universities which declined to have any part in this program originally, as well as of those who have withdrawn, are institutions supported by churches which do not favor serving in the Armed Forces of the Nation. For example, in the group of institutions which declined to participate, I notice two of our very fine academic schools which have that background; namely, Swarthmore and Haverford. If the Senator will look at the list, he will see other institutions of that kind. What I have said is without derogation of them. They are fine academic institutions, with a good record of civic service and service in other fields that the people of that particular religious persuasion have rendered.

I am merely calling attention to the fact that it should not be a source of surprise to us that institutions of that kind would not want to participate in a defense program.

Mr. CLARK. Mr. President, will the Senator yield to me for the purpose of making a comment on what the Senator from Florida has said?

Mr. GOLDWATER. Yes.

Mr. CLARK. The Senator from Florida mentioned Swarthmore and Haverford, which are in the Commonwealth of Pennsylvania. So is Bryn Mawr. My daughter is at present a student at Bryn Mawr. While these institutions have a background in the Society of Friends and were originally organized by the Society of Friends, not a single one is supported at the present time by the Society of Friends, or is connected, on any legal basis, other than perhaps a sentimental interest in the past, with pacifist views of that fine Pennsylvania institution, the Society of Friends.

Mr. HOLLAND. I thank my good friend for that comment. I had the pleasure recently of spending a summer vacation at Buck Hill Falls, at an institution supported by one of the Quaker groups, the other branch has one on the same grounds nearby, as the Senator well knows. I refer to the fall of 1958. I was not surprised to find there that the attitude toward service in the Armed Forces, at least of the grand and conscientious people to whom I talked while there, was quite the same as I have found among the Society of Friends all my life. I say this without any reflection on that institution, because I recall one very fine ambulance organization that served in my war, the war in which I served, which is the one before the war in which the Senator from Pennsylvania served. That ambulance organization was composed, as I understood, entirely of members of that religious belief, and no one could have been braver.

I merely wish to call attention to the fact that it is not surprising that schools such as the ones the Senator has mentioned—and there are others on the list, which the Senator will recognize—have felt it was against their deep and conscientious convictions to participate in a program of this kind.

I thank the Senator for yielding.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield to my friend from Colorado.

Mr. ALLOTT. I compliment the Senator from Arizona for the position he has taken in this debate. I cannot help recalling when we passed the National Defense Education Act. As the Senator from Arizona knows, at that time I was a member of the Committee on Labor and Public Welfare. I believe I was the ranking minority member of the Subcommittee on Education. I not only had a great deal to do with the National Defense Education Act, but I also participated very strongly in regard to its passage by the Senate and through the conference committee.

I cannot forget that at the time there was a great deal of opposition to the bill in the U.S. Senate. I was one of those who felt we had to give our education processes, particularly as they related to defense, a big push. I felt that we had grown lackadaisical—perhaps apathetic—about our educational system. I came to the floor of the Senate at that time, with the Senator from Alabama and some others, and fought for the National Defense Education Act.

Upon what basis did we fight for that act? We fought for it upon the basis that we had to do something to get these people going, which would contribute to the defense of our country.

In such a situation I, like most other Senators, have taken an oath to my country, on several occasions. I took my first oath in the National Guard, when I was 16 years old. I took another when I went into the Air Force. I took an oath when I became Lieutenant Governor of Colorado, and I took one when I became district attorney. I took an oath when I entered the Senate. I may have taken others.

I cannot see how any American could feel that this would limit his mental capacity, his opportunity to have free thought or free study, and to be free in his objective thinking.

Last year I heard most of the arguments on this question, and I participated in the discussion. I should like to ask my friend a question. The arguments we heard last year were primarily to the effect that, "After all, if a man is a Communist, he will sign this affidavit and it will not mean anything, anyway." While I have been in the committee today, I suppose this argument has recurred on the floor of the Senate, or that it will recur. This is the type of cynical, frustrated thinking which I personally cannot condone. It seems to me that if one is to use such an argument, which was used extensively against the affidavit last year, one might as well say, "There is no use in administering an oath of office in the Senate, when Senators take office." We might as well say, if we

want to extend the thought, "There is no use in administering an oath to a witness who goes on the witness stand, because that witness may try to save his hide," or "may try to save himself from incarceration," or "may try to save himself from a very large judgment."

If we adopt this decadent philosophy—which it is—that a person does not mean what he signs, then we might as well stop administering oaths in the Senate. We might as well stop having our secretaries and employees of the Senate, as the Senator from South Carolina suggested, take oaths. We might as well do away with the entire procedure and rely upon the good will of everyone to do his best for his country.

The oath has a tradition of hundreds of years.

I note that the faculty of the University of Colorado is listed as disapproving of this affidavit. I know there are many members of that faculty who approve of it as strongly as others may disapprove of it. I cannot speak with regard to other institutions from personal knowledge, but I am sure that is true with respect to others.

Because this issue involves defense, we must try to build up the strength which will enable us to defend our country. We must develop mathematicians, scientists, and others who are proficient in foreign languages, so that we can communicate with other peoples of the world.

Despite this, the purpose of the bill before us is to say, "It does not matter whether these people have any concept of loyalty to the Government or not, they should not be imposed upon by being made to take such an oath." If we are imposing upon such people by requiring them to take an oath, I say we should let them go somewhere else, that we do not want them under the National Defense Education Act, because this is of vital concern and necessity to our country.

I deplore the decadent, frustrated, and cynical philosophy which says that when a person signs such an oath it does not mean anything. If we have reached that point in this country I say, "Heaven help us."

I thank my friend from Arizona, who has done such a beautiful job, for yielding these few moments to me.

Mr. GOLDWATER. Mr. President, will the Senator permit me to ask him a question?

Mr. ALLOTT. I shall be happy to have the Senator do so.

Mr. GOLDWATER. I recall with great pleasure that the Senator from Colorado served on the Committee on Labor and Public Welfare. I add that I wish the Senator were still with us, because we miss his strength and his judgment.

Is it the recollection of the Senator from Colorado that there is any act which carries the words "national defense" in the title, with respect to which money is to be disbursed, as is true in this case, which carries a similar oath or affidavit as a requirement?

Mr. ALLOTT. I could not answer that question completely, because I have never made a complete study of the question, but I can recall no instance in which such is not true.

Mr. GOLDWATER. Mr. President, I am not certain that is a truism. Thinking about several acts, I can see a pattern which must repeat itself in other acts.

Mr. ALLOTT. When the Senator was asking the question I was trying mentally to run over the acts in my mind. I can think of no circumstances where it is not true, although there may be some.

Mr. GOLDWATER. I thank my friends.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. GOLDWATER. I am happy to yield.

Mr. HICKENLOOPER. I am sorry I was not able to follow all of the argument this afternoon, since the bill came before the Senate, but I have been occupied with committee matters which are rather important. I was able to come to the floor only a little while ago.

I should like to ask the Senator if I am correct in interpreting the measure now before the Senate. The measure now before the Senate, the Kennedy bill, S. 2929, in effect proposes to leave in the present act the so-called oath of allegiance to the United States, the oath to support and defend the Constitution, but proposes to eliminate from the present provisions of the National Defense Education Act the so-called disclaimer affidavit, the statement to the effect that the recipient of the loan does not belong to an organization which advocates overthrowing the Government of the United States by force or violence or by illegal or unconstitutional means; is that correct?

Mr. GOLDWATER. The Senator is absolutely correct. That is the intent of the proposed legislation.

Mr. HICKENLOOPER. That is my understanding. The thing which is completely mystifying to me is why anyone would desire to take that statement out of the act and not take out the oath of allegiance. It is utterly illogical to me, and completely ununderstandable.

I have said before that the only supportable argument which I know for eliminating the whole disclaimer affidavit and loyalty oath might be placed on the basis that certain other people who get Federal money do not have to take it. I refer to loans such as farm loans. I do not think it is a completely logical argument, but I say it is the only possible supportable argument. To eliminate the oath of disclaimer would in effect, unless the entire requirement were taken out and it was put on the basis of complete equality, say to teachers and others who advocate the provision being taken out, "Yes, go ahead and teach subversion. Go ahead and teach the philosophy of overthrowing the Government of the United States by force or violence or by illegal or unconstitutional means."

I should like to verify my understanding with the Senator from Arizona. The disclaimer, as I understand, as it exists in the law today, does not prevent any teacher from advocating orderly, constitutional, or legal change in the form or the legislative structure of this Government. Is that correct?

Mr. GOLDWATER. The Senator is eminently correct.

Mr. HICKENLOOPER. There is nothing in the law that provides a teacher cannot stand up and say, "I advocate or teach that a certain provision of the Constitution of the United States should be changed, but changed in the orderly due process provided by the Constitution." There is nothing in the law that prevents such teaching.

As I look over the list of colleges, I am shocked to see those that have taken a position opposing the disclaimer. There are some colleges in my home State that have taken such a position.

I do not recall having received a single letter from a student objecting to taking the oath or to signing the disclaimer. I have, on the other hand, received a substantial number of letters from college professors in two or three colleges in my State taking great offense, not because they are required to sign any such affidavit, but because students under them, who will be the citizens of tomorrow, are required to make this statement. So far as I can determine, the students are not objecting. There is not the least objection from students.

But we have a pedagogical philosophy that opposes the oath that seems to run rampant through our colleges, and the only way I can interpret the actions of such pedagogs is that they feel it is perfectly all right for them to stand in the classroom if they wish to do so and to teach the overthrow of this Government by force or violence or by unlawful, illegal, or unconstitutional means.

Such philosophy is completely beyond my ken. I cannot imagine any loyal citizen taking such a position or tolerating it in the United States of America. We have ample ways of changing our laws if we do not like them. If we want to change a policy—even if we want to change the Constitution—which we have done many times, we have the means to do so in an orderly manner.

I ask the Senator from Arizona if he thinks it would be proper for a teacher in a classroom to teach students how to do second-story work, to rob, to get into houses, and how to shoot a gun properly in the commission of a crime. Does the Senator think such teaching would be acceptable?

Mr. GOLDWATER. No, the junior Senator from Arizona thinks such teaching would be quite wrong, although from the amount of crime in this country I must suspect that there are such institutions.

Mr. HICKENLOOPER. I do not believe that even those who so loudly ask for the elimination of the disclaimer provision would stand up and say, "I ought to be able to teach in the classroom how to do second-story work, how to commit robbery, how to hijack trucks, or how to commit fraud or teach the arts of forgery."

Mr. GOLDWATER. Or to stuff ballot boxes.

Mr. HICKENLOOPER. Yes, or to stuff ballot boxes, although I do not believe they would go quite that far. But it is just as logical, under the heading of liberty of education and liberty of teaching, to say that teachers ought to be free to teach how to commit crimes of various kinds as it is to say that teachers ought to be permitted to teach the overthrow of the Government by force or violence or by illegal or unconstitutional means. I think the country is not aware of the language in the bill that these institutions are trying to get thrown out. There is nothing in that language which prevents freedom of teaching, within orderly, legal, and constitutional bounds, and it is only the teaching of the overthrow of the Government by illegal or unconstitutional means as such that the disclaimer proscribes.

I say it is incomprehensible to me why any American citizen should possibly object to such a statement. There is something more insidious behind this proposal than appears on the surface.

I do not know whether the Senator from Arizona agrees with me or not, but I think it is an ominous situation. In my experience we have seen periodic outbursts of so-called freedom of education proposals by people who object to any restraint on teaching communism and the militant overthrow of the Government. The subject has arisen periodically. Whether it is like the 17-year locust or not, I do not know, but it comes up about that often.

This is a provision that I simply cannot rationalize as an American citizen, and I do not believe thinking students can rationalize it. The only support that it seems to have comes from certain faculty members who seem to think that they ought to be free to teach philosophies that advocate the overthrow of this Government if they wish to, and they argue for it under the guise and the excuse of educational freedom. I cannot quite comprehend their reasoning. I thank the Senator from Arizona.

Mr. GOLDWATER. It is impossible for me to comprehend the workings of the academic mind as completely as I should like to, because I was exposed to them only for the better part of 1 year. I sometimes regret that I did not avail myself of the full collegiate career, but when I hear educators complaining about this provision of the law, I am rather glad that I put off my education until a later time.

Mr. HICKENLOOPER. I may say I was exposed to a little more college education than 1 year, but I think perhaps in many ways the Senator was fortunate, because in my own experience I have known certain teachers who literally taught subversion of the American system of government, sometimes in a very tactful way and sometimes in a very blunt way. What I have said does not apply to all teachers. The overwhelming number of teachers in this country are loyal, perfectly fine and perfectly rational teachers so far as the American system of government is concerned. But we do have a small coterie in many institutions in this country that keep festering with this philosophy under the guise of educational freedom. I have been exposed to some of them in the past.

I was exposed, prior to World War I, to a group of teachers who had been sent out to a college I was attending. They had been sent out from a university in this country which has since become rather well known for its so-called left-wing views. The teachers had been sent to the college that I was attending. If anyone ever saw a group which had a single purpose, namely, the weakening of basic confidence in the Constitution of the United States, it was that group.

They had their effect, I will say, on a number of students at that time. That has happened many times since.

However, the overwhelming number of teachers are just as stable, just as sound, and just as loyal to the United States and its system of government and its Constitution, as any citizen can be. I have received a number of letters from teachers advocating the rescission of this particular provision under discussion by us. I have received letters from more teachers, however, quietly saying that they see no reason at all for repealing this section; on the contrary, they see a great deal of good in retaining it.

So, so far as the teachers are concerned, I believe it is a small minority which is advocating the rescission, but, unfortunately, they have had an effect on faculty action in a number of colleges.

Mr. GOLDWATER. I thank my good friend. In conclusion, I wish to read a very brief part of an article appearing in the magazine the New Leader, which at its best cannot be considered a conservative publication. I should like to quote from an article written by Carl A. Auerbach, who is a professor at the University of Wisconsin, and has written frequently on the subject of civil rights. He makes a very good point when he says:

> I do not see how anyone can take the oath in good faith who believes in the overthrow of the United States by force or violence or by any illegal or unconstitutional methods. The oath seeks not only to elicit a promise of future behavior but also of future belief—to "bear true faith and allegiance to the United States." What is explicit in the disclaimer is implicit in the oath. If the oath is unobjectionable, so is the disclaimer affidavit; if the affidavit is objectionable, so is the oath.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KEFAUVER. Mr. President, with the permission of the acting majority leader, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. CLARK. Mr. President, reserving the right to object—and I shall not object—I am not the acting majority leader.

Mr. GOLDWATER. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue the call of the roll.

The Chief Clerk resumed the call of the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, and I ask further unanimous consent that I may retain the floor after the call is dispensed with.

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, reserving the right to object, I was on my feet, addressing the Chair, before the Chair ruled.

The PRESIDING OFFICER. The Senator must object or fail to object.

Mr. CLARK. May I address a parliamentary inquiry to the Chair?

The PRESIDING OFFICER. The Senator may not.

Mr. CLARK. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will proceed with the call of the roll.

The Chief Clerk resumed the call of the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, and that I may retain the floor.

The PRESIDING OFFICER. The Senator must make one request at a time.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. GOLDWATER. Mr. President, I yield to the Senator from Tennessee.

AMENDMENT OF FEDERAL FOOD, DRUG, AND COSMETIC ACT

Mr. KEFAUVER. Mr. President, I introduce a bill for appropriate reference, and I ask unanimous consent that it may remain at the desk for 4 days, in order that other Senators may join as cosponsors.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk as requested.

The bill (S. 3677) to amend the Federal Food, Drug, and Cosmetic Act to redefine the term "new drug" and to provide for the licensing of persons engaged in the propagation, manufacture, or preparation of drugs dispensed only upon prescription, and for other purposes, introduced by Mr. KEFAUVER, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. KEFAUVER. Mr. President, the reason for my asking that the bill lie on the desk for 4 days is that I have not had an opportunity to study the bill with members of the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary. The bill relates to matters which have been under discussion in connection with the investigation of the manufacture of ethical drugs, an investi-

gation which is being conducted by that subcommittee. Perhaps after such a discussion, other Senators, after examining the bill, may wish to join as cosponsors.

Hearings before the Antitrust and Monopoly Subcommittee on the administered pricing practices in the ethical drug manufacturing industry have not been completed. Yet facts now in the record that I, individually, have heard and considered show that some legislation should not await their completion. Hence, I have prepared and am sending to the desk for appropriate reference a bill to amend the Federal Food, Drug, and Cosmetic Act. It would redefine the term "new drug" and provide for the licensing of persons engaged in the propagation, manufacture, or preparation of drugs dispensed only upon prescription.

The term "new drug" would be redefined so as to require that new drugs would not only have to be safe but efficacious. The bill would also vest in the Secretary of Health, Education, and Welfare the duty of licensing persons engaged in the manufacture and sale of prescription drugs.

The drug hearings disclosed that the 20 largest drug manufacturers spend a large percentage of sales to promote the prescription of their products by doctors by brand names. As I have previously explained to this body, when a doctor prescribes a drug by brand name, the druggist can fill the prescription only with the brand the doctor specifies, even though he has other brands which are identical generically that are considerably less expensive. Despite the fact that different brands are identical generically, the contention was made at the hearings that identical products which met the safety requirements of the law, nevertheless, were for various reasons not equal in therapeutic quality or efficacy. I am satisfied that much of the high cost of drug products has come about as a result of this claim, whether it is fact or fiction. Hence, the requirement of this bill that the Food and Drug Administration pass on the efficacy as well as the safety of new drugs should make it more difficult to contend successfully that there is a difference between two brands which are identical generically and both cleared as to safety and efficacy. Thus, promotion costs of new drugs attributable to this contention could be saved and the price of new drugs lowered accordingly.

We cannot afford anything but the best drugs. There is not and should not be any room in America for first-, second-, and third-class drug products. In passing on efficacy as well as safety in new drug applications the Food and Drug Administration could go a long way toward eliminating any basis for the contention that there are second- and third-class drugs. Also of great importance is the section of my bill under which the Secretary of Health, Education, and Welfare is charged with the responsibility of issuing licenses to manufacturers of drugs which are sold only on prescription. Ample authority is also given the Food and Drug Administration to obtain the necessary and proper information upon which to base the issuance or the continuation of such a license. The bill also provides the necessary opportunity for judicial review of the licensing procedure.

Mr. President, I am satisfied that the enactment of the licensing section of this bill will result in great benefit to the public. If there are irresponsible "bathtub" manufacturers of prescription drugs, they can be eliminated or brought into line under appropriate licensing standards. No longer could one drug manufacturer say to the practicing physician that its products are better than another manufacturer's products if both are making the identical drug product under identical processes and procedures. Think, Mr. President, of the money being wasted today by promotional practices regarding brands that might be saved and reflected in the price to the ultimate consumer if this bill is enacted into law. I am satisfied that large numbers of physicians would prescribe drug products by generic names if this bill is enacted. If this were done, competition might very well come into play within the industry.

Mr. President, in offering this bill today I am fully aware that there are other areas where corrective legislation is needed in order to restore competition in the drug manufacturing industry. I am presently considering such legislation and it is my intention to prepare and introduce it at a later date. I know of no area where corrective legislation is more needed, not only to benefit the industry but the public as well.

Mr. President, I was much gratified that Mr. Flemming, Secretary of Health, Education, and Welfare, made several important legislative recommendations, many of which we have been talking about, in rough form, for some time.

We will welcome Mr. Flemming's suggestions and criticisms of the bill and his suggestions as to other legislative proposals. We hope we may work in cooperation with him toward the enactment of legislation which will bring down the cost of prescription drugs, so that they may become available to more persons who need them.

ELIMINATION OF AFFIDAVIT OF DISLOYALTY

The Senate resumed consideration of the bill (S. 2929) to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief.

Mr. GOLDWATER. Mr. President, I yield the floor.

Mr. PROUTY. Mr. President, I send to the desk an amendment in the nature of a substitute, which I am proposing on behalf of myself, the senior Senator from South Dakota [Mr. MUNDT], and the senior Senator from Wisconsin [Mr. WILEY]. I ask that the amendment be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. It is proposed to strike out all after the enacting clause, and insert in lieu thereof the following:

That subsection (f) of section 1001 of the National Defense Education Act of 1958 (20 U.S.C. 581) is amended to read as follows:

"(f) (1) No person may apply for or receive any grant, payment or loan under this Act while he is a member of the Communist Party or any other organization having for one of its purposes or objectives the establishment, control, conduct, seizure, or overthrow of the Government of the United States, or the government of any State or political subdivision thereof, by the use of force or violence, and has knowledge of such purpose or objective of that party or other organization.

"(2) No person who within five years has been a member of the party or any other organization of the kind referred to in paragraph (1) may apply for or receive any grant, payment or loan under this Act unless his application for such grant, payment or loan is accompanied by a written statement, executed under oath, containing a full and complete disclosure of the facts concerning his membership in that party or other organization and the knowledge possessed by him during the period of his membership therein with regard to the purposes and objectives thereof.

"(3) Whoever knowingly violates paragraph (1) or paragraph (2) of this subsection shall be fined not more than $10,000, or imprisoned not more than five years, or both."

It is proposed to amend the title so as to read: "A bill to amend section 1001(f) of the National Defense Education Act of 1958."

Mr. PROUTY. Mr. President, I ask unanimous consent that, without losing the floor, I may be permitted to yield to the distinguished junior Senator from Connecticut [Mr. DODD].

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DODD. Mr. President, I thank the Senator from Vermont.

Mr. President, I intend to vote for the removal of the disclaimer affidavit from the National Defense Education Act. But I do so without enthusiasm and indeed with a certain reluctance. I think there are some reasons which are of sufficient weight to justify the removal of this affidavit. But I also feel that most of the arguments on behalf of this bill are spurious ones. I disagree with the basic philosophy behind them and for that reason I wish to make my position clear and to suggest an alternative to the bill before us today.

I oppose the present disclaimer affidavit for two reasons. The first is that it is vaguely worded and loosely drawn. It requires a student to certify "that he does not believe in, and is not a member of and does not support any organization that believes in or teaches, the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods."

When we consider that teenage youths who sign this affidavit in bad faith are liable to criminal prosecution, it seems to me that the affidavit is extremely vague. What do we mean by "believe in"? Are we to try to punish beliefs as distinguished from acts? What do we mean by "support"? What are "illegal or unconstitutional methods" as distinguished from the use of "force or violence"?

We all recall that during the recent civil rights debate, it was not uncommon for the opponents of various amendments to describe those amendments as attempts to overthrow the Constitution

by unconstitutional or illegal means. And so I oppose this affidavit because it does not go directly to the mark, because it is unclear, vague, and subject to a variety of interpretations. And I oppose it for a second reason.

There is something rather distasteful about requiring our young people to sign a rather elaborate affidavit denying that they are Communists or subversives. But I do not make too much of this point. I believe the Government has a legitimate right to require a disclaimer affidavit if it serves a sufficient purpose. Nor do I believe that students ought to feel abused, or put upon, or maligned, or discriminated against if they are asked to sign such an affidavit as one of the qualifications for receiving valuable public benefits. I believe that if they approached their Government for help in the proper spirit of humility and allegiance, they would be able to sign such an affidavit without any grave misgivings. But there is something about this affidavit which seems to me to violate good taste. It is unnecessarily officious.

For these reasons, I will support the elimination of this affidavit. But in doing so, I would also like to point out my opposition to a number of arguments which have been brought forth against the loyalty oath and the affidavit which, in my judgment, do not hold water.

These arguments are used interchangeably against both the oath of allegiance and the disclaimer affidavit. We should remember that the bill which the committee brought to the floor last year eliminated both the oath of allegiance and the disclaimer affidavit. The report which the committee issued last year condemned both with fine impartiality although this year the report supports the oath of allegiance.

The broadsides issued by educators and groups opposed to this section of the act originally condemned both the oath and the affidavit and used the same arguments against both. This year, obviously as a tactical maneuver, many of these complainants say they can live with the oath, but it is clear that they are accepting it only as an act of expediency. They are unhappy with it and that once they get the affidavit eliminated, they will then move on against the oath itself. For this reason, my remarks today pertain both to the oath and the affidavit.

Mr. THURMOND. Mr. President, will the Senator from Connecticut yield to me?

The PRESIDING OFFICER (Mr. BARTLETT in the chair). Does the Senator from Connecticut yield to the Senator from South Carolina?

Mr. DODD. Yes, I am happy to yield.

Mr. THURMOND. Is it not a fact that originally the proponents of the bill advocated abolishing both the oath of allegiance to the Constitution of the United States and the non-Communist affidavit?

Mr. DODD. That is correct, and that is what I referred to a moment ago. I made that point.

This situation intrigues me—namely, that the same arguments which now are made against this ugly disclaimer—and I say, and repeat, that I believe it is distasteful; I want that point to be clear—were also made, last year, against the oath of allegiance, although those who formerly protested against the oath of allegiance now say—this year—they will accept the oath of allegiance. I find that attitude on their part a suspicious one, and I have my doubts about their position.

Mr. THURMOND. And we find that those who formerly opposed both are now stating that they are willing to accept the oath of allegiance, do we not?

Mr. DODD. Yes.

Mr. THURMOND. Is it not the fear of the Senator from Connecticut that, later, some of them will try to have the oath of allegiance requirement repealed?

Mr. DODD. Yes, I think some of them will. I realize, of course, how dangerous it is to indulge in blanket generalizations and, particularly, blanket denunciations; and I know the Senator from South Carolina feels as I do about that.

But in answer to his question, I say that I am more than suspicious; I am fairly well convinced that, in the present situation, some of those who are behind the present proposal to repeal only the disclaimer affidavit really desire later to do away with the oath of allegiance, and will attempt to do so when they think they can get away with that.

Mr. THURMOND. As a matter of fact, when we analyze the situation, we find there is really no valid objection to either the oath of allegiance or the non-Communist affidavit. Does not the Senator from Connecticut think this bill grows out of a desire on the part of some of the people in this country to call themselves great liberals and to claim academic freedom, and so forth, whereas, as a matter of fact, this type of philosophy is inspired by Communists and fellow-travelers, and a lot of people have been misguided, and some warped minds have been misled into joining this movement?

Mr. DODD. I say to the Senator that is highly possible. However, I say again, because I want him to understand it clearly, that I do not believe in the disclaimer affidavit. I do not think the Senator was here when I made that statement. I said I thought it was officious. I could not find another word to fit. I have been searching my vocabulary. It is officious. It is repugnant to me. I do not think it is right to ask people to say under oath that they are not disloyal or that they are not members of a party advocating the overthrow of this Government.

My argument tonight is that, while I am against the affidavit of disclaimer, I do not want the RECORD to appear that I—and I think this is true of many other Senators here—have been "taken in" by what I think is a change of tactics. This is why, a little later, I shall have something to say about another proposal, which I hope will merit the support of the Senator from South Carolina.

Mr. THURMOND. I wish to thank the Senator from Connecticut for yielding, but I want to say that, so far as the Senator from South Carolina is concerned, he is in favor of retaining both requirements in the National Defense Education Act.

Mr. DODD. I understand. I thank the Senator.

The argument of these groups runs as follows: the device of loyalty oaths and affidavits is an invasion of academic freedom; it enforces an odious conformity; it is a tactic of the totalitarian state; it undermines true patriotism; it discriminates against and points a finger of suspicion at the entire educational community; it discriminates against the needy student by setting up a "double standard" within our colleges; and it creates suspicion and animosity between the U.S. Government and our educational community. This is a formidable list of charges, all of which I believe are not substantiated.

Does section 1001(f) of this bill constitute an invasion of academic freedom? If it does, the only implication to be drawn from this assertion is that the U.S. Government has no right to ask a student to affirm loyalty or to renounce any ideology whatever, or any organization whatever, as a condition for participation in Government-sponsored programs. I reject this interpretation of academic freedom. Under appropriate circumstances, the Government has every right to require of a student, a teacher, or anyone else a pledge of loyalty and an assurance of opposition to those forces that would destroy our Government by force or violence. This is a basic allegiance from which no American is exempt.

The educators who have written to me on this subject generally take the position that the student's right to inquire freely, to satisfy his intellectual curiosity, to criticize his political system, is challenged by the loyalty oath and the affidavit. I think this argument is specious. Freedom of inquiry is not even remotely at issue here. The student who presently signs up under the national defense education loan program has the same academic freedom as all other students. He may inquire into anything he chooses; he may satisfy his intellectual curiosity to the full; he may criticize his Government to his heart's content. But as a willing participant in a Government program aimed at strengthening the Nation's defense, he must be willing to affirm basic loyalty to our country and certify his opposition to treasonable acts against it. If the vociferous minority among the educational community that has blown this issue up into a major controversy contends that academic freedom embraces even freedom to engage in treasonable activities, they should say so, and make as good a case for that strange doctrine as they can. But unless they contend that academic freedom includes freedom to engage in treason, they have no justification whatever for dragging this issue into the current controversy.

The student has no legitimate reason for objecting to this oath on the grounds of academic freedom. But even if he does object, he is free to follow his false notion of academic freedom by remaining outside of the program.

Remember this. The Government established this program to promote the national defense. No one is required to participate. The Government stretches

out its hand for no one. Instead it is the Government that is sought out by the student. The student asks the Government to finance his education on the grounds that his contribution as an educated man to the total national strength will justify the Government expense involved in educating him. Having sought out the Government for aid, has the student the right to object to the exceedingly modest qualifications required by the Government?

There is an implication in the statements of some educators that the student ought to be absolutely free from all allegiance in order that he might pursue his scholarly inquiry unimpeded by any restrictions or reservations whatever. No one is free from all allegiance.

Neither the student, nor the clergyman, nor the doctor, nor the businessman, nor the laborer, nor the farmer is free from the obligation of professing this patriotism, and of defending the Nation against its enemies. None is spared from this obligation—least of all those who wish the Government to finance their education in order that they may more fully contribute to its preservation.

The next argument made in learned articles, and indeed in the committee report, is the implication that the loyalty oath is the tactic of the totalitarian state. The hideous specter of Hitler and the loyalty oath he required of the German academic world has been brought forth and equated with the provisions of this act. The record of other tyrannies is cited as evidence against this loyalty oath. There is an attempt to create the impression that the loyalty oath is bad of itself, that it is a tool of despotism and accompaniment of tyranny. Can anyone honestly see any valid resemblance between the oath that the criminal Nazi regime forced upon its academic world and the loyalty oath which our free Government requires as a qualification for voluntary participation in an educational program founded upon the needs of national defense?

A loyalty oath can be good or bad depending upon the object of the profession of loyalty. It can be sublime or it can be satanic. It can be noble or ignoble depending upon the thing to which loyalty is sworn. If vows of allegiance have been used by tyrannical governments, they have also been used by all free governments. If this is a practice of illicit groups, it is also the practice of religious organizations and the most worthy of fraternal and patriotic groups. If it is used by the forces of ignorance, it is also employed by the forces of enlightenment.

The compulsion by force of oaths of loyalty to a bad regime is wrong. The needless requirement of loyalty oaths to a good regime is absurd and foolish. But the modest requirements of an oath or an appropriate disclaimer as a qualification for voluntary participation in a Government program geared to the national defense is so obviously right and just and reasonable that any comparison between it and anything remotely connected with Hitler is inexcusable, and ought not to pass unchallenged.

Page 7 of the committee report states the following:

> The wholesale extension of loyalty oaths to free citizens will ultimately and most insidiously weaken rather than strengthen loyalty to the Nation. For loyalty is not to be equated with formal outward expressions. Historically, we know that it is precisely those societies which have been most tyrannical that have insisted on frequent and formal expressions of loyalty by its citizens. Loyalty to country is a spiritual quality; it cannot be coerced nor is it strengthened by automatic, unthoughtful responses to stock questions.

There is a whole series of irrelevancies in this paragraph which I would like to point out.

First of all, the present act as it stands today does not involve any wholesale extension of loyalty oaths. It is a selective extension to a selective group of volunteers for a specific purpose. None are required to participate; all who do so participate on their own initiative. There is here no coercion, no "automatic, unthoughtful response to stock questions."

It is the intent of this oath, and the affidavit as well, that it be taken with careful thought and with serious reflection. The committee report itself regards the oath as so serious a matter that it considers the false taking of such an oath as a sufficient reason for imprisonment. And as for the rest of that paragraph, I ask my colleagues, was your loyalty insidiously weakened by the morning pledge of allegiance which you took each day as a school child? Was your loyalty undermined by the repeated singing of our national songs in school or at the ball park or at political meetings? Was your loyalty weakened by the repeated oaths of office, all of which the committee apparently place in the category of "automatic, unthoughtful responses to stock questions"?

Another argument made is the assertion that this act involves discrimination against the educational community. It is said that no other programs involving the extension of Government benefits require a loyalty oath and a disclaimer of disloyalty and that to level this requirement at the educational community alone is discriminatory and points the finger of suspicion at education.

There are three answers to this assertion. The first is that the aid given under the National Defense Education Act is not to be equated with other general Federal aid programs. In this instance, the educational community is treated differently because the nature of this program is different. The object of this program as I have said repeatedly before is, "to insure trained manpower of sufficient quality and quantity to meet the defense needs of the United States." It is not a general aid to education statute such as the Senate passed a few months ago, without any loyalty oath requirement.

The second answer to the charge that this act is discriminatory against education is that there is a sound reason for the distinction between what is required of the beneficiary under the National Defense Education Act as opposed to the requirements of beneficiaries of the farm program, the FHA program, and the social security program which are most commonly cited as comparable examples.

Participation in the social security program requires a complete disclosure of one's income status and compulsory taxation irrespective of the wishes of the person involved.

Participation in the farm support program requires the farmer to put up his crop as collateral for the loan the Government gives him.

In the case of the FHA beneficiary, his house is collateral.

No such requirement is made of the student. The only collateral that the Government can hope for from him is his good faith, his loyalty, his patriotism, his devotion to the country which is educating him in the interests of its own defense.

If he is unwilling at the start to make a formal statement of such good faith, whether because of disloyalty or because of mixed-up ideology, then he can hardly be considered a good risk. For our Government to fail to make some attempt to satisfy itself as to the good faith of the beneficiaries of its loans would appear to me to be gross negligence.

The third response to this point of discrimination is that in the field of education, unlike that of the farm program or the social security program or the housing program, a person's basic philosophy is of necessity a crucial element. Whether the farmer or the homeowner or the social security beneficiary as such is dedicated to our concept of government is irrelevant to the success of those particular programs. But whether the man or woman who is educated to enhance the contributions he can make to the defense of his country is loyal is of fundamental importance. The student is expected to make an ideological contribution to society. He is expected to contribute to the world of ideals, of concepts, and as such, his philosophy on the one fundamental question of loyalty to his country is legitimate and highly relevant and ought to be determined insofar as it is possible to do so—before Government money is expended on his education.

To those who say that a loyalty oath or disclaimer of disloyalty will not inculate patriotism, I say that no one has argued that this is its fundamental purpose.

Section 1001(f) is not aimed at creating loyalty. The Government assumes that except in rare cases a person taking the oath is already loyal, although it considers it worth while to remind him of his obligations and his responsibilities to his country.

The purpose of this section of the act is rather to deter the disloyal from attempting to get Government benefits. It may well be that this form of deterrence is inadequate. If so, we should try to make it more adequate. But I believe that those who have a record of disloyalty and who are immune from the Smith Act under the gravely weakened status of that act arising from Supreme Court decisions would be reluctant to run the risk of providing the Government with a means of prosecuting them. I do not expect these provisions to be too

effective but I think they would have some effect, and if we made no attempt at all to deal with this problem we would be negligent in our duty.

Then we have the argument that this act discriminates against the needy students by setting up a double standard which requires loyalty oaths of the needy but leaves the other exempt and undefiled. This is rather a laughable argument coming from those supposedly trained in logic. It could be said with just as much sense that the Government sets up a double standard and discriminates against a large body of students when it finances the education of some and does not finance the education of others. The use of the word "discrimination" in this context obviously refers to the dictionary definition "an unfair or injurious distinction." It is a symptom of something seriously wrong with a segment of our educational community that they should protest against an oath of allegiance to their Government and a renunciation of its enemies on the grounds that it demeans such a student by requiring him to perform an odious, unfair, and injurious act.

Is it not truer to say that the Government under this act singles out the needy student in order to help him? Is it not truer to say that it singles him out for benefits rather than burdens, for preferment rather than mistreatment? And that the loyalty oath is merely an obvious necessity arising from this preferment?

The only group discriminating against the needy student so far as this issue is concerned are those few colleges which have abolished the loan program by which the needy students might have received an education in the college of their choice.

Finally, we have the argument that this act has unnecessarily stirred up friction, suspicion, and resentment between the educational community and the U.S. Government. The fact is that a minority of about 30 or 40 colleges in the land—out of 1,350—have withdrawn from the loan program. The fact is that this minority has stirred up resentment against the U.S. Government and blown up this controversy to as great a size as it could. The fact is that a minority of colleges and universities are boycotting the U.S. Government and, having done so, they have the gall to claim that they are the offended parties, that they are the innocent victims of the friction and suspicion and resentment.

The tactics of these colleges and educational spokesmen have been one of the reasons why I am reluctant to make any change in this act. This act has only been on the books for less than 2 years. The loyalty oath and affidavit provisions were inserted in the act rather perfunctorily, according to the remarks of the junior Senator from Massachusetts last year on the floor of the Senate. There was no intent by the Congress to offend the educational community or arouse its resentment. Had the representatives of that group come to the Congress in a reasonable manner and quietly sought to work out their differences, I have little doubt but that the Congress would have gone very far to meet their objections.

But instead they chose to repudiate a Government program. Instead they chose to stir up the students against this act which was aimed to benefit them and the Nation's defense. Instead they chose to liken our Government to the Nazi regime of Hitler, to shed crocodile tears, and to put on an air of persecution.

If there is friction between the academic world and the Government as a result of this oath controversy, it is the academic world which must take the major blame.

I am very reluctant to yield to this kind of tactics. My tendency would be to let these colleges and universities that are boycotting their Government continue to do so. Let them stay out of this program and all future Government programs aimed at helping students and schools.

But I would much prefer an alternative under which the legitimate requirements of the Government can be satisfied in a way least offensive to what I consider are the misguided spokesmen of a minority of the educational world.

Last year, this bill was sent back to committee because the Senate was dissatisfied with it as it stood. The committee was expected to hold further hearings and to return with a bill which provided more safeguards against the disloyal applicant than is contained in the mere oath of allegiance as it is presently worded.

In the face of this the committee held no public hearings, made no changes in the bill, and has returned to us for consideration the exact bill we recommitted last year.

Therefore, I believe that the Senate should do here on the floor what the committee was expected to do. To that end, I introduce and send to the desk an amendment to amend the present wording of the loyalty oath by including in it an express definition of the enemies of the United States against which the student pledges to defend our country in the present oath.

I agree that loyalty in its significant form cannot be brought about by the taking of oaths. But neither can it be encouraged by the calculated avoidance of all manifestations of loyalty. Loyalty to our Government is a moral and rational obligation binding upon every American. And the open profession of this loyalty is also an obligation binding upon all Americans under appropriate circumstances. The oath in the present bill is an appropriate expression of loyalty. And I therefore support it and seek to strengthen it. The affidavit, in the present bill, is legitimate in concept but objectionable in its present wording and unnecessary to achieve the legitimate objectives it seeks. I believe that the solution which I propose will preserve the just claims of the Government against the unwarranted assumptions of some of the academic world and will at the same time remove whatever legitimate grievances this group may have while yet protecting in some measures the national defense education program from being misused for the benefit of disloyal Americans.

I prepared an amendment, which I shall place in the RECORD. The amendment stands between those who believe that we should have a disclaimer affidavit and those who believe it should go out. It is a moderate position. I doubt now, from what I heard a few minutes ago, that it will be acted on. However, since I spent some time on it, and perhaps because the question may arise again, I should like to make the amendment and the explanation I had proposed as a part of the RECORD.

The PRESIDING OFFICER. Without objection it is so ordered.

AMENDMENT INTENDED TO BE PROPOSED BY MR. DODD TO THE BILL S. 2929

Following the word "domestic" on line 3 of page 2, strike out the period and add a comma followed by the words "including the Communist Party and any organization which advocates the forceable overthrow of the Constitution or the laws of the United States of America."

EXPLANATION OF DODD AMENDMENT

The present oath of allegiance required in the National Defense Education Act reads as follows:

"I do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic."

My amendment would add to the end of this oath the following phrase: "including the Communist Party and any organization which advocates the forceable overthrow of the Constitution or the laws of the United States of America."

I offer four reasons for the adoption of this amendment.

First, it seems to me logical that an oath which includes a pledge to defend our Constitution and laws against all enemies, foreign and domestic, should include at least a basic definition of what is meant by foreign and domestic enemies.

Second, the committee report lists as one of its reasons for eliminating the affidavit the contention that the oath of allegiance itself provides sufficient protection against the use of this act by disloyal persons. The committee report contends on page 3 that should a member of the Communist Party or of any other subversive organization take the oath of allegiance contained in this act, he would be subject to criminal prosecution for nondisclosure of such membership. The committee further contends that even if the student were not a member of any such organization at the time of his loan application but later joined the Communist Party, he would be liable for prosecution at the time he joined the Party if he were still receiving loan installments.

Under these circumstances, I believe that the wording of the oath should be so clear on this subject as to prevent any confusion on the part of the student or leave any pretext for the excuse that the student took the oath in good faith without realizing its full implications. My amendment, by singling out the Communist Party as an enemy of the Nation and by clearly defining as enemies all organizations which seek the forceable overthrow of our Government, removes this vagueness in the present oath of allegiance.

Third, in his minority views on page 18 of the report, the able junior Senator from Vermont, Mr. PROUTY, quotes Freeman W. Sharp of the American Law Division of the Legislative Reference Service, who points out that there is grave doubt that membership in the Communist Party would be construed by the courts as a violation of the present oath of allegiance but that the Communist Party member who signed the affidavit, which goes further in defining what

are the enemies of the United States, would be in violation of the false swearing provisions of section 1001 of the U.S. Criminal Code.

Therefore, if the committee majority is right in maintaining that Communist Party membership would constitute criminal violation of the oath of allegiance, we owe it to those taking the oath to clearly single out what we mean by enemies of the United States. If, on the other hand, Senator PROUTY and the sources he quotes are correct in contending that a clearer definition of foreign and domestic enemies is needed than that contained in the present oath, we owe it to the country to provide that clearer definition as I have done in my amendment.

Fourth, the elimination of the disclaimer affidavit, if not compensated for by other action, would leave the impression that the right of our Government in this matter is limited to calling for a vague, affirmative oath of allegiance and that the Government may not also require a clear statement of opposition to the unquestioned enemies of our country. This is a concession that it is not necessary to make and that I am unwilling to make.

In summary, my amendment merely defines the enemies against which the loan applicant pledges to defend the Constitution and laws of the United States. This addition to the oath implies no disloyalty nor does it go beyond the oath itself in requiring what some people resent as negative disavowals.

Mr. DODD. Mr. President, because of certain advice which I have received, I shall not offer my amendment. I have read it into the RECORD.

I shall conclude by saying that I hope we can clear up this situation and be done with it. I hope that never again shall we have this kind of furor raised in this country, with a great many people frightened and intimidated and confused, not by the forces of government, but by some people inside academic communities and outside academic communities who have axes to grind.

Mr. DIRKSEN. Mr. President, we have had some discussion with reference to the Prouty amendment, and it is my understanding that with a few slight modifications the amendment is acceptable to the proponents and sponsors of the repeal bill which is before us. We are agreeable to these modifications, and I think I speak for the Senator from Vermont.

Mr. PROUTY. Yes.

Mr. DIRKSEN. In respect to those whose names are on the agenda to speak, I ask unanimous consent that their remarks may be inserted in the RECORD, since the schedule was unpredictable, and they had some commitments. With that understanding, I have no particular desire to have a quorum call or even to ask for a yea-and-nay vote. We can approve this bill; as I suggested to the Senator from Massachusetts, and if any refinements or modifications are necessary, there will still be an opportunity to do so, either here are in conference.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I understand that the amendment is in the nature of a substitute. Is that correct?

Mr. DIRKSEN. Yes.

Mr. KENNEDY. I accept the amendment. I still prefer the bill that was reported by the committee. I think the substitute follows the precedent we followed in the case of the labor bill which was passed last year, when we enacted a similar section and when we were unable to repeal the affidavit the year before. My judgment is if we accept the language of the amendment of the Senator from Vermont we will have a better chance of carrying this effort through to successful completion this year. After all, our objective is not merely action in the Senate, but by the House also.

It is my judgment that in the atmosphere which exists in Congress in June of this year, we have a much better prospect of carrying the amendment in the nature of a substitute, offered by the Senator from Vermont, through the Senate and the House than we would have in carrying the committee bill. I think, therefore, that the amendment in the nature of a substitute will be greatly preferable to the present law. It will result in the repeal of the oath and the affidavit. It will subject those who accept money from the Government, and who are members of the Communist Party, to severe penalties, the same as is provided in the committee bill.

I express my appreciation to the Senator from Vermont for suggesting what I consider to be a happy compromise.

Mr. PROUTY. I appreciate the statement of the Senator from Massachusetts. I point out that while I myself have had no objection to the loyalty oath or the disclaimer affidavit in existing law, nevertheless I know there are objections, for various reasons, in the minds of some persons who are very sincere.

I shall not take much time. I know many Senators wish to leave because of the lateness of the hour. However, I point out in the speech which I had intended to deliver, but which I shall insert in the RECORD, that I think it is quite conclusive that the amendment which I have offered, while it removes the objectionable procedures which are in the minds of some persons, is still much stronger than existing law.

I treat that at some length and discuss it in detail. I discuss the relationship of the amendment with the Smith Act, the Internal Security Act, and various other facets of the security program. Nevertheless, I believe the amendment protects the American people. Actually, it is tougher, so far as subversives are concerned, than the present law. It does away with the features of the affidavit and the loyalty oath.

Mr. President, I think that at this time I should ask to modify my amendment in a very mild form.

On page 1, line 4, of the amendment, which is at the desk, I propose to strike out "establishment, control, conduct," so that the language will read, "having for one of its purposes or objectives the seizure or overthrow of the Government of the United States."

The PRESIDING OFFICER. The amendment will be so modified.

Mr. DODD. Mr. President, will the Senator yield?

Mr. PROUTY. I yield.

Mr. DODD. I have seen a copy of the amendment. Do I correctly understand that the Senator's amendment actually does away with both the oath and the affidavit?

Mr. PROUTY. That is correct.

Mr. DODD. So the bill is left without any provision for an oath?

Mr. PROUTY. That is correct; there is no oath whatsoever. I am sorry I have not had an opportunity to make my speech in full. If the Senator from Connecticut will read the individual views in the report, he will find a set of questions which I presented to the Department of Justice and also to the Legislative Reference Service of the Library of Congress.

Both those agencies suggest that the oath is absolutely worthless; that a Communist could not be convicted under it. They point out, for example, that one who was not a Communist and who took an oath in good faith, but who 3 or 4 months later became a Communist, could not be guilty of a crime.

They also point out that one who is actually a Communist could take an oath of office today, based on court decisions and statutes at the present time. It is rather convincing that both agencies believe that the oath does not carry very much weight.

Mr. DODD. Is it to be understood, then, that the purpose of the oath was only to lay a foundation for criminal prosecution? Does it not have any other value?

Mr. PROUTY. I do not believe it does even that, according to the best legal talent with whom I have been in contact.

I call the attention of the Senator to the question which I posed on page 16 of the report:

> Would an individual, who is not a member of a subversive organization at the time he makes application for benefits under the National Defense Education Act, but who later joins such an organization while receiving benefits under the act, be guilty of a criminal offense if he had executed the oath of allegiance set forth in S. 2929?

I raised this point with the Department of Justice, and John D. Calhoun, Assistant Deputy Attorney General, had this to say:

> We are unaware of any criminal statute which would be applicable to the facts as set forth in your letter. Generally, the provisions of the statutes relating to perjury and false statements are applicable to statements which are alleged to be false at the time they were made, and, in our judgment, they would have no application to activities in derogation of the oath at a date subsequent thereto.
>
> Moreover, even though the oath of allegiance set forth in S. 2929 be construed as a promise for future conduct, there is serious doubt whether in the circumstances described in your letter, an individual would be liable to criminal punishment for a subsequent failure to abide by the oath.

The Legislative Reference Service of the Library of Congress subscribes to the same opinion, and there are innumerable court cases which, I believe, sustain those views.

Mr. DODD. Then it seems to me that all we have done is to effect a compromise. We have abandoned the oath on the ground that it is not enforcible;

on the ground that one who took the oath could not be punished.

Is there not something more to an oath of allegiance than the possibility of punishment for falsely executing it? I was brought up to believe that an oath of allegiance was an act of loyalty and faith in and support of something which was worthwhile.

Mr. PROUTY. I have no objection whatsoever, and never have had, to an oath of allegiance or to an affidavit. I have taken such an oath many times.

Mr. DODD. I do not believe the Senator ever has had objection, but I feel certain there have been persons who have had. In a subtle way they have conjured up or dragged up many other arguments about the nonenforcibility of a criminal statute, and they may have won a great victory through sabotage of the bill tonight by having the Senate abandon the simple oath of allegiance to the country.

Mr. PROUTY. I cannot entirely agree with the Senator that subversive influences have won a great victory, because the law, as provided in my amendment, will be stronger and more realistic than the provisions of existing law.

I am sympathetic to the Senator's attitude with respect to persons who hesitate or decline to take the oath of allegiance. Such action cannot be justified on any ground. Nevertheless, we must face up to the reality. We will have a law which will be stronger than existing law. It will protect the Government against subversive influences, whereas the existing law, in many instances, does not.

Mr. KENNEDY. Would the Senator from Connecticut want to have it go out to the country that if the Prouty amendment is accepted, the forces of subversion will have won a great victory in the Senate?

Mr. DODD. I did not say anything of the kind. What I said, was that some persons are active for the repeal, in the first place, of the oath of allegiance.

The program a year ago was to accomplish exactly what will be done by the Prouty amendment if we strike out or abandon the oath of allegiance and disclaimer of disloyalty.

I said earlier, while the Senator from Massachusetts was not in the Chamber, that I thought there was something distasteful about a disclaimer of disloyalty, but that I thought an oath of allegiance or loyalty was a very simple and decent thing.

I said I thought there were people who were using the same argument against the oath of allegiance as they were using against the disclaimer of disloyalty. That was the point I raised in connection with the amendment of the Senator from Vermont.

Mr. KENNEDY. I was confident of that, but I did not want to have any misreading of what the Senator from Connecticut had said, or any misreading of his intention. As the Senator from Connecticut knows, the bill which the committee reported to the Senate contained an oath of allegiance. Personally, I do not object to continuing the oath of allegiance, if there is a feeling in the Senate that that would be desirable.

Mr. PROUTY. I certainly have no objection.

Mr. KENNEDY. If the Senator from Connecticut would like to propose that as an amendment to the substitute, I would accept it.

Mr. DODD. I would. I think it is an entirely right action for us to take.

Mr. DIRKSEN. Mr. President, will the Senator from Vermont yield?

Mr. PROUTY. I yield.

Mr. DIRKSEN. When this matter came before the Senate in July of last year, the great controversy which arose was over the disclaimer, not over the oath; and the only effort made at that time was to repeal the disclaimer. The bill went back to the committee, as I understand, on a recommittal vote of 49 to 42; but at no time was there any real discussion about taking out the oath. At one time it was said that it was not required of other groups which received loan funds from the country. But never was there any real objection to the oath itself.

I think this entire situation can be cured if the Senator from Vermont, instead of offering his proposal as a complete substitute for the bill, will offer his proposal as an amendment to the bill which now is before us, which preserves the oath. Then we shall have the oath and also an enforceable provision with respect to any applications for loan funds by persons who belong to or have belonged to subversive organizations, but have not disclosed that fact. I believe that in that way the difficulty would be cured. I respectfully make that suggestion to the distinguished Senator from Vermont.

Mr. DODD. I concur in the suggestion.

Mr. PROUTY. Mr. President, I ask that I may submit my amendment, instead of an amendment in the nature of a substitute for the entire bill, as an amendment to the bill.

The PRESIDING OFFICER. The Senator from Vermont has a right to modify his amendment; and it will be modified accordingly.

Mr. KENNEDY. Mr. President, certainly the Senator from Vermont has a right to modify his amendment; and I believe the Senator from Connecticut has made a valuable suggestion.

Mr. DODD. I thank the Senator from Massachusetts for the compliment.

Mr. PROUTY subsequently said: Mr. President, I ask unanimous consent that the remarks I intended to make be printed in the RECORD just prior to the taking of the vote.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR PROUTY

In the interest of self-preservation, an element in any society, in the interest of guarding our republican form of government guaranteed to the States by article IV, section 4, of the Constitution, in the interest of providing for the common defense and securing the blessings of liberty, the Federal Government has the right and the duty to avoid taking any action which would further the interests of those inimical to the United States.

The duty of the General Government was made unmistakably clear in the writings of James Madison in the "Federalist Papers." This is what the father of the Constitution had to say:

"In a confederacy founded on republican principles and composed of republican members, the superintending government ought clearly to possess authority to defend the system against aristocratic or monarchial innovations * * * but who can say what experiments may be produced by the caprice of particular States, by the ambition of enterprising leaders, or by the intrigues and influence of foreign powers?"

The history of mankind has taught the unforgettable lesson that excessive and misguided protection of individual privilege ill serves the cause of freedom. Without some legislative restraints on individual privilege, there is neither law nor liberty.

If there is one overriding issue in the debate which is now taking place, it is whether the Federal Government should permit Communists and other subversives to partake of benefits under a statute which was adopted in order to strengthen our defenses and to assist in the development of our scientific capabilities to meet the cold war which may currently become a hot war.

In some ways, it is ironic that the Senate should be considering such legislation at a time when the tensions between the East and the West have reached an all-time high. The National Defense Education Act of 1958 was adopted in order to assist students who would otherwise financially be unable to pursue courses that would enhance their effectiveness in the defense of the United States.

Title I, section 101 of the National Defense Education Act reads as follows:

"The Congress hereby finds and declares that the security of the Nation requires the fullest development of the mental resources and technical skills of its young men and women. The present emergency demands that additional and more adequate educational opportunities be made available. The defense of this Nation depends upon the mastery of modern techniques developed from complex scientific principles. It depends as well upon the discovery and development of new principles, new techniques, and new knowledge.

"We must increase our efforts to identify and educate more of the talent of our Nation. This requires programs that will give assurance that no student of ability will be denied an opportunity for higher education because of financial need; will correct as rapidly as possible the existing imbalances in our educational programs which have led to an insufficient proportion of our population educated in science, mathematics, and modern foreign languages and trained in technology.

"The Congress reaffirms the principle and declares that the States and local communities have and must retain control over and primary responsibility for public education. The national interest requires, however, that the Federal Government give assistance to education for programs which are important to our defense.

"To meet the present education emergency requires additional effort at all levels of government. It is therefore the purpose of this act to provide substantial assistance in various forms to individuals, and to States and their subdivisions, in order to insure trained manpower of sufficient quality and quantity to meet the national defense needs of the United States."

This statement establishes the fact that the Congress in enacting this legislation was concerned with promoting our national se-

curity and not with a general program of aid for education. American technology, particularly in the applications of science, has been acclaimed throughout the world. It is too often forgotten, however, that most of the fundamental sciences upon which this technology rests were first developed abroad. This applies to the basic laws of physics formulated by Galileo, an Italian; Newton, an Englishman; and more recently, Einstein, a German.

Every Member of the Senate is well aware of the advances in the chemical industry which were made by the Germans during the latter part of the 19th century and the first quarter of the 20th century. In fact, until after World War I America's chemical industry was not of too great importance in our economy. When German dyes, pharmaceuticals, and other products were denied to us, American efforts developed a preeminent chemical industry.

While America was the first Nation to apply atomic energy, the basic scientific research in nuclear fission stems from the studies of Rutherford of England, Niels Bohr of Denmark, Planck of Germany, Madame Curie of France, Enrico Fermi of Italy, and countless other gifted scholars. The enactment of the National Defense Education Act was in part a result of America's awareness of the need to advance our basic knowledge following Russian successes in the exploration of our space. Here again, we were assisted by the experience of Wernher von Braun, a gifted German scientist who became a loyal U.S. citizen.

All of those who provided the fundamental scientific knowledge upon which our advanced technology rests received a disciplined education in these basic fields in other countries that was not available in most of our educational institutions until recent years. We had a vast new country to develop and exploit, and our efforts were devoted to training engineers who could invent and develop equipment which applied the knowledge already available. Our educational institutions were concerned with the development of those instruments of production that were necessary to make the maximum use of our vast resources.

I am still a firm believer in the fact that our own technology is superior to the Russians because under our security system we do not reveal all that we have accomplished for propaganda purposes. On the other hand, since we do enjoy a free press, any failures are immediately noted and brought to the attention of the entire civilized world. This, in a large sense, explains Russia's claims to outdistancing America's performance in the exploration of outer space. Yet, once again, it is important to maintain our perspective, and it should be noted that most of the satellites presently in orbit were launched by the United States of America, and not by Russia. Furthermore, they have far more advanced equipment to record and transmit pertinent data which enhances our knowledge of the outer atmosphere than their Russian counterparts. Our military capabilities have been demonstrated by the successful launching of an Atlas missile on Friday, May 20, which covered a range from Cape Canaveral to the Indian Ocean below the southern tip of Africa.

A report submitted by the President's Science Advisory Committee on May 24, 1959, reviews the position of science and technology in the world of today. Portions of this document, which was prepared by a group of our leading academic scientists including Dr. James R. Killian, Jr., chairman of the Massachusetts Institute of Technology, formerly Special Assistant to the President for Science and Technology, as well as the present occupant of that post, Dr. George B. Kistiakowsky, read as follows:

"Science, engineering, and technology have obviously been responsible for a host of conspicuous changes at all levels of our modern civilization. There is much reason to expect that such changes will continue, and will indeed accelerate. There is no way to turn back the clock or to turn off scientific advance. There will be no international moratorium on science or technology. The people of the United States, on the most practical grounds, must accept and support these propositions. By ignoring them, or by fostering them only with reserve, they could doom their Nation to unnecessary weakness and backwardness in a world where other nations are not so foolish. Alfred North Whitehead said in 1916:

" 'In the conditions of modern life the rule is absolute: The race which does not value trained intelligence is doomed. Not all your heroism, not all your social charm, not all your wit, not all your victories on land or at sea, can move back the finger of fate. Today we maintain ourselves. Tomorrow science will have moved forward yet one more step, and there will be no appeal from the judgment which will then be pronounced on the uneducated.'

"This is even more forcibly apparent in 1959 than it was in 1916. It follows that we must educate more, and especially we must educate better scientists and engineers. But this is not enough. We must have trained specialists in many fields. Even then we would not be successful if, having such specialists, the American people were merely to applaud and reward them for their contributions while still thinking of them as useful strangers, dimly understood and more feared than admired. Hence, we must also cultivate a widespread dedication to and respect for learning in all fields, and a deep understanding between the public and the experts.

"GROWTH OF SCIENCE

"The story of man has from the very beginning involved his progress in the conquest of nature, and, less successfully, his effort to understand himself and to live amicably with his fellow men. Here we are concerned with the accelerating conquest of nature which began in prehistory and proceeded in spite of superstitions, of magic, and of taboos. Yet modern science had its beginnings only 300 years ago, and since then our ability to understand nature has grown by leaps and bounds and at an ever-accelerating rate. Twentieth-century advances in the techniques of research in applied science, replacing the simpler process of invention, have aided the explosive growth of modern industrial societies.

"Science affects the life of every contemporary man every day. It conditions decisions that need to be made by his government on many matters, including national defense, foreign policy, and public health. It affects the decisions made by individuals on business problems, on selecting a community in which to live, on choosing an automobile, a record player, or perhaps even a dentifrice. If an individual is ignorant of science he must guess what to do or else believe what he is told. Even if he is told what to do by an expert, he has no way to check on this advice or even to understand it. This unhappy predicament is precisely that of most citizens of the United States today. Their fate in important matters and in trivial matters alike may thus be decided without their participation. And it will not be otherwise so long as they remain illiterate about science and technology.

"The march of science and technology is of growing importance to every American as a citizen. Congress regularly appropriates huge sums for scientific research and even larger ones for engineering and development; yet a majority of the voters have little grasp of what this is all about. Do we, for example, seek to make shots at the Moon, or send vehicles to Mars, in order to extend scientific knowledge alone—and, if so, how much is that effort worth? Is our primary purpose to launch such vehicles before the Russians do for the sake of impressing the rest of the world? Then how much are such achievements worth? To what extent do these space ventures attain primarily a strengthening of our military capabilities? If our space ventures essay all of these purposes simultaneously, we must still have judgment on the weight to be given to each purpose. To be able to think beyond the press releases and publicity statements, to understand the background of national debate requires a greater comprehension of space problems than that provided by science fiction or the comic strip.

"Yet the field of space research is only one important field of modern technology which is of concern to the average citizen. There are other fields involving communications, transportation, and human health. But are there still others which we do not recognize at all? Is it because no comparable sputnik has awakened us? The shocks provided by achievement elsewhere may not be an adequate guide to our progress or our efforts. A national effort is required to strengthen our scientific and technological efforts in all fields, aimed at the advance of knowledge and the enhancement of the general welfare. In a democracy such an effort can succeed only if it has widespread public understanding and support.

"In a frontier society, such as that of America of 100 years ago, it was natural that physical prowess and bravery, inherent in the pioneer, should have been held in high esteem. Today the frontier is intellectual; the scholar, the research worker, the scientist, the engineer, the teacher are the pioneers.

"Until recent years the total intellectual capacities of our Nation have never really been fully challenged. But they are being challenged today. Our intellectual resources will be adequate to meet our needs only if all the brain power of our population is fully developed and utilized. Well-trained minds are among the most critical of our present national assets among the scarcest and most valuable of our resources.

"Fortunately, Americans of high talent can be found in every field of human endeavor, in teaching and in music, in art and in craft, in science and in economics; we have produced brilliant clergymen and philosophers, engineers and lawyers, doctors and politicians. We need high-quality leadership in all these fields; we need to make sure that the young potentials for such high-quality leadership are developed and not wasted. To this end intellectual excellence needs to be fostered, rewarded, and applauded. Though the star athlete may remain a hero, it is now evident that an even deeper recognition ought to be given to the scholar. An enhancement of the Nation's desire to learn and an increase in its respect for intellectual excellence have become essential to national progress, and even to survival. Whatever importance we may attach to the acquisition of physical and mechanical or social skills, they must not be mistaken for, or replace, the acquisition of intellectual competence.

"It is true that as the schoolchild grows into the adult, he must accept adult responsibilities as a member of a family, a member of society, and a wage earner. But it does not follow that schools should overemphasize vocational skills or personal adjustment and social techniques at the expense of intellectual subjects. When social and technological change took place more slowly than it does now, it was sometimes possible for one generation directly to teach the next the practical skills that experience

had developed. But social and technological change are now taking place too rapidly for this kind of instruction to be the best method of preparation for adult responsibilities. The vocational necessities remain, but the best help our schools can now give many students is an intelligent understanding of the world in which they live—a basis on which they can begin to think and learn for themselves so that they will not be lost or supine in the changing world of tomorrow.

"There is much more to learn than there was 100 years ago and hence the learning process must be made more efficient at every level. Time is precious in each student's life so there is an evident necessity to examine our methods of teaching and learning and to work imaginatively on every possible way of improving them. But at this point we face the distressing fact that good teachers are now in short supply in all fields and at all levels and that they are going to be in shorter supply in the future.

"At the college and university level, teachers with Ph. D. degrees are important because of their more extended training in scholarship and research. In the recent past some 40 percent of such faculties have held Ph. D.'s, but the prospects for the future are that there will be a further decline.

"The National Science Foundation, in 1956, estimated that we must have 300,000 or more new college teachers by 1970 if we are to keep pace with our needs. Prospects for filling even 40 percent of these positions with Ph. D. recipients are very slim. Some authoritative sources have indicated that we will provide only 20 or 25 percent. In fact, the National Education Association has found in studying newly employed college teachers, that the percentage holding earned doctor's degrees dropped steadily from 31.4 percent in 1953–54 to 23.5 percent in 1956–57.

"There were only 250 students in the country in 1957–58 who took Ph. D.'s in mathematics; 500 in physics; 1000 in chemistry; 650 in all engineering fields; many of these, of course, will not go into teaching at all.

"High school science teachers come from teachers' colleges, from liberal arts colleges, and from universities where they have taken either a major or a minor in science, with perhaps some education courses to meet certification requirements. The present corps of full and part-time high school teachers of science and mathematics of all kinds numbers about 140,000 and the annual loss is about 10 percent. Thus merely to replace those who leave, and taking no account of increased student population, 14,000 new teachers would be needed each year. But secondary school populations will increase at least 50 percent by 1969. Thus merely to maintain our present inadequacies we will need to increase input each year until by 1969 it is at least 21,000 new science teachers each year."

The statements from the report of the President's Science Advisory Committee clearly show the need of our developing our potential of gifted youth so that not only can we compete effectively in the contest with the Russians, but also secure the support of the underdeveloped countries who will look to us for leadership in today's world of technology.

We all remember that when sputnik came people in all walks of life in this country became determined that we would as a nation reduce any possible scientific gap that might exist between the United States of America and the Soviet Union.

Sputnik proved that the Russians were far more advanced in the fields of rocketry and space exploration than America had estimated. In the light of this situation Congress would have been derelict in its duty had it not enacted legislation within its power to protect the national welfare.

The enactment of the National Defense Education Act into Public Law 864 of the 85th Congress on September 2, 1958 marks a new era in our efforts to promote science and technology. Previously the Federal Government, through the National Science Foundation and the Atomic Energy Commission, had granted fellowships to further our general position in the fields of atomic energy and the natural and social sciences.

We all recall that when the National Defense Education Act became law it contained the requirement that every individual who seeks benefits under the act shall have to take an oath of allegiance and execute a non-Communist affidavit.

A hubbub was raised last year in some academic circles about the oath and affidavit requirements and as a consequence thereof the Labor and Public Welfare Committee reported a bill which would repeal both the oath and the affidavit. The recommendations of the committee met strong objections on the Senate floor and there was a regrouping of forces behind a so-called compromise proposal which called for repeal of the non-Communist affidavit only. A slim majority of the Senate quickly ran up the hill to approve the compromise and after taking a look at it became dissatisfied with its action and the Senate then proceeded to send back the whole controversy to the Senate Labor and Public Welfare Committee.

In a speech in support of his motion to recommit the bill repealing the non-Communist affidavit the distinguished Senator from Louisiana summed up the mood of the Senate when he said:

"It seems to me that when the loyalty, the security and the safety of a nation are involved, if the Senate can come no nearer to agreeing than to decide the issue by the margin of a single vote, it is evident that sufficient consideration has not been given to the issue, because certainly there is no division among us on the question of our desire to protect this Nation."

The Long motion to recommit the bill was agreed to by the Senate by a vote of 49 yeas to 42 nays.

In February 1960 a majority of the Senate Labor and Public Welfare Committee ordered reported S. 2929, a bill which would leave the oath of allegiance requirement in the National Defense Education Act but remove the non-Communist affidavit requirement. This proposal is nothing new. It is the same old so-called compromise which the Senate finally deemed unacceptable last year.

It is indeed ironic that a majority of the Senate Labor and Public Welfare Committee now finds itself in the unenviable position of having to advance concepts and language it has hitherto roundly condemned as discriminatory and ineffective.

Last year the committee opposed the loyalty oath requirement observing (1) that it is ineffective as a security measure, (2) that it interferes with the operations and objectives of the National Defense Education Act, (3) that it casts doubt upon the loyalty of the members of the educational community, and (4) that it raises a serious constitutional problem.

I asked this question in my individual views contained in the committee report and I ask it again now: How can the committee counsel us to follow a path it has found to be strewn with inequity and unrighteousness?

I agree with my colleagues on the Labor Committee that affidavits have their shortcomings as security measures but I do not believe that we should remove the affidavit requirement from the law until a more protective device has been found to replace it.

I do not think that a majority of the American people want members of the Communist Party or other subversive organizations to get grants or loans under a program which was set up to improve our national defense. This is the reason I intend to speak at length today.

The Communist conspiracy, which seeks to destroy all of the rights of the individual which we cherish and hold dear, has always approached America as a special target.

In an article which appeared in a national magazine, J. Edgar Hoover, Director of the Federal Bureau of Investigation, drove sharply home the grim facts about Communist penetration of our national life.

This is what Mr. Hoover had to say:

"Never a day passes that I do not receive reliable reports on Communist activities in many different parts of the Nation. Almost no field of our society is immune to them."

In their untiring efforts to shape the thinking and attitudes of what they term the "masses," Director Hoover says, and I quote: "The Reds have always devoted much attention to idea-molding fields, such as education, the press, radio, and television. Here, too, they are still dangerously active."

Mr. Hoover makes it unmistakably clear that the vast majority of American teachers are loyal citizens. Yet, he points out that there is evidence that the Communist Party has members at work in every kind of educational institution. This is how he characterizes the Red strategy:

"Being good tacticians, the Communists realize that one concealed party member in education may be worth a dozen in less strategic fields, and some of their more successful propagandists in this area have influenced, and are influencing, the ideas of thousands of young people."

In January of 1960, Director Hoover of the FBI appeared before the Senate Internal Security Subcommittee to discuss the 17th National Convention of the Communist Party USA. This is the warning Mr. Hoover gave on that occasion:

"Profaning the very meaning and spirit of the 'Star Spangled Banner' by opening its sinister conclave with our national anthem, Communist Party USA convened its 17th national convention on December 10, 1959, in a hotel in New York City's Harlem section. Four days later the same 200 delegates representing other Communists throughout our Nation, adjourned in a state of jubilance.

"And well they might feel in high spirits—because the Communist Party USA emerged from this convention more powerful, more unified, and even more of a menace to our Republic."

In the view of the Federal Bureau of Investigation, the most significant achievement of the Communist Party convention was the welding of the party into a solidly unified, aggressive force, behind the militant, devious, and ruthless leadership of Gus Hall, ex-convict and an avowed enemy of the American way of life.

J. Edgar Hoover drew the attention of the Senate Internal Security Subcommittee to the radio and television interviews conducted at the Communist Party convention wherein Gus Hall, party leader, stated that the American public definitely has underestimated the size and influence of the Communist Party U.S.A. According to Hoover, Hall added that the Communists in this country should make even greater strides toward increasing its already growing number of members. Hall boasted that the party is "growing in industry and youth" due mainly to the change in political climate.

Andrew Ilyinski of New York City, an employee of the Bureau of Customs of the U.S. Treasury Department, displayed to a House of Representatives committee last year, samples of typical Communist propaganda periodicals published abroad and sent into the United States destined to student groups in schools and colleges. Mr. Ilyinski

stated that every school and college in the United States is directly or indirectly the recipient of some of these Communist propaganda publications.

A spot check of the volume of Communist propaganda destined to schools and colleges in the United States was made over a 12-month period in 1959 by the Bureau of Customs, Mr. Ilyinski stated. The result of the spot check showed that at least 300,000 packages of Communist propaganda destined to schools and colleges in the United States were processed through the port of New Orleans during this 12-month period. Mr. Ilyinski further stated that the port of New Orleans, where the spot check was made, is one of the lesser ports of entry from the standpoint of Communist propaganda, and that a heavier volume of this material is coming into the United States by way of approximately 40 other ports of entry. It is clear from the statement of this distinguished Customs official that last year upward of 12 million packages of Communist propaganda went to American colleges and universities.

I again quote from Mr. J. Edgar Hoover's comments on the proceedings of the 17th National Convention of the U.S. Communist Party in December 1959. He said:

"If for a moment any American considers the Communist to be blind to opportunity, let him consider this vile tactic which came out of the 17th national convention:

"It is obvious to the Communists that, if its party is to survive, it must attract the youth of this Nation. As newspapers and other media reveal almost daily, many of America's juveniles are in a state of upheaval—adult authority and morality have been spurned to the point where juvenile arrests in this country in 1958 increased 8 percent over the preceding year.

"During the convention, an Illinois Communist took note of the juvenile delinquency situation and proposed that if 'we' provide them with a place to go and with activities, they will not be so delinquent, 'we' (the Communists) can move them in a positive direction.

"What can be more despicable or dangerous to our democracy than this sort of Red Pied Piper trickery?"

It is obvious that the Communists will stop at nothing in order to penetrate every segment of our society. One of the prime targets of the Communist conspiracy is our youth. It has always occupied a top position in Communist activities, and the resolution recently passed at the December 1959 convention of the Communist Party clearly illustrates the new designs and plans for the subversion of our young people. The resolution states:

"The incoming national committee within a period of no more than 30 days after the adjournment of this convention, shall appoint a full-time director of youth affairs and establish a functioning national commission on youth affairs composed of youth and adult members. This commission, amongst other things, shall issue a regular national party youth bulletin. We urge that in a brief period of time those State committees which have not done so, shall establish political and organizational responsibility for youth affairs."

What does all this mean? It means in the words of Mr. Hoover himself that "the Communist Party remains deeply interested in the American college student."

The aim of the Communist Party to rob young people of their birthright by destroying their faith in our Republic was clearly stated in an appeal to the college students by the FBI chief entitled "Communism and the College Student":

"You, the college student, whether or not you realize it, are the rich earth which the Communist conspirator hopes to kill. Your mind is the soil in which he hopes to plant alien seed. Your subsequent acts are the products whose growth he strives to direct. The harvest which he seeks is the destruction of our democratic processes of government."

It is inconceivable to me, to strike out the non-Communist affidavit from the National Defense Education Act without adopting another means of affording the Federal Government some measure of protection against those who may be recipients of benefits while advocating the overthrow of our constitutional form of government by illegal methods.

Because I believe that a majority of the American people do not want members of the Communist Party or other subversive groups to get grants or loans under a program which was set up to improve our national defense, I intend to speak at length today in opposition to the committee bill.

During the course of my remarks, I shall advance, to the best of my ability, several contentions which I feel are well documented. These contentions may be enumerated as follows:

First. I contend that the Federal Government conditions its financial assistance to a great number of groups with security requirements and that the argument that putting security provisions in defense education programs is discriminatory, is an argument without foundation in fact.

Second. I contend that contrary to the impression created by those who support the committee-reported bill, what is involved here today is not only the possible repeal of the non-Communist affidavit provision as it applies to undergraduate students seeking loans, but also the repeal of the non-Communist affidavit provision as it applies to four different categories of graduate students who get cash grants under the National Defense Education Act.

Third. I contend that S. 2929 will not protect the interests of the United States because, if enacted into law, individuals who join the Communist Party while receiving National Defense Education Act benefits would be guilty of no criminal offense.

Fourth. I contend that even if a person were a Communist at the time he made application for a national defense education grant or loan, he might still be able to avoid conviction if S. 2929 is enacted into law.

Fifth. I contend that although the oath and affidavit provisions in the National Defense Education Act could be utilized to punish an individual who was a member of the Communist Party at the time he made application for a grant or loan, there is grave doubt about the fact that an individual could be punished if he joined the Communist Party after he had made application for such benefits.

Sixth. I contend that existing internal security statutes are not adequate to protect the Federal Government from individuals who apply for or receive benefits under the National Defense Education Act while belonging to the Communist Party.

Seventh. I contend that my amendment has more merit than the provisions presently in the National Defense Education Act because it requires no oath or affidavit to which some people object for religious or other reasons, and my amendment will have an impact only upon the guilty and the innocent are affected by both the committee bill and the existing provisions of the National Defense Education Act.

Eighth. I contend that under my amendment it would be a crime for a member of the Communist Party or another subversive organization to apply for or accept grants or loans under the defense education program while—on the other hand—individuals who join the Communist Party, after making application for grants or loans, could escape conviction under both existing law and the committee-reported bill.

1. THE FEDERAL GOVERNMENT CONDITIONS ITS FINANCIAL ASSISTANCE TO A GREAT NUMBER OF GROUPS WITH SECURITY REQUIREMENTS AND THE ARGUMENT THAT PUTTING SECURITY PROVISIONS IN DEFENSE EDUCATION PROGRAMS IS DISCRIMINATORY IS AN ARGUMENT WITHOUT FOUNDATION IN FACT

Now, let us turn to my first contention—that the Federal Government conditions its financial assistance to a great number of groups with security requirements and that the argument that putting security provisions in defense education programs is discriminatory is an argument without foundation in fact.

Mr. President, I have been throughout my lifetime a supporter of academic freedom—but I distinguish academic freedom from academic special privilege. And I contend that if anything academic is at issue today it is special privilege and not freedom.

The rafters of the Senate Chamber have rung with a cry that the non-Communist affidavit required by the National Defense Education Act is discriminatory; the rafters of the Senate have also been shaken with the cry that the Federal Government does not condition its assistance to other groups, only students under the National Defense Education Act. Mr. President, nothing could be further from the truth.

Federal employees

Loyalty oaths and disclaimers of subversive affiliation are required of all Federal employees. Public Law 330 was an enactment, in permanent form, of a previous restriction against the employment of subversive persons in the Federal Government which appeared in appropriation acts. This law states:

"No person shall accept or hold office or employment in the Government of the United States or any agency thereof, including wholly owned Government corporations, who—

"(1) advocates the overthrow of our constitutional form of government in the United States;

"(2) is a member of an organization that advocates the overthrow of our constitutional form of government in the United States, knowing that such organization so advocates."

Public Law 330 provides that everyone entering Federal employment must execute an affidavit to the effect that his employment does not and will not constitute a violation of the act.

Department of Defense

Section 624 of the Department of Defense Appropriations Act of 1959 (recurring appropriation act provision) reads:

"No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the Senior Division, Reserve Officers Training Corps, who has not executed a certificate of loyalty, or loyalty oath in such form as shall be prescribed by the Department of Defense."

At the present time, according to the Department of Defense figures, there are about 155,000 college students enrolled in ROTC units across the Nation during the current school year. Interestingly enough, the number of ROTC students is more than double the total number of college students benefiting from the Federal loan program—68,152 students as of November 1, 1959. There has been no hue and cry that our ROTC students are discriminated against, and as far as I know, not one single Senator has received a letter indicating that these students should not have to take the loyalty oath and non-Communist affidavit.

Office of Civil and Defense Mobilization

Section 403(b) of the Federal Civil Defense Act of 1950 provides that each person, other than a Federal employee, who is appointed to serve in a State or local organization for Civil Defense, shall, before entering upon his duties, take an oath in writing before a person authorized to administer oaths, which oaths shall be substantially as that cited in the section.

In other words, any civil defense person, even though not employed by the Federal Government, has to take an oath, notwithstanding the fact that it is highly unlikely that he will have any contact whatsoever with secret material.

National Science Foundation

Loyalty oath and nonsubversive affidavit requirements are found in the National Science Foundation Act of 1950. The statute requires a loyalty affidavit and oath of allegiance from persons receiving payments under Foundation scholarships or fellowships.

Department of Interior

Section 376.2.6 of the Departmental manual states that a prospective representative who wants to represent employees in labor-management negotiations may be required to submit affidavits of nonaffiliation with the Communist Party or other subversive organizations.

Atomic Energy Commission

Public Law 85-766 specifies that appropriations made to the Atomic Energy Commission shall not be used to confer fellowships on certain individuals. The terms of appointment, which the prospective fellow agrees to in a letter of acceptance, include a declaration that he will support and defend the Constitution of the United States, that he is not a Communist or Fascist, that he does not advocate and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence. In addition, the prospective fellow is required to complete a personnel security questionnaire.

Department of Health, Education, and Welfare

The regulations under the Vocational Rehabilitation Act provide that in order to be eligible for a traineeship award under section 7(a)(3) of the act, an individual must have "executed and filed with the Office of Vocational Rehabilitation an affidavit that he does not advocate, and, is not a member of any organization that advocates or teaches, the overthrow of the U.S. Government by force or violence, or by any illegal or unconstitutional methods."

Another section of the regulations imposes an identical requirement with respect to eligibility for a research fellowship under section 7 of the Vocational Rehabilitation Act.

The regulations under the Public Health Service Act require a loyalty oath and disclaimer in order to be eligible for regular Public Health Service research fellowships and for National Institutes of Health traineeship awards.

Workers in private industry

It is not commonly known but under the language of the Internal Security Act of 1950, the Secretary of Defense is authorized to proclaim a list of private enterprises, such as plants, factories, mines, railroads, etc., in which it would be unlawful for any member of a Communist organization to hold office or employment. This is true even though the workers in these private facilities get no benefits at all from the Federal Government.

We should all remember very distinctly that until last year all officers of labor organizations were required to file loyalty oaths with the National Labor Relations Board in order for their unions to make use of the Board's authority to settle employee representation and unfair labor practice disputes.

Yes; Congress did away with the non-Communist affidavit requirement affecting union officials but it replaced it with provisions of law that are far more sweeping and far more effective.

The Kennedy-Landrum bill, which became law last year, makes it a Federal crime for any Communist to hold office, however petty, in labor organizations and in groups or associations of employers dealing with any labor organization.

Section 504 of the Labor Management Reporting and Disclosure Act of 1959 contains the significant prohibition in these words:

"No person who is, or has been, a member of the Communist Party * * * shall serve—

"(1) as an officer, director, trustee, member of any executive board or similar governing body, business agent, manager, organizer, or other employee (other than as an employee performing exclusively clerical or custodial duties) of any labor organization, or

"(2) as a labor relations consultant to a person engaged in an industry or activity affecting commerce, or as an officer, director, agent, or employee (other than as an employee performing exclusively clerical or custodial duties) of any group or association of employers dealing with any labor organization,

during, or for 5 years after the termination of his membership in the Communist Party.

"Any person who willfully violates this section shall be fined not more than $5,000, or imprisoned for not more than 1 year, or both."

The provision in the new labor reform law which makes it a crime for a Communist to hold office in any association of employers or labor union was inserted by the House of Representatives. Interestingly enough, not one single motion was made in conference or in the House of Representatives to strike the antisubversive feature of the new law.

Not only is it a crime for a man to hold office in a labor union or employer association if he is presently a Communist, but the new law also makes it a crime for an ex-Communist to serve in this capacity if he was a party member within 5 years prior to the time he got his position.

Employees of the Government

At the request of the Senate Committee on Labor and Public Welfare, the Library of Congress performed a survey of all the departments and many of the agencies of the Federal Government to ascertain which ones require loyalty oaths or disclaimers of subversive affiliation. This survey indicates that there are a number of agencies which I have not mentioned today, including the Veterans' Administration, the General Services Administration, the Foreign Claims Settlement Commission, and the Department of the Treasury, which require claimants, or other people who are not working for the Federal Government, to complete affidavits concerning subversive activities or affiliations.

For the benefit of Members of the Senate, I submit for the RECORD the following pertinent portions of the Library of Congress survey:

"PUBLIC LAW 330 AND EXECUTIVE ORDER 10450

"Public Law 330 was an enactment in permanent form of a previous restriction against the employment of subversive persons in the Federal Government which appeared in appropriation acts. This law states that "no person shall accept or hold office or employment in the Government of the United States or any agency thereof, including wholly owned Government corporations, who—

"'(1) advocates the overthrow of our constitutional form of Government in the United States;

"'(2) is a member of an organization that advocates the overthrow of our constitutional form of Government in the United States, knowing that such organization so advocates.'

"Except for persons employed by the Government of the United States for less than 60 days for sudden emergency work involving the loss of human life or the destruction of property, Public Law 330 provides that everyone entering Federal employment must execute an affidavit to the effect that his employment does not and will not constitute a violation of the act.

"Section 8(a) of Executive Order No. 10450 of April 27, 1953, as amended (Federal employee loyalty security program), based in part on Public Law 733, 81st Congress, provides:

"'The investigations conducted pursuant to this order shall be designed to develop information as to whether the employment or retention in employment in the Federal service of the person being investigated is clearly consistent with the interests of the national security. Such information shall relate, but shall not be limited, to the following:

"'* * *

"'(4) advocacy of use of force or violence to overthrow the Government of the United States, or of the alteration of the form of Government of the United States by unconstitutional means.

"'(5) membership in, or affiliation or sympathetic association with, any foreign or domestic organization, associations, movement, group, or combination of persons which is totalitarian, Fascist, Communist, or subversive, or which has adopted, or shows, a policy of advocating or approving the commission of acts of force or violence to deny other persons their rights under the Constitution of the United States, or which seeks to alter the form of Government of the United States by unconstitutional means.'

"Standard forms 61 and 61a—Appointment affidavits—cover the provisions in Public Law 330 and Executive Order No. 10450, and state in part:

"'**A.** Oath of office: I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely without any mental reservation or purpose of evasion; that I will well and faithfully discharge the duties of the office on which I am about to enter, so help me God.

"'B. Affidavit as to subversive activity and affiliation: I am not a Communist or Fascist. I do not advocate nor am I knowingly a member of any organization that advocates the overthrow of the constitutional form of the Government of the United States, or which seeks by force or violence to deny other persons their rights under the Constitution of the United States. I do further swear (or affirm) that I will not so advocate, nor will I knowingly become a member of such organization during the period that I am an employee of the Federal Government or any agency thereof.'

"The oath of office set out above is required of all officers and employees of the Federal Government, except the President, by Revised Statutes 1767 (5 U.S.C. 16). A number of statutes which require specific officers and employees to take an oath of office have come to our attention: e.g., section 18 of the Taylor Grazing Act and various oaths required of territorial officers, mentioned in the attached letter from the Department of the Interior. Statutes of this type have not been treated in this memorandum. There is also a requirement for any person prosecuting a claim, either as an attorney or on his own account, before any of the departments or bureaus of the United

States, to take the oath of allegiance, and to support the Constitution as required of persons in the civil service. Revised Statutes 3478 (31 U.S.C. 204).

"Standard Form 57—Application for Federal Employment—includes the following questions:

" '23. Are you now, or have you ever been, a member of the Communist Party, U.S.A., or any Communist organization?

" '24. Are you now, or have you ever been, a member of a Fascist organization?

" '25. Are you now, or have you ever been, a member of any foreign or domestic organization, association, movement, group, or combination of persons which is totalitarian, Fascist, Communist, or subversive or which has adopted, or shows, a policy of advocating or approving the commission of acts of force or violence to deny other persons their rights under the Constitution of the United States, or which seeks to alter the form of government of the United States by unconstitutional means?'

"Similar questions are asked in Standard Form 60—Application for Federal Employment, Short Form—and Standard Form 86—Security Investigation Data for Sensitive Position.

"Letter of inquiry

"The text of our letter requesting the information was as follows:

" 'The Senate Committee on Labor and Public Welfare is seeking information concerning loyalty oaths and disclaimers of subversive affiliations required of persons by the U.S. Government. We have been requested by the chairman of the committee to contact each department and agency of the Federal Government to obtain copies of all laws, orders, regulations or internal directives administered by them which require such oaths or disclaimers.

" 'We shall very much appreciate your cooperation in providing us with this information as it applies to the ————, other than the requirement of Public Law 330, 84th Congress (5 U.S.C. 118p–118r). Inasmuch as it is needed in connection with pending legislative consideration of section 1001(f) of the National Defense Education Act of 1958, we must have this material by Saturday, April 25, 1959.'

"Results of survey

"The following agencies and departments stated that they administer no loyalty oaths or disclaimers other than those referred to in the preceding material. Certain of the departments and agencies, such as the Defense Department and the three military departments, make use of additional oath or disclaimer forms which apply only to their own personnel. We have not included these additional requirements because they did not seem pertinent to the inquiry at hand:

"Department of Agriculture.
"Department of Commerce.
"Department of Labor.
"Bureau of the Budget.
"Civil Aeronautics Board.
"Export-Import Bank of Washington.
"Farm Credit Administration.
"Farm Credit Banks.
"Federal Aviation Agency.
"Federal Coal Mine Safety Board of Review.
"Federal Communications Commission.
"Federal Deposit Insurance Corporation.
"Federal Home Loan Bank Board.
"Federal Mediation and Conciliation Service.
"Federal Power Commission.
"Board of Governors of the Federal Reserve System.
"Federal Trade Commission.
"General Accounting Office.
"Government Printing Office.
"Housing and Home Finance Agency.
"Library of Congress (oral).
"National Aeronautics and Space Administration.
"Panama Canal Company.
"Post Office Department.
"Railroad Retirement Board.
"Renegotiation Board.
"Saint Lawrence Seaway Development Corporation.
"Securities and Exchange Commission.
"Selective Service System.
"Smithsonian Institution.
"Subversive Activities Control Board.
"Tennessee Valley Authority.
"U.S. Information Agency.
"U.S. Tariff Commission.

"I. Oaths and disclaimers specifically required by statute:

"National Science Foundation: 'The only requirement of this nature administered by the National Science Foundation is contained in section 16(d) of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861–1875), which requires a loyalty affidavit and oath of allegiance from persons receiving payments under Foundation scholarships or fellowships. The language of this requirement is very similar to section 1001(f) of the National Defense Education Act of 1958, which, I understand, was based in large measure upon section 16(d) of the Foundation Act.' (William J. Hoff, General Counsel.)

"Office of Civil and Defense Mobilization: 'Section 403(b) of the Federal Civil Defense Act of 1950 provides that each person other than a Federal employee who is appointed to serve in a State or local organization for civil defense shall, before entering upon his duties, take an oath in writing before a person authorized to administer oaths, which oath shall be substantially as that cited in the section.

" 'Also attached is a copy of an oath, based upon section 403(b), taken by persons other than Federal employees who enroll at the OCDM Civil Defense Staff College which was established for the purpose of training State and local employees and other individuals in specialized defense plans, programs, and services.' (Charles H. Kendall, General Counsel.)

"Department of Defense: 'Section 624 of the Department of Defense Appropriation Act, 1959 (recurring Appropriations Act provision) reads: "No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the Senior Division, Reserve Officers Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense." '

"The oath prescribed under this section is as follows: 'I do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign or domestic; that I will bear true faith and allegiance to the same; and that I take this obligation freely, without any mental reservation or purpose of evasion; so help me God.'

"Department of Justice, Immigration and Naturalization Service: Naturalization oath of section 337 of the Immigration and Nationality Act states:

" '(a) A person who has petitioned for naturalization shall, in order to be and before being admitted to citizenship, take in open court an oath (1) to support the Constitution of the United States; (2) to renounce and abjure absolutely and entirely all allegiance and fidelity to any foreign prince, potentate, state, or sovereignty of whom or which the petitioner was before a subject or citizen; (3) to support and defend the Constitution and the laws of the United States against all enemies, foreign and domestic; (4) to bear true faith and allegiance to the same; and (5)(A) to bear arms on behalf of the United States when required by the law, or (B) to perform noncombatant service in the Armed Forces of the United States when required by the law, or (C) to perform work of national importance under civilian direction when required by the law.'

"II. Oaths and disclaimers based on administrative regulations implementing legislation which denies rights or privileges because of subversive activities or affiliations:

"Atomic Energy Commission: 'Section 145 (b) of the Atomic Energy Act of 1954 (42 U.S.C. 2165(b)) requires the Commission to make certain findings before an individual may be employed by the Commission or be granted access to restricted data. Each individual who seeks such employment or access is accordingly required to complete Form AEC–1 (Personnel Security Questionnaire) attached herewith. Questions 17–20 of this form refer to possible subversive activities, and the individual is required to certify that his answers to all the questions are correct and complete.

" 'Public Law 85–766 specifies that appropriations made to the Atomic Energy Commission shall not be used to confer fellowships on certain individuals. The terms of appointment, which the prospective fellow agrees to in a letter of acceptance, include a declaration that he will support and defend the Constitution of the United States, that he is not a Communist or Fascist, that he does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence. In addition the prospective fellow is required to complete a Personnel Security Questionnaire.' (Edwin E. Ferguson, Deputy General Counsel.)

"Foreign Claims Settlement Commission of the United States: 'The Commission is impressed with the statutory duty of inquiring into whether or not applicants before it have at any time voluntarily, knowingly, and without duress, given aid to or collaborated with or in any manner served any hostile force. This requirement relates to claims which arose during World War II and the Korean conflict and may be found where marked in the enclosed copy of Public Law 615, 83d Congress. It may also be found at section 312 of Public Law 285, 84th Congress. Appropriate inquiries are made in the respective application forms (enclosed) designed to implement these statutes.' (Andrew T. McGuire, General Counsel.)

"Veterans' Administration: 'Although seemingly not pertinent to the inquiry, you may be interested to know that in connection with the administration of the forfeiture provisions of section 3504, title 38, United States Code, the Administrator, by regulation, requires that claimants for benefits "who in time of war resided in territory of or under the military control of an enemy of the United States or its allies will be required to execute VA Form 8–508". See 38 C.F.R. 4.108. (The form in current use is VES–4169.) By this means information is elicited as to past associations with pro-Japanese, pro-German or anti-American-Filipino organizations, a number of which have been identified as Nazi, Fascist, or Communist. Any further information desired relating to the use of such forms will be furnished.' (David A. Turner, Associate General Counsel for the General Counsel.)

"Department of State: 'Under section 212 (a)(28) of the Immigration and Nationality Act, 8 U.S.C. 1182, certain classes of subversive aliens are ineligible to receive visas. Section 222(a) of the same act, 8 U.S.C. 1202(a), requires that applicants for immigrant visas file an application which shall include a statement as to membership in any excludible class of aliens and section 222(e) requires that the application be under oath, 8 U.S.C. 1202(e). Regulations in implementation thereof are found in 22 C.F.R. 42.30–42.35. Section 42.30(g) requires that the application be under oath.'

" 'Although the regulation contained in 22 C.F.R. 51.142 authorizing the Passport Office or the Board of Passport Appeals to require of passport applicants an affidavit concerning membership in the Communist Party has not been revoked, it is considered without authority of law by reason of the decision of the Supreme Court in *Kent* v. *Dulles*, 357 U.S. 116, and is no longer being applied.' (Loftus Beckar, the Legal Adviser.)

"Interstate Commerce Commission: 'The Commission under its employee training program established under 5 U.S.C., section 2301, has employed as instructor in management and supervisory techniques. In accordance with 5 U.S.C., section 2313, which prohibits training through facilities advocating overthrow of the Government, it has required the instructor to certify that he is not affiliated with any subversive organization and that he does not teach or advocate the overthrow of the Government as set forth in the provisions of this section. The Commission does not require any other loyalty oaths or disclaimers of subversive affiliations other than that as set forth in 5 U.S.C., sections 118p–11r.' (Robert W. Ginnane, General Counsel.)

"The Civil Service Commission commented on the Government Employees' Training Act provision as follows: 'Section 14 of the Government Employees' Training Act prohibits use of training facilities or personnel which teach or advocate overthrow of the Government. Contracts for training service are made by the agencies. The Commission does not require an oath or disclaimer, relying instead on standard investigative procedures.' (L. V. Meloy, General Counsel.)

"International Cooperation Administration: 'This agency requires of each employee, at the time of appointment, a written certification that he is not now and has never been a member of any organization listed by the Attorney General under the mandate of Executive Order 10450, section 12. The certificate is not sworn and is not required by law. (A copy of the certificate form is attached.)

" 'This disclaimer of subversive affiliations is required as a matter of unwritten agency policy. Its purpose is twofold:

" '1. Under section 8(c) of Executive Order No. 10450 as a part of such investigation.

" '2. Under section 531 of the Mutual Security Act of 1954 (Public Law 665, 83d Cong.) as amended, the Director of the International Cooperation Administration must certify in writing, as to each employee (with certain specific exceptions) that the Director "* * * believes such individual is loyal to the United States, its Constitution, and form of government, and is not now and has never knowingly been a member of any organization advocating contrary views. The disclaimer aids the Director in making the required certification." ' (John G. Burnett, General Counsel.)

"III. Oaths and Disclaimers Required Administratively:

"Department of Health, Education, and Welfare: 'Excluding Public Law 330, 84th Congress (5 U.S.C. 118p–118r) and section 1001(f) of the National Defense Education Act, there are no statutes administered by the Department which specifically require loyalty oaths or disclaimer of subversive affiliations. There are no orders, regulations, or directives except for those relating to the above statutes and except as described in the following paragraphs.

" 'The regulations under the Vocational Rehabilitation Act (29 U.S.C., ch. 4) provide that, in order to be eligible for a traineeship award under section 7(a)(3) of the Act (29 U.S.C., 37(a)(3)), an individual must "have executed and filed with the Office of Vocational Rehabilitation an affidavit that he does not advocate, and, is not a member of any organization that advocates or teaches the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods." (45 CFR 401.82(d). Another section of the regulations imposes an identical requirement with respect to eligibility for a research fellowship under the above-cited section of the Vocational Rehabilitation Act. (45 CFR 401.88(d)). There are no further instructions regarding these oaths, but the forms upon which such oaths are obtained are attached.

" 'Also, although the applicable regulations do not require a loyalty affidavit or statement under the grant program for training (sec. 4(a)(1) of the Vocational Rehabilitation Act (29 U.S.C. 34(a)(1)), in practice the attached OVR 9 is used for short courses (as distinguished, we understand from regular university courses) supported under that section. In such cases the last page which calls for the loyalty statement is not crossed out.

" 'The regulations under the Public Health Service Act (42 U.S.C., ch. 64) require a loyalty oath and disclaimer in order to be eligible for regular Public Health Service research fellowships (42 CFR sec. 61.9(e)) and for National Institutes of Health traineeship awards (42 CFR sec. 63.5(c)). A copy of the pertinent provisions of these regulations is attached.

" 'Essentially the same kind of oath and disclaimer requirements are imposed in the administration of the traineeship programs for professional public health personnel (42 U.S.C., sec. 242d) and for professional nurses (42 U.S.C., sec. 242e). This is done, however, not by regulation but by certain provisions included on the application forms (copies attached).' (Reginald G. Conley, Assistant General Counsel.)

"Department of Defense: 'The Defense Department industrial security program. All employees of private corporations doing contract work for the Defense Department who are to handle classified information are required to submit a Form DD48–1 entitled "Certificate of Nonaffiliation With Certain Organizations." The organizations referred to are those contained in the Attorney General's List of Subversive Organizations.'

"General Services Administration: Under GS Manual I–1, sections 407.05 and 408.04, consultants, bidders, contractors, subcontractors, and the officers, employees, associates, or any authorized representatives who because of their contractual relationship with the GSA are required to have access to classified defense information must fill out GSA Form 176 which includes a disclaimer of subversive affiliation.

"Department of the Interior: Paragraph 376.2.6 of the Departmental Manual states that a prospective employee representative seeking to represent employees in labor-management negotiations may be required to submit affidavits of nonaffiliation with the Communist Party or other subversive organizations. The affidavit requirement reads as follows:

" 'Affidavit: A request may be made on the petitioner (if an organization) for copies of its constitution and bylaws and the names and titles of its officers. The petitioner may also be required to file a statement (by an individual, or by each officer of an organization) that he is not a member of the Communist Party or affiliated with that party and that he is not a member of and does not believe in any organization that believes in or teaches the overthrow of the U.S. Government by force or by any illegal or unconstitutional methods: *Provided*, That any labor organization which is an affiliate in good standing of a national federation or other labor organization, whose policies and activities have been directed against these advocating the overthrow of the U.S. Government by force or violence, will be presumed, prima facie, to satisfy this requirement without filing a statement.'

"Department of the Treasury: 'Applicants for a special validation endorsement for emergency service as a merchant mariner must make application at a Coast Guard Marine Inspection Office and complete a document entitled "Specially Validated Merchant Mariner's Documents Application Questionnaire." This document must be signed by the applicant under oath, and contains questions concerning subversive activities or affiliations.'

" 'Applicants for a Coast Guard Port Security Card are required to complete a "U.S. Coast Guard Security Card Questionnaire, under oath, which contains similar questions.'

"Civil Service Commission: 'The International Organizations Employees Loyalty Board requires execution of Form 1LB–2, which includes questions on affiliations (Nos. 15, 16, 17, and 18) form attached. The requirement is pursuant to section 7 of its regulations and E.O. 10422, January 9, 1953, as amended by E.O. 10459, June 2, 1953, and E.O. 10763, April 23, 1958.' (L. V. Maloy, General Counsel.)"

2. CONTRARY TO THE IMPRESSION CREATED BY THOSE WHO SUPPORT THE COMMITTEE-REPORTED BILL, WHAT IS INVOLVED HERE TODAY IS NOT ONLY THE POSSIBLE REPEAL OF THE NON-COMMUNIST AFFIDAVIT PROVISION AS IT APPLIES TO UNDERGRADUATE STUDENTS SEEKING LOANS, BUT ALSO THE REPEAL OF THE NON-COMMUNIST AFFIDAVIT PROVISION AS IT APPLIES TO FOUR DIFFERENT CATEGORIES OF GRADUATE STUDENTS WHO GET CASH GRANTS UNDER THE NATIONAL DEFENSE EDUCATION ACT

I should like to proceed now to my second contention that contrary to the impression created by those who support the committee-reported bill, what is involved here today is not only the possible repeal of the non-Communist affidavit provision as it applies to undergraduate students seeking loans, but also the repeal of the non-Communist affidavit provision as it applies to four different categories of graduate students who get cash grants under the National Defense Education Act.

Let us take a look at the graduate fellowship program, for example, and bear in mind the fact that this affects only people who have already got their college degree and want to go on to study for 3 more years.

The graduate fellows get 3 years of study paid for by the Federal Government. This isn't a loan; it is a grant. The individuals involved will get about $2,500 each year for 3 years or a total of about $7,500, in cold cash.

Let us take another example—the modern foreign language fellowship program.

The individuals involved in this program have already graduated from college and the Federal Government is paying their way for additional study to the tune of about an average of $3,525 per year. This is no loan; it's cash on the barrelhead.

There is a third program for people who have already graduated from college. This is a program for those who want to attend foreign language institutes. The individuals involved in this program either go just during the summertime or throughout the school year. In either case they receive about $96 a week. There are a lot of people employed by the Federal Government who don't make anywhere near this kind of money and they have to sign a non-Communist affidavit. But the proponents of the committee bill say it's all right for the Federal employee but not this fellow who's getting $96 a week to study foreign languages. Bear in mind, again, that this isn't a loan—it is a grant in cold hard cash.

There is still another program for people who have already graduated from college and want to go on to further study. This is the counseling and guidance program.

Those who want to go on to counseling and guidance training institutes after they graduate from college can do so under the

National Defense Education Act at Federal expense. Whether they go just in the summertime or throughout the school year, these individuals get on an average of about $108 a week. Contrast this with the salaries paid some people who work on Capitol Hill and who have signed the non-Communist affidavit, and you will find that in many cases the people under the National Defense Education Act are doing a little bit better from a financial standpoint. Nevertheless, it is argued here today that it would impinge upon their freedom to sign the affidavit.

What am I saying here? I am simply saying that notwithstanding the wind of oratory which has been circulating around the Chamber, if we repeal the affidavit requirement for undergraduates we are repealing it for four graduate groups as well. Let there be no mistake about that.

3. S. 2929 WILL NOT PROTECT THE INTERESTS OF THE UNITED STATES BECAUSE, IF ENACTED INTO LAW, INDIVIDUALS WHO JOIN THE COMMUNIST PARTY WHILE RECEIVING NATIONAL DEFENSE EDUCATION ACT BENEFITS WOULD BE GUILTY OF NO CRIMINAL OFFENSE

I do not believe that the non-Communist affidavit presently required of college students who receive benefits under the National Defense Education Act should be removed unless something effective is put in the law to replace it.

If the Senate approves the committee-reported bill, S. 2929, an individual who made application for benefits under the Defense Education Act, and who later joined the Communist Party while receiving benefits, would not be guilty of a criminal offense merely because he had executed the oath of allegiance set forth in S. 2929.

I presented this situation to the Department of Justice and John D. Calhoun, Assistant Deputy Attorney General, replying for the Department, had this to say:

"We are unaware of any criminal statute which would be applicable to the facts as set forth in your letter. Generally, the provisions of the statutes relating to perjury and false statements are applicable to statements which are alleged to be false at the time they were made, and, in our judgment, they would have no application to activities in derogation of the oath at a date subsequent thereto.

"Moreover, even though the oath of allegiance set forth in S. 2929 be construed as a promise for future conduct, there is serious doubt whether, in the circumstances described in your letter, an individual would be liable to criminal punishment for a subsequent failure to abide by the oath."

If there is a department any more qualified to pass on the efficacy of our criminal statutes than the U.S. Department of Justice, I have yet to hear of its name.

So that it will be clear to all Senators that if they vote for S. 2929 they are voting for a bill which would allow members of the Communist Party to accept benefits under the National Defense Education Act and get off without any punishment whatsoever, I quote the entire text of the letter which I received from Assistant Deputy Attorney General Calhoun of the Department of Justice:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF THE DEPUTY
ATTORNEY GENERAL,
Washington, D.C., February 5, 1960.

HON. WINSTON L. PROUTY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: This is in response to your letter of February 2, 1960, concerning the bill (S. 2929) "To amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief." You requested the views of this Department as to whether an individual who is not a member of a subversive organization at the time he makes application for benefits under the National Defense Education Act, but who later joins such an organization while receiving benefits under the act, would be guilty of a criminal offense if he had executed the oath of allegiance set forth in S. 2929.

S. 2929 would amend section 1001 of the National Defense Education Act of 1958 by striking out subsection (f) which requires an affidavit relating to the applicant's membership in an organization that believes in or teaches the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods, and inserts in lieu thereof a provision requiring that the applicant subscribe to an oath of allegiance to the United States.

We are unaware of any criminal statute which would be applicable to the facts as set forth in your letter. Generally, the provisions of the statutes relating to perjury and false statements are applicable to statements which are alleged to be false at the time they were made, and, in our judgment, they would have no application to activities in derogation of the oath at a date subsequent thereto.

Moreover, even though the oath of allegiance set forth in S. 2929 be construed as a promise for future conduct, there is serious doubt whether, in the circumstances described in your letter, an individual would be liable to criminal punishment for a subsequent failure to abide by the oath.

Sincerely,

JOHN D. CALHOUN,
Assistant Deputy Attorney General.

It occurred to me after reading Mr. Calhoun's letter dated February 5, 1960, that the Department of Justice might possibly have overlooked the membership clause of the Smith Act, 18 United States Code 2385. I, therefore, wrote Mr. Calhoun asking whether the Department of Justice had considered the Smith Act provisions when it reached the conclusion that no criminal statute would apply to an individual who joins the Communist Party while receiving benefits under the National Defense Education Act.

On April 20, 1960, Assistant Deputy Attorney General Calhoun gave me firm assurance that in reaching its conclusions on the whole problem the Department of Justice had given full consideration to the language in the Smith Act. This is what Mr. Calhoun had to say in the April 20 letter:

"This is in response to your letter of April 12, 1960. You inquired whether the hypothetical situation posed in your letter of February 2, 1960, would be punishable under the Smith Act, 18 United States Code 2385.

"The hypothetical situation is whether an individual who is not a member of a subversive organization at the time he makes application for benefits under the National Defense Education Act, but who later joins such an organization while receiving benefits under the act, would be guilty of a criminal offense if he had executed the oath of allegiance set forth in S. 2929. By letter of February 5, 1960, we advised you that we knew of no criminal statute that would be applicable to the above facts. You are correct in assuming that we considered the possible applicability of the Smith Act.

"We assume you had in mind the possible applicability of the so-called membership clause of the Smith Act. However, even under this clause it is necessary to prove, in addition to membership in a subversive organization, that the organization teaches and advocates forcible overthrow of this Government in language of incitement, the individual's knowledge thereof, and his intent to assist the organization in achieving this goal."

To carry on this line of inquiry further, I asked the American Law Division of the Legislative Reference Service whether an individual would violate criminal section 1001, or any other section of the Criminal Code, if he took the oath prescribed in S. 2929, assuming its enactment, in good faith, and later, while receiving benefits under the National Defense Education Act, became a member of the Communist Party, or some other group which has a similar desire to overthrow the Government by illegal or unconstitutional means.

Freeman W. Sharp, legislative attorney, American Law Division, gave this response:

"An oath of this nature taken in good faith at the time would only be violated by a future action contrary to the oath. It would be very difficult to convict a person of violation of such an oath. Actually, violation of the oath would be in the nature of treason which, as you know, requires two witnesses to the same overt act for conviction. It is my belief that should the Government prosecute for violation of the oath required to be taken, the courts would require proof of intention to violate it at the time the oath was taken. Since your question presupposes that the individual * * * took the oath in good faith at the time, the answer would seem to be that he could not be convicted under section 1001 of the Judicial Code."

I am sure it is clear from the statements I have read from the U.S. Department of Justice and from the Library of Congress that if an individual joins the Communist Party after he takes the oath prescribed in S. 2929, he can receive money under the National Defense Education Act and there won't be anything in the statute books to stop him from doing so.

4. EVEN IF A PERSON WERE A COMMUNIST AT THE TIME HE MADE APPLICATION FOR A NATIONAL DEFENSE EDUCATION GRANT OR LOAN, HE MIGHT STILL BE ABLE TO AVOID CONVICTION IF S. 2929 IS ENACTED INTO LAW

Now, I turn to my next contention that even if a person were a Communist at the time he made application for a national defense education grant or loan, he might still be able to avoid conviction if S. 2929 is enacted into law.

I ask the Library of Congress whether an individual would violate section 1001, or any other section of the Criminal Code if he were a member of the Communist Party at the time he made application for benefits and took the oath provided in S. 2929.

The opinion of American Law Division, Legislative Reference Service, makes it unmistakably clear that it may be possible for an individual to avoid conviction even though at the time he applies for money under the national defense education statute, he is a card-carrying member of the Communist Party. I quote below excerpts from the opinion of Freeman W. Sharp, American Law Division, Library of Congress, at this point:

"You will note that section 1001 of the Criminal Code only applies to knowingly and willfully falsifying, concealing, or covering up a material fact or making a false statement or representation or making a false writing or document, etc., while the oath in S. 2929 is a future promise to bear true faith and allegiance to the United States and to support and defend the Constitution and laws thereof in order to receive certain benefits under the National Defense Education Act. It should be noted further that because section 1001 is a penal statute it will be strictly confined by the courts within the fair meaning of its terms, *U.S.* v. *Moore* (1950) 185 F. 2d 92.

"I am unaware of any legal decision or statute which specifically holds or provides that mere membership in the Communist Party is, in fact, either a failure to bear true faith and allegiance or to support and defend the Constitution and laws of the United States or even to specifically declare mere membership in that party illegal.

"Contrast this with the present requirement of section 1001(f), the National Defense Education Act (U.S.C. 20:581(f)) which requires the individual in part to make an affidavit that 'he does not believe in, and is not a member of and does not support any organization that believes in or teaches the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional method.' A present member of the Communist Party who executes such an affidavit under the act would seem to be, in fact, violating criminal section 1001."

I know that Senators will be interested in the cases on non-Communist statements under criminal section 1001 of the United States Code, and I submit for the RECORD the following citations of cases, on which the Library of Congress relied for a part of its opinion: *U.S.* v. *Marzani* (1947), 71 F. Supp. 615, affirmed 162 F. 2d 133, affirmed 335 U.S. 895, and adhered to on rehearing 336 U.S. 653; *U.S.* v. *Schneider* (1942), 45 F. Supp. 848; (Nazi Party) *U.S.* v. *Barra* (1945), 149 F. 2d 489; (Nazi Party) *U.S.* v. *Dawe* (1945) 149 F. 2d 491; *Frasier* v. *U.S.* (1959), 267 F. 2d 62; *Sells* v. *U.S.* (1959), 262 F. 2d 815, cert. denied 360 U.S. 913; *Bryson* v. *U.S.* (1956), 238 F. 2d 657, rehearing denied 243 F. 2d 837, cert. denied 355 U.S. 817, rehearing denied 355 U.S. 879.

I think the American Law Division opinion which I have just quoted brings sharply to focus the fact that the non-Communist affidavit which the committee reported, S. 2929, would remove, is a far more protective device than the loyalty oath requirement which it retains.

The very able lawyer and distinguished junior Senator from Louisiana shares the opinion of the American Law Division on this question, for he is quoted in the Congressional Digest, April 1960, as saying the following:

"What would we have? We would have merely an oath of allegiance to the United States, which any Communist on earth can take. After he takes it, if he is prosecuted for it, or found to be a Communist, all he will have to say will be that 'Just for that one brief moment when I took the oath of allegiance, I did intend to be loyal to the United States, and I changed my mind the moment I had signed the paper.' That is all he needs to do.

"Anyone who has ever handled criminal prosecutions knows what I am talking about. The burden would be on the Government to prove beyond a reasonable doubt, before a jury, which must decide the case unanimously, that the particular person, during the brief moment when he took the oath of allegiance, did not mean to be loyal to America. It would have to be proved beyond a reasonable doubt in order to convince a jury of 12 persons that the particular individual did not intend, during that brief moment, to be loyal to the United States."

I do not believe that the Constitution of the United States is a suicide pact in the view of the American people, but I feel that as Members of the U.S. Senate we will be making a mockery of our constitutional responsibility if we foster the careers of people dedicated to the overthrow of our form of government by giving them money and other benefits under the National Defense Education Act.

I have demonstrated, I think, that although it does have some shortcomings, the non-Communist affidavit provision in the law makes a greater contribution to our national security than the loyalty oath feature.

Although I will concede that both oaths and affidavits have their weaknesses from a security standpoint, I do not intend to vote for the repeal of either until better provisions are found to replace them.

The quotations I have read previously from legal authorities at the Department of Justice and Library of Congress indicate rather clearly that it wouldn't matter whether a man is a Communist at the time he applies for benefits or at the time he receives them; he would be completely eligible for such benefits and get off scot free.

When the Senate Committee on Labor and Public Welfare made its report on S. 819, the predecessor to S. 2929, the majority of the committee stated, "It is folly to pretend that this oath and disclaimer provide any protection against subversion."

Surprisingly enough this year a majority of the committee has taken an entirely different tack and argues that the oath requirement would offer some protection against misuse of defense education funds by members of the Communist Party.

Let us turn to page 3 of the committee report and take a close look at what the majority has to say:

Starting with the second paragraph on page 3, the report deals with covering up, concealing, or nondisclosure of a material fact. The statute (sec. 1001 of the Criminal Code) is quoted to the effect that it applies to a person dealing with the Government who knowingly and willfully "falsifies, conceals, or covers up * * * a material fact." It also states that the statute applies to nondisclosure and cites: *U.S.* v. *Uram* (148 F. 2d 187 (1945)), where defendant, in applying for an FHA loan, did not reveal that he had a prior loan which was in default, and *U.S.* v. *Heine* (149 F. 2d 485 (1945)), in which an alien was convicted for failure to disclose his Nazi Party membership on his application for an alien certificate of identification.

Let us consider whether the fact of Communist Party membership would be a material fact in deciding whether or not a loan is to be granted under the NDEA as amended by S. 2929. Corpus Juris Secundum volume 37, Fraud, section 18 has this to say concerning "a material fact":

"A false representative to be actionable, and likewise, a false concealment to be actionable, must relate to a matter material to the transaction involved; that is the false representation or concealment must be the efficient, inducing, and proximate cause, or the determining ground, of action or omission. Thus representations are material if the transaction would not have occurred in their absence or with knowledge of their falsity, and if they are related directly to the transaction involved. Likewise, the concealment of facts which, if known, would have influenced a party to refrain from action causing injury has been held material. A representation is immaterial if the same thing would have been done in the same way in the absence of such representation; and, in general, failure to disclose facts which did not substantially affect the transaction have been held immaterial."

Consider the two cases cited in the memorandum. The Uram case involved appeal from a conviction under certain Federal criminal statutes. Defendant, when applying for an FHA loan, failed to reveal that a prior loan was in default. An important point to remember is the fact that on his application for credit, the defendant was specifically asked to list all prior loans and failed to fill in the proper information.

This case does not in any way support the arguments which supporters of S. 2929 are trying to make because if they are successful in getting the bill through individuals will no longer be required to sign any statements regarding their membership in subversive organizations.

As in the Uram case, the defendant was supposed to put on his application form the fact that he had a prior housing loan, so, too, under existing law is a student supposed to tell the truth in making statements about his affiliations with subversive organizations.

If the Kennedy bill is adopted, individuals will simply have to take a loyalty oath and sign no statement about subversive beliefs or affiliations. If *United States* v. *Uram* makes a case for anything, it is a case for retention of the affidavit or adoption of my amendment.

Now the majority report is so written that it suggests, contrary to what I have just stated that *United States* v. *Uram* was a case involving simple nondisclosure of a fact about which the defendant was never questioned. Suppose that were true, although, in fact, it was not. There is some kind of a logical relationship between granting a loan to one whose credit is good and not granting a loan to one whose credit is not good due to a prior defaulted loan. This unquestionably would be a material fact upon which the FHA would logically base its decision whether to grant the loan.

The Uram case could conceivably meet the definition of a "material fact" which I read you from corpus juris. The question here, however, is whether the fact of Communist Party membership is so related to the extension of benefits under the NDEA as to be "material" under that act as amended by S. 2929.

The purpose of the National Defense Education Act is stated in title 1, section 101 of the act (20 U.S.C. 401) as follows:

The Congress finds and declares that the security of the Nation requires the fullest development of the mental resources and technical skills of its young men and women. The present emergency demands that additional and more adequate educational opportunities be made available. The defense of this Nation depends upon the mastery of modern techniques developed from complex scientific principles. It depends as well upon the discovery and development of new principles, new techniques, and new knowledge.

We must increase our efforts to identify and educate more of the talent of our Nation. This requires programs that will give assurance that no student of ability will be denied an opportunity for higher education because of financial need; will correct as rapidly as possible the existing imbalances in our educational programs which have led to an insufficient proportion of our population educated in science, mathematics, and modern foreign languages and trained in technology.

The Congress reaffirms the principle and declares that the States and local communities have and must retain control over and primary responsibility for public education. The national interest requires, however, that the Federal Government give assistance to education for programs which are important to our defense.

To meet the present educational emergency requires additional effort at all levels of government. It is therefore the purpose of this act to provide substantial assistance in various forms to individuals, and to States and their subdivisions, in order to insure trained manpower of sufficient quality and quantity to meet the national defense needs of the United States (Public Law 85-864, title I, sec. 101, Sept. 2, 1958, 72 Stat. 1581).

The act says that the "security of the Nation requires the fullest development of the mental resources and technical skills of its young men and women," etc. Nowhere in the act is a particular group barred until we reach section 1001(f) (20 U.S.C. 581) which at present bars those who have not both executed a disclaimer affidavit, which at present cannot truthfully be executed by party members, and also taken an oath of allegiance. If the provisions of S. 2929 were in effect, only those who have not taken the oath would be barred. Party members could take such an oath. It could then be argued that, Congress having eliminated the

specific bar against party members in S. 2929, the fact of membership would no longer be material.

With respect to the fifth paragraph on page 3, there is some question as to the extent to which party membership would afford a legal basis for denying a loan. Party membership would not seem to be illegal and Congress, by enacting S. 2929, would specifically lift the ban on such members. The purpose of the act, as amended, would be to achieve the fullest development of the mental resources and technical skills of the Nation's young men and women who have taken the oath of allegiance required by section 1001(f).

With respect to the "congressional purpose which has emerged from the debates on this bill," the courts would probably follow the rule of statutory interpretation which provides that as long as the statute is clear and unambiguous on its face the courts will give the natural and ordinary meaning to its provisions. They will resort to the reports, debates, etc., only if there is a patent ambiguity. There would seem to be no ambiguities on the fact of the act.

The fifth paragraph of the report on page 3 also refers to the omission or concealment of the fact of party membership as being made a material fact "especially in the light of the Secretary of HEW's expressed intention to deny loans to applicants who are members (CONGRESSIONAL RECORD, vol. 105, pt. 11, pp. 14088 and 14089). The mere intention of the Secretary to deny a loan cannot make the omission a material fact, unless the Secretary has at least colorable authority to deny. The paragraph also states that "even if the Secretary did not have actual authority to deny a loan on grounds of such membership, it has been held that such absence of authority cannot be attacked in a prosecution under section 1001, so long as the Secretary's general authority is apparent, *U.S.* v. *Meyer* (140 F. 2d 652, 2d Cir. 1945)." The question may be raised, however, whether the Secretary would have any authority at all, since Congress, in adopting S. 2929, would have eliminated all authority to bar party members on mere membership, as long as they had taken the oath of allegiance.

The situation here would differ materially from that in the Meyer case. In that case the validity of the constituted tribunal was raised (p. 655). The Court said:

"The courts have consistently held that the unconstitutionality of the operation or proceeding in relation to which a deception was practiced is not a defense in a prosecution for such deception. As long as a department or agency has colorable authority to do what it is doing, the constitutionality of the statute or order granting the authority in the first place is immaterial. * * * And here the combination of Executive Order 9066, Public Proclamation Nos. 1 and 2, and the rules for exclusion proceedings surely vests the Exclusion Board with ample apparent authority.

There the overall authority to exclude persons from the military area continued and was apparent, while here the overall authority would be specifically repealed by the Congress in enacting S. 2929. That case and the cases cited by it in the paragraph partially quoted involved false statements and representations. Here only the omission of a fact which Congress specifically dispensed with is involved.

What has been said thus far also applies with equal force when the party member receives any installment of the benefit.

The case of *United States* v. *Heine*, on which the committee relies in its report, does not in any way give any support to its arguments.

In the Heine case the defendant was convicted because he answered "none" when asked to name the organizations to which he belonged. He actually had been a member of the Nazi Party.

Under the new version of S. 2929, an individual isn't required to state that he does not belong to subversive groups so therefore he cannot be convicted for falsifying a statement in that regard, and too, as I have demonstrated previously, once the Committee bill is adopted, the fact of Communist Party membership can no longer be considered a material fact in deciding whether or not a loan is to be granted under the national defense education statute.

5. ALTHOUGH THE OATH AND AFFIDAVIT PROVISIONS IN THE NATIONAL DEFENSE EDUCATION ACT COULD BE UTILIZED TO PUNISH AN INDIVIDUAL WHO WAS A MEMBER OF THE COMMUNIST PARTY AT THE TIME HE MADE APPLICATION FOR A GRANT OR LOAN, THERE IS GRAVE DOUBT ABOUT THE FACT THAT AN INDIVIDUAL COULD BE PUNISHED IF HE JOINED THE COMMUNIST PARTY AFTER HE HAD MADE APPLICATION FOR SUCH BENEFITS

I now turn to my next contention that—although the oath and affidavit provisions in the National Defense Education Act could be utilized to punish an individual who was a member of the Communist Party at the time he made application for a grant or loan, there is grave doubt about the fact that an individual could be punished if he joined the Communist Party after he had made application for such benefits.

Dr. Freeman W. Sharp of the Legislative Reference Service, pointed out in a memorandum prepared on the National Defense Education Act that a present member of the Communist Party who executes the non-Communist affidavit under the act would be violating criminal section 1001 of the United States Code.

However, the Department of Justice points out that the provisions of statutes relating to perjury and false statements are applicable to statements which are alleged to be false at the time they were made. So, therefore, even with the affidavit provision left in the National Defense Education Act an individual could not be punished if he signed the affidavit in good faith and later joined the Communist Party after he had made application for benefits.

6. EXISTING INTERNAL SECURITY STATUTES ARE NOT ADEQUATE TO PROTECT THE FEDERAL GOVERNMENT FROM INDIVIDUALS WHO APPLY FOR OR RECEIVE BENEFITS UNDER THE NATIONAL DEFENSE EDUCATION ACT WHILE BELONGING TO THE COMMUNIST PARTY

My next contention is that existing internal security statutes are not adequate to protect the Federal Government from individuals who apply for or receive benefits under the National Defense Education Act while belonging to the Communist Party.

The membership clause in the Smith Act (18 U.S.C. 2385) provides as follows:

"Whoever organizes or helps or attempts to organize any society, group, or assembly of persons who teach, advocate, or encourage the overthrow or destruction of any such government by force or violence; or becomes or is a member of, or affiliates with any such society, group, or assembly of persons, knowing the purposes thereof—shall be fined not more than $10,000, or imprisoned not more than 10 years, or both, and shall be ineligible for employment by the United States or any Department or Agency thereof, for the 5 years next following his conviction."

With such a broad provision of law as this on the statute books, one might properly inquire why it is necessary to insert in the National Defense Education Act language which would make it a criminal offense for a Communist to accept funds provided under the defense education programs.

I shall try to answer this question as clearly and succinctly as I can.

First, may I point out that there is a real possibility that the Supreme Court will declare the membership clause of the Smith Act a nullity, not on constitutional grounds, but on the theory that another statute has repealed the Smith Act membership clause by implication.

In the *Yates* case (354 U.S. 298), the Government brought charges against 14 leaders of the Communist Party in California. The charges brought were for conspiring (1) to advocate and teach the duty and necessity of overthrowing the Government of the United States by force and violence, and (2) to organize as the Communist Party of the United States a society of persons who are so advocated.

The Government wasn't able to prove either of these two charges with respect to five defendants and the Supreme Court could have limited itself to saying just that and no more, but look at what it said by way of dicta:

"For all purposes relevant here, the sole evidence as to them was that they had long been members, officers, or functionaries of the Communist Party of California; and that standing alone, as Congress has enacted in section 4(f) of the Internal Security Act of 1950, makes out no case against them. So far as this record shows, none of them has ever made a single remark or been present when someone else made a remark, which would tend to prove the charges against them.

I think that the dicta in the Yates case indicates the Supreme Court is giving very serious consideration to the possibility of deciding that section 4(f) of the Internal Security Act bars prosecution under the membership clause of the Smith Act.

There is further evidence of this possibility in the fact that on June 29, 1959, the U.S. Supreme Court in the case of *Julius Irving Scales, Petitioner* v. *The United States of America*, in setting down the case for reargument, specifically directed Government counsel to address itself to the question of whether section 4(f) of the Internal Security Act bars prosecution under the membership clause of the Smith Act.

What does section 4(f) of the Internal Security Act say? It reads, in part, as follows:

"Neither the holding of office nor membership in any Communist organization by any person shall constitute per se a violation of subsection (a) or subsection (c) of this section or of any other criminal statute."

I, myself, do not believe that Congress ever intended to render to a state of impotency the membership clause of the Smith Act when it enacted the Internal Security Act of 1960, yet, the Supreme Court feels that the question is of such significant merit that it ought to hear arguments from the Federal Government on it.

This brings me to the second point I wish to make regarding the inadequacy of existing security statutes to protect the Federal Government from the subversives who receive benefits under the National Defense Education Act.

Suppose the Supreme Court holds that the membership clause in the Smith Act was not repealed by section 4 of the Internal Security Act. Would then an individual who joins a subversive organization while receiving benefits under the National Defense Education Act be guilty of a criminal offense if he had executed the oath of allegiance set forth in S. 2929? I put this question to the Department of Justice and John D. Calhoun, Assistant Deputy Attorney General, replying for the Department on February 5, 1960, and I quote:

"We are unaware of any criminal statute which would be applicable to the facts as set forth in your letter. Even though the oath of allegiance set forth in S. 2929 be construed as a promise for future conduct,

there is serious doubt whether, in the circumstances described in your letter, an individual would be liable to criminal punishment for a subsequent failure to abide by the oath."

I was so shocked to hear from the Department of Justice that a member of a subversive organization could receive benefits under the National Defense Education Act if S. 2929 were adopted, that I wrote the Department again on April 12, 1960, to inquire whether the Department, in reaching its conclusions, had considered the possible applicability of the Smith Act.

Again replying for the Department of Justice, John D. Calhoun, Assistant Deputy Attorney General, said:

"We assume you had in mind the possible applicability of the so-called membership clause of the Smith Act. However, even under this clause it is necessary to prove, in addition to membership in a subversive organization, that the organization teaches and advocates forcible overthrow of this Government in language of incitement, the individual's knowledge thereof, and his intent to assist the organization in achieving this goal."

7. MY AMENDMENT HAS MORE MERIT THAN THE PROVISIONS ALREADY IN THE NATIONAL DEFENSE EDUCATION ACT BECAUSE IT REQUIRES NO OATH OR AFFIDAVIT TO WHICH SOME PEOPLE OBJECT FOR RELIGIOUS OR OTHER REASONS—AND—MY AMENDMENT WILL HAVE AN IMPACT ONLY UPON THE GUILTY. THE INNOCENT ARE AFFECTED BY BOTH THE COMMITTEE BILL AND THE EXISTING PROVISIONS OF THE NATIONAL DEFENSE EDUCATION ACT

My amendment has more merit than the provisions already in the National Defense Education Act because it requires no oath or affidavit to which some people object for religious or other reasons—and—my amendment will have an impact only upon the guilty. The innocent are affected by both the committee bill and the existing provisions of the National Defense Education Act.

Dr. William P. Fidler, speaking for some members of the American Association of University Professors, asked Congress to repeal the non-Communist affidavit in the National Defense Education Act. During the course of his remarks, Mr. Fidler had this to say:

"Time and again this question has been put to me: Why should a person who receives money raised by taxes from loyal Americans refuse to declare himself free of disloyalty? Or, in practical terms, why should not the sword of prosecution be hung over the heads of disloyal liars?

"I would be forced to agree that this is not a bad idea if the requirement directly and exclusively affected only persons of the kind aimed at. But the requirement does not do this and cannot because it is a bad and confused means to an end. It is a shotgun blast discharged into a crowd in the hope of bringing down guilty persons. That is no kind of law to have."

You will note that the very essence of Dr. Fidler's objection to the affidavit provisions in existing law is the fact that it applies to the innocent as well as the guilty.

I am pleased to say that in contrast to the Kennedy amendment, which requires a loyalty oath of both the innocent and the guilty, and in contrast to the provisions in existing law, which requires an oath and affidavit from both innocent and guilty, my amendment requires neither oath nor affidavit.

The amendment simply provides that if an individual applies for or accepts benefits while belonging to the Communist Party or another subversive organization, he will be guilty of a crime. The innocent won't have a thing to worry about.

My amendment is totally consistent with the action which Congress took last year when it removed the oath and affidavit requirements affecting labor organizations and substituted therefor a new provision of law which simply makes it a crime for a labor union official or an official of an employers' association to be a member of the Communist Party.

I think that many Members of the Senate have been misled to believe that the vocal minority in academic circles which has opposed the presence of the affidavit requirement in defense education programs is a majority. I would point out, however, that the American Federation of Teachers, AFL–CIO, conducted a survey among college presidents and what were the results of that survey? The "affidavit" was approved by a majority of the university and college presidents that responded to the survey.

Let us keep uppermost in our minds the fact that while 20 institutions have refused to participate in some portions of the defense education programs because of the oath and affidavit, more than 1,300 other schools are actively participating. Unfortunately, some people's version of "liberty" depends on the old maxim about whose ox is being gored.

I contend that those few universities who have refused to cooperate in defense education programs are, in effect, impinging upon the freedom of choice of students who might want to go to college or do graduate work under the NDEA. These few college officials have taken the attitude—we don't care whether you, as an individual, want to sign the non-Communist affidavit or not—we're not going to let you make that decision.

I do not condone this attitude but I have tried to understand it and that is why I have advanced an approach that requires neither oath nor affidavit and which reaches the guilty and not the innocent.

8. UNDER MY AMENDMENT IT WOULD BE A CRIME FOR A MEMBER OF THE COMMUNIST PARTY OR ANOTHER SUBVERSIVE ORGANIZATION TO APPLY FOR OR ACCEPT GRANTS OR LOANS UNDER THE DEFENSE EDUCATION PROGRAM WHILE—ON THE OTHER HAND—INDIVIDUALS WHO JOIN THE COMMUNIST PARTY, AFTER MAKING APPLICATIONS FOR GRANTS OR LOANS COULD ESCAPE CONVICTION UNDER BOTH EXISTING LAW AND THE COMMITTEE-REPORTED BILL

My next contention is that under my amendment it would be a crime for a member of the Communist Party or other subversive organization to apply for or accept grants or loans under the defense education program while—on the other hand—individuals who join the Communist Party, after making application for grants or loans could escape conviction under both existing law and the committee-reported bill.

"(1) No person may apply for or receive any grant, payment or loan under this act while he is a member of the Communist Party or any other organization having for one of its purposes or objectives the establishment, control, conduct, seizure, or overthrow of the Government of the United States, or the government of any State or political subdivision thereof, by the use of force or violence, and has knowledge of such purpose or objective of that party or other organization."

I think it is unmistakably clear from a reading of this paragraph of the amendment that any individual who applies for or receives any grant, payment or loan while belonging to the Communist Party, or any other subversive organization, will be performing an unlawful act.

It will be recalled that earlier in my speech I pointed out that the only protective features in the National Defense Education Act at the present time are the oath and affidavit. I pointed out also that it was the view of the Department of Justice and the American Law Division of the Library of Congress that prosecutions for false swearing in the affidavits could deal only with statements false at the time they were made and would have no application to activities in derogation of the oath at a subsequent date.

What applies to the oath and affidavit in the National Defense Education Act also applies to the oath in the reported bill, S. 2929, and in the light of the opinions of the Justice Department and the Library of Congress, it is apparent that any one who takes the oath and signs the affidavit in good faith could join the Communist Party while receiving benefits and not be punished.

Now, let us take a look at the second paragraph of my amendment. It reads as follows:

"(2) No person who within 5 years has been a member of the party or any other organization referred to in paragraph (1) may apply for or receive any grant, payment or loan under this act unless his application for such grant, payment or loan is accompanied by a written statement, executed under oath, containing a full and complete disclosure of the facts concerning his membership in that party or other organization and the knowledge possessed by him during the period of his membership therein with regard to the purposes and objectives thereof."

If we examine this paragraph very carefully, we will note that the innocent fellow doesn't have to file any statement about what organizations he has belonged to. You will note further that the innocent individual does not have to swear that he has never been a member of the Communist Party, or any other subversive organization. Any individuals who have in the past belonged to subversive organizations have to file a written statement disclosing the facts about such membership. Once the facts are disclosed, it will be up to the people considering the person's application to determine whether this activity, together with other factors, would warrant disapproval of a request for a grant or loan.

The last paragraph of the amendment is the penalty paragraph, and it provides that anyone who violates paragraph (1) or paragraph (2) shall be fined not more than $10,000, or imprisoned not more than 5 years, or both.

This penalty is the same penalty that would attach if a person committed perjury in completing any Government application form.

My amendment does not make it a crime to be a member of the Communist Party as would the Humphrey-Kennedy proposal which was offered in the Senate in 1954

What I and those who support me are trying to do today is to take every step possible to discourage members of the Communist Party from attempting to apply for or accept money under a defense statute, the National Defense Education Act.

We all know that the purpose of the national defense education law, in the words of the act itself, is—

"To provide substantial assistance in various forms to individuals, and to States and their subdivisions, in order to insure trained manpower of sufficient quality and quantity to meet the national defense needs of the United States."

My amendment does not make it a crime to be a member of the Communist Party; it simply states that it shall be a crime for a Communist Party member to try to get or receive money under a law devised to advance the security and defense of this Nation.

Many Senators presently serving in this body will recall that when the Communist

Control Act of 1954 was under consideration, the distinguished Senator from Minnesota [Mr. HUMPHREY], and the distinguished Senator from Massachusetts [Mr. KENNEDY], who is now the floor manager of S. 2929, offered an amendment in the Senate which would make mere membership in the Communist Party a Federal crime. A number of Senators cosponsored that amendment and it was agreed to by a vote of 84 to 0.

It is worthy of note that all of the members of the Senate Labor and Public Welfare Committee who served in the Senate in 1954 voted for this measure, including Senators HILL, MURRAY, KENNEDY, MORSE, GOLDWATER, COOPER, and DIRKSEN. I am confident that those members of the committee whose service in the Senate commenced at a later date would certainly have joined their colleagues if they had been given the opportunity to do so.

CONGRESSIONAL RECORD, volume 100, part 11, page 14208, contains the actual text of the Humphrey-Kennedy amendment and I should like to take the liberty of reading section 3 of that amendment which made it a crime to join the Communist Party.

The pertinent portion of the amendment reads as follows:

"SEC. 3. (a) Whoever knowingly and willfully becomes or remains a member of (1) the Communist Party, or (2) any other organization having for one of its purposes or objectives the establishment, control, conduct, seizure, or overthrow of the Government of the United States, or the government of any State or political subdivision thereof, by use of force or violence, with knowledge of the purpose or objective of such organization, shall upon conviction be punished as provided by the penalty provisions of section 15 of the Subversive Activities Control Act of 1950 (50 U.S.C. 794).

"(b) For the purposes of this section, the term 'Communist Party' means the organization now known as the Communist Party of the United States of America, the Communist Party of any State or subdivision thereof, and any unit or subdivision of any such organization, whether or not any change is hereafter made in the name thereof."

It will be noted from a careful reading of the words I have just quoted that those who sponsored the Humphrey-Kennedy amendment wanted the Congress to go way beyond anything I am proposing today. My amendment simply makes it a crime for a Communist to accept defense money. The Humphrey-Kennedy amendment made Communist membership itself a Federal offense. Therefore, even if a citizen never got a nickel from the Federal Government, he could have been put in jail under the Humphrey-Kennedy amendment for joining the Communist Party.

During the course of the debate, the junior Senator from Massachusetts pointed out, and I quote:

"That one of the great difficulties has been our treatment of the Communist Party as a legitimate political party."

He stated that situation would be ended if the amendment proposed by Senator HUMPHREY and him were adopted.

Senator PASTORE was equally eloquent on that occasion. I quote from his remarks:

"Is it not a fact that what we are trying to do through this substitute is to recognize the fact that the Communist Party is a party of an international conspiracy to destroy our Bill of Rights and our American institutions? By this action are we not saying that everyone who belongs to it is a criminal in the eyes of Americans?"

The senior Senator from Oregon, Mr. MORSE, pointed out on August 12, he thought the Humphrey amendment which he had cosponsored should be adopted. I quote from the comments of Senator MORSE:

"In my judgment, this amendment should bring the conservatives and the liberals together, because we have always been of one mind on the issue of communism. As constitutional liberals, on the one side, and as constitutional conservatives on the other, we have all been dedicated to a common patriotic motive; namely, that our constitutional system of Government shall persevere in the history of the United States."

The senior Senator from Minnesota, the principal sponsor of the amendment, Senator HUMPHREY had this to say in a very moving attack on the Communist Party:

"Do we believe it is a party dedicated to the destruction of this Republic? Is it a force dedicated to the destruction of this Government as we know it? If it is, then Senators should vote for this amendment.

"If Senators do not believe that the Communist Party is such a conspiratorial force, let them vote against the amendment. There is no way in the world in which one can cloak himself in nice legal phrases."

I am not one who sees a Communist under every bedpost, but I do think the Senate ought to give great weight to the comments J. Edgar Hoover made only a few months ago to the Internal Security Subcommitttee about the status of the Communist Party today:

"The Communist Party today is more powerful, more unified, and even more of a menace to our Republic than it has been in the past."

I hope that the Senators impelled by patriotic motives to demand, in 1954, that Congress make mere membership in the Communist Party a crime, will support my amendment today, which would only make it a crime for a Communist to accept money under a defense statute.

Senators will remember that the Humphrey-Kennedy amendment which said, in effect, join the Communist Party and we'll put you in jail, was an amendment which was adopted by the Senate unanimously but which was altered significantly in conference. Senators will recall also the seriousness with which Congress viewed the defense problem after the appearance of sputnik. Some Senators who had long opposed Federal aid to education voted for the National Defense Education Act because its purpose was so directly related to the long-term security of this country. Nothing more clearly expressed the congressional purpose behind the National Defense Education Act than the preamble of the statute itself which made repeated references to "the security of the Nation," "the defense of this Nation," and the "national interest."

Even if my amendment went so far as to outlaw the Communist Party, as did the Humphrey-Kennedy amendment offered in 1954, it would still be in harmony with the Constitution and Supreme Court decisions interpreting the Constitution.

The Supreme Court has not often considered the constitutionality of laws forbidding membership in certain organizations. But where it has, the Court has upheld their validity without regard to the specific intent or activity of individuals involved.

In *Bryant* v. *Zimmerman* (278 U.S. 63), a New York statute aimed at the Ku Klux Klan punished membership in certain oath-bound associations which had failed to register. The Supreme Court held that to forbid individual members to attend meetings or retain membership did not violate due process of law.

In *Whitney* v. *California* (274 U.S. 357), the defendant was charged with violations of the California Syndicalism Act by reason not only of her participating in the organization of the California Communist Labor Party, but also her membership in it. One of the questions before the Supreme Court was her claim that, in fact, she personally opposed the illegal aims of the organization and that they were adopted over her objections. Dealing with this claim, the U.S. Supreme Court, without exploring her own intentions, placed reliance on the fact that she had knowingly kept her membership after the aims of the party had become clear. The majority of the Court felt that there was nothing inconsistent with the 14th amendment in punishing knowing membership in the Communist Labor Party even without the element of specific intent to carry out the objectives of the association.

The membership clause in the Smith Act, which makes it a crime to organize any group or become a member of any group which advocates the overthrow of the Federal Government, was discussed by the Court of Appeals for the Fourth Circuit in *Frankfeld* v. *U.S.*, 198 F. 2d. The court had this to say:

"So far as membership in an organization advocating destruction or overthrow [of Government] is concerned, such membership is condemned only where there is knowledge on the part of the accused of the unlawful purpose of the organization. Membership in an organization renders aid and encouragement to the organization; and when membership is accepted or retained with knowledge that the organization is engaged in an unlawful purpose, the one accepting or retaining membership with such knowledge makes himself a party to the unlawful enterprise in which it is engaged."

A petition of certiorari was filed with the Supreme Court in the Frankfeld case but the petition was denied. It is my understanding that the same construction of various State syndicalism laws has been approved in the State courts (*People* v. *Ruthenberg* (229 Mich. 315), writ of error dismissed by Supreme Court, 273 U.S. 782).

I think it is clear from the decisions to which I have referred that my amendment would be in keeping with the spirit of the Constitution even if it outlawed the Communist Party, which it most certainly does not.

The proposal which I have submitted for the Senate's consideration is one designed to deny to members of subversive organizations the benefits available under the National Defense Education Act.

Does the Federal Government have the power to deny Federal benefits to subversives? The answer is a resounding "yes."

In *American Communications Association* v. *Douds* (339 U.S. 382), the Supreme Court upheld the "non-Communist oath" provision of the Taft-Hartley Act, which withdrew the benefits of the act from unions whose officers had failed to file an oath that they did not believe in the violent overthrow of the Government and did not then belong to the Communist Party or any organization that so believed.

Speaking of the oath formerly required of union officials under the Taft-Hartley Act, the Supreme Court made the following important point:

"We think that the 'belief' provision of the oath presents no different problem from that present in that part of the section having to do with membership in the Communist Party. Of course, we agree that one may not be imprisoned or executed because he holds particular beliefs. But, to attack the strawman of 'thought control' is to ignore the fact that the sole effect of the statute upon one who believes in overthrow of the Government by force or violence—and does not deny his belief—is that he may be forced to relinquish his position as a union leader."

The Court made it perfectly clear that the principle that one should not suffer the loss of any right or privilege because of his beliefs could be reduced to an absurdity. This is what the Court had to say:

"Suppose, for example, that a Federal statute provides that no person may become a member of the Secret Service force assigned to protect the President unless he swears that he does not believe in assassination of the President. Is this beyond the power of Congress, whatever the need revealed by its investigation? An affirmative answer hardly commends itself to reason unless, indeed, the Bill of Rights has been converted into a 'suicide pact.'"

In the same case, *American Communications Association* v. *Douds* (339 U.S. 382), Justice Jackson wrote a powerful concurring opinion in which he discussed the nature of the Communist conspiracy.

Under the topic head "Every Member of the Communist Party Is an Agent To Execute the Communist Program," Mr. Jackson made this cogent observation:

"Membership in the Communist Party is totally different [from membership in lawful political parties]. The party is a secret conclave. Members are admitted only upon acceptance as reliable and after an indoctrination in its policies, to which the member is fully committed. Moreover, each pledges unconditional obedience to party authority. Adherents are known by secret or code names. They constitute 'cells' in the factory, the office, the political society, or the labor union. For any deviation from the party line, they are purged and excluded.

"Inferences from membership in such an organization are justifiably different from those to be drawn from membership in the usual type of political party. Individuals who assume such obligations are chargeable, on ordinary conspiracy principles, with responsibility for and participation in all that makes up the party's program."

The Supreme Court, deciding in favor of the constitutionality of the oath in the Taft-Hartley Act, decided that the oath was designed to protect the public against what Congress has concluded Communists have done and are likely to do again.

Let us look at some more cases dealing with the power to deny privileges to members of subversive organizations.

In *Garner* v. *Board of Public Works* (341 U.S. 716 (1951)), the U.S. Supreme Court sustained the Los Angeles loyalty oath, which required each employee to file an affidavit with respect to his Communist Party membership and to swear that he did not now advocate and had not within 5 years from enactment of the ordinance advocated violent overthrow of the Government and did not and had not within such period belonged to an organization which so advocated. This oath went way beyond the Taft-Hartley oath in that it applied to past advocacy and past membership.

One of the attacks made on the oath in this case was that it violated due process because its negation was not limited to organizations known by the employee to be within the proscribed class.

The Supreme Court rejected this argument because it felt justified in assuming that scienter or knowledge was implicit in each clause of the oath.

In *Adler* v. *Board of Education* (342 U.S. 485), the Supreme Court upheld a New York statute which prohibited employment in the public schools to persons who advocated overthrow of the Government or who belonged to organizations which so advocate. The new Feinberg law requires State officials to make a listing of the proscribed organizations. The Supreme Court, in upholding this legislation, took note of the fact that the New York courts had construed the statute to require knowledge of organizational purpose before the regulations could apply.

Members of the Senate will note that my amendment makes it a crime for members of the Communist Party and other Communist groups to get benefits under the National Defense Education Act only if they have knowledge of the aims or purposes of the subversive organization to which they belong.

Therefore, the amendment is clearly in keeping with the holdings in the Garner and Adler cases.

It is true that some State loyalty oath statutes have been struck down by the Supreme Court but these statutes were poorly drafted and did not meet, as my amendment meets, the requirements laid down in the Garner and Adler cases.

Take, for example, *Wieman* v. *Updegraff* (344 U.S. 183). This case involved an Oklahoma statute which required each State officer and employee to take a loyalty oath that he is not and has not been for the preceding 5 years a member of any organization listed by the Attorney General of the United States as Communist front or subversive.

As construed by the Supreme Court of Oklahoma, it excludes persons from State employment solely on the basis of membership in such organizations, regardless of their knowledge concerning the activities and purposes of the organizations to which they had belonged.

The Supreme Court, in its opinion, pointed out that it had rejected an attack on the oath in the Garner case because it felt justified in assuming "that scienter was implicit in each clause of the oath."

The Supreme Court also emphasized the fact that although it had upheld the legislation being attacked in *Adler* v. *Board of Education* (342 U.S. 485), in upholding it, it expressly noted "that the New York courts had construed the statute to require knowledge of organizational purpose before the regulation could apply."

The Supreme Court went on to say that under the Oklahoma statute before the Court "the fact of membership alone disqualifies."

In the majority opinion, Justice Clark noted that membership in a subversive organization may be innocent and it was on the question of knowledge that the case turned.

The Court held that the Oklahoma statute violated the due process clause of the 14th amendment.

The clause, it said, does not permit a State, in attempting to bar disloyal persons from its employment on the basis of organizational membership, to classify innocent with knowing association.

The power of the Federal Government and of State governments to deny privileges to subversives upheld so clearly in the Adler and Douds cases, is broad in scope.

In both Adler and Douds, a principal argument was that the legislation involved violated the first amendment rights of those affected. Justice Minton threw this argument out saying:

"If they do not choose to work on such terms, they are at liberty to retain their beliefs and associations and go elsewhere * * * his freedom of choice between membership in the organization and employment in the school system might be limited, but not his freedom of speech or assembly, except in the remote sense that limitation is inherent in every choice."

My amendment does not forbid anyone to join the Communist Party; it simply states that you can't be a Communist and get defense money, too.

Chief Justice Vinson was rather frank in the Douds case which upheld the constitutionality of the loyalty oath as applied to union officials. This is what he had to say:

"Congress has undeniably discouraged the lawful exercise of political freedoms as well * * * men who held union offices often had little choice but to renounce communism or give up their offices."

The National Defense Education Act confers benefits not only on students but on college graduates who are already in the teaching profession. Justice Minton pointed out in the Adler case the harm that can be done in the classroom by one disloyal to the United States. Justice Minton made this well-reasoned statement:

"A teacher works in a sensitive area in a schoolroom. There he shapes the attitude of young minds toward the society in which they live. In this, the State has a vital concern. It must preserve the integrity of the schools. That the school authorities have the right and the duty to screen the officials, teachers, and employees as to their fitness to maintain the integrity of the schools as a part of ordered society, cannot be doubted."

Even Associate Justice Douglas, who disagreed with the majority opinion in the Adler case, admitted that "the school systems of the country need not become cells for Communist activities; and the classrooms need not become forums for propagandizing the Marxist creed."

There is no question in my mind about the fact that the Federal Government is not obligated by good constitutional law, good morals, and, particularly, good sense, to allocate money set aside for education connected with national defense to promote the careers of people who have joined the Communist conspiracy.

The clear and present danger test as applied to my amendment sustains its constitutionality.

Certainly there is support in the majority opinions in *Gitlow* v. *New York* (268 U.S. 652), and in *Whitney* v. *California* (274 U.S. 357), for the proposition that where Congress has dealt directly with aspects of speech, as in a sense my amendment does, by limiting defense benefits to those without membership in subversive associations, the issue is properly one of whether the congressional determination of the necessity of the restriction is reasonable and, if it is, there is no occasion to apply the clear and present danger test.

The Court of Appeals for the Fourth Circuit, in dealing with a membership clause, had this to say about the application of the clear and present danger test to such a clause:

"The defendants contend that these provisions [literature and membership clause] of the statute are unconstitutional because they do not require a 'clear and present danger' as a condition of criminality; but it would be little short of absurd for a statute to forbid advocacy of the destruction of the Government or membership in an organization formed for the purpose of such advocacy only in the event that they result in 'clear and present danger.' This would be to make the mere success of an attempted crime the criterion of criminality for making the attempt."

It is my firm belief that if the "clear and present danger" doctrine were ever applied to the amendment which I offered, that it would be applied with regard to the danger to be anticipated from the Communist Party rather than from the individual who violated the amendment by getting defense benefits while a Communist. All our security statutes would be absolutely meaningless if the Government had to prove that it is in danger of overthrow from the activity of any one individual. It is the individual Communist's contribution to his party together with that of his comrades that gives the party power.

Turning to *American Communications Association* v. *Douds* (339 U.S. 382), this is what the Supreme Court states:

"The attempt to apply the term 'clear and present danger,' as a mechanical test in every case touching first amendment freedoms, without regard to the context of its application, mistakes the form in which an idea was cast for the substance of the idea, although the first amendment provides that Congress shall make no law abridging the freedom of speech, press, or assembly, it has long been established that those freedoms themselves are dependent upon the power of constitutional government to survive. If it is to survive, it must have power to protect itself against unlawful conduct and, under some circumstances, against incitements to commit unlawful acts."

Chief Justice Vinson pointed out in a Taft-Hartley loyalty oath case that the legislation was not designed to prevent incitements to revolution but rather to forestall the havoc which individuals who advocate disloyalty may bring about if placed in positions of authority and responsibility.

In "Speech: Public and Private," an article in the Columbia Law Review, Morris L. Ernst and Arthur J. Katz draw a significant distinction between public speech which can be dealt with in the marketplace of ideas, and secret speech which cannot be evaluated in terms of immediate danger to the country because of the very fact that it is concealed. Mr. Ernst and Mr. Katz had this to say:

"It is obvious that in dealing with secret speech as opposed to public speech, the Court is faced with a problem to which the established standards of clear and present danger are not readily applicable. Secret speech, particularly when combined with concealed political activity, never yields an opportunity for the kind of consideration of the issues by the citizenry which it is the purpose of the first amendment to secure. There can be no competition in the marketplace of thought if the people are not informed of the ideas, aims, or identity of a group until after these ideas have been translated into action."

In their very excellent article, Morris L. Ernst and Arthur J. Katz further clarify the difference between public and secret speech by this example:

"The man who mounts a soapbox in a municipal park to urge the overthrow of the Government is entitled to the protection of the first amendment unless the circumstances surrounding his speech makes it clear that his listeners will forthwith arm themselves and march on city hall. Here the test of danger is a practical, workable one which can be applied in terms of the time and opportunity available for the expression of diverse opinions, for the consideration of the issue by those to whom the speech is addressed and for self-defensive action by the Government, if necessary. On the other hand, political plans secretly conceived and executed, or executed under the guise of activity apparently remote from the ends sought, do not (and, we can assume, are not meant to) provide time or opportunity for consideration, choice, or proper counteraction. The very use of stealth in a society that protects public speech negates the protection of the first amendment."

The thinking expressed by the Court in the Frankfeld decision appears to be very much in accord with the arguments advanced by Mr. Katz and Mr. Ernest.

In the Frankfeld decision the Court remarked:

"The question presented is not one as to freedom of speech or as to the right to organize for proper political purposes, but goes to the power of the Government to outlaw and punish conspiracies whose purpose it is to overthrow the Government itself by force and violence. Modern history is replete with instances of the danger to the Government inherent in such conspiracies; and there is nothing in the Constitution or in any sound political theory which forbids it to take effective action against that danger."

The late distinguished Chief Justice Vinson in the Dennis case gave a strong and persuasive answer to the argument that the Smith Act should be held invalid in its application to the defendant because of the "clear and present danger" rule. Listen to the words of Chief Justice Vinson, who was speaking for the U.S. Supreme Court:

"Obviously, the words cannot mean that before the Government may act, it must wait until the putsch is about to be executed, the plans have been laid, and the signal is awaited. If Government is aware that a group aiming at its overthrow is attempting to indoctrinate its members and to commit them to a course whereby they will strike when the leaders feel the circumstances permit, action by the Government is required."

Harry L. Wallace, writing in the Indiana Law Journal, summed up the whole relationship of the question of free speech to the question of denying public benefits to subversives when he said:

"Because the Government may not lock up an advocate of disloyalty if there is time to expose the fallacy of his ideas in the marketplace, it does not follow that it must necessarily employ him in the schools to expound those fallacious ideas to the children with whose care he would be entrusted."

Had the present controversy been existing when Mr. Wallace wrote the article, he might have said that just because the Congress has not outlawed the Community Party it does not follow that it must necessarily allow Communists to get loans and other benefits under a defense statute.

Supreme Court cases make it unmistakably clear that my amendment in no way conflicts with the bill-of-attainder provision in the Constitution

"A bill of attainder is a legislative act which inflicts punishment without a judicial trial."

This is the definition of a bill of attainder which has been given by the U.S. Supreme Court and adhered to since the time of its definition.

In order to qualify as a bill of attainder a statute must apply either to named individuals or to an easily ascertainable group. However, just because an individual or group is named in a statute does not in and of itself mean that the law is a bill of attainder. In *American Communications Association* v. *Douds*, the unions argued that the loyalty oath in the Taft-Hartley Act was a bill of attainder, and the unions cited the familiar cases, *United States* v. *Lovett* (328 U.S. 303 (1946)); *Ex parte Garland* (4 Wallace 333 (1867)); and *Cummings* v. *Missouri* (4 Wallace 277 (1867)). The majority of the Supreme Court dealt with the unions' arguments in the following words:

"Those cases and this also, according to the argument, involved the proscription of certain occupations to a group classified according to belief and loyalty. But there is a decisive distinction: In the previous decisions the individuals involved were in fact being punished for past actions; whereas, in this case they are subject to possible loss of position only because there is substantial ground for the congressional judgment that their beliefs and loyalties will be transformed into future conduct."

The Supreme Court pointed out that disloyal individuals were not forever disbarred from union office. This is what the Court had to say:

"There is no one who may not, by a voluntary alteration of the loyalties which impel him to action, become eligible to sign the affidavit. We cannot conclude that this section is a bill of attainder."

The courts have pointed out time and time again that if every statute which applied to specific individuals or groups were a bill of attainder it would be impossible to pass any criminal or regulatory legislation which applied to anything less than all persons within the jurisdiction.

In *United States* v. *Lovett*, the case involved a rider on an appropriation bill which prohibited payment of further compensation to three named Federal employees. The Court interpreted this as a permanent proscription from any opportunity to serve the Government and considered the rider a bill of attainder. Whereas, in *American Communications Association* v. *Douds* the Court upheld a loyalty oath as stated previously because there was no one who could not by a voluntary alteration of his loyalties become eligible to sign an affidavit and hold union office.

In the concurring opinion of Justice Frankfurter in the Lovett case, Mr. Frankfurter sketches out a theory that a prospective statute could not be a bill of attainder because it did not punish past conduct.

The theory that a statute imposing unavoidable disqualifications is a bill of attainder was smashed to the ground by *Hawker* v. *New York* (170 U.S. 189 (1898)). In that case the U.S. Supreme Court upheld a statute disqualifying convicted felons from the practice of medicine as applied to an abortionist convicted prior to the passage of the statute. The Court reasoned that a State might rightfully require good character of those who had practiced medicine and that it could reasonably determine that conviction of a felony was conclusive evidence of poor character.

In *Garner* v. *Board of Public Works* (341 U.S. 716 (1951)), the Court was faced with a situation which involved a Los Angeles city charter provision which barred from city offices and jobs, persons who were associated with subversive organizations. An ordinance adopted pursuant to the charter provision required all city employees to take an oath that they had not advocated subversive views or been associated with any subversive organization within 5 years prior to enactment of the ordinance.

The Supreme Court upheld the oath. In spite of its retrospective features the Court refused to find a bill of attainder holding that the charter and ordinance simply "declared general and prospectively operative standards of qualification and eligibility for public employment."

My amendment does not disqualify applicants for benefits under the National Defense Education Act on the basis of past conduct. It does state that in the future it will be a crime for Communists or other subversives to apply for or accept them.

As in *American Communications Association* v. *Douds* the union official was faced with the choice of renouncing communism or losing his job. So, too, is an individual faced under my amendment with a choice. This is the choice: to be loyal to the United States and be eligible for benefits or to be disloyal and ineligible for such benefits.

The Members of the Senate will recall that during the last session of Congress we enacted the labor reform law which contained in section 504 a provision very similar to my amendment. The labor reform provision to which I refer bars Communists from holding office in labor organizations and in groups or associations of employers dealing with any labor organization.

The distinction between that provision of law and my own amendment is the fact that the labor reform bill language goes way beyond it and prohibits anyone from serving as a union leader or employee of certain business associations not only on the basis of

present membership in the Communist Party but on the basis of past membership as well. This feature of the Kennedy-Landrum bill was never objected to in the House of Representatives or by the Senate conference group headed by the distinguished junior Senator from Massachusetts.

Since my amendment requires only a disclosure of past membership in the Communist Party on the part of those who seek defense education benefits, and since the amendment does not provide for automatic denial of benefits on the basis of past membership, it is clearly in harmony with the ex post facto provisions in the Constitution.

An ex post facto law is a law which inflicts a greater punishment for an offense than was annexed to the crime when committed (*Calder* v. *Bull* (1798) 3 Dallas 386, 390). Accordingly, if the proposed disqualification would be an additional punishment for offenses committed before its enactment, it would be invalid. But a statute is not deemed to be penal if it imposes a disability—not to punish—but to accomplish some other legitimate governmental purpose (*Trop* v. *Dulles* (1958) 358 U.S. 86, 96).

In American Communications Association v. *Douds* ((1950) 339 U.S. 382), the Supreme Court, as stated earlier, upheld a statute denying certain benefits under the National Labor Relations Act to unions whose officers had not filed non-Communist affidavits. In that case Chief Justice Vinson wrote:

"Power is never without responsibility. And when authority derives in part from government's thumb on the scales, the exercise of that power by private persons becomes closely akin, in some respects to its exercise by government itself."

It was the Supreme Court view that Congress could exclude from union office those classes of persons whom it feared would misuse powers lodged in them. It is my view that Congress may also exclude from benefiting under a defense statute those individuals dedicated to the overthrow of the Government that provides the benefits.

There are now in effect Federal statutes which deny the right to engage in certain activities to persons who have been convicted of specified crimes. The Federal Alcohol Control Act, for example, forbids the issuance of a basic permit to any person who, within 5 years prior to the application, has been convicted of a felony under Federal or State law, or has, within 3 years, been convicted of a misdemeanor under any Federal law relating to liquor. The Investment Company Act of 1940 makes it unlawful for any person who, within 10 years, has been convicted of any felony or misdemeanor relating to certain securities dealings, to serve as an officer of any registered investment company.

In all of these situations individuals are deprived of certain rights because of past conduct. In each case the courts have upheld the statutes involved.

My amendment does not deny benefits to those who in the past have belonged to questionable organizations. It simply requires the disclosure of prior membership in subversive organizations.

In the Garner case referred to previously, the loyalty oath was upheld even though it required as a condition precedent to getting a Los Angeles City job that the individual applicant had not been associated with a subversive organization prior to enactment of the ordinance.

The relevancy of past loyalty to future conduct was brought sharply to focus by the words of the Supreme Court in the Garner case. In that case the Court said:

"Past conduct may well relate to present fitness; past loyalty may have a reasonable relationship to present and future trust. Both are commonly inquired into in determining fitness for both high and low positions in private industry and are not less relevant in public employment."

CONCLUSION

The unfortunate developments of the past week clearly show that the statement by the Soviet Premier, Nikita Khrushchev, in June of 1957 when he calmly assured a nationwide television audience that one day the United States would be a Communist nation is still his basic belief. He stated, and I quote:

"I can prophesy that your grandchildren in America will live under socialism. And please do not be afraid of that. Your grandchildren will not understand how their grandparents did not understand the progressive nature of a socialist society.

A number of years before this statement was made by Mr. Khrushchev, the Communist intent was more graphically described. The Communist Party's 1921 constitution proclaimed its purpose:

"To destroy the bourgeois state machinery; to establish the dictatorship of the Proletariat in the form of Soviet power; to abolish the capitalist system and to introduce the Communist society."

These words reveal the nature of the Communist conspiracy which has, within the past four decades, engulfed almost 40 percent of the world's population and 25 percent of the earth's surface. The ultimate and tragic aim of the Communists is to control and dominate this Nation, and eventually to conquer the world.

Many people today tend to discount the menace of domestic communism. They believe, because of a decline in its membership, that the Communist Party in this country is no longer an influential organization. Some go so far as to say "the party is almost over." Those who believe this are only deluding themselves and others. It is a mistaken policy which has already done considerable harm and which may bring even more disastrous results. We must keep in mind in estimating the influence of this well-organized and aggressive group that each party member or sympathizer must be evaluated in terms of his political, social, and economic weight and influence and the fact that he has the backing of a major foreign power. William Z. Foster, former national chairman of the Communist Party of the United States, stated that "Communist strength cannot be measured even approximately by statistics. The Communist Party's strength runs far beyond all formal measurements."

Founded in 1919, the American Communist Party is a Russian-inspired, Moscow-dominated, anti-American conspiracy against our Government, our ideals, and our freedoms. It is, in fact, simply the American branch of the Russian Communist Party; an organic part of the Communist movement seeking world conquest and more specifically the destruction of the American Government as its chief obstacle.

I am aware that there are many conscientious individuals who are not in any way subject to Communist discipline who object to the present so-called non-Communist affidavit. In fact, President Eisenhower himself in his budget message for the fiscal year starting July 1 stated that:

"I am recommending repeal of the provision of the National Defense Education Act that prohibits payments or loans from being made to any individual unless he executes an affidavit that he does not believe in or belong to any organization that teaches the illegal overthrow of the Government. This affidavit requirement is unwarranted and justifiably resented by a large part of our educational community which feels that it is being singled out for this requirement."

Frankly, if there is this much feeling with reference to the act, it is proper to raise a question as to whether a better method might not be adopted to insure the allegiance of those who are receiving benefits from the Federal Government to advance their own education while at the same time promoting our security. In fact, under the existing legislation it would be possible for an individual to swear that he was a loyal citizen at the time that he embarked upon his educational program, but he could later join a subversive organization and still receive benefits under the act without being liable to any criminal punishment.

It was my hope in preparing remarks that I have read today that I would treat this whole issue in the most objective manner possible. I have endeavored to secure the best advice of the Department of Justice, the American Law Division of the Legislative Reference Service, and other qualified persons and agencies. I feel, as I have explained earlier, that I am submitting language to the Senate which would prevent anyone from applying for, or accepting, benefits under the National Defense Education Act while a member of a subversive organization. My proposal does not require the signing of any affidavit nor the taking of any oath. It will, I think, safeguard the interests of the United States.

There are many sources of financial support for individuals who wish to pursue an educational program without requiring assistance from the Federal Government. Those who are unwilling to submit to the discipline imposed by my amendment should be required to finance their education without recourse to the taxpayer.

Mr. DIRKSEN subsequently said: Mr. President, earlier I suggested, with respect to Members who wished to be heard on this matter, that I would ask unanimous consent that their remarks be printed in the body of the RECORD. Therefore, I now ask unanimous consent that the remarks of the distinguished Senator from New Hampshire [Mr. BRIDGES] appear in the body of the RECORD, in the course of the debate prior to the vote.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

LESSONS IN LOYALTY

(Statement by Senator BRIDGES)

During my 24 years as a Member of this body, I have witnessed a number of teapot tempests in this Chamber.

One of the more recent debates of this particular nature occurred during the first session of this Congress when the Senate spent considerable time discussing the merits of S. 819. This bill sought to delete the loyalty oath and disclaimer affidavit provisions from the National Defense Education Act.

I was dismayed by the amount of time devoted to this piece of legislation last year but gratified by the end result when the bill was recommitted to committee. I am sure that many of my colleagues shared my hope at that time that S. 819 and its objectives would thereafter rest in peace.

WATERED-DOWN VERSION STILL OBJECTIONABLE

Unfortunately, such was not the case. The sponsors of the bill apparently saw fit to slice up S. 819, sweeten it with verbal sauce and serve it to the Senate in sections.

The sweetened portion before us today is no more palatable, however, than the original serving. To my way of thinking, S. 2929 is still a distasteful piece of legislation.

Rather than removing both the loyalty oath and disclaimer affidavit like its ill-fated

predecessor, S. 2929 attacks only the affidavit provision.

But it still boils down to the time-worn proposition of six against a half dozen.

NO BASIS FOR OBJECTIONS TO AFFIDAVIT

Quite frankly, I see absolutely no reason why any patriotic American should find cause to object to an affidavit which states, in substance, that he does not believe in, and is not a member of, and does not support, any organization that believes in or teaches the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods.

I have given a good deal of thought to this matter.

I have looked at the affidavit from all angles.

I have tried diligently to see the other side of the coin.

But it still saddens me that Americans should be so concerned over such a simple repudiation of any collusion with the enemy.

LET'S EXAMINE THE ARGUMENTS

My purpose is not solely to state my opposition to this legislation. The fact that I am opposed to it surprises no one, I am sure.

I shall direct my remarks today to the arguments presented by the proponents of S. 2929. I shall attempt to analyze their objections to the disclaimer affidavit to see if any of them hold water.

IS ACADEMIC FREEDOM THREATENED?

First of all, some advocates of the bill have claimed that the affidavit is a threat to academic freedom.

Now, let us examine this claim.

For a number of reasons, it simply does not bear up under close scrutiny.

The most obvious reason is that all students are not required to sign an anti-Communist affidavit. Only those students who are seeking financial assistance from the Federal Government are required to comply with this provision of the act.

Therefore, any student who finds that the disclaimer is obnoxious or objectionable has only to seek another benefactor in order to pursue his education without being bothered with such a requirement.

GOVERNMENT ASKS SIMPLE GUARANTEE

In effect, the Federal Government is saying to the prospective student: "I am prepared to assist you financially and the only thing I ask in return is a written guarantee that you have no intention of using this education to assist my enemies in their attempts to destroy me."

This hardly strikes me as an abridgement of academic freedom.

If for some reason beyond my perception a student feels that he can honestly object to the disclaimer procedure, the Federal Government does not withdraw his right to further education. The Government merely asks that the prospective student obtain his financial assistance elsewhere.

DEFECTING COLLEGES ABORT FREEDOM OF CHOICE

The only infringement of academic liberty which I have noted in this entire controversy was not committed by the Federal Government. On the contrary, it was perpetrated by those college presidents and administrators who saw fit to withdraw from participation in the National Defense Education Act student loan program.

These self-styled "freedom-fighters" have actually closed their doors to worthy students who need Federal assistance in obtaining a college education.

They are saying, in substance, that any student who, through financial necessity, must turn to the student loan program for assistance, cannot enter their institutions of learning.

I should add here, that only a handful of misguided educators have chosen to abort academic liberty in this fashion. The overwhelming majority have displayed the kind of clear thinking which one might expect of intelligent, well-educated men.

Beyond that, we must remember that the educator opposition to the affidavit has reached the saturation point, while educator support is mounting steadily. I am convinced that the pendulum of educator opinion began swinging in the opposite direction some time ago.

According to the U.S. Office of Education, a total of 1,360 colleges and universities are participating in the loan program during the current academic year. There are conflicting reports as to exactly how many colleges have withdrawn from the program, or have expressed their intention to withdraw, because of the disclaimer affidavit. The report of the Committee on Labor and Public Welfare lists 18 institutions which have withdrawn and 8 others which have declined to participate because of the affidavit.

The sum of both these categories hardly makes a dent in the total number of participating colleges.

Like everything else, there are always a few dissenters who object to any rules, regulations or requirements.

ARE WE SINGLING OUT STUDENTS?

Now let's examine another popular objection to the disclaimer affidavit.

Some of the champions of S. 2929 believe that the affidavit singles out students for suspicion.

This seems to me to be a little ridiculous.

Do these critics mean that the Federal Government should not require any individual or group to do anything without imposing the same requirement on 180 million Americans?

Perhaps what the opponents of the affidavit are saying is that all beneficiaries of Government assistance should be required to sign a similar affidavit.

While I am not advocating such a policy, I would certainly have no objection to it. If these individuals feel that every person receiving Government subsidies should come under this requirement, it is all right with me.

The fact of the matter is that Government employees are required to execute an affidavit to the effect that their employment does not constitute a violation of Public Law 330 of the 84th Congress. The wording of this Public Law is remarkably similar to the National Defense Education Act affidavit. Despite this requirement, I have heard no complaints that Government employees are being singled out for suspicion.

Thousands of Americans employed in private industry sign such an affidavit because their companies are engaged in Government contract work but no screams are coming from that quarter.

I might add that students at our service academies must meet this requirement, but no hue and cry is being raised by these young men. And our academies are always filled to capacity.

Additionally, it is interesting to note that the National Science Foundation Act has been in force for 10 years and has been successful in such activities as the awarding of scholarships and graduate fellowships in the sciences. However, this 1950 act requires a loyalty oath and an oath of allegiance from persons receiving assistance under these programs. Nevertheless, I hear no anguished reports about this act.

In short, I hardly think that there is sound reasoning behind this claim and I dismiss it for lack of good logic.

ARE THE STUDENTS OPPOSED TO IT?

Then there is a group which justifies passage of S. 2929 on the grounds that college students, in general, are opposed to the provision in question.

To begin with, this is at best a flimsy basis for remedial legislation.

In addition, on closer inspection the claim appears to be without foundation.

Let's examine the facts. The first year the student loan program was in operation, approximately 28,000 loans were made. During the 1959–60 academic year, which is now drawing to a close, the program swelled to more than 70,000 individual loans. Also, it is estimated that this program will attract about 125,000 loan applications during the next academic year.

If the students are opposed to this provision, their opposition is certainly not reflected by these figures.

Speaking as one U.S. Senator who has received a large amount of mail on this subject from college students, I want to stress that my correspondence from young men and women on this topic has been overwhelmingly in favor of retaining both the loyalty oath and the disclaimer affidavit.

I have in my possession—and I should be happy to produce them should any of my colleagues so desire—the names of 3,718 college students who have taken a stand in favor of the affidavit and in opposition to the legislation we are now considering.

STUDENT COMMITTEE ORGANIZED

Earlier this year, an organization known as the National Student Committee for the Loyalty Oath was started by a group of students here in the District of Columbia. This group has snowballed into a nationwide organization of men and women of college age, students at universities and colleges from Maine to California, all of whom are opposed to this bill under consideration.

I really do not think that this indicates a feeling of resentment to these provisions.

IS THE AFFIDAVIT UNNECESSARY?

I have also heard the argument that it is unnecessary for the Government to extract such a guarantee from students.

To find an answer to this claim, let's inspect the mechanics of the bill itself.

I feel there is no need for me to dwell on the fact that this act was passed initially to promote the national defense. Its very name should be sufficient evidence of that fact.

IT IS MERELY GOOD BUSINESS

In the final analysis, this act places the Federal Government in the position of an agency loaning money to needy scholars for continuance of their educations. And I think we can all agree that sound lending institutions do not scatter money to the four winds without first obtaining certain guarantees from the borrowers.

Under NDEA, however, the Government makes no demands with respect to collateral and is willing to accept without question the good intentions of its debtors to repay the loans.

In fact, the only requirement for eligible students is the taking of the loyalty oath and the signing of the antisubversive affidavit.

IS THE AFFIDAVIT INEFFECTIVE?

Objectors to the affidavit also claim that it is ineffective; that subversives can still sign it and reap the benefits of the NDEA.

They can, but I question whether or not they will.

Section 1001(f) of the National Defense Education Act states in its final sentence—and I quote—"The provisions of section 1001 of title 18, United States Code, shall be applicable with respect to such affidavits."

If a Communist were to check on this reference to the United States Code, he would find the following words:

"Whoever, in any matter within the jurisdiction of any department or agency of the

United States, knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statement or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both."

To be sure, there is no absolute guarantee that an enemy of our country would decline to sign such an affidavit. But, if he did, he would do so with full knowledge that he would be running the risk of subsequent imprisonment on the grounds of perjury. I feel certain that this risk would be a very effective deterrent to any would-be student loan applicants from the ranks of the Communist Party.

IS IT SUPERFLUOUS OR BURDENSOME?

Finally, there are a few persons who have claimed that loyalty oaths and disclaimer affidavits are superfluous and burdensome.

I do not know of anything that annoys me more than this kind of thinking among supposedly loyal Americans.

It seems to me that loyalty, like patriotism, and any other outward sign of allegiance to one's country has become "old hat" in this day and age.

I, personally, consider it a pleasure to doff my hat when the American flag goes by; an honor to join in the singing of the national anthem; a privilege to repeat the pledge of allegiance; to take a loyalty oath or sign a disclaimer document. Because of this, however, some of our supersophisticates or pseudointellectuals or fuzzy-brained internationalists might consider me to be eccentric or at least somewhat amusing. But, if such outward manifestations of patriotism indicate eccentricity, then we should all be thankful that our forebears were eccentric along these lines of patriotism.

S. 2929 SHOULD BE DEFEATED

In closing, I cannot help but indicate a little disgust over the fact that the Senate of the United States should be required to take time out from the pressing legislation which is needed in other fields to spend time on such a needless bill as S. 2929. I trust that my colleagues will treat it with the contempt it deserves; that it will be defeated with speed and dispatch; and that we can get back to the important business of the Senate.

Mr. McGEE subsequently said: Mr. President, I ask unanimous consent that remarks I had prepared for discussion on the loyalty oath be included in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The statement is as follows:)

STATEMENT BY SENATOR MCGEE

What is the purpose of a loyalty oath requirement for college student loans? Is it to prevent subversives from obtaining student loans? Is it to inspire loyalty in students?

If it is any one of these things, then it cannot succeed in accomplishing its purpose.

Even the Senators supporting the oath requirement admitted it would not keep Communists from getting loans. I cannot imagine a devoted Communist hesitating to sign a loyalty oath. In fact he might be eager to sign.

As a college professor for many years, I am sure that the routine administration of an oath during a financial transaction will not inspire students to a higher regard for their country.

To demand, rather than expect, loyalty from any class of citizens is to weaken this Nation's democratic ideals.

There is nothing inherently wrong or improper about loyalty oaths. If the recitation of a loyalty oath inspires patriotism in an individual, let him take an oath when he so desires. But let us not require oaths of those who find them personally distasteful for routine matters.

Recently I took my first oath as a Senator. It was a solemn moment and one I shall remember always. I was swearing to dedicate myself to my new job, an affirmation of acceptance of solemn responsibility.

It is entirely proper that Senators begin their term of office by swearing an oath of allegiance, and all are proud to do so. But it is not necessary to take an oath to obtain an FHA home loan or to receive Government crop supports.

No one expects a loyalty oath to be connected with these financial transactions with the Government. Why then do we single out student loans as more important than other loans?

Never have I doubted the loyalty of 99.9 percent of the American people. This is a loyalty not of laws or codes but of individual belief in the rightness of the American system and respect for the rights and dignity of every person. As long as this loyalty exists in this country, we need no laws to protect it. If it disappears, no law will ever restore it.

Communism is "soft" on truth. It's time we got tough with the Communists. Instead of coddling them with statutes which protect them from exposure to our most devastating weapon—unrestrained and unlimited education—let's hit them hard where it hurts. Let's throw the books at them.

But our attention is focused upon students in our universities. These students fall into one of two categories. Either they are loyal or they are Communists. If loyal, they are no problem. If not—if by chance and in spite of all existing precautions, a Communist should slip into one of our colleges, what then?

I submit that even under these improbable circumstances we have much less to fear than some suggest.

It is clearly established that the most vulnerable aspect of communism is its inability to stand the tests of criticism and truth. This is communism's "softest" or weakest side.

From our point of view in the United States, ideas, truth, and freedom of criticism are our greatest weapons in the struggle against totalitarianism around the world.

The Communists themselves offer the most dramatic evidence. In the Soviet Union, both propaganda and severe censorship shield the Russian people from the truth. The Communists fear unlimited, unrestricted education because it seeks the truth and the truth exposes the false premises of communism.

Instead of worrying quite so much about the one or two Communists who might slip into our colleges in spite of all existing precautions, we should close in on them with the searching light of truth inherent in our educational system.

The Communist system cannot withstand this searchlight which our system turns upon despotism wherever it occurs.

Even the most avid supporters of the disclaimer affidavit requirements which have been scorned by several of our major colleges, universities, and educational leaders, admit that the signing of such a document will not deter a single Communist. Why not then throw the books at whomever might slip into our educational system and instead of shielding them from our great educational processes, subject them to truthful analysis? Education represents our most powerful weapon against communism.

Mr. McGEE. I ask unanimous consent, moreover, that correspondence I have received on this question likewise be included in the RECORD following my remarks. It includes a statement from the Wyoming Chapter of Sigma Xi, an honorary scientific fraternity, opposing the loyalty oath; one from the Western Association Graduate Schools, opposing the loyalty oath; and one from the President of the Wyoming Chapter of the American Association of University Professors, likewise opposing the loyalty oath.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WYOMING CHAPTER OF SIGMA XI,
THE UNIVERSITY OF WYOMING,
Laramie, Wyo., February 12, 1960.

Hon. GALE W. MCGEE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCGEE: The Wyoming Chapter of the Society of the Sigma Xi approved the following motion in their regular meeting last night:

"The chapter secretary shall notify the Wyoming Congressmen in Washington that it is the consensus in the Wyoming Chapter of Sigma Xi that the requirement for a disclaimer affidavit relating to subversive activities should be eliminated from the National Defense Education Act."

The Society of the Sigma Xi is an organization whose aim is to encourage original investigations in science. Its membership is composed of men and women engaged in or devoted to scientific research. The Wyoming Chapter now has 173 active members including teachers and research workers in most of the scientific discipline.

Sincerely yours,

JOHN S. BALL,
Secretary.

WESTERN ASSOCIATION
OF GRADUATE SCHOOLS,
Boulder, Colo., March 16, 1960.

Hon. GALE W. MCGEE,
U.S. Senator,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MCGEE: At its annual meeting on March 1, 1960, in Berkeley, Calif., the Western Association of Graduate Schools, which is composed of 49 graduate schools in colleges and universities located in every Western State, including Alaska and Hawaii, unanimously adopted the following resolution, which I am instructed to transmit to you:

"Whereas the requirement of affidavits of disbelief or disclaimer oaths as a condition for receiving fellowships or loans is an unwarranted interference with freedom of expression and is ineffective: Now, therefore, be it

"Resolved, That the Western Association of Graduate Schools urge the Congress of the United States to eliminate the affidavits of disbelief or disclaimer oaths which appear in the National Science Foundation Act of 1950 and the National Defense Education Act of 1958."

Respectfully yours,

DAYTON D. MCKEAN,
Secretary, Dean of the Graduate School, University of Colorado.

THE UNIVERSITY OF WYOMING,
Laramie, Wyo., February 16, 1960.

Hon. GALE W. MCGEE,
U.S. Senate, Washington, D.C.

DEAR GALE: The University of Wyoming chapter of AAUP has completed a vote on the following proposition:

"The Wyoming chapter of AAUP should forward a statement to Senator GALE MCGEE informing him of the chapter's opposition to

the disclaimer affidavit of the 1958 National Defense Education Act, and urging that this affidavit be eliminated from the act."

This resolution was passed with only one dissenting vote. This action by the chapter confirms a resolution by the chapter forwarded to the national office of AAUP in February 1959.

I might say that the vote was taken by mail and was intended to be anonymous. Nearly all of the members, however, did sign their ballots, a sign, I believe, of their strong feelings in the matter.

As president of the local chapter, I am forwarding the results of this ballot to you, knowing you are doing all that you can to help eliminate the disclaimer affidavit.

Cordially yours,

JOHN K. MATHISON,
Professor of English, President, Wyoming Chapter, AAUP.

Mr. MOSS. Mr. President, one of the most eloquent and thoughtful statements I have seen on the disclaimer affidavit provision of the National Defense Education Act is the resolution which was adopted recently, with only one dissenting vote, by the Brigham Young University Chapter of the American Association of University Professors.

This resolution, coming as it does from the faculty of Utah's largest and a most highly respected private educational institution, which is the pinnacle of the widespread education system of the Church of Jesus Christ of Latter-day Saints, is most noteworthy. I ask unanimous consent to place it in the RECORD at this point.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the National Defense Education Act of 1958, includes a provision (sec. 1001(f), title X) which reads: "No * * * funds * * * shall be used to make payments or loans to any individual unless such individual (1) has executed and filed with the Commissioner an affidavit that he does not believe in, and is not a member of and does not support any organization that believes in or teaches the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods"; and

Whereas this provision invites serious objections because of the vagueness of its language, its possible impingement upon areas of freedom guaranteed in the first amendment, its ineffectiveness against genuine threats to national security, its imputation of a need for special loyalty checks on the academic community, and its implications for Federal control in the field of education; and

Whereas this provision has prompted many prominent American universities, such as Harvard, Yale, Amherst, and Princeton, to refuse to participate in the NSDA program and inspired requests for the repeal of the provision from many other great universities, such as Columbia, Dartmouth, Minnesota, and Wisconsin; and

Whereas resolutions calling for the repeal of this provision have been adopted by such organizations of stature and responsibility as the American Association for the Advancement of Science, the American Association of Law Schools, the Association for Higher Education, the Association of American Colleges, the National Students Association, and the American Association of University Professors; and

Whereas the President of the United States in his January 18, 1960, budget message called for the repeal of the disclaimer affidavit proviso; and

Whereas there is now pending before the Congress of the United States a bill (S. 2929) providing for the repeal of the disclaimer affidavit: Therefore be it

Resolved, That the Brigham Young University Chapter of the American Association of University Professors records its opposition to the disclaimer affidavit provision of the National Defense Education Act and urges the Members of Congress of the United States from the State of Utah to vote for its repeal.

Adopted at a meeting of the B.Y.U. chapter at Provo, Utah, on May 23, 1960, by a substantial majority but not unanimously.

RICHARD D. POLL,
President, B.Y.U. Chapter, AAUP.

Mr. DIRKSEN. Mr. President, I ask that the question be put.

The PRESIDING OFFICER. The question is on agreeing to the modified amendment of the Senator from Vermont. [Putting the question.]

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (S. 2929) was passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1001 of the National Defense Education Act of 1958 is amended by striking out subsection (f) and inserting in lieu thereof the following:

"(f)(1) No part of any funds appropriated or otherwise made available for expenditure under authority of this Act shall be used to make payments or loans to any individual unless such individual has taken and subscribed to an oath or affirmation in the following form: 'I do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic.'

"(f)(2) No person may apply for or receive any grant, payment, or loan under this Act while he is a member of the Communist Party or any other organization having for one of its purposes or objectives the seizure or overthrow of the Government of the United States, or the government of any State or political subdivision thereof, by the use of force or violence, and has knowledge of such purpose or objective of that party or other organization.

"(3) No person who within five years has been a member of the party or any other organization of the kind referred to in paragraph (1) may apply for or receive any grant, payment or loan under this Act unless his application for such grant, payment or loan is accompanied by a written statement, executed under oath, containing a full and complete disclosure of the facts concerning his membership in that party or other organization and the knowledge possessed by him during the period of his membership therein with regard to the purpose and objectives thereof.

"(4) Whoever knowingly violates paragraph (2) or paragraph (3) of this subsection shall be fined not more than $10,000 or imprisoned not more than five years, or both."

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1961

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1614, House bill 11998.

The PRESIDING OFFICER. The bill will be read by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 11998) making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill (H.R. 11998) making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. MANSFIELD. Mr. President, I wish to announce to the Senate that there will be no further legislative business this evening; but if Senators have statements to be printed in the RECORD I suggest that they submit them now, before I suggest the absence of a quorum.

Mr. DIRKSEN. Mr. President, first, let me ask the acting majority leader whether the previous order for the Senate to convene at 9:30 a.m. tomorrow still stands.

Mr. MANSFIELD. It does, indeed.

MILITARY ASSISTANCE AND MUTUAL SECURITY—RELEASE BY THE SECRETARY OF DEFENSE

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a press release issued today by the Secretary of Defense, the Honorable Thomas Gates, with respect to action on the mutual security program, particularly the military assistance portion thereof.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

The Department of Defense released today the following statement of the Secretary of Defense, Thomas S. Gates, Jr.:

"I am deeply concerned over the fate of the military assistance program.

"The President requested a $2 billion appropriation for military assistance for fiscal year 1961, to provide weapons and military equipment to strengthen our alliances and to promote our own national security. The Joint Chiefs of Staff all stated that they would not take one dollar away from the military assistance program in order to augment the funds for their own services. Military assistance is just as much a part of our own national defense as are the appropriations for our Army, Navy, Air Force, Central Intelligence Agency, and the Atomic Energy Commission.

"I have testified before the Congress, as have other Defense Department witnesses, in support of the $2 billion request. We have discussed frankly every aspect of the program. We have responded to every question and criticism. We have a sensible, sound, well-administered program. Yet the House

Appropriations Committee recommends that the appropriation be reduced by 20 percent.

"In spending military assistance funds, it is necessary first to maintain existing allied forces in good working order and conserve the investment already made. Therefore the proposed reduction must come from cutting down on force improvement, that is, postponing indefinitely the newer weapons: 80 percent of any cut below the budget request must be absorbed in equipment for force improvement, which includes missiles, electronic equipment, modern aircraft, and ships, modernized tanks, and combat vehicles and the like.

"The impact of the proposed cuts would fall most heavily on NATO, which also bore the greatest weight of last year's appropriation cut.

"We must lead the free world without hesitation.

"We must contain the Communists, but we cannot do it with imaginary weapons.

"We must continue to sustain the capability and determination of our allies to defeat both aggression and internal subversion.

"We must provide for the military assistance program as an integral part of our national defense required by our national interest.

"Before departing for the Far East, the President said in telegrams to House leaders: 'This (cut) cannot but jeopardize our own security and the defense of the free world.'

"I urge the House of Representatives, when it debates this appropriation on Thursday, to restore the full $2 billion intact."

PURCHASES BY FOREIGN SERVICE BUILDING COMMISSION—LETTER FROM SECRETARY OF COMMERCE

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a release issued by the Secretary of Commerce, the Honorable Frederick H. Mueller, with respect to certain observations made on the floor of the Senate by the Senator from Wisconsin [Mr. PROXMIRE] and by me.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

DEPARTMENT RELEASES SECRETARY MUELLER LETTER TO SENATOR PROXMIRE

The U.S. Department of Commerce released today a letter from Secretary of Commerce Frederick H. Mueller to Senator WILLIAM PROXMIRE, of Wisconsin. Text of the Secretary's letter follows:

JUNE 15, 1960.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: Your public attacks earlier this week, and your renewal of them on the floor of the Senate yesterday, prompt this letter.

As a father, I have very great personal interest in my son and I do not intend to remain silent while you, in your efforts to discredit me, continue to try to hurt him.

My son's independent furniture company has done business over the years with private individuals and firms and various public agencies. As Secretary of Commerce, I did not follow its transactions or ever solicit Government business for his or any firm. But, since your attacks, I requested and received thorough information as to the incident from both the State Department and from him.

From these facts, I believe that any fair-minded person would recognize that my son has not asked or received treatment from the State Department beyond its procedures for anyone engaged in a similar business transaction. The record shows that both parties conducted their affairs in a proper manner and in the public interest.

For example, the mode of transportation of furniture was found to be the most desirable for the Department under all the circumstances and was used to save extra expense that faced the Government in rentals of the unfurnished new building and of old properties. The Department prior to executing the contract for furniture made a check with four additional American firms of prices for comparable items of basic office furniture.

A reading of the documents in the CONGRESSIONAL RECORD, and of transcripts of your radio remarks on the case, fortifies my belief that through ignorance you twisted the truth.

For example, in radio broadcasts you said:

"Now the fact is that the Secretary of Commerce is a member of the Foreign Service Building Commission, which is responsible for this kind of purchase."

And again:

"The Secretary of Commerce, of course, in authorizing the Foreign Service Building Commission to go ahead and buy from his son's company, * * * it seems to me is engaging in a—what I think is a very irregular practice."

I never authorized such action—and I cannot but feel that you could have found that out.

Had you asked anyone familiar with the situation, including members of the Senate Foreign Relations Committee, you would have learned that the functions of the seven-member Commission were taken away by President Roosevelt in 1939 through a reorganization project and very properly transferred to the State Department's Office of Foreign Buildings. You also would have discovered that no meetings have been held by the inoperative unit for at least 10 years—long before my day.

I have confidence in my son, who is running a small business of his own. I felt proud to see him stand up to the unfair attacks of a U.S. Senator and to reply convincingly to your charge by saying in the press that you were using "half-facts and innuendos * * * in attempting the destruction of a small business whose dealings over the years have been and always will be honorable."

In assuming the right to discuss this matter publicly, you certainly undertook an obligation to act and speak fairly. Since you have failed to do so, my purpose in responding is to set the record straight in the public interest.

Sincerely yours,

FREDERICK H. MUELLER,
Secretary of Commerce.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REQUEST FOR AUTHORIZATION FOR JUDICIARY COMMITTEE SUBCOMMITTEE TO MEET DURING SESSION OF THE SENATE TOMORROW

Mr. HART. Mr. President, I ask unanimous consent that a subcommittee of the Judiciary Committee be authorized to meet tomorrow, at 10:30 a.m., to hold a hearing on the nomination of Hyman Freehof, of the District of Columbia, to be an Examiner in Chief of the U.S. Patent Office. Notice of the scheduled meeting was filed on Monday of this week.

The PRESIDING OFFICER. Is there objection?

Mr. MANSFIELD. Mr. President, reserving the right to object, did I correctly understand the Senator from Michigan to ask for authorization for a subcommittee of the Judiciary Committee to meet tomorrow morning, to hold a hearing on a nomination?

Mr. HART. That is correct.

Mr. MANSFIELD. Mr. President, I have to object, because today the senior Senator from Oregon asked me to object to any requests for the holding of hearings by the Judiciary Committee.

The PRESIDING OFFICER. Objection is heard.

Mr. DIRKSEN. Mr. President, let me add that I shall find myself compelled to object to requests for the holding of committee meetings or subcommittee meetings from this point on, when the Senate is in session.

CAPTIVE NATIONS WEEK

Mr. DOUGLAS. Mr. President, at this time of tension and doubt created by the bluster and threats of the Soviet Union, it is of first importance that the cause of the captive nations be kept in mind by all freedom-loving people.

The widespread observance of Captive Nations Week, as created by Congress in its resolution of July 17, 1959, will be a worthy means for attaining this objective. I have been delighted to receive from the mayor of Buffalo, the Honorable Frank A. Sedita, a letter announcing their plans for setting up a citizens' committee to observe Captive Nations Week.

In order to give full information about this to those who may be prompted to take similar action, I ask unanimous consent to insert in the RECORD a copy of a letter which Mayor Sedita has written to me on this subject, together with the enclosures outlining the plans for his citizens' committee.

There being no objection, the letter and enclosures were ordered to be printed in the RECORD, as follows:

CITY OF BUFFALO,
OFFICE OF THE MAYOR,
June 7, 1960.

Hon. PAUL H. DOUGLAS,
Senate Office Building,
Washington, D.C.

DEAR SENATOR DOUGLAS: I thought you might be interested in the observance of Captive Nations Week which is planned for the city of Buffalo. A citizens' committee has been appointed and is preparing plans for sports, music, dances, and other appropriate events during the week of July 17–23.

So that you may know something of the thinking that lies behind this movement, I am attaching copy of letter of invitation to committee members, and copy of letter to other mayors throughout the country, informing them of our activities.

Very truly yours,

FRANK A. SEDITA,
Mayor of Buffalo.

CITY OF BUFFALO,
OFFICE OF THE MAYOR,
May 11, 1960.

DEAR ———: I am sure you are aware of the importance and meannig of the Captive Nations Week resolution enacted by Congress last July. When President Eisenhower signed this resolution on July 17, 1959, making it a law of our country (Public Law 86–90), he issued a proclamation designating the week of July 19, 1959, as "Captive Nations Week." The Presidential proclamation read in part as follows:

"I invite the people of the United States of America to observe such week with appropriate ceremonies and activities and urge them to study the plight of the Soviet-dominated nations and to recommit themselves to the support of the just aspirations of the peoples of those captive nations."

The law provides that the third week of July for each succeeding year be designated as "Captive Nations Week," until such time as freedom and independence shall have been achieved for all the captive nations of the world. Last year we had no opportunity to plan in advance for the ceremonies and activities which this law calls for. This year I am taking the initiative to make certain that the citizens of Buffalo will have every opportunity to demonstrate their support of the aspirations of the people of the captive nations for freedom and independence. To that point I am appointing a Citizens Committee to Observe Captive Nations Week.

The committee will have these responsibilities:

1. To plan appropriate public ceremonies which will draw attention to the struggles of the captive nations for their freedom and independence and the historic relationship of their aspirations to the victory of our Founding Fathers which brought liberty and national independence to the United States.

2. To promote activities which will bring greater public appreciation of the rich and distinct cultures, folklore, customs, and music of each and all of the captive nations.

3. To develop public understanding that the desire for liberty and independence by the overwhelming majority of the peoples of these submerged nations constitutes a powerful deterrent to war and one of the best hopes for a just and lasting peace.

I take pleasure in extending to you an invitation to become a member of the Citizens Committee To Observe Captive Nations Week. Will you please let me know if it will be convenient for you to serve? The first meeting of the committee will be called soon and I look forward to seeing you then.

I am confident that Buffalo has the spirit and the enterprise to carry out the high purposes of Public Law 86–90. We have always been proud of the fact that our city is made up of people of diverse national and religious backgrounds, all working in harmoniously unity for the common good. It is natural, therefore, that our people should have warm sympathy for the oppressed in the captive nations set forth in the law.

Sincerely yours,

FRANK A. SEDITA,
Mayor.

CITY OF BUFFALO,
OFFICE OF THE MAYOR,
June 6, 1960.

DEAR MAYOR: I thought you would be interested in the advance preparations being made in Buffalo to commemorate Captive Nations Week as provided in Public Law 8690. It is my understanding that President Eisenhower will issue a proclamation, as he did last year, designating the week of July 17–23 "Captive Nations Week."

Last year there was little time available for advance preparations to commemorate this week, due to the fact that Congress enacted this law but a few days in advance of the third week of July. This year I felt advance preparations should be made so that appropriate ceremonies and activities would be carried on in the city of Buffalo. To this end, I established a Citizens Committee to Commemorate Captive Nations Week, appointing to it individuals representing each of the nations named in the law, and other outstanding citizens. My letter of invitation to serve on this committee sets forth what I believe to be the basis for a suitable program for the week. A copy of this letter is enclosed for your information.

Unless similar action is taken by the mayors throughout the country, it is my conviction that the intent of the law, which is to alert the American people to the importance of keeping the spark of freedom alive behind the Iron Curtain, will not be fully implemented.

At this moment of history, when the question of peace with justice looms so large in the minds of all of our people, it is important to note that Congress made a finding, the effect of which is that the striving of these people of the captive nations for their independence and freedom is a powerful deterrent to war, and one of the best hopes for a just peace. Certainly there is a compelling objective and one which I am sure all Americans support.

If you establish a citizens' committee along similar lines, I can assure you that the members of our Buffalo committee and I will be happy to share our plans and program developments with you.

Very truly yours,

FRANK A. SEDITA,
Mayor of Buffalo.

ELIMINATION OF AFFIDAVIT OF DISLOYALTY

Mr. DIRKSEN and Mr. HOLLAND addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIRKSEN. Mr. President, there may be some misunderstanding as to the action of the Senate a moment ago on the bill that was under consideration today. To be sure, the so-called Prouty substitute was a substitute for the entire Kennedy bill, but before action was taken, it was changed and made an amendment to the bill so that the loyalty oath remains in the act, and this is, in addition, in lieu of the disclaimer requirement which was the subject of controversy both last year and this year. This is an enforcible provision, in my judgment, and leaves the loyalty oath intact.

Mr. HOLLAND and Mr. RUSSELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. RUSSELL. Mr. President——

Mr. HOLLAND. Mr. President——

Mr. DIRKSEN. I have the floor.

Mr. HOLLAND. Mr. President, who was recognized?

The PRESIDING OFFICER. The Chair recognized the Senator from Florida in error, because the Chair did not realize the Senator from Illinois had not yielded the floor.

Mr. HOLLAND. Very well.

Mr. DIRKSEN. I yield to the Senator from Georgia.

Mr. RUSSELL. I wish to ask the Senator a question. This substitute, on its face, shows it strikes out both the loyalty oath and the disclaimer of Communist affiliation.

Mr. DIRKSEN. That is correct, and that is why the Senator withdrew his amendment as a substitute and offered it as an amendment to the bill, so that the result was the retention of the loyalty oath, and it is in lieu of the disclaimer affidavit.

Mr. RUSSELL. If that is the action taken, very well. I think the criminal statute is more effective against Communists, but I had been told the substitute struck down the entire loyalty oath, and the copy on my desk indicates that.

Mr. DIRKSEN. Mr. President, to clarify the situation officially, I ask that the Chair, after conference with the Parliamentarian, advise the Senate as to exactly what action was taken.

The PRESIDING OFFICER. The amendment was offered so as to make an amendment to the bill, as opposed to a substitute for the bill.

Mr. HOLLAND. Mr. President——

The PRESIDING OFFICER. In other words, the statement made by the Senator from Illinois is correct.

Mr. DIRKSEN. Will the Chair repeat it, so Senators may hear?

Mr. KERR. Let the Senator from Illinois repeat it, and let the Parliamentarian listen and decide whether it is correct.

Mr. MANSFIELD. I understood the Presiding Officer to say that the explanation given by the Senator from Illinois was correct.

The PRESIDING OFFICER. The statement of the Senator from Montana is correct.

Mr. KERR. The Senator from Montana did not ask if the statement of the Senator from Montana was correct. He asked the Presiding Officer if the statement of the Senator from Illinois was correct.

Mr. MANSFIELD. That is correct.

The PRESIDING OFFICER. The answer, in either case, or in both cases, is "Yes."

Mr. HOLLAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield?

Mr. DIRKSEN. I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. HOLLAND. I thank the Presiding Officer. It may well be that the situation is exactly as the Senator from Illinois has stated. I certainly would not want to express the slightest disagreement to it, but I think those of us who were waiting—and there were several of us waiting—for the quorum call, with the understanding from the clerk in charge that the Senator from Vermont was going to speak for a long time, were waiting so we could vote on final passage, are entitled to examine the substitute and see what it does.

For that reason, I shall move to reconsider the vote, and have the motion go on the calendar.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

Mr. HOLLAND. Mr. President, is that in order? I have asked that it go on the calendar. Business has been transacted since action on the bill. That is not the order of business at this time. I have moved to reconsider and asked

that my motion go on the calendar, and I shall insist on that motion.

Mr. MANSFIELD. Mr. President, I move to table the motion.

The PRESIDING OFFICER. The Senator from Florida, the Chair is advised, may enter the motion to reconsider, which is privileged.

Mr. HOLLAND. The Senator from Florida understands the procedural matter. He has a right to enter the motion to reconsider, which is done, and it goes to the calendar, but then it requires a motion to take it up, debate on that motion, and a vote upon that motion, before the motion to reconsider can be brought up. I claim the right to look at what has been done in my absence. I had been advised by those in charge of the debate that there was going to be a sizable debate. I simply went to an adjoining room, along with other Senators who feel, as I do, that this matter is of great importance and wanted to be here when action was taken, to find that action had been taken when we were outside.

Mr. MANSFIELD. Mr. President, I ask for an interpretation.

Mr. BIBLE. Mr. President, may we have order, so we can get the ruling of the Presiding Officer?

The PRESIDING OFFICER. The Senate will be in order.

After the motion to reconsider has been entered, another Senator may move to proceed to the consideration of the motion to reconsider, and that motion is debatable.

Mr. HOLLAND. That is exactly the way I understood the situation. I shall debate it if that motion is made now. I do not think I shall debate it in the morning. I want an opportunity to see what was done in the absence of several of us who have a vital interest in the legislation. I think we are entitled to see what was done, particularly when we were wrongly advised—and I am not charging any deliberation—that the argument of the Senator from Vermont was to take a long time, and we would be safe in going to an adjoining room and waiting for a quorum call before final action was taken.

Mr. DIRKSEN. Mr. President, if the Senator from Florida will consider this, I ask unanimous consent that the motion made to reconsider, to go on the Calendar, be taken over until the session tomorrow, with the full understanding that the Senator from Montana or any other Senator will not be prejudiced in his right to make the motion, and that it will not be considered as intervening business for that purpose.

Mr. HOLLAND. Mr. President, so far as I am concerned I am willing to make the motion to reconsider, but I do not propose to have taken away from me the right to see what has been done with respect to a matter in which I am greatly interested and in which the people of my State are greatly interested.

I think all Senators can observe the situation. I am not going to be obstinate about it. I am not going to be ugly about it. However, I am going to insist upon my right under the rule to have the matter on the Calendar. If the distinguished Senator wants to oppose that, I shall oppose his position at some length, but I shall be glad to make the motion myself tomorrow.

Mr. MANSFIELD. Mr. President, I think the Senator from Florida understands the situation fully, in the light of what the Senator from Illinois, the minority leader, has stated.

The PRESIDING OFFICER. The motion will go to the Calendar.

Mr. HOLLAND. I thank the distinguished Presiding Officer, the distinguished acting majority leader, and the minority leader. I think we are all entitled to have the rules prevail and to know what we are doing before we accede to actions.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate go into executive session for the consideration of the nomination for the Indian Claims Commission.

The motion was agreed to; and the Senate proceeded to consider executive business.

The PRESIDING OFFICER. If there be no reports of committees, the Clerk will state the nomination on the calendar.

INDIAN CLAIMS COMMISSION

The legislative clerk read the nomination of T. Harold Scott, of Colorado, to be Associate Commissioner of the Indian Claims Commission.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. The President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, for the information of the Senate, after consultation with the distinguished minority leader, I wish to announce that it is anticipated there will be a number of votes tomorrow. There will be a number of votes on amendments to the Defense Department appropriation bill, which is now the unfinished business. There will be a vote on the Japanese peace treaty. If we get to it, there will possibly be votes upon the housing bill reported by the distinguished Senator from Alabama.

The Senate will meet at 9:30 tomorrow morning. I anticipate a late session tomorrow evening.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, June 15, 1960, he presented to the President of the United States the following enrolled bills and joint resolution:

S. 1185. An act to provide for the preservation of historical and archeological data (including relics and specimens) which might otherwise be lost as the result of the construction of a dam;

S. 1358. An act to authorize the Secretary of the Interior to provide a headquarters site for Mount Rainier National Park in the general vicinity of Ashford, Wash., and for other purposes;

S. 1892. An act to authorize the Secretary of the Interior to construct, operate, and maintain the Norman project, Oklahoma, and for other purposes;

S. 2327. An act to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes";

S. 2439. An act to authorize certain teachers in the public schools of the District of Columbia to count as creditable service for retirement purposes certain periods of authorized leave without pay taken by such teachers for educational purposes;

S. 2954. An act to exempt from the District of Columbia income tax compensation paid to alien employees by certain international organizations; and

S.J. Res. 42. Joint resolution to establish an objective for coordinating the development of the District of Columbia with the development of other areas in the Washington metropolitan region and the policy to be followed in the attainment thereof, and for other purposes.

ADJOURNMENT TO 9:30 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, if there is no further business to come before the Senate, I move that the Senate stand in adjournment until 9:30 o'clock tomorrow morning.

The motion was agreed to; and (at 8 o'clock and 23 minutes p.m.) the Senate adjourned, pursuant to the order previously entered, until tomorrow, Thursday, June 16, 1960, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate June 15, 1960:

UNITED NATIONS

The following-named persons to be representatives of the United States of America to the 15th session of the General Assembly of the United Nations to serve no longer than December 31, 1960:

Henry Cabot Lodge, of Massachusetts.

GEORGE D. AIKEN, U.S. Senator from the State of Vermont.

WAYNE MORSE, U.S. Senator from the State of Oregon.

Francis O. Wilcox, Assistant Secretary, International Organization Affairs, Department of State.

Mrs. Oswald B. Lord, of New York.

The following-named persons to be alternate representatives of the United States of America to the 15th session of the General Assembly of the United Nations to serve no longer than December 31, 1960:

Mrs. Zelma Watson George, of Ohio.

Arthur F. Lamey, of Montana.

Frederick Blake Payne, of New York.
Charles Rosenbaum, of Colorado.
Miss Frances E. Willis, Ambassador Extraordinary and Plenipotentiary of the United States of America to Norway.

CONFIRMATION

Executive nomination confirmed by the Senate June 15, 1960:

INDIAN CLAIMS COMMISSION

T. Harold Scott, of Colorado, to be Associate Commissioner of the Indian Claims Commission.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JUNE 15, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

II Corinthians 4: 11: *That the life of Jesus may be manifested in our mortal flesh.*

Most merciful and gracious God, with eager and earnest hearts we are invoking Thy blessing and dedicating ourselves anew unto Thee through the merits and mediations of our Lord and Saviour.

May the spirit of the lowly Man of Galilee, His love, His faith, His humility, His compassion be incarnated in us and become the sovereign and supreme reality in the mind and heart of humanity.

We humbly acknowledge that we so frequently fail to embody and express His spirit and do not make vivid and vital the beauty of His life which our character and conduct should reveal.

Grant that in these troublous and bewildered times we may manifest the influence that His spirit has upon us and have the courage to make greater trial of His way of life, trusting Thee as He did, loving our fellow men and seeking their welfare as He always did.

To Thy name we ascribe all the praise. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

CALL OF THE HOUSE

Mr. WILLIS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 132]

Barden	Green, Oreg.	Powell
Bentley	Holifield	Rivers, S.C.
Blatnik	Jensen	Short
Buckley	Kearns	Steed
Burdick	Loser	Taber
Carnahan	Mitchell	Taylor
Durham	Morris, Okla.	Teller
Fisher	Moulder	
Gray	Patman	

The SPEAKER. On this rollcall, 406 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

SALARY INCREASES FOR POSTAL AND OTHER FEDERAL EMPLOYEES

The SPEAKER. The Chair recognizes the gentleman from Louisiana [Mr. THOMPSON].

Mr. THOMPSON of Louisiana. Mr. Speaker, pursuant to the unanimous-consent agreements of June 8 and 9, 1960, and clause 4, rule XXVII, I call up motion No. 6, to discharge the Committee on Rules from the further consideration of House Resolution 537, providing for the consideration of the bill H.R. 9883, to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

The SPEAKER. Did the gentleman sign the petition?

Mr. THOMPSON of Louisiana. I did, Mr. Speaker.

The SPEAKER. The Clerk will report the title of the resolution.

The Clerk read the title of the resolution.

The SPEAKER. Under the rule, the gentleman from Louisiana [Mr. THOMPSON] is recognized for 10 minutes; and if the gentleman from Kansas [Mr. REES] desires time, he will be recognized for 10 minutes.

Mr. THOMPSON of Louisiana. Mr. Speaker, I merely want to thank all Members on both sides of the aisle for having given consideration to the discharge petition. The petition is entirely within the bounds of the rules of the House. It is not uncommon that such a petition be passed by this body. It is a matter of great urgency that this matter be disposed of at the earliest possible moment.

We all know this is going to be a short session. We know, other than over this route that we have taken, that the Members have so graciously helped with, that these long-suffering people, these Federal employees, would not have been given the relief to which they are entitled.

I want to thank the members of the Committee on Post Office and Civil Service for having taken up and, in their own judgment, done what should be done to dispose of this matter satisfactorily. I do hope that we will vote on this in the shortest possible time, and that the House will give favorable consideration to the measure so that the other body may act upon it at the earliest date.

Mr. REES of Kansas. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HALLECK. I understood the gentleman from Kansas yielded 5 minutes to the gentleman from Iowa. Would that be within his rights?

The SPEAKER. The gentleman from Iowa is recognized for 5 minutes.

Mr. THOMPSON of Louisiana. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Will the gentleman from Iowa yield for a parliamentary inquiry?

Mr. GROSS. I yield for that purpose, Mr. Speaker.

Mr. THOMPSON of Louisiana. The gentleman from Louisiana particularly wishes to know if he can still yield his remaining 5 minutes to the gentleman from Louisiana.

The SPEAKER. The gentleman has control of the remaining time.

Mr. GROSS. Mr. Speaker, I have been in Congress some 12 years and I do not recall at any time such highhanded action on the part of a committee as that demonstrated this morning in the House Committee on Post Office and Civil Service when the Morrison amendment was offered and adopted.

The gentleman from Louisiana [Mr. MORRISON] offered an amendment that makes drastic changes in the pending pay bill. Do not labor under the illusion that the amendment will provide the same bill to which you affixed your signatures on the discharge petition, even with the percentage figure changed from 9 to 7½ percent, because this is not the case. But let the gentleman from Louisiana [Mr. MORRISON], who railroaded what amounts to a new bill through the committee, explain the details if he can.

He offered his amendment and then immediately moved the previous question. There was no copy of his bill in my possession in the committee room and it was not until 12:30 that copies were made available on the House floor. This is the first opportunity I have had to read the amendment. There was no explanation whatsoever in the committee until after the vote had been taken which adopted the amendment. Then out of the goodness of the hearts of the majority, members were permitted to ask a few questions.

I reiterate that I have never witnessed more highhanded action on the part of a committee, especially in dealing with a $700 million bill, and if I am reelected to the next Congress and go back on the Committee on Post Office and Civil Service next year I will remember the treatment accorded to some of us today. This method of operation in a committee of Congress is wrong and it is intolerable. It is injurious to the public welfare and does violence to orderly and sane procedure.

Mr. REES of Kansas. Mr. Speaker, I yield myself 5 minutes.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield for a question?

Mr. REES of Kansas. I yield.

Mr. HOFFMAN of Michigan. Was the action taken today acceptable to the lobby that put across the signing of the discharge petition?

Mr. REES of Kansas. I have heard no complaint from the lobby so far.

Mr. HOFFMAN of Michigan. Is it acceptable to them now?

Mr. REES of Kansas. I did not ask them. They are not so far away, if the gentleman wants to make inquiry.

Mr. Speaker, this legislation is one of the biggest pieces of legislative manipulation I have seen in a long while. The Committee on Post Office and Civil Service held rather long hearings on a proposal whereby certain employees, the greater segment of them in the postal service, if that bill were passed would get about 23 percent. The others would have received from 16 to 15, to 14, down to 10 percent.

The committee held these hearings for quite a while, for several weeks. As a matter of fact, finally, when they closed the doors and considered the matter in executive session, the committee all at once decided by a majority vote to strike out the whole bill and just say in substance "give every employee in the Government a 9-percent increase in salary except for a $350 minimum for postal and classified workers." That means everybody. It means the folks who work in your office who work on Capitol Hill. If you can find me a Government employee who is not included in the bill, let me know because the chairman himself when I asked him whether certain groups were in the bill, said that he was not sure and he said, "If they are not in, we will put them in." They took care of that. So, as I said a moment ago, there is a 9-percent increase for everybody. Just last Monday, the day before yesterday, I was informed of a meeting of the Committee on Post Office and Civil Service to consider an amendment to the bill because, as you know, this bill does not come in in the regular way. It comes to the floor of the House by a petition which, of course, Members have a right to do and 219 of them signed that petition and said that they wanted this bill considered. So last Monday a meeting was called, or ordered by our chairman to consider, and of course not in writing, a proposed increase to employees of 9 percent or to reduce the 9 percent to 7½ percent. So just a while ago, at 11 o'clock, they came up with the committee print on H.R. 9883 to be offered as a substitute. So this morning the substitute was approved by the committee. I have not had time to read it all. I read a part of it. I tried to get the chairman to read it to us, but there was not the time. So we got around to it and looked the thing over. It may be agreeable to all of you—I do not know. But, the committee changed the 9 percent to 7½ percent and leaving the bulk of postal employees at a little over 8 percent. Then they put in a few extra pieces of legislation. We put in about four or five new employees in the service in the higher grades. When you get through with this bill, you are going to spend something over $700 million. You are going to get to vote on it up or down, and that is all. If you want it—take it. You cannot amend it at all under the rule.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. REES of Kansas. I yield to the gentleman from Illinois.

Mr. ARENDS. Does the committee action this morning do more than change the 9 percent to 7½ percent?

Mr. REES of Kansas. Oh, yes; I think, perhaps, the author of the bill can explain that.

Mr. ARENDS. Certainly, we are entitled to know and we should know what is in the committee amendment. I hope the gentleman who is offering the committee amendment, although he has over the past weeks changed his position many times, will tell us what is in the committee amendment.

Mr. REES of Kansas. Speaking of changing positions, I can also tell you we did not get to vote on the first bill introduced at all when the committee first met in executive session. We did not even discuss the contents of the original bill. The thing was all stricken out except the enacting clause and we wrote a new measure providing for 9 percent across the board.

Mr. JOHANSEN. Mr. Speaker, will the gentleman yield?

Mr. REES of Kansas. I yield to the gentleman from Michigan.

Mr. JOHANSEN. I wonder if it is not true that the statement made by the gentleman from Illinois expresses a desire and a right of the House of Representatives, which was denied to the members of the committee this morning, namely, the right to know what was in the amendment.

Mr. REES of Kansas. We tried to find that out and it was voted down. We did not get to find out what was in the bill except in a general way. There are a good many changes, and I hope when the time comes the distinguished Member, the gentleman from Louisiana, the chairman, will fully explain the bill.

The SPEAKER. The time of the gentleman has expired.

Mr. THOMPSON of Louisiana. Mr. Speaker, I yield 6 minutes to the gentleman from Louisiana [Mr. MORRISON].

Mr. MORRISON. Mr. Speaker, since some remarks at the outset today were directed at me, I wish to state that this legislation was very carefully considered by our full committee for over 6 weeks. We took all due and deliberate time to work out just about every detail that any Member wanted to bring up concerning this bill. We finally reported out a bill providing increases of approximately 9 percent across the board with a $350 annual minimum for postal and classified employees. That the bill as reported out was the one subject to the discharge petition. The committee voted by a yea-and-nay vote, and I believe that vote was 17 to 5 when it was voted out of our committee. The discharge petition carried 219 signatures.

A committee meeting was scheduled for today at 11 o'clock. I suggested to the chairman that perhaps it would be better to meet at 10, for I wanted to discuss my amendment fully. I gave the chairman of our committee a copy of my amendment last night, approximately an hour after I had completed it. In the 2 hours of general debate that will be allowed for the consideration of this bill we will discuss it very thoroughly.

At the committee meeting this morning time left, after discussing parliamentary procedure, was too short to allow an adequate discussion of the details of my amendment.

In effect this is what the amendment does, and I will be glad to explain it fully to the membership when we go into debate on it. The amendment that was offered in effect changes the amount of the general increases from 9 percent across the board to approximately 7½ percent across the board with $5 a year added for each step of the first six postal field service salary levels.

This bill was voted out by a yea-and-nay vote by our committee this morning. My amendment for 7½ percent was voted by a clear-cut majority of 17 to 4, and the committee worked its will. I am sorry the committee did not have more time to allow me to explain it in detail. Frankly, I think this 7½ percent, taking everything into consideration, is a good, fair, and moderate pay raise that is certainly justified. That the majority of the membership of the House feels that way is evidenced by the fact that 219 Members affixed their names to the discharge petition. They want this bill to come to the floor for debate and to be voted on. I can assure the membership that the full membership of the House Committee on the Post Office and Civil Service did vote on this. They voted on several other motions and they tabled several other amendments. During the whole time I have been here, and, as far as I can ascertain from the beginning of the proceedings of the House, the same rule of the will of the majority has prevailed. The overwhelming majority of our committee voted that they want this amendment for a 7½-percent, across-the-board increase.

Mrs. BLITCH. Mr. Speaker, will the gentleman yield?

Mr. MORRISON. I yield to the gentlewoman from Georgia.

Mrs. BLITCH. The gentleman has explained what the lowest salaried employee would obtain under this bill; will he please tell us what the highest salaried employee will obtain under this bill?

Mr. MORRISON. It will be a 7½-percent, across-the-board increase with a maximum of $18,500 for the top classified salary.

Mrs. BLITCH. Has the gentleman figured out the number? I cannot make mathematical calculations that quickly.

Mr. MORRISON. I do not know the number of supergrades we have in the Government, but I will be glad to get it for the gentlewoman. This amendment, in essence, is a straight 7.5 percent across-the-board increase, offered as a substitute for the 9 percent pay raise bill which is the subject of the discharge petition.

Mr. REES of Kansas. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri [Mr. JONES].

Mr. JONES of Missouri. Mr. Speaker, I do not know what is in this new bill which is to be offered as a committee amendment, but I am going to talk on the bill that was on the discharge petition and which was the only thing before us up until this hour.

Mr. Speaker, if for no other reason—and there are many—this bill should be

recommitted to the committee for the elimination of that portion which applies to legislative employees.

If there is any group of employees either in or out of Government who are on the whole adequately compensated, it is the employees of Congress, and if there is any place—and again there are many—where there should be selectivity rather than an across-the-board increase, it is among the employees who serve Congress.

I think most Members of Congress are aware, and certainly all of us should be aware of the complicated formula under which the salaries of most of our employees are computed, and this in itself subjects Congress to criticism, if not ridicule. The very idea of starting with a base salary which has been increased by various and sundry devices not less than eight different times, employing flat increases, percentage increases, all predicated upon the gross rather than the base salary, lends itself to a charge of finagling, and there is every basis for the criticism that Congress is trying to confuse, if not mislead, the public in the operation of the legislative branch of the Government. Any further percentage increase would only tend to increase the inequities which now exist.

The very fact that literally hundreds of employees are kept on the payroll, some at substantial salaries, while Congress is not in session and while there are no duties to be performed by many of these employees, is to me a convincing argument that these employees are in an entirely different status from other Government employees.

In the case of employees in congressional offices, as all of you are aware, the pay cannot only be adjusted up or down by the Member, but the employment can even be terminated without notice. The fact that the total amount which can be spent for secretarial and clerical hire in the office of each Member is predicated on the so-called base salaries, is, to say the least, most misleading, and I doubt if there is a Member on this floor today who can tell you both the base and gross salary being paid to the employees in his own office, without referring to the Rube Goldberg formula under which these salaries are computed.

I realize there are many Members who assume the attitude that it is no one's business how we operate the business of Congress, but I would remind you that it is the same taxpayers' dollars that we spend here that we appropriate for other branches of our Government. Economy, efficiency, and, above all, fiscal responsibility should begin here—right here in this House today. Oh, I know someone will attempt to justify his action by what the other body does, and I hear the old song that the public does not get to see the records in the other body. We are responsible for what happens here in the House of Representatives, and it is time that we begin to meet this responsibility.

It will be interesting to hear how some Members will attempt to justify their vote on a bill which will add thousands of dollars to the cost of operating the House of Representatives, when instead we should be taking steps to reduce the expenses which could be done at a savings at not less than $5 million a year right here in this body, without affecting the efficiency one iota, and I might add without disrupting any of the practices of an overwhelming majority of the Members of this body.

Many Members have told me that they were not aware that this bill applied to legislative employees. I would say to them that before you vote for this bill you had better find out what all it does include. Other Members have told me that they felt confident that the bill would be vetoed. To me, that is all the more reason why this bill should be recommitted. If we are honest in our desire to provide pay increases where they are justified, let the committee bring out a realistic bill which can be supported enthusiastically and which the President will have no reason to veto. I, too, believe this bill will be vetoed, and I believe the veto would justifiably be sustained, and that is just another reason why I will not vote for it.

Mr. THOMPSON of Louisiana. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I must disagree with the gentleman from Missouri [Mr. JONES] and others who are not inclined to favor this increase in salary. I think the majority of this House believes that this increase is justified.

I might also say to the gentleman from Missouri that it is entirely within his discretion what salary he gives his employees. If his employees are not worth the salary they are getting, certainly he should pay them commensurate with the work they do.

Mr. JONES of Missouri. That does not apply to employees of committees or other employees of the House.

Mr. THOMPSON of Louisiana. The chairmen of committees can set the salary of committee employees. I say that the people who work in Washington, on the Hill, especially, are the lowest paid employees considering what they do. I am not going to kid myself at all. I depend upon my very competent staff, and I do not believe we could accomplish 50 percent of our work if it were not for the faithful employees we have.

Mr. JONES of Missouri. I agree with the gentleman that we do have many faithful employees; but I have two employees in my office who will do more work than five employees in many other offices.

Mr. THOMPSON of Louisiana. Would the gentleman care to name one?

Mr. JONES of Missouri. Name one what?

Mr. THOMPSON of Louisiana. One other office where five employees would not do as much as your two.

Mr. JONES of Missouri. I am not going to call names. I am not trying to tell what other people do. I know you have certain opportunities. I have the opportunity to pay the employees what I think they are worth, and I do it, and I am not ashamed of the salaries they are paid.

Mr. THOMPSON of Louisiana. Mr. Speaker, I may say in closing that I have been in the public service for 26 years. I have known what it is to live on wages that are much lower than the industrial wages paid during times of inflation. I know that these people suffer great hardships and they could get better jobs on many occasions, but they have seen fit to stay with the Government because they are loyal employees who recognize their responsibilities and discharge them.

Mr. Speaker, I hope we can pass this resolution immediately.

The SPEAKER. The question is on the motion of the gentleman from Louisiana [Mr. THOMPSON] to discharge the Committee on Rules from the further consideration of House Resolution 537.

The motion was agreed to.

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution, the Speaker shall recognize Representative James H. Morrison, or Representative John R. Foley, or Representative Joel T. Broyhill, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed two hours to be equally divided and controlled by the Member of the House requesting the rule for consideration of said H.R. 9883, and a Member who is opposed to said bill to be designated by the Speaker; the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except those offered by direction of the Committee on Post Office and Civil Service. Amendments offered by direction of Committee on Post Office and Civil Service may be offered to any part of the bill but shall not be subject to amendment. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. This special order shall be a continuing order until the bill is finally disposed of.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. MORRISON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation for certain officers and employees of the Federal Government, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 9883, with Mr. BOGGS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. MORRISON. Mr. Chairman, I yield myself such time as I may desire.

Mr. Chairman, in many respects the circumstances under which this legislation is being considered by the House are familiar to most of the Members. As remarked by a Member several years ago, the situation is somewhat like an old movie shown on television. You watch it thinking you have never seen it, but nevertheless you have a strong feeling it has all happened before.

And so it is with this bill, except for one important difference. In my memory, there has never been such uniform and overwhelming support among the Members for salary increases for postal and other Federal employees.

Mr. Chairman, the only question, as I see it, is as to the amount of the increase. As I was explaining to the membership before the adoption of the rule, our committee reported out a bill after 6 weeks of hearings during which either side that wanted to could be heard. We came out with a bill and reported it to the House which called for a 9-percent pay increase straight across the board with a $350 minimum for the postal field service, rural carriers, and classified workers. That bill as reported to the House was amended today by a committee amendment which will be offered at the proper time. This committee amendment is very simple. In general, it does not do anything to the original bill that was reported out except to change the amount from 9 percent to 7½ percent. It covers all the people who were covered in the original bill as reported by our committee—the bill which was subject to the discharge petition. The change, as I said, is that it cuts the 9 percent straight across the board increase to 7½ percent straight across the board. In some instances, in the postal field service for the first 6 pay levels it gives $5 a year extra for each of the automatic salary steps.

Mr. GARY. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to my distinguished colleague from Virginia.

Mr. GARY. Was any change made in the minimum amount of the pay raise?

Mr. MORRISON. Yes; the minimum of $350 was taken out completely. There is no minimum of $350 in the amendment that is to be submitted to the Committee of the Whole at the proper time.

Mr. GARY. Does the bill in addition make permanent the 2½ percent increase we granted last year which will expire on July 1 unless it is made permanent?

Mr. MORRISON. It makes that 2½ percent increase permanent.

Mr. GARY. And the 7½ percent is in addition to the 2½ percent which is made permanent?

Mr. MORRISON. Yes; that is right.

Mr. GARY. The gentleman referred to some increases in the lower brackets. Was that action designed to take the place of the minimum?

Mr. MORRISON. It does not nearly come up to the $350 minimum. But in effect it does give the very low-salaried employees a little better than 7½ percent. But I believe in each case it is well below 9 percent, and the slight extra allowance is only for those in the lower grades.

Mr. GARY. I thank the gentleman for the information.

Mr. CHELF. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman.

Mr. CHELF. Mr. Chairman, I should like to ask the gentleman whether his amendment which was adopted this morning provides for a 5-cent postage stamp.

Mr. MORRISON. No.

Mr. CHELF. Do any of the other amendments that were adopted provide for an increase in the postal rate?

Mr. MORRISON. No.

Mr. CHELF. I thank the gentleman.

Mr. MORRISON. The 7½ percent is not what the committee voted out at first. Now, to show the interest of the Members of this House in this matter, more than 80 Members introduced pay raise legislation that was considered by our committee. I want the membership to know that every viewpoint on both sides of the aisle, and of all concerned, was considered by the committee. Everybody had his day in court, so to speak, and was permitted to testify before the committee.

I know of no instance, in the nearly 18 years that I have been here, when anybody made a more constructive or substantial or more forceful argument for a pay raise for Federal workers than was made, in our hearings, when comparisons were submitted between Government pay and pay for similar work in private enterprise. In every one of those cases that was cited before our committee it was shown that workers in private industry doing comparable work receive higher salaries than postal and other workers in the Federal Government.

I can further say that the testimony that was brought out showed one example of a newspaper advertisement for people to apply as janitors. Actually they were offering to pay janitors in the larger cities far more money, as starting salaries, than the postal carriers and clerks get who have been working months and years for the Post Office Department.

I can further state in support of this wage increase that the whole weight of testimony that was in favor of it more or less dwelt on the fact that here we are, in this great Nation of ours, not paying our Government workers the fair and just salaries that workers get in similar employment in private enterprise.

I think the committee studied this amendment well. It was adopted by a tremendous majority. I think 17 to 4, which was today's vote, will certainly show that by far the vast majority of the committee that went into detail on this thought that a very excellent case had been made for the proposed salary increase.

All of us know that the time is getting short. We all know we have to be practical about this. Frankly, I felt that whereas I was personally in favor of the 9 percent, and I still think it was highly justified, this compromise of 7½ percent will be far more acceptable to some of the Members of the House. I am sure the same situation prevails over in the Senate. And so, I felt that by bringing out this amendment today, which will be considered at the proper time, the 7½ percent is certainly the proper thing to do under the circumstances—if we are going to be realistic and practical about this legislation and give the House and the Senate a chance to vote on it and give the President a chance to act on it one way or another.

There were many who said the President would veto any pay-raise bill this year. I do not know what the President is going to do, and I do not think anyone else knows what the President is going to do. But I think when you have this bill as it will be amended today, coming within the time we have before adjournment, it will have an opportunity to go to the White House. If it is signed, that ends it. If it is vetoed, we will have a chance to override that veto.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I congratulate the committee on coming up with this successful compromise. The question is really the amount of the pay raise, not whether there should be one, because if we are going to have the postal and other Government workers move along with private industry we must give some sort of a pay raise at this time. Is that correct?

Mr. MORRISON. That is correct.

Mr. HOLLAND. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman from Pennsylvania.

Mr. HOLLAND. Is it not true most of the wives of the postal workers have to go to work to help support their families?

Mr. MORRISON. The witnesses who testified before us showed us example after example where both the husband and the wife were working. The husband was working for the postal service and the wife had to have another job in order to make ends meet, so to speak.

Mr. HOLLAND. The postal workers had to work at night to supplement their salaries to keep their families.

Mr. MORRISON. That is correct.

Quite frankly, in my opinion, increases considerably higher than those in the committee amendment are justified. My original bill so provided. But we all realize, particularly those of us who have served many years in the Congress, that the views of others deserve full consideration. All major legislation more or less represents a compromise as between different convictions, in the highest tradition of our democratic process.

Many of the members of the Committee on Post Office and Civil Service have put aside their individual preferences in a true spirit of compromise to

bring to the House floor a bill to provide a moderate and fair pay raise which should generally be acceptable.

After careful and diligent study of all evidence developed in the hearings and in full consideration of the many different opinions, the committee decided that the amendment to be proposed represents a solution to which we could all agree. It is a real tribute to the tireless and conscientious work of every committee member that there is such overwhelming committee support for this amendment.

The committee amendment which I will have the honor to offer, which I will place before the House at the proper time, grants a 7.5 percent salary increase, in lieu of 9 percent provided by the reported bill, to all of the groups covered by the reported bill, with the provision, as I stated before, for slightly over 7.5 percent to those in the lower postal levels.

I would also like to call to the attention of the House the cost of this bill compared to what they said my original bill would cost, that is, $1,600 million. There was a great deal to do about that in our hearings. As I say, the bill that will be before the House for eventual passage after this amendment is presented, and if the committee amendment is adopted, will call for 7 5 percent overall increases and that will cost between approximately $680 million and $700 million. This is the best figure I have been able to obtain from the committee counsel—that is, between $680 million and $700 million.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield.

Mr. HALEY. Would the gentleman be willing to support a tax measure or an increase in the postal rates to take care of this increase in expenditures by the Federal Government?

Mr. MORRISON. I am the type of person who crosses a bridge when he comes to it. That question is not before the House today. That is still before the committee. Frankly, I think my distinguished friend, the gentleman from Florida, will agree that we should certainly know what propositions are brought before our committee before we finally act on a bill. I assure him I will try to do justice to myself and to my people, in trying to represent them, and that I will vote according to their wishes. How I will vote I do not know until I have something to vote on.

Mr. HALEY. The gentleman realizes, of course, that this will bring us further into deficit financing. Do you not think that somewhere along the line this Congress, and do you not think that you as chief sponsor of this bill, has some responsibility to bring a bill here to pay for it?

Mr. MORRISON. I appreciate the gentleman calling me the chief sponsor, but I have over 79 other gentlemen who are with me on it, and I am not all alone in bringing this legislation before this session of Congress. But as I say, frankly that is not before the House now. I think at the proper time the House will take up that bill. The committee is just about to wind up action on it. What the committee does and what the House does is a matter on which the gentleman's guess is as good as mine.

Mr. JOHANSEN. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield.

Mr. JOHANSEN. I do not want to be unfair to my very able and distinguished friend, but do I understand from what the gentleman is saying that it means the gentleman will in committee support a postal rate increase of some kind?

Mr. MORRISON. I did not say what I would do, and I do not believe I will ever say what I will do before I see the bill that is presented to the committee and before all the amendments come up. Frankly I do not commit myself to my own constituents nor can I commit myself to the gentleman or to any other Member of the House as to what I will do on any proposal, before I have it before me.

Mr. JOHANSEN. I thank the gentleman.

Mr. GRAY. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield.

Mr. GRAY. If suggestions are in order, I suggest to the gentleman that the cost of this bill be taken out of the $4 billion surplus that the President is telling the people of the country we are going to have. Why do we need to raise the postal rates?

Mr. MORRISON. We are not taking up postal rates today; they are not germane and cannot be taken up today. So if the membership will allow me, I would like to explain further the bill and the amendment adopted by the committee this morning.

This increase will affect some 535,000 postal Federal service employees, 980,000 employees under the Classification Act, 8,100 Foreign Service employees, 19,300 employees in the Department of Medicine and Surgery in the Veterans' Administration, and 15,000 Agricultural Stabilization and Conservation Committee employees; 5,000 employees in the judicial branch; and 7,500 in the legislative branch.

The amendment contains provisions of the reported bill extending to these employees that I have just enumerated a very moderate pay increase.

I would like to cite some of the effects of this bill as far as the hourly wage is concerned. The average salary of our letter carriers is $2.23 an hour, or $370 a month. The committee amendment will increase this by about 17 cents an hour, or $28 a month. But this is the gross salary increase. This is not the take-home pay, it is not the amount included in his pay check. As I said, it is not take-home pay.

The average letter carrier is one of the finest family men in America. The family, of course, is the basis of our economy and our economic and our social system. The average letter carrier's family consists of husband, wife, and three children, a family of five. From the gross monthly salary of $370, before the employee receives anything, there is $26.64 deducted to pay his fringe benefits, and $17.17 for Federal and State income taxes. This reduces his monthly take-home pay to $326 a month, or $1.96 an hour.

Under the committee amendment his gross monthly salary would be $398. Deductions would be $28.64 to pay for his fringe benefits and $21.89 to pay for the Federal and State income taxes, leaving a net monthly take-home pay of $347.22, or $2.09 an hour. Now, this is after this 7½-percent increase is put into effect. In other words, carried down to the fundamental question of take-home pay, the committee amendment would grant an increase of 13 cents an hour in the average take-home pay of a postal letter carrier. This is the additional amount the letter carrier will have with which to buy meat, groceries, and milk, and to buy clothing for his family, to make payments on his mortgages, or whatever he has to do with it.

Certainly it is only fair to grant this moderate salary increase in recognition of the conscientious and efficient public service rendered by our postal employees.

A moment ago I told you about an advertisement that was in a paper. I would like to be specific and quote from this want ad. It appeared in a paper at Detroit, Mich., where many employees in the postal field service work and live. It reads:

> Wanted: Janitor for city hall. Examples of work: Sweep, mop, scrub, and polish floors; clean and maintain lavatories, replace light bulbs. Starting salary, $4,450; $5,050 after 2 years.

Frankly, I feel that no more need be said to demonstrate that the salary adjustments proposed by the committee amendment are extremely moderate and should be approved and granted to these Federal employees.

Some reference has been made, during our pay deliberations, to fringe benefits for Federal employees—usually by way of implying that they are so liberal that they can take the place of salary. This is a myth. I am proud of the fringe benefits we have been able to gain for Federal employees and am sure that they and their families deeply appreciate these benefits. But they are not to be confused with hard cash in the pay envelope. They are not considered negotiable by shopkeepers or bill collectors or mortgagees. It is much easier to get along with these people when we should show them the color of our money.

Nor are Federal employees' fringe benefits by any means so liberal that they can replace justified pay raises. If anything, they lag further behind similar benefits in private enterprise than is the case with Federal employees' salaries. The Cordiner committee disclosed in 1957 that Federal employees personally contribute more than their fellow workers do in private enterprise for fringe benefits. According to the report, employees of 356 firms covered by one study paid an average of 4.5 percent, and employees of 1,000 firms covered by another study paid only 3.5 percent, of their

salaries for fringe benefits. Federal employees pay 7.2 percent.

Another factor largely overlooked, or given too little weight in the administrative consideration of salary legislation, is the record of productivity by postal and other Federal employees. When postal rate increases or appropriations are being sought, the proponents quite often argue brilliantly and forcefully of improved service and efficiency to justify the rate increases or appropriations. The history is told in glowing terms of a 15 or 17 percent increase in mail volume in recent years, with little or no increase in such man-years of work as are within management control.

In truth and in fact, we all know that this fine record of efficiency is attributable to the performance of more and more work by the 535,000 postal employees. Yet opponents of salary legislation give it no weight at all as justifying pay raises for the very employees who have done the work. The employees are commended indirectly and by words—not by supporting reasonable pay raises in recognition of their efficiency. This failure to give full credit where credit is due in my judgment can become one of the most damaging blind spots in employee-management relationships and in the administrative consideration of salary problems. It tends to create a climate closing off the best avenues of communication and exchange of views between employer and employee—except as a one-way street for the views of the employer.

I strongly urge the Members to vote for the committee amendment providing this 7½ percent pay raise for postal and other Federal employees.

Mr. MERROW. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman from New Hampshire.

Mr. MERROW. I want to congratulate the gentleman on his very able presentation today. I am glad that we are going to have an opportunity to vote for a pay raise for Federal employees. I was one of those who introduced a pay raise bill and I was very happy to sign the petition to discharge the Rules Committee from further consideration of the subject. Personally, I feel as does the gentleman, there should be a 9-percent increase. I would like to ask this question: Does not the gentleman agree with me that regardless of what the rates may be for postage the people who are working in the Postal Department should have adequate compensation for the work performed, and that the people working for the Government in other Departments should have adequate compensation for the work performed comparable with what can be obtained in industry?

Mr. MORRISON. The gentleman is correct, and I thank him for his contribution.

Mr. MERROW. We are living in an age of constant peril, and every realistic appraisal of the future indicates that this condition will continue for a long time. At the same time, almost every aspect of society and government is growing more complex and is demanding a progressively higher degree of expertness. Under these circumstances, the Government must do everything possible to assure itself of the services of the most competent people.

The questions of employee morale and, even more, of the recruitment and retention of intelligent, imaginative, and experienced employees have long constituted a major problem for the Federal Government. To fail now to adopt this well-merited pay raise will needlessly and unjustifiably intensify this problem.

The pay schedule for the Federal service continues to lag, not only behind the costs of living, but also behind the salary levels being paid in private enterprise. Since the last Government pay raise in 1958, wages in private industry have risen considerably. At the same time, studies in productivity have shown that the increase in work output among Federal employees compares very favorably with that of private industry.

Congress, therefore, has a special moral and legal obligation to investigate the needs of Federal employees and to act promptly to rectify any inequities that may exist. These investigations have now been completed. Both Houses of Congress have held hearings on the question of Federal compensation, and both of these hearings have demonstrated conclusively that a pay raise at this time is both deserved and urgently needed.

The time has now come for action. As Members of Congress, we have a responsibility to these Federal employees that we can neither ignore nor delegate to anyone else.

Mr. GEORGE P. MILLER. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman from California.

Mr. GEORGE P. MILLER. I want to pay my respects to the gentleman and congratulate him upon the introduction of this bill and for the fine exposition he has made of the subject. Moonlighting among Government employees is something that must be avoided. A man's loyalty should be to his first job, not to his secondary position. Moonlighting is too prevalent at this time, and by "moonlighting" I mean that a Federal employee must secure a second job in order to be able to have an adequate income.

While I am on my feet, I would like to pay my respects to your colleague, the gentleman from Louisiana [Mr. THOMPSON], who placed this petition on the desk. Whenever the chips are down and the Federal workers need assistance, it seems they go to Louisiana, to you or to Mr. THOMPSON. I think it is a great compliment to the gentleman from Louisiana that he was able to get 219 Members of this House to sign that petition. It indicates the respect in which we hold him and the high position he has earned in the House. During the 8 years Mr. THOMPSON was able to work with people and coordinate efforts. I serve on the Merchant Marine and Fisheries Committee with him and I know the great things he has done for your State of Louisiana.

Mr. MORRISON. I thank the gentleman for his contribution.

Mr. LANE. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman from Massachusetts.

Mr. LANE. Mr. Chairman, I, too, want to congratulate the gentleman from Louisiana [Mr. MORRISON] for his very able and intelligent statement made on a very, very important bill.

Mr. Chairman, many post office employees have complained to me, claiming that their postal pay increase bill is being kicked around for personal or partisan or selfish advantage as the countdown toward adjournment begins. They are cynical and bitter for they believe that Congress is only going through the motions.

Much as they resent it, they know where they stand with the President who is flatly opposed to any pay increase for postal workers, and by extension, for all classified employees of the Federal Government, during 1960. But they are suspicious of the legislative maneuvering in the Congress whereby the impression is conveyed that Congress is seeking to ingratiate itself with over 2 million Federal employees for the record, while privately writing off hopes for a pay increase bill at this session.

"It is not enough," the postal employees insist, "for Congress to vote for a pay increase, and then wash their hands of it. What we want to know is whether Congress means business about this, and whether it is prepared to go all the way and vote to override the Presidential veto, before this session adjourns."

That is the issue. From several disillusioning experiences in the past, they have learned much. This time they will be watching, not only the vote for the bill, but the vote to override the President.

For the Congress cannot have it both ways on this bill which is necessary to relieve the economic handicap under which Federal employees must work. The indifference of Government toward the bread and butter problems of its own employees, is undermining their morale and their efficiency. To overcome this lack of understanding and appreciation, it is urgent that the many friends of Federal employees in the Congress should intensify their efforts to line up the commanding support that is necessary to override the veto.

The good faith of the Congress itself is at stake here, for the Federal employees have no recourse but to appeal to us for help. As they compare their lot with the consistently improving pay standards of private industry, they realize that their own position is steadily deteriorating.

We have seen how the United States has lost prestige and power in its relations with the rest of the world through the misleading emphasis on economy, to the detriment of public progress, in recent years. This pennywise conservatism, desperately hugging the status quo, has deprived our Nation of the means necessary to maintain its leadership. At home, this sterile fixation on budget balancing has cramped the progress of Federal employees.

If it were possible for them to transfer their civil service retirement system

credits to coverage under private employment, many would immediately avail themselves of the better opportunities available elsewhere.

As it is, Federal workers are dissatisfied, and rightly so. When they are not paid what they deserve, their job performance is bound to suffer.

To prevent further deterioration we must open the way for an improvement in the wage standards of Federal employees by passing the postal pay raise bill—with votes to spare on this round—and ready to beat the veto.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. I yield to the gentleman from California.

Mr. COHELAN. Mr. Chairman, I congratulate the gentleman from Louisiana [Mr. MORRISON] on his statement on behalf of his measure providing salary adjustments for certain Federal workers.

As one of those who has supported this legislation all along, has introduced a companion to the original bill, and has signed the discharge petition which brought the bill to the floor, I urge full support for H.R. 9883 on the floor today.

Opponents of the bill say that postal workers have received seven pay raises in the past 15 years, and would have us conclude from this that everything is fine and no new attention to the Federal wage scale is needed. The fact is, however, that seven pay raises in 15 years is in no way out of line, that there has actually been only one pay raise after that granted in 1955 and, most important of all, that the wage of the average post office worker and the average classified employee is still below that of his counterpart in local government or private industry.

In the committee report, on page 5, a comparison of salaries of letter carriers to policemen and firemen in various large cities shows that the former is lower paid in every case. As I testified before the committee, the problem is particularly acute in the city of Oakland, Calif., a major portion of which I represent. In Oakland the automatic salary range for police and firemen ranges from $6,396 to $6,828 and this indicates so very clearly that in Oakland the letter carrier's range of $4,035 to $4,875 leaves him in a more inequitable position even than elsewhere.

The need for the salary increases provided in H.R. 9883 is clear. They are justified. I urge full support for the bill.

Mr. HOLLAND. Mr. Chairman, I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. HOLLAND. Mr. Chairman, the other evening I visited a shoestore with my daughters. While the clerk was trying on the shoes, he asked me if anything was being done for his raise. I replied: "What raise?" He said, "The postal workers." I then learned from him after he leaves the post office he is forced to work from 5 until 9 at night in a shoestore to supplement his income so that he can furnish the necessities of life for his family of five children.

I was quite alarmed to find this was true in many, many cases, and having an office in the Federal building in Pittsburgh, I checked with other workers and learned of their plight in trying to raise an American family. I found postal workers employed in filling stations at night, in garages doing odd jobs, yes—and tending bar in clubs.

Some of these workers spend 16 hours away from their family doing extra work so that they can receive sufficient money to clothe, feed, and house their families.

In many cases, I found that their wives were forced to work as clerks in stores, offices, factories, and restaurants to supplement their husbands' wages.

This is a pitiful case in America where a man is penalized for being a Government worker and denied the pleasure of an enjoyable evening at home with his family like other American families do, who work for private enterprise.

This is a disgraceful condition, and we the Congress of the United States permit it to exist. We who pose before the world as a benevolent government do not show it to our own employees. In this session I have heard about billions of dollars which must be appropriated for peoples of other lands, and to raise their standard of living. I have always supported aid to raise the standard of living in other countries, but I am convinced now that it is time to think of our own, and at least give to our employees the right to enjoy American homelife.

This bill will cost the Government considerably less than what they have appropriated to the peoples of any one country in the world. To hear objections from the administration that a 7½ percent raise is too much for their own employees is an insult to the conscientious and dedicated postal workers of our own country.

The administration has forgotten its own employees too long.

This big business administration seems to be only interested in seeing that the big corporations make higher profits and the banker gets higher interest on the money loaned to the Government's underpaid workers. For the President of the United States to threaten he will veto any raise given to the Government workers is an insult to those who are devoted to Government. In fact, it is the Government workers who are responsible for the efficiency of our Government. You will not find them on the golf course when they have a job to do.

Mr. Chairman, I am sorry that this bill has been cut to 7½ percent from 9 percent, for I believe that every man and woman working for the Government deserves and earned the 9 percent increase. Let the Members of Congress at least recognize their plight, pay them a decent wage so that the family life so long denied them can be enjoyed in the American way.

I, for one, Mr. Chairman, not only support this bill on this vote, but I promise the Government workers of America if it is vetoed by the President I shall vote to override it.

Mr BARRETT. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BARRETT. Mr. Chairman, as one of the early signers of discharge petition No. 6, I respectfully urge all the Members here on the floor today to vote for the passage of H.R. 9883, the Federal employees pay increase bill, because these men and women not only deserve this recognition, but are in need of larger paychecks to properly support their families. I feel confident we have the votes to overwhelmingly pass this bill and I am hoping the President will not veto it.

Inasmuch as the Congress plans to adjourn early in July, I further respectfully request that additional bills be scheduled for debate that will improve the economic standards of our American families.

An excellent start in this direction would be the passage of my bill, H.R. 5868, to increase the present hourly minimum wage from $1 to $1.50. At today's prices, which continue to rise, I cannot conceivably understand or know how a man with a wife and two or three children can properly shelter, clothe, and feed them on a weekly salary of $40 or $50. We all know food costs are high and rents in our metropolitan area of Philadelphia are exorbitant for desirable living accommodations.

While it is true you can rent substandard homes and apartments in the $50 to $75 price range, the fact remains that the location is usually very undesirable for the raising of a family. What is needed at this time is legislation to provide additional low-cost housing units in Philadelphia and other cities at nominal rentals in well planned communities for those people who have limited budgets and cannot afford to pay high rents. I, therefore, urge you gentlemen to accept the housing bills presented by my committee, which will destroy blighted areas and create communities of comfortable houses and apartments for our middle- and low-income families with adequate school facilities for their children.

Mr. Chairman, millions of children throughout the country today are receiving an inadequate education simply because there are not enough classrooms available for them. In many of our cities and towns these very same children are attending school in split shifts. In these days of the cold war, when we are fighting for our very survival, the education of our children is one of our greatest assets. They will become our leaders of tomorrow and, therefore, we cannot permit them to continue to be crowded into poorly equipped schools.

Another major item in my program for the American family is the need for legislation to provide medical and hospital care for our elderly citizens who, because of restricted pension checks and limited assets, are unable to cope with emergency illnesses. There are several proposals pending before us to give help

to these very deserving citizens and I urge all here today to back my plea for their immediate passage.

I sincerely and honestly believe my program for the betterment of our American way of life is sound in every detail. It is not an expensive giveaway proposal and will benefit every American citizen.

As representatives of these citizens, I am requesting your support of this program.

Mr. REES of Kansas. Mr. Chairman, I yield 10 minutes to the gentleman from Tennessee [Mr. MURRAY].

Mr. MURRAY. Mr. Chairman, I realize that my opposition to this measure is futile, since the majority of the Members of the House have already signed the discharge petition on this pay legislation. I am opposed to the measure. I think it is not justified and should not be approved. But, of course, it is going to be approved by the House.

Mr. Chairman, let me say something about the conduct of certain lobbyists on this piece of legislation. This morning when I went to the committee room of the Committee on Post Office and Civil Service, I had difficulty getting to the room because of the great swarm of lobbyists outside in the hall. There must have been 75 of them. I had to pry my way through to get into my own committee room. And I have never seen such tactics employed as these lobbyists have been using during this fight for the pay bill. I think it is high time for the Members of the Congress to stand up and let these lobbyists know that they are not to be controlled by them, not to be dictated to by them. If we do not, it will be a sorry picture regarding any future pay legislation.

Today, Mr. Chairman, we have a national debt of over $285 billion. We pay $9.5 billion in interest each year.

Our Federal payroll is over $13 billion a year, over $1 billion a month.

In the last 15 years the salaries of Federal employees have been increased a total of 83.6 percent. There have been 8 pay raises in the last 15 years, for Federal employees. Besides, there is no group of employees in private industry that receives the fringe benefits that Federal employees are getting today. These fringe benefits amount in compensation to about 30 percent of their salaries. They have such liberal fringe benefits as life insurance, health insurance, retirement, hospitalization, and medical expenses. This Government has certainly been fair and liberal to our employees.

Mr. Chairman, we have a $285 billion debt, on which we pay interest each year of $9.5 billion. It is high time we stopped these reckless expenditures. I say that it is not in keeping with a sense of fiscal responsibility to increase the salaries of these employees today.

I am sorry to see the influence that these postal lobbyists exercise upon certain Members of Congress and particularly upon certain members of my committee. I regret it. I think that unless Congress stands up and lets them know that we will exercise our own judgment, this condition will get worse instead of better. I am sick and tired of the tactics of these lobbyists. I, for one, have never been controlled by them and do not propose to be controlled by them.

There is little I can say further, because I know this bill is going to pass. I think we are making a mistake. I do not think it should pass. But I do not care to argue the matter any longer. I am strongly opposed to the bill, but I am sure that will not have any effect.

Mr. REES of Kansas. Mr. Chairman, I yield 7 minutes to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Chairman, the gentleman from Tennessee [Mr. MURRAY] is a realist. I certainly am a realist on this occasion. I have no illusions about what is going to happen to this bill. It will be passed by the House of Representatives today. But I want to tell you that in my opinion, as it is now written and as it will have to be voted upon under this gag rule that was petitioned out, it is not going to become law.

Having said that, I would like to point out that through the years I have been here I have supported pay increases for Federal employees both in the classified and in the postal service. So far as the postal service is concerned I have been concerned about the deficit in the Post Office Department. In the Republican 80th Congress, in which I was privileged to be the majority leader, we gave the employees the greatest single annual increase in pay they had ever had.

But with that pay increase we had a rate increase designed to keep the Post Office Department out of the red as far as we could. What happened in the 80th Congress, as far as pay increases are concerned, has been happening in the Congresses since that time. Increases have been voted from time to time. In 1958 we had a rate increase. In addition, as the gentleman from Tennessee has so well said, fringe benefits have been voted that I understand would amount to about an 18 percent pay increase.

I realize, of course, that everyone would like to have more pay, anyone who works for a living, but when those of us who have the responsibility to fix that rate of pay get ready to do something, everybody would like to be openhanded, but we have a responsibility otherwise. One Member on the other side of the aisle in the interruption of another speaker said:

> Take the pay increase out of the proposed surplus.

That is one philosophy of government. But I say to you that we should not go overboard because we have a little surplus that might be applied on the national debt to keep the credit of this country good and to keep us strong here at home.

This bill will add $700 million a year additional to the cost of our Government. It really has been a strange development, with 20-percent bills introduced, and a 9-percent bill petitioned out under a gag rule with no opportunity to correct things in this bill that I think are glaringly wrong. We are foreclosed from that opportunity.

Referring to the Post Office Department, there is presently a deficit of about $600 million a year. This bill in the Department alone will add an estimated $225 million a year. The author of the bill was asked about the rate increase that has been pending before the committee for a long time and he was reluctant to say what his position on that would be. That is understandable. But the fact is that a proposal for rate increases has been pending before that committee, given to the committee by the President of the United States, for months and months and months, and I have not seen any activity in respect to it and I do not suppose there is going to be any. In other words, the committee has ignored that recommendation, so we will add $225 million to an already existing deficit of $600 million.

People talk about the cost of living situation. My understanding is that the cost of living has gone up about 2 percent since we voted the last pay raise. That is not 7.5 percent. Again I want to point out that through the years since certainly about 1953 the cost of living has gone up about 10 percent and the pay increases have averaged out to a total of about 20 percent, and that does not take into account the 18 percent for fringe benefits.

One other point: We appropriated $500,000, as I understand it, to appoint a commission and to enable that commission to make a study of this whole Federal employee situation and to report back to us. It does seem to me that more attention might have been given to the matter of waiting for a report from that commission.

I said when I started that I did not think this measure would become law. I do not need to tell you that it is not in accord with the President's program. As the gentleman from Tennessee pointed out, the administration witnesses before the committee take the position that the circumstances at the time did not justify a pay increase. So I say to you on my individual responsibility, because the President has never committed himself as to what he would do, I have no question in my mind as to what his action will be on this measure if and when it reaches the White House.

Mr. MORRISON. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from California [Mr. HOLIFIELD].

Mr. HOLIFIELD. Mr. Chairman, I want at this time to say I respect very highly the chairman of our committee, the gentleman from Tennessee [Mr. MURRAY]. We have served together in the House for 18 years. There have been many times we have not agreed upon issues, but I want to say in the handling of the committee the gentleman from Tennessee [Mr. MURRAY] has always, in my opinion, handled it according to the rules of the House and the rules of the committee. When presented with a parliamentary situation, he has had the honesty, the character, and the integrity to make his rulings in accordance with the House rules or the committee rules, and if they were questioned and appealed, he would abide with the decision of the majority of the committee. The committee was called together this morning at 11 o'clock. Our normal time of meeting is 10 o'clock. The 1 hour that

was given to us was, therefore, from 11 o'clock to 12 o'clock, at which time we had to rise under the rules of the House; the rules do not allow the Committee on Post Office and Civil Service to sit while the House is in session, therefore the majority of the committee found it necessary to avail themselves of the rules of the House in order to bring before the House for its consideration the legislation which you have before you. When they did avail themselves of the rules of the House, I must say the chairman responded to those rules and upheld them as he does in most instances, at least in all instances for which I have knowledge.

Mr. Chairman, we have heard some talk in the well of the House about the lobbyists in the hall outside the committee room. It has been my experience in the Congress that a lobbyist is a person who opposes something you are for, but if he is for something that you are for he becomes either a public relations man or a representative of a friendly group. So all of us have the right to label these men who appear in behalf of the different groups as either lobbyists or public relations men. But I want to point out something to you that I know you know, and that is there are over a million employees classified and postal employees, yes, close to 1,500,000 employees, and they are denied the right of collective bargaining. I am not arguing that point at this time. But they do not have the right to bring the force of collective bargaining to bear for increases in their wages. They must depend upon the Congress of the United States when they want a pay raise. They come to you and to you and to you for an adjustment of their wage scale commensurate with that of people in outside industries who have the right of collective bargaining. Therefore, this Committee on the Post Office and Civil Service has a peculiar obligation to see that these people are not left wanting, that they do have their day in court. Today is their day in court, before the Congress of the United States. There has been no move other than that permitted under the rules of the House to bring this subject before you for consideration. You have the responsibility to vote it up or vote it down. I have complete confidence that every Member of this House will act on his own responsibility when the roll is called.

Mr. Chairman, let us see about some of the merits of this case. President Eisenhower appointed committees to study this. He has appointed many committees. The Cordiner Committee was one that studied the rates of pay of these people in Federal employ. This was in 1957. Dust has gathered on that study. Then the O'Connell Committee was appointed. Here is what the O'Connell Committee said:

> Salaries fixed by statutes have not been adjusted in a timely and adequate manner in response to general changes in non-Federal salary levels.

There is the guts of the situation.

Federal employees' salaries have not been adjusted commensurate with salaries of non-Federal positions. What do I mean by that? Let us just look at the record.

The average gross monthly salary of a letter carrier is $370—that is gross salary. When you deduct the fringe benefits and tax deductions he gets $1.96 an hour—$1.96 an hour, or $89 a week; he gets $89 a week take home pay.

What is the average weekly earnings in industry? In the transportation business it is $118; in coal production and the petroleum industry, $116; in printing and publishing, $105; in machinery, $105; in chemicals, $100.84; in electrical machinery, $92.84; in stone, clay, and glass products, $91.30.

The average overall industry wage is $15 a week or $780 a year higher than that of Federal employees doing the same type of work.

We are before you on this day asking you to do something about this. You can quote figures about the increase in cost of living since the last time they had an increase in the cost of living, but Congress always lags behind in giving Federal employees their wage increases. When we grant this raise we still will not bring them up to the average wage outside of the Federal Government. We always lag behind, and regardless of whether the cost of living has gone up 2 percent or 3 percent since their last raise, they started with an inequitable wage balance to begin with. When we pass this bill today and if it should become law, it would still be behind pay for the same type of work, the same caliber of work in outside industry.

Mr. JONES of Missouri. Mr. Chairman, will the gentleman yield for an inquiry, please?

Mr. HOLIFIELD. In just a moment. The gentleman from Indiana [Mr. HALLECK] has said to this House that he has private information that this will not become law. We have reduced the 9 percent in the committee bill to 7½ percent. We have tried to compromise as far as we can possibly go in the discharge of our responsibility. If the President vetoes this bill it is his responsibility, and it is the responsibility of those who vote against overriding his veto when it comes back to this House. I want you to know that I for one am going to discharge my responsibility by voting for this measure; and when the bill comes back, if it does come back vetoed, I am going to accept my responsibility again and vote to override the President's veto. There are 1,500,000 families who need a few paltry dollars more to pay their debts, to buy food and medication and the necessities of life. The President can discharge his responsibility, and I will discharge mine.

Mr. JONES of Missouri. Mr. Chairman, will the gentleman yield for a question?

Mr. HOLIFIELD. Yes, I will yield.

Mr. JONES of Missouri. The gentleman knows about a study and report that was made on the salary of postal and classified employees, but can you tell us what report or what study was given to the legislative employees?

Mr. HOLIFIELD. The studies were given to the Federal employees outside of the Congress. The responsibility of the Congress is to make that study. If the gentleman wants such a study made I suggest that he introduce a bill and refer it to the Rules Committee. The House will be glad to consider the matter.

Mr. JONES of Missouri. I was just asking if a study had been made.

Mr. HOLIFIELD. Not that I know of.

Mr. JONES of Missouri. If a study has not been made how can the gentleman determine that a wage increase is needed or desirable for those people?

Mr. HOLIFIELD. Living has gone up. If the gentleman does not want to use the increase he can set the wages of his own employees. I may say I am not using all of my allowance for my salaried staff.

Mr. JONES of Missouri. Over half of the Members are not.

Mr. REES of Kansas. Mr. Chairman, I yield 7 minutes to the gentleman from Virginia [Mr. BROYHILL].

Mr. BROYHILL. Mr. Chairman, the proposed increase of the salaries of postal and classified employees which is before the House at this time is in my opinion one of the urgent items on our legislative program. It is urgent because any measure which is intended to help men and women to improve their means of livelihood is urgent. It is designed to satisfy human needs and nothing could be of greater material importance.

I am deeply interested in the objectives of the entire bill—H.R. 9883, as it has been amended—I would like to record my support for the benefits it will provide for both postal and classified employees. All are well deserved and I am of the firm belief the bill in its present form should be enacted.

The plight of the postal employees has been ably presented in the hearings and on the floor of this House. An impressive argument can also be advanced for raising the salaries of employees under the Classification Act who are covered by title II of this bill, and I would like to comment on several of the sound arguments which may be advanced in support of an increase of the salaries of classified employees.

The case to be made for this raise is sound. It is in every sense a debt which this Government owes to these employees. The discharge of that debt is overdue and there is no valid reason why it should be further delayed.

This pay raise can be substantiated in many ways. It is not necessary to rely on an emotional appeal or to fall back on fallacious reasoning which misrepresents the real conditions supporting the soundness of this legislation. There is ample factual material available to justify the 9-percent increase provided in this bill, as well as the 7½-percent proposed amendment. I shall in the course of my remarks summarize several of the more meaningful points which can be made in support of this pay raise. Among them are the following:

First. The rate of wage increases has been substantially greater during the last 10 years for employees of large corporations than it has been for Federal classified workers.

Second. The pay for comparable jobs in private industry in many metropolitan

centers is above that of classified employees. Bureau of Labor Statistics data on these areas of heavy concentration of Federal employment are already available. We need not wait for more.

Third. The 9 percent is well supported by the advance in prices and productivity since January 1958, and to a greater degree during the last 10 years.

Fourth. The Federal Government's policy toward its wage board employees is more equitable and realistic.

Fifth. Altogether too great emphasis has been placed on the cost of this pay raise.

Sixth. An annual salary adjustment plan will provide the most desirable solution to this classified salary problem.

Now let us examine these six points in some detail.

First. The rate at which hourly wage rates of employees of some of the largest corporations have been increased during the last decade has been substantially greater than the rate of salary increases for Federal classified employees. To understand the extent to which this has taken place, it must be kept in mind that since 1950 Federal classified salaries were raised 10 percent in 1951, 7½ percent in 1955, and 10 percent in 1958, or a total of 30 percent, if the percentages are compounded. Let me repeat that figure—classified salaries increased 30 percent since 1950. In the last 2 years of that decade, there has been no increase. Now let us see what industry has done.

The hourly rates of employees of General Motors Corp. advanced 62 percent from January 1950 to February 1960. Of this increase 9.5 percent was received since January 1, 1958. During the same 10-year period the United States Steel Corp. raised wages 63 percent and the Aluminum Co. of America, 87 percent. The increase of the Steel Corp. in the last 2 years was 7 percent and of the Aluminum Co. 10 percent—the 2-year period in which the Federal Government has given no increase.

To mention other instances—Firestone and Goodrich Rubber Cos. raised wages 56 percent in 10 years, including 6.8 percent since the beginning of 1958. The increase of the Lockheed Aircraft Corp. was nearly 63 percent of which 13.7 percent was in the 2-year period.

These percentages are reliable, for they have been calculated by the Bureau of Labor Statistics. Even though they apply to a segment of industry, they have significance because the companies to which they refer represent a total employment of well on to 2 million, the majority of whom were involved in these wage statistics. They were the result of collective bargaining with several of the large unions. These increases in industry include only general increases of pay rates, cost-of-living and similar wage adjustments. They do not include incentive earnings, premium overtime pay, shift differentials or changes in skill level.

Second. Analysis of wage and salary trends in the metropolitan centers plainly indicates that the salaries of Federal classified employees are lagging behind those for comparable jobs in private industry. This disparity in pay is shown by a comparison of the average earnings of three representative office-type positions surveyed by the Bureau of Labor Statistics with the average of the comparable grade in the Federal classification salary schedule. The positions compared were stenographer, key punch operator and tabulating machine operator.

In a number of widely scattered cities in which the current BLS survey program has been completed, the average earnings for these positions exceeded the comparable Federal average. This was true of Buffalo, Cleveland, Detroit, Indianapolis, Jersey City, Newark, Pittsburgh, San Francisco, Seattle, and Washington, D.C. New York and Chicago have not been completed.

Throughout the hearings in both the House and Senate, emphasis was placed on the need to wait for the completion of the current BLS occupational wage surveys. I do not believe that is necessary. There are ample data now available. The 30 metropolitan areas for which final wage data have already been published have a Federal employee population of approximately 750,000 or close to one-third of all Federal employees. Sufficient data are available from many of the remaining 30 metropolitan areas to be completed by September to provide all the significant information needed. The cities which have been added to those previously surveyed are smaller cities and are not representative for purposes of classified salary analysis. Classified employees are to a great extent office clerical and professional employees who are employed in the larger communities. It is unfair and unsound to base the study of their salaries on labor market areas that are not metropolitan in character.

Third. The proposal to raise classified salaries 9 percent is also well justified by the advance that has taken place in consumer prices and productivity since January 1, 1958. The Consumer Price Index of BLS has advanced 3.2 percent from January 1958 to April 1960. If we assume that the postwar average increase in productivity of 3.1 percent a year from 1947 to 1958 has continued, we have the additional factor of a 6.2 percent productivity increase in the private sector of the economy. Thus our basis for urging the proposed salary increase consists of 3.2 percent for the price rise and 6.2 percent for productivity, or a total claim actually in excess of 9 percent.

If we take into account the fact that prices and productivity advanced more than Federal classified salaries from 1950 to 1958, there is even greater justification for a pay raise. During that period there was a combined increase in prices and productivity of 46 percent, but salaries were raised only 30 percent. There was, so to speak, a deficit of 16 percent. If that deficit is added to the increase of more than 9 percent of prices and productivity since 1958, we have an even greater basis for advocating a salary increase, but our 9-percent figure for the most recent 2-year period is sufficient for present practical purposes.

Fourth. There is another phase of the classified salary problem which deserves attention. It is the inconsistent policy of the Federal Government toward these employees as compared with its attitude toward those who are subject to wage boards. During the last 10 years classified salaries have been adjusted only three times. During that same period there have been annual wage adjustments for the nearly half million blue-collar workers in the Defense Department. Comparing the median hourly rate of a grade W–7 wage board employee with a GS–4 classified salary, the wage board rate increased 62 percent and the comparable classified rate 30 percent during that 10-year period.

On the basis of the same grade W–7 rate, the record shows that it was increased 6 percent in 1957, 5 percent in 1958, and 6 percent in 1959. What happened in these 3 years alone shows the very great inconsistency in the Government's policy. It also indicates that an important reason for wage board employees receiving added increases is that their rates are reviewed annually. And they should be. But why deprive classified employees of the same consideration?

Fifth. And this brings us to the next point of the need for more frequent review of classified salaries. Some method should be devised for making, if possible, an annual review of classified salaries. I believe such a system could be worked out successfully, and certainly it is needed to assure classified workers of the equitable treatment they deserve.

More frequent examination of these salaries would prevent the delay between classified increases—4 years in the case of 1955 pay raise. These delays are unfair to the employee because his rate of pay continues to lose purchasing power. A regular annual review would be administratively desirable for the Government. It would permit annual budgeting of the cost of whatever increase seemed desirable since the preceding year, and if done annually it would probably result in a smaller percentage increase falling within any single year while the employee would receive as much or more money over a given period. And, of course, the important fact is that he would receive it when he needed it—not 3 or 4 years later.

Sixth. There has been altogether too much emphasis on the cost of a classified salary increase. By that I mean that the principal consideration should be whether it is needed. If that can be demonstrated, it should be treated as having at least as much urgency as any other budgetary proposal. The important difference, of course, is that a pay raise has the purpose of helping people, and of greater importance, of helping our own Government employees.

To think first in terms of cost is the wrong approach. We should realize that a 9 percent pay raise will cost a good deal more today than it would have 10 years ago, and it will cost still more 10 years hence, if the price level continues to increase at the same rate. We should be prepared for these exigencies that are the result of economic change.

We should consider this proposal to raise classified salaries first for its benefit to the men and women who are serv-

ing the Government. But that is by no means the sole reason. We should consider it from the standpoint of national dignity and of administrative efficiency for it is upon the capabilities and the loyalty of our Government employees that much of the successful operation of this Government must depend. We cannot in good faith continue to ask the men and women of the career civil service to continue to perform the duties which each year become more exacting and more complex and at the same time refuse to accord them the simple justice of rates of pay which they have earned by any reasonable standard.

Mr. Chairman, in conclusion and in the way of a summary I would like to make three additional observations concerning this legislation.

First of all, as well pointed out by the gentleman from Louisiana [Mr. MORRISON], the legislation before us and the committee substitute which is pending is the result of a compromise. There is nothing unusual about that. Very often when we are considering major legislation which is somewhat controversial there always has to be a little give and take. I want to assure the membership of the House that the willingness on the part of us to compromise is not because we did not feel a higher increase was justified, because we know we can justify a higher increase; it was not because we did not desire to grant a higher increase to Federal employees, but it was in recognition of certain political facts of life. We realized we could get a great deal more support from Members for a 7.5-percent increase than we could for a higher amount. We have been reasonably assured that any legislation of this sort will be vetoed. We will certainly need support of the overwhelming majority of the Members of the House in order to act on a veto when this bill comes back.

My second point is this, and I make it as a statement of fact, and while it is repetitious I use it for emphasis. The Federal Government has not kept up with private industry insofar as the salaries of its employees are concerned. It has not nearly kept up. You can toy with statistics all you want to, but the record of the hearings on this legislation was full of proof in substantiation of my statement.

The Bureau of Labor Statistics presented evidence before the committee showing what the consumer price index was. It is up 113 percent since 1939. The figures of the Bureau of Labor Statistics show that all grades from grade 5 up of Federal employees have not received increases consistent with the increases in the cost of living since 1939. Approximately 60 percent of our classified Federal employees have not received salary increases since 1939 in keeping with the increased cost of living.

Employees of other industries have fared much better than employees of the Federal Government. Since 1950 we have granted increases to Federal employees in an amount of approximately 30 percent. It may be interesting to observe that the employees of major industries of this country have received over twice as much in the way of increases since 1950. General Electric has increased its employees 62 percent since 1950, United States Steel 66 percent, Aluminum Co. of America 87 percent, Firestone and Goodrich Rubber Companies have increased their employees 56 percent, Lockheed Aircraft has increased its employees 63 percent. These major industries employ approximately 2 million people. This shows that the increases have been consistent with the general increases that industries have paid their employees since 1950.

Since 1958 these same industries have increased their employees on an average of 10 percent.

Mr. Chairman, I had a very interesting personal observation to make in the committee when one of the witnesses pointed out or referred to the increase that the grocery clerks here in the Washington area received as a result of collective bargaining back last January or February. He pointed out that they received a settlement that amounted to $97 per week. Back in 1937 I worked for the Safeway Grocery Co. for a short time. It was then the Sanitary Grocery or the Piggly-Wiggly Grocery Co. They paid their employees $23 a week. Since 1937 the Safeway Grocery Co. has increased its employees to $97, amounting to a 320 percent increase. The postal employees in 1937, during that period, received an average of $2,038 a year. The postal employees today—I speak primarily of the letter carriers—are receiving an average of $4,640; in other words, an increase of 123 percent. I do not believe any Member of this body would like to recognize the Safeway Grocery Co. as having better employees or thinking more of the welfare of their employees than the Federal Government—certainly not that many times greater.

Now, the executive branch has recognized that there are inequities existing in our Federal employees pay scale. The minority leader has pointed out they have recommended a study be made. I think that we are all in accord with that. But the study comes too late. They have known that these inequities have existed for years, and they should have taken the initiative several years ago to propose a study and to propose a plan on which the Congress could act to correct these inequities. This is but a partial solution of the problem. After the study is completed we can come back and further improve the situation next year.

My third point is with reference to this estimated cost of $680 million. I would hate to think that all of us who support this legislation are not as equally concerned about the fiscal condition of this country as those who oppose it. I submit that this instrument we have before us today, this legislation itself, is not in itself what is causing the additional cost of $680 million. The reason why it is going to cost $680 million more is because the Federal Government has assumed certain responsibilities and certain obligations as a Federal Government and is rendering certain services to the people of this Nation. Since we have assumed these responsibilities and obligations, it requires the employment of approximately 2.3 million people. We cannot economize by merely refusing to pay these people a proper salary and a competitive wage. Anybody that has any experience with business, anybody that has had any experience with employee-employer relationships knows that you cannot economize in your business by the blood and sweat of your employees. To those who are stressing fiscal responsibility today I say if you want to economize, then we can reduce some of these Federal services or eliminate some of these Federal responsibilities that we have assumed. We can eliminate some of the Federal agencies. Certainly we can employ better manpower utilization. Incidentally, the subcommittee of the Committee on Post Office and Civil Service has been holding continuous hearings on manpower utilization to try and improve and get more effective use of our personnel. This argument that this pay increase is too costly has been used in every proposal during the past 10 years, and yet I do not believe any of the previous opponents will say today that we should not have granted those previous increases, because even after granting those previous increases, we are still very far behind. I predict that in the future, after we have granted this pay increase, the opponents here today will then recognize and might even acknowledge that this increase was necessary. We cannot overlook the increase in efficiency and morale and the improvement in our competitive position with other industries by acting favorably on this legislation today. This is a reasonable, a fair bill. As I stated before, it is the result of a compromise, a good compromise. I hope it will receive the overwhelming support and approval of the membership in order to insure that when the bill comes back up here, if it is vetoed, we will have the necessary votes to override the veto.

Mr. BALDWIN. Mr. Chairman, I rise in support of H.R. 9883. This pay increase for Federal classified and postal employees is very much needed. The Federal Wage Board or blue-collar employees in the San Francisco area of California have received increases totaling 11 percent in the last 18 months. These increases were 5.1 percent in December 1958, and 5.9 percent in December 1959. However, the Federal classified and postal employees have received no increases during the same period. As a result, numerous classified employees in the San Francisco area are receiving lower salaries than wage-board employees who are working under their supervision. This is highly undesirable from a morale or administrative standpoint. H.R. 9883 will aid in correcting this situation. I think this bill is worthwhile and very much needed. I urge its approval by the House.

Mr. REES of Kansas. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan [Mr. JOHANSEN].

Mr. JOHANSEN. Along with a few minority members of the Committee on Post Office and Civil Service, and including the distinguished chairman and the ranking minority member, I have been fighting a steamroller today and for a

number of days past. I have no complaint about that. I have no quarrel with it, although I think some of the tactics of the steamroller reflect on the legislative processes of this country and of this Congress. I hope the American people will know as a result of this debate a little bit more about the system by which we juggle a $90 million percentage point of increase and kick it around when at the very same time there is a major scandal in the press, an effort to create the impression of a scandal, because of a $90 expense account. But I have no complaint about the fact I am in a minority.

Mr. Chairman, I rise in opposition to H.R. 9883, and before I go further let me say that I have voted for the two pay raises for postal employees that became law since I have been in Congress. I voted for one of the two classified pay raises that became law. And I hope, if I am here for some years to come, to vote for some more. But I am opposed to H.R. 9883.

I realize that I need to be a little bit more explicit, because there have been a number of 9883's kicking around this House and in the committee.

I oppose the newborn, minutes-old form, this so-called 7½-percent bill, as it comes to us this afternoon direct from the committee delivery room after a very violent Caesarean operation, and with it still red-faced and squalling, wrapped in swaddling clothes. I oppose this newest legislative offspring just as I opposed the original, H.R. 9883, which was greatly ballyhooed prenatally, and which was subsequently disowned and orphaned by its own parent or parents; they claim some 80 fathers to the bill. And I oppose this newest H.R. 9883 exactly as I opposed the offspring that came to this House under this discharge petition, which had a very short life, which was abandoned in the desert of committee reconsideration and left to gasp out its last breath all alone.

So let the record be clear that I am opposed to this bill. Now I am done with the obstetrical metaphors and I want to say some things in very blunt language. In doing so I address myself, Mr. Chairman, not so much to my colleagues here where the die is cast, but I address myself to the people of this country, to the taxpayers and to the Federal employees themselves, the two innocent bystanders in this tragedy-farce.

First of all this entire legislative undertaking has been an attempt to find out how much the traffic would bear and just how many political friends and votes could be picked up in the process of finding out how much the traffic would bear.

This is an attempt at successive, well directed, well engineered—and not all of the engineering and direction has come from within the Congress—a well directed and engineered attempt to retreat by successive steps to an ultimate victory of some sort.

I have great respect and regard for my friend from Louisiana and I do not criticize in the slightest his right to do what he did, but according to a report appearing in the publication of the National Association of Letter Carriers during a big super pay rally that was held here in Washington the first week of April, the gentleman is described as having said that he would fight to the limit to secure the passage of this bill, that is, the 12-percent and 23-percent bill. But even before the committee had completed its hearings the gentleman was asked by the chairman of the committee:

> You do not seriously insist on the 23 percent?

And his answer was:

> No, sir.

There was never a motion made by this gentleman in his own behalf or in behalf of these other gallant sponsors of this bill; there was never a motion made in committee to vote out this bill or even give it consideration in the executive session.

Mr. PILLION. Mr. Chairman, will the gentleman yield?

Mr. JOHANSEN. I yield to the gentleman from New York.

Mr. PILLION. Did the committee consider restricting the increase to salaries of $7,000 or less?

Mr. JOHANSEN. No, the committee did not, principally because the committee under the legislative principle that has been followed has not had a chance to consider very much of anything.

Mr. PILLION. Does the gentleman believe that salaries of $15,000, $16,000, or more should have this increase?

Mr. JOHANSEN. The persons up to the highest level in the classified service get the straight 7½ percent.

I will say in further response to the gentleman, and this goes to my second point, this is an election year, something for everybody on the Federal payroll bill. I will say to the gentleman that even the efforts of the minority in the committee to get separate consideration on the floor of this House in separate bills as between the postal employees and the classified received the same steamroller treatment as was given the entire effort on the part of the minority opposition to the bill.

Mr. PILLION. I thank the gentleman very much.

Mr. JOHANSEN. I want to go further and say this, the President of the United States immediately after the last 10-percent pay increase, at a time when the pay issue was not before the Congress, at a time when no one in good faith could accuse him of stalling tactics, recommended a Hoover Commission type of study to go into this whole program of Federal pay policy and pay procedure. That recommendation was repeated twice thereafter by the President of the United States.

I want to report to this House that on this very morning, as a member of the committee, the recommendation of the President of the United States was offered by the gentleman from Michigan as an amendment, and I will say to the committee that the recommendation of the President of the United States received considerably less courteous consideration than have the recommendations of some of the presidents of some of the organizations who represent the employees, and, of course, have a perfect right to do so.

I want to point out a third fact about this whole situation. This legislation involves the one kind of book burning which the liberals are in favor of and practice with great enthusiasm. I do not know whether the gentleman from Illinois [Mr. O'HARA] is on the floor or not, but I call your attention to the fact that on the 3d of June when we saw the spectacle of this House being enlisted in cooperation with the effort to secure the 219 signatures, the gentleman from Illinois [Mr. O'HARA] said, and I quote him accurately, I think, that:

> When it comes to human need I would never find the answer in a book of arithmetic.

I respect the gentleman's right to that view.

Mr. O'HARA of Illinois. Mr. Chairman, will the gentleman yield to me?

Mr. JOHANSEN. Of course I will.

Mr. O'HARA of Illinois. I thank the gentleman for his courtesy. He quoted me correctly. Does the gentleman disagree? Does the gentleman contend that human needs should be left to the mathematical calculation of cold hearts?

Mr. JOHANSEN. I would be very glad to answer the gentleman.

Mr. O'HARA of Illinois. I wish the gentleman would.

Mr. JOHANSEN. I would be very glad to if the gentleman would permit me, but let me complete what I was saying and I think that will answer the gentleman. Let me say this, that I know of no sure way in which we can assure that this country, the people of this country, and the employees of this Government will know a more crucial and desperate need, I know of no sure guarantee that that will happen than if we continue persistently in this country to ignore and fail to find the answers in a book of arithmetic.

Mr. O'HARA of Illinois. Mr. Chairman, will the gentleman yield further?

Mr. JOHANSEN. I cannot yield further.

Mr. O'HARA of Illinois. The gentleman has mentioned my name. Is he afraid?

The CHAIRMAN. The gentleman declines to yield.

Mr. JOHANSEN. Is the gentleman implying that I am afraid?

Mr. O'HARA of Illinois. The gentleman from Illinois would never question the courage of his good friend, the gentleman from Michigan. But, on general principle, I take it that any man who does not want to yield after mentioning my name is afraid to face the issue. I, of course, would respect both the sincerity of his conviction and his caution in retreat.

Mr. JOHANSEN. I will be very glad to yield if the gentleman will make it very clear that he does not think the gentleman from Michigan is afraid.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. REES of Kansas. Mr. Chairman, I yield 2 minutes to the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Chairman, I particularly thank the ranking minority

Member on our side for granting me this time, because I am sure he knows that most reluctantly, most regretfully, but in my case most necessarily, I am going to take a position opposite to his, on this legislation. I am going to vote for this bill. And because it is so exceptional a rarity for me not to support fully the position of the administration on fiscal matters, and because I think my position parallels that of many in this House who share my constant concern for sound fiscal policy, I would like in 2 brief minutes to tell you why I am so voting. I am voting for this bill, Mr. Chairman, because this is the only avenue given to me after all the 17½ months of this Congress wherein I can keep not a spoken pledge but certainly an assurance that I gave to those Government workers in my own district whom I know to be deprived of what they need to live decently, particularly the many in the lower grades, without taking extra jobs and without having their wives also working outside the home to obtain a necessary supplementary income. I have made a personal study of the family budgets and salaries of the classified workers and the postal workers in the 13th District over the period of the last 4 years. I speak from definite knowledge of the inadequacies of the salaries and the subsequent unsalutary effect upon both the service itself and upon the morale and actual physical well-being of those who are attempting to raise families on inadequate salaries—or are forced to supplement those salaries to the extent of having a second position of their own and/or additional work outside the home on the part of the wife and mother. The difficulty of obtaining and of retaining trained workers has become increasingly difficult as competition continues to increase through the rapid development of new industries which offer a salary range that cannot fail to attract men of good intent whose first responsibility remains for the welfare of their families

Aside from the deleterious effect on the service through frequent turnover and disrupted and insufficient service, however, I deplore the additional effect upon the worker himself who must attempt to support his family on a wage which, in our area and similar areas where the cost of living is high, simply cannot meet even the simplest needs of family living.

The area which it is my privilege to represent has an exceptionally high cost of living index. In fact, an analysis of the price index of the entire Chicago area, according to the Consumer Price Index for all items as of January 1960 shows the great extent to which the Chicago area is above the national level.

The annual budgets that have been submitted to me in 1960 by postal workers in the 13th District bear mute but effective testimony to the effect of this high consumer price index on Government workers on low-fixed salaries. Of the budgets so submitted, only 7.5 percent showed any surplus after deducting the cost of basic necessities. Of this 7.5 percent, half of these represented single men and none within this category had more than two dependents.

Investigation further showed that almost 75 percent of the postal workers whose returns were analyzed were forced to seek additional income in order to meet basic living costs.

Some budgets presented to me showed, despite extreme care and an effort at thrift, a deficit of over $1,000 per year in meeting just the ordinary expenses of living. In certain post offices there is evidence that certain workers hold, in fact, three part-time jobs in addition to their basic postal work. Past raises in pay have been more than absorbed by the rising cost of living.

Mr. Chairman, were there time, I could quote from letter after letter from Government employees whom I know and trust. These letters attest the inadequacy of present pay, and deplore the effect of that inadequate pay upon both the branch of Government which they serve and pointedly upon their families.

In the face, therefore, of reports which I personally have investigated and know to be true and not exaggerated, I could not possibly deny an increase at this time.

In other words, Mr. Chairman, without taking time to go into the sociologically bad effect on both the community as well as the family involved when a government worker is forced to live on insufficient pay, I would repeat that the present measure offers to me and others in similar circumstances the only avenue through which I can help the Government workers involved to obtain the increase in income which I know they need.

It, therefore, today, cannot be with me just a question of whether this bill is completely right or the plan just as I myself would have sought to make it. It is not just a question of how much I may dislike the "gag rule" for which some of my colleagues condemn the measure. I only know that I cannot possibly refuse to bring to those in my own area, particularly to those in the lower grades, what I think the Government of the United States owes its workers—a living wage.

Mr. Chairman, I yield back the balance of my time.

Mr. MORRISON. Mr. Chairman, I yield 3 minutes to the gentleman from West Virginia [Mr. HECHLER].

Mr. HECHLER. Mr. Chairman, not long ago I received a letter from a postal worker which moved me very deeply.

For some time I have been very interested in the first Allied crossing of the Rhine during World War II at Remagen Bridge—which will go down as one of the greatest exploits in American military history. I have followed the record of the heroes of the Remagen Bridge carefully since 1945. I know all of these men like brothers. I have visited with them and eaten at their homes. They correspond with me regularly.

This letter comes from a mail handler in the New York City post office named Anthony L. Samele. Tony Samele is a big, optimistic fellow who married his childhood sweetheart. When Remagen Bridge loomed, he was a squad leader in the point infantry company. Not only did he lead his squad in the precarious crossing of the bridge, but he helped clean a German machinegun nest out of one of the big towers on the bridge. He was the third man in the American Army to hit the east side of the Rhine on that dramatic day of March 7, 1945. He writes to me:

Everything has not been going too well for me since my Army days. I'll explain, as briefly as possible, to tell you what my life has been like since leaving the Army.

I'm married to a swell girl and have two children. I've been a regular mail handler in the Post Office Department for the past 8 years. My salary is $4,450. After taking out pension money and taxes, there is hardly much left. I live in three small rooms, with poor heat and ventilation. As my family increased, demands became more and more, and I was forced to borrow, since my earnings were insufficient to cover expenses.

My wife worries about the health of the children and not being a well person to start with she became very sick mentally and physically.

My wife had lost the sight of her right eye at the age of 5 as the result of a bad fall. This week, she was rushed to the Bronx Eye and Ear Hospital for an emergency operation on her other (left) eye. I had taken her to see two eye specialists, and both of them agreed that an operation was the only thing to do or she would be completely blind. It's been 4 days now and we still do not know the outcome. The doctor will not commit himself. As I'm writing this letter to you, I'm hoping and praying that everything will be OK with me.

The doctor wants his money, the hospital wants their money, and me with no hospitalization plan of any kind or money to pay them.

KEN, I have never asked anyone for a favor big or small. I'm no hero. I tried my best for my country when I was in the service. I've tried my best to support and maintain a family. I've never approached anyone for a handout, I don't know how. If it's within your power to help me, I would appreciate it very much and be grateful to you for the rest of my life.

Now, here is one of World War II's outstanding heroes—one of the eight enlisted men to receive a Distinguished Service Cross for his courage. Yes; I will help him, and help thousands of other loyal and hard-working postal employees and I hope the membership will join in supporting H.R. 9883 to give these people a well-deserved raise in their wages. And if the President sees fit to veto this bill, I shall vote to override the veto.

Mr. REES of Kansas. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. CORBETT].

Mr. CORBETT. Mr. Chairman, I asked for this time to discuss issues which are not going to arise. Personally, I should feel some sense of exaltation today because I told you very early in this debate on the salary issue that a 7½-percent increase was approximately correct, and I do congratulate all of those who have extended this necessary and desirable increase for having arrived at a figure which seems to me to be most realistic and which seems to me to be passable.

I think all of us recognize that when these bills do come to the floor including large numbers of people that there can be inequalities, there can be groups covered that should not be covered; there are groups which perhaps did not receive

all they should get; but we should remember that the Congress of the United States is a continuing body and that grievances can be adjusted at all times, corrections can be made when those in charge of a legislative program desire them to be made.

So, Mr. Chairman, I am simply rising here today to state that I am definitely in favor of this bill; that I think over all it is a good bill, that it can become law, and that it can result in necessary increases for all but a few of our employees.

I recognize, as some of you do, that the bill in all its aspects is not exactly as I would like to have it; but under all the circumstances which have prevailed I believe this is a bill which we can support in sincerity and honesty. Where individuals have objections they can go to work to make those objections felt in the year ahead.

Therefore, Mr. Chairman, I again urge that all of those who have any regard for the majority judgment of this committee which did work long and hard on this bill and which found itself confronted with nothing really new this morning, we all recognized that what has been in the papers, what has been discussed time after time was nothing new, and I do not think those arguments are very valid. No one should have been surprised by what was voted on.

So I am going to support this bill and urge my colleagues to do the same.

Mr. Chairman, I yield back the balance of my time.

Mr. REES of Kansas. Mr. Chairman, I yield 1 minute to the gentleman from California [Mr. YOUNGER].

Mr. YOUNGER. Mr. Chairman, I want to make just one remark. This situation proves how ludicrous it is for the Congress to attempt to set salaries. Here in one week the committee reports a 9-percent salary increase, and then in a couple of weeks they report an amendment to 7.5 percent, with no basis in fact whatsoever. Until this Congress gets to a point of putting salaries under the control of a board and making them on a regional basis you will never have justice for the employees in high-cost areas, one of which I represent.

I am certainly sorry to see this spectacle on the part of the House making in one week a 9-percent recommendation and within the next week a 7.5-percent recommendation. It proves just how wrong we are in trying to set salaries on this kind of a basis.

Mr. REES of Kansas. Mr. Chairman, I yield 5 minutes to the gentlewoman from New York [Mrs. ST. GEORGE].

Mrs. ST. GEORGE. Mr. Chairman, this bill comes before us in a very strange manner. I am very happy that I have been able to be here during the debate. In the committee this morning I heard absolutely nothing about the present bill, H.R. 9883, as amended, in the way of explanation. The gentleman who offered the amendment did not take time to explain it; he did not seem to consider that was at all necessary, although it is my recollection he was enthusiastically in favor of a 9-percent pay raise bill which was taken from the Speaker's desk by way of discharge petition. I voted for that 9 percent. Of course, I would like to know some good reason besides political reasons, which I think I know, why we should suddenly be brought face to face with a 7.5-percent increase.

Mr. Chairman, even the 9 percent was considered highly inadequate by all proponents of this legislation. We started out with 23 percent, then we went slowly and gradually down until finally with tears and groans and ice water in our veins we decided on 9 percent as the very lowest that could be offered. Here we appear with 7.5 percent. How do we explain such a situation? I think there are two ways of explaining it.

First of all, what the gentleman from California has just said is eminently correct. We have shown ourselves as a committee and as a body—that is, the Congress of the United States—to be completely unfit to set wages.

During a colloquy I had with one of the employee representatives I said to him what I would like to say to many of the proponents of the present bill, not the original 9 percent—that this is the finest argument I have ever heard in my life for private enterprise.

We have been told how wonderfully the great corporations treat their employees as compared with the U.S. Government, and I agree with that 100 percent. So I said to this gentleman:

> How would you feel about doing what the late John Wanamaker suggested many years ago? He said, "I will be very happy to take over the postal service of the United States. I will run it efficiently, I will have no trouble with my employees, and I will make money out of it."

Mr. Chairman, that is the situation, and I think it is a situation that we had better consider very seriously.

We get ourselves into this hassle, Mr. Chairman, to my certain knowledge, at least every 2 years and usually once a year. It is never a satisfactory solution. Everything we do is always too little and too late, and this is going to be much too little and much too late.

Some time ago I offered an amendment to this bill in the nature of an escalator clause, such as has been used very successfully in private industry. That would not be considered because, of course, we know perfectly well that the leaders of the employee groups do not want anything that would automatically take care of their people, so that they would be perfectly well off and would not have to come in year after year with this kind of a compromise bill which, apparently, we all agree is quite inadequate and insufficient.

Now, Mr. Chairman, I believe in the committee system and I believe in our system of government. And, I must say here and now that if we are to be governed by discharge petitions, I would suggest that we go right ahead on that basis; that we send the Congress of the United States back to other occupations for which they would probably be better fitted and that we leave this matter entirely in the hands of pressure groups and the Executive. But, this is certainly not what we, when we took our oath of office, believed we were doing. This is certainly not what I, when I first came to this Congress, expected to be called upon to do. I expected to work in committee, to understand what was being brought out of committee, not to have things shouted through the committee; not to have them brought out on the floor unexplained. Why, this bill was never on our desk in the committee until 11 o'clock this morning. I understand that some members of the committee did have copies last night. I understand that one member of the committee did not even have a copy this morning. This is no way to legislate.

The CHAIRMAN. The time of the gentlewoman from New York has expired.

Mr. GROSS. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I had hoped to be able to support a pay raise bill on behalf of postal workers who do not have the flexibility in their pay structure that is provided classified employees. I had hoped to be able to support a reasonable increase for postal fieldworkers, particularly in the lower brackets, but I am not going to be given that opportunity. I offered a motion in committee when the 9-percent bill was considered to separate postal field workers from title II of the bill, which brought in all other employees. My motion was defeated. I cannot support a 7½-percent increase across the board for all employees of the Federal Government.

The gentleman from Louisiana [Mr. MORRISON] and the gentleman from Virginia [Mr. BROYHILL] say that this is fair and reasonable legislation. Well, if it is, what label did they put upon their 23-percent bill and then their 9-percent bill? If this is fair and reasonable, what label did you put on those bills? Now, I would like to ask the gentleman from Louisiana [Mr. MORRISON], the leader of this movement, when hearings were held before our committee on the foreign service pay section of this bill?

Mr. MORRISON. Is the gentleman yielding to me?

Mr. GROSS. Yes. I am trying to get an answer to my question.

Mr. MORRISON. Well, it so happens that the chairman of the committee was conducting the hearings, and he conducted all the hearings, so I think the question should be addressed to him.

Mr. GROSS. If the gentleman attended the hearings on his own bill he must have known whether any witnesses appeared to justify an increase in pay for all foreign service employees.

Does the gentleman know or does he not know?

Mr. MORRISON. I was not there every minute of the time. It is possible that testimony could have been had when I was not there. All I did was introduce the bill which was considered by the committee. The chairman of the committee had control of the time, as to when witnesses would be heard who were for the bill and when witnesses would be heard who were against the bill. I am sure the gentleman has the same access to that information as I have.

Mr. GROSS. The gentleman can say whether they were there without going into a speech.

Mr. MORRISON. I am sure the gentleman knows as much as I do about who testified and who did not testify.

Mr. GROSS. The gentleman knows, if he attended the committee hearings, that not a single witness appeared on behalf of the State Department in behalf of a pay raise for all Foreign Service employees.

I would like to ask the staff member for the committee who is sitting next to the gentleman from Louisiana to answer the question, but I am sure that would be a violation of the rules of the House.

Does the gentleman know when hearings were held on the 25 supergrades that were put into this overnight bill? When were hearings held to justify the 25 supergrades that the gentleman has in the amendment he offered this morning?

Mr. MORRISON. That does not create 25 supergrades. It merely reallocates existing supergrade positions. The cost of title II not over $40,000 a year. And I might add that this is one thing in this bill that President Eisenhower wants, because that is what he requested. I am very hopeful that by giving him what he wants——

Mr. GROSS. Mr. Chairman, I refuse to yield further. I did not yield to the gentleman for a speech in behalf of the President of the United States. I doubt very much that the President approves this bill. But I cannot recall a single witness appearing before our committee in behalf of 25 more supergrades, nor do I remember a single witness appearing before our committee this year in behalf of a new $19,000 poo-bah in the Department of Health, Education, and Welfare. If any member of the committee knows when any witnesses appeared before the committee to justify these high priced employees, I wish they would tell me. I do not know who dreamed this up. I assume it was dreamed up along with some more of the stuff that was dreamed up last night and rammed through the committee this morning.

Mr. JOHANSEN. Mr. Chairman, will the gentleman yield for a question?

Mr. GROSS. I certainly do.

Mr. JOHANSEN. Is it not obvious that the reason why there were no hearings on these items is because these items were never in the bill until the amendment was put before us today?

Mr. GROSS. And yet they put a batch of supergrades in this bill and gave them nice, fat increases; supergrades calling for up to $18,500 a year. Under the terms of this bill they will get somewhere around a $1,000-a-year increase, some of them more.

But what is the increase for the 349,939 postal field service employees in level 4? Can the gentleman from Louisiana tell me how much he proposes to increase the top step in that level, while he is proposing to increase these supergrades and others by $1,000 to $1,200 a year? By how much is he going to increase these postal workers?

Mr. MORRISON. The gentleman has asked me a question which may be rather confusing. I wish to say that there are no more supergrades created. There are just 25 supergrades reallocated. Several other jobs are increased, at a cost of less than $40,000 a year and which the administration asked for. As far as the increases in the class to which the gentleman is referring, if he will get out his paper and pencil, he can get the answer by taking their present salary and increasing it by 7½ percent.

Mr. GROSS. The gentleman is the author of this bill and he ought to be able to tell me what the increase is in the top bracket of the supergrades, as well as the highest increase to be given in level 4 where there are almost 350,000 postal employees.

Mr. MORRISON. The answer is very simple, 7½ percent.

Mr. GROSS. You bet your life, 7½ percent. You give several hundred superdooper employees an increase of $1,000 a year or more while a level 4 postal worker gets around $300 a year or less; is not that correct?

I might add that it appears the amendment will increase the pay of secretaries to Senators to $17,500 a year or an increase of about $1,000 a year. Can it be that these employees and others are suffering far worse than other workers trying to support families on $5,000 and $6,000 per year?

Mr. MEADER. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Michigan.

Mr. MEADER. Can the gentleman tell the House how much this committee amendment is going to cost the Government annually?

Mr. GROSS. I saw it for the first time when I arrived on the House floor this afternoon.

Mr. MEADER. Has any estimate been made about that?

Mr. MORRISON. If the gentleman will yield, I can answer that. It is slightly under $700 million, or between $680 million and $700 million. It is $150 million less than the 9 percent bill which was the basis of the discharge petition.

Mr. MEADER. Will the gentleman give me the source of that $680 million figure?

Mr. MORRISON. The committee counsel.

Mr. MEADER. It was not made by the Budget Bureau, as was the estimate on the original bill? Is that correct?

Mr. MORRISON. No.

Mr. GROSS. The bill we are actually considering at this time is a 9 percent bill. What we are talking about in dealing with the 7.5 percent increase is the amendment railroaded through the committee that may or may not be adopted. I assume it will be. But what we are actually dealing with at this moment is a 9 percent increase, not 7.5 percent. That is the bill that the discharge petition went to, and then they walked off and left it as they did with the 23 percent increase on which all the hearings were held.

My objection to this bill is that it goes across the board. It gives to those who least need the increase the greatest increase, compounding the inequities that already exist, and with no opportunity or disposition to correct these inequities. That is why this bill is so wrong and why I cannot support it.

Mr. DULSKI. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DULSKI. Mr. Chairman, I rise in support of the bill, H.R. 9883, as amended by the Committee on Post Office and Civil Service.

As a member of the committee, I had an opportunity to hear and to review all of the testimony offered during the extensive hearings on this legislation, and as a result of those hearings can only conclude that the increase provided in the bill before us is completely justified.

It should be obvious to anyone that postal and Federal employee wages have not kept pace with wages paid in private industry in the past 20 years. Despite this condition, those who oppose this legislation ask that we wait another year to take any action so that a study now in process may be completed. In view of the studies that have been made in recent years, particularly the study by the administration-sponsored O'Connell Committee, whose report, to my knowledge, has never been published, I am forced to conclude that this problem has already been studied to death. In the report of the O'Connell Committee, it is readily admitted that "Salaries fixed by statutes have not been adjusted in a timely and adequate manner in response to general changes in non-Federal salary levels." In the face of that conclusion—a conclusion upon which the administration took no action—I have no reason to believe that the study now being conducted would have any result.

Further, I think we should recognize that the current study, which has been rather widely described as a study by the Bureau of Labor Statistics, is not what it seems. In the first place, the Bureau of Labor Statistics is simply making a survey of white collar wages. For a number of years the Bureau has been making a study of white collar wages in some 20 areas, and is extending that survey to an additional 60 metropolitan areas. Once the figures are gathered, the Post Office Department and the Civil Service Commission, and not the Bureau of Labor Statistics, are going to make comparisons of the wages paid to postal and other employees in thousands of different positions.

Personally, I have no hope that either the Post Office Department or the Civil Service Commission will arrive at any conclusions as a result of the survey greatly different from those expressed to our committee. Since the survey is limited to about 29 white collar positions, 23 of which are commonly filled by women or girls in private industry, it is hardly likely that it will provide information upon which anyone could logically or fairly determine a comparable wage for post office clerks and letter carriers.

The Bureau of Labor Statistics already has all the figures anyone would need to determine what a fair wage

should be, and witnesses appearing before our committee demonstrated by means of these figures that since July 1951, average industrial wages have been increased approximately 70 cents per hour or 45 percent, while postal employee salaries have increased only 38½ cents per hour or 19 percent. To me this is sufficient evidence that there is an immediate need for postal and Federal employee salary increases. For that reason, as a member of the committee, I supported the majority opinion which is now before us.

My position is perhaps best summed up by a statement made by one of the witnesses appearing before our committee, Mr. E. C. Hallbeck, of the National Federation of Post Office Clerks, who presented facts which clearly demonstrated that—

First. Postal wage increases have lagged more than 25 percent behind wage increases granted in private industry since 1951.

Second. The productivity of post office clerks has continued to increase which in itself warrants salary increases.

Third. The administration by its part in the settlement of the steel dispute stands committed to further wage increases in private industry.

For these reasons, Mr. Chairman, I shall vote for the bill now before us. I hope that the President will approve this legislation. If he does not, I shall certainly vote to override a veto.

Mr. MORRISON. Mr. Chairman, I yield 4 minutes to the gentleman from Michigan [Mr. LESINSKI], a member of the committee.

Mr. LESINSKI. Mr. Chairman, I think it is very important to know that the administration has requested additional supergrades. Also increases in the upper levels. In past years when we had given an increase across the board, the result was to narrow the wage level difference between the upper and lower grades, bringing about a serious inequity in the salary structure and violating the accepted principle of equal pay for equal work and responsibility.

A further point I want to mention here is that the last Federal Pay Act of 1958 which amounted to an increase of 10 percent created a considerable amount of new purchasing power. The pay increase we are considering at the present time increases the purchasing power of the American public about $2 billion a year in terms of the gross national income.

The purchasing power of the American public is going down. We have unemployment in various sections of the country. This will be a stimulant to our national economy.

But disregarding that, the equity of this measure is that the Federal employee as such is in need of an increase in his take-home pay, so as to bring him closer to industry in the high cost of living area in which most reside.

Also, although the Postmaster has given us figures that they have a large number of applications requesting jobs in the Post Office Department, those are in areas where unemployment is high, like Detroit, and some in the low-cost-of-living areas where there is a large demand for postal jobs.

I hope the committee will act favorably upon this legislation. In order to keep good well-trained employees in the employ of the Federal Government we have to give them a fair salary commensurate with the work they do.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. LESINSKI. I yield to the gentleman from California [Mr. HOLIFIELD].

Mr. HOLIFIELD. The gentleman from Michigan [Mr. MEADER], asked this question. On page 2 of the committee report the budget figure of the 9-percent raise was $846,306,500. That is on a 9-percent basis. If you take off 1½ percent of that, which is one-sixth of it, you take off approximately $141 million. Then there was another adjustment downward which amounted to about $8 million. So in round figures, and I am only giving round figures, the difference between this bill, and it is just as statistically justified as was the figure of $846 million because it is based on that figure, is about $150 million less than the 9-percent figure which was given to us by the Civil Service Commission and approved by the Bureau of the Budget.

Mr. LESINSKI. In other words, the gentleman from California is saying that the figures presented have been substantially verified by the Commission. I thank the gentleman from California for his contribution.

Mr. GROSS. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Chairman, in order to be plain I have first outlined my points in favor of this legislation for the postal workers and Federal employees' pay raise.

First. This pay raise will not unbalance the Federal budget nor cause a deficit.

Second. Twenty-five percent of this pay raise will come back to the Government in taxes.

Third. Our U.S. economy of $500 billion of gross national product this year must be a balanced economy, giving due regard to necessities of our working people, as well as the production of luxuries. We in America should stop starving our community services and provide adequately for the workers who provide these necessary basic services.

Fourth. Government employment should be a model for other employers and employees in our U.S. economy. Government employment and Government employees should not be continued as another chronic depressed area. Whether or not Government employment is officially designated as a chronic depressed area, it certainly carries the general public reputation.

Fifth. There is no doubt about the efficiency and loyalty of our American people working in the postal service, and in Federal employment. But there is and continues to be a large turnover of these Government employees which shows the need of a pay raise, and basic dissatisfaction over wages, salaries, fringe benefits, and conditions of employment. This turnover of Government employees is unnecessary, causes inefficiency, and higher costs to the Government and to the taxpayers.

Sixth. This bill is not inflationary, as the pay raise for Government employees will go to provide the minimum necessities for families, food, clothing, housing, education for children, and transportation.

Seventh. We in Congress have a special responsibility to our U.S. postal workers and Federal employees. We have a tradition in America that adequate pay for a good day's work is an American heritage. Congress has this responsibility for the public employees. Nobody can reasonably argue that the present level of pay is adequate. Recognition should be given to the loyal service given by postal and Federal employees because it is the special concern of the Congress, as the employer who sets the rates for those employees. We in Congress are their employers and the guardians of Federal employment. A fair day's pay for a fair day's work is basic to our U.S. free enterprise system.

Eighth. Congress should see that all groups in our Nation's economy move ahead and progress together. I do not believe that any one group, particularly Federal and postal employees should fall behind. Likewise, if the level of Government employment does fall behind the level of employment of private industry, Government efficiency and Government employees will suffer. Private industry will be in a position of competition that can only be disastrous to employment for necessary public programs. Government employment must therefore compare favorably with employment conditions in private industry.

Ninth. When we have a group that has been as loyal as these U.S. Government employees have been—there have been no strikes and no industrial trouble, and when they have uniformly provided efficient services day and night, we should give such worthy service to our American people, every recognition, and back this pay raise fully. I think the compromise of 7½ percent recommended by the Post Office and Civil Service Committee is certainly a minimum amount which we should approve promptly.

In conclusion, I urge strong support of the current pay raise bill, H.R. 9883, and recommend adoption of the proposed committee amendment as a compromise to insure action in this session of Congress.

All that our good postal workers and other Federal employees ever have asked of their Government is timely and fair salary provisions. They do not ask for any special or extraordinary treatment, but they rightfully expect not to suffer discrimination.

Review of the record before the Post Office and Civil Service Committee confirms the overwhelming weight of evidence presented, at the committee hearing on H.R. 9883 and over 80 companion bills, including H.R. 9997, which I introduced on January 27, 1960, that immediate and substantial Federal employee salary adjustments are necessary in the interest of efficiency in the Government and fairness to Government employees. I firmly believe that

all groups in our economy should move ahead economically at the same rate, and this pay raise is necessary to meet this test.

A man must receive a full day's pay for a full day's work, whether he works in private industry or the Government. The beneficiaries of this bill, our postal workers and Federal employees, can be no exception.

In the hearings before the committee, representatives of postal and other Federal employees clearly demonstrated that their salaries are well below salaries paid their fellow workers in private enterprise whose levels of responsibility are comparable. These employees proved that their salaries have been, and are today, far behind the U.S. national economy.

The Federal employees who are seen most by the general public, the taxpayers, the citizens of these United States, our fine letter carriers, whose motto, "Neither rain, nor hail, nor snow, nor black of night shall stay these couriers from their appointed rounds," are the direct public representatives of our Government, yet they cannot meet the rising cost of living as well as their neighbor who works in private industry, and cannot educate his child to be the engineer, scientist, or teacher which our Nation now needs.

The time for sympathy is past, the time for action is now. Now is the time to begin the end of this discrimination. Now is the time to vote for the bill, H.R. 9883, with the proposed compromise.

Mr. Chairman, I strongly urge the prompt adoption of the bill and the committee amendment.

Mr. MORRISON. Mr. Chairman, I yield such time as he may require to the gentleman from California [Mr. ROOSEVELT].

Mr. ROOSEVELT. Mr. Chairman, I add my voice to those who have spoken in support of H.R. 9883, which would bring a long needed and necessary pay increase to postal and other Federal employees.

I also take this occasion to commend most sincerely the sponsor of this bill, the gentleman from Louisiana [Mr. MORRISON], and those members of the House Committee on Post Office and Civil Service for their effective work in achieving a breakthrough in a most important area of legislation.

As a cosponsor of the Morrison proposal and as a signer of the discharge petition, I join those who point out that a reasonable increase of 9 percent is preferable to that of 7½ percent. However, although the facts are not on the side of the administration, I certainly realize that the original increase of 9 percent would without doubt incur a Presidential veto.

Additionally, I realize that the amendment calling for a 7½-percent increase should make the bill less vulnerable to a Presidential veto. This amendment has been offered in good faith by reasonable men so that such Presidential action may be stayed, and that the issue may be clarified should a veto unhappily occur.

It may well be that the administration will not assume its responsibility in approving the amended bill. I do not think this possibility should deter us from approval of the bill. Our responsibility is to act affirmatively since we must not lose sight of the fact that the provisions of H.R. 9883 are needed and needed now.

It would be "carrying coals to Newcastle" to repeat the extensive documentation, made in committee and on this floor during discussion of the sum and substance of the issue, on the practical need to improve the wage standard of our postal and other Federal employees, and the economic feasibility of doing it at this time.

I not only urge passage of this bill, but I urge that it pass so overwhelmingly—in both Houses—that a Presidential veto, if still forthcoming—can be readily overridden, as it should be.

Mr. Chairman, I would hope that the President would like to see the employees of the U.S. Government on a wage level in line with that prevailing in private industry. I would also hope that he join with the supporters of the increase in realizing that the wage structure of our Federal Government is closely related to the maintenance and attraction of competent personnel. This is sound budget thinking.

Our duty in Congress is clear. Let the record show that the duty of the administration is also clear.

Mr. MORRISON. Mr. Chairman, I yield such time as he may require to the gentleman from Minnesota [Mr. KARTH].

Mr. KARTH. Mr. Chairman, today 1.6 million Federal employees and their families are watching our deliberations to see if their Government, their employer, will courageously face up to the ugly economic fact that the record high cost of living has reduced their standard of living.

These employees and their families have confidence that the Congress will help restore to them some of the economic position which they lost relative to their counterparts in private industry. As was pointed out so capably in the committee's report submitted by the gentleman from Louisiana [Mr. MORRISON]:

> All that postal and other Federal employees ever have asked of their Government is timely and fair salary provisions. They do not ask for any special or extraordinary treatment, but they rightfuly expect not to suffer discrimination or to be sacrificed on the altar of personal or political ambitions. Committee deliberations on the salary problem this year demonstrate once more that the Federal employees can expect and obtain sympathetic and fair salary consideration only through appeals to their elected representatives in Congress. They cannot hope for proper recognition at high executive levels, in terms of fair compensation, for the loyal and efficient services they render.
>
> The House Post Office and Civil Service Committee has considered Federal salary legislation in each of the last four Congresses, including the 86th Congress. Only once in this 7½-year period has there been an administrative proposal for upward salary adjustments—a 5-percent increase during the 84th Congress. All other general salary increase bills have been bitterly opposed. Had the administrative recommendations been followed, over 500,000 postal workers and over 1 million other Federal employees might have received only a 5-percent increase in 7½ years. There have been three vetoes of pay raise legislation during this period.
>
> Notwithstanding constant administrative opposition, the Congress has succeeded in providing salary increases totaling nearly 20 percent for postal employees and slightly less for other Federal employees during this 7½-year period. Were it not for the intervention of Congress, therefore, Federal employees would be in even greater distress than they now find themselves.
>
> Review of the record confirms the overwhelming weight of evidence presented, at extended committee hearings on H.R. 9883 and over 80 companion bills, that immediate and substantial Federal employee-salary adjustments are necessary in the interest of efficiency in the Government and fairness to Government employees.

I think it is of the utmost importance that we unmask for all to see the ruthless attitude of this administration toward Federal employees. We ought to make clear to those of the public who are still misled by the slick Madison Avenue slogans that this much self-advertised "Administration with a heart" has tenderness in its breast—but only for bankers for whom it has every sweet solicitude and whom the administration has enriched to the tune of billions in unwarranted high interest rates paid by each of us.

During the hearings before the House Post Office and Civil Service Committee the administration, through its spokesmen, Maurice H. Stans, Robert B. Andersen, and Arthur E. Summerfield stanchly fought well-deserved pay raises for Federal employees, calling such increases inflationary, unjustified, fiscally irresponsible—and, yes, practically un-American.

I am confident that this Congress will again intercede for the many, many conscientious and loyal Government workers and make it unmistakably clear that to hold a Federal job a man or woman does not implicitly have to take a vow of poverty.

I strongly urge the passage of H.R. 9883 by such an overwhelming vote that any thought of a sustainable veto will be out of the question.

Mr. MORRISON. Mr. Chairman, I yield such time as he may require to the gentleman from Missouri [Mr. BROWN].

Mr. BROWN of Missouri. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. BROWN of Missouri. Mr. Chairman, our distinguished colleague, the gentleman from Missouri [Mr. MOULDER], is in Walter Reed Hospital today or he would have been here to vote for this bill.

Mr. MORRISON. Mr. Chairman, I yield such time as he may require to the gentleman from New York [Mr. GILBERT].

Mr. GILBERT. Mr. Chairman, as a member of the House Committee on Post Office and Civil Service, I had the opportunity to listen to the many witnesses who appeared at the hearings held on the pay-increase bill now before us for consideration. It was clearly proven, to my satisfaction, that an increase of at least 9 percent would have to be

granted if our postal and classified Federal employees were to be given adequate help.

They have been suffering real hardships; they have been struggling under the burdens of ever-increasing living costs and high taxes. Those with families to support have found it impossible to make ends meet, and meager living and deprivations have been their lot. In a high percentage of cases, postal employees have had to seek outside work in addition to their post office positions, in order to meet their obligations. This has meant the sacrifice of loss of time with their families and a lessening of their morale and sense of well-being. We find that many wives have had to leave their home duties and find jobs in order to help maintain a decent standard of living. All this is most unfair; surely, our faithful employees are entitled to a living wage, to time for recreation, to a just reward for the services they render.

I was happy to vote for the 9 percent increase and pleased when our committee took favorable action on the bill. Thereafter, when it appeared that there would be a serious delay in bringing the pay increase bill before the House for action, a petition was placed on the Speaker's desk to discharge the Committee on Rules from further consideration of the bill. Although I was engaged in a serious primary contest in my congressional district, I made a special trip from New York to Washington for the sole purpose of signing the discharge petition, and then returned immediately to New York to continue with my arduous campaign schedule. I wished to make this effort for our postal and classified Federal employees, because I appreciated the fact that it was imperative for Congress to take favorable action in their behalf without further *delay.*

Now it appears that the 9 percent increase voted by our committee is in grave danger of defeat; that the President would veto such a bill, and that we do not have enough strength to override the veto. A compromise appears necessary, and the increase of 7½ percent is now proposed. Although I feel that an increase of at least 9 percent should be granted, if that would mean complete defeat of a pay increases bill until next year, then I am compelled to go along with the compromise figure. While the 7½ percent figure is inadequate, it will alleviate somewhat the hardships which our postal and Federal classified employees are now suffering. They look to us for assistancce, and it is our duty to help them to the utmost of our ability.

I am fully cognizant of the fact that a pay raise is required for the employees covered by the bill. Therefore, in the event of a veto by the President, I shall vote to override the veto.

Mr. MORRISON. Mr. Chairman, I yield such time as he may require to the gentleman from Maine [Mr. OLIVER], a member of the committee.

Mr. OLIVER. Mr. Chairman, as I sat through the long—and, I must confess, sometimes tedious—hearings before our committee on pay legislation for postal and other Federal employees, I was struck forcibly by several points.

First of all, I would observe that the representatives of the employee groups and their associates certainly had done their homework; they presented the hard and incontrovertible facts. On the other hand, it seemed to me that much of the administrative opposition delved into as much fancy as fact.

As demonstrated in the committee report, the employees overwhelmingly proved not only their dire need for salary raises—now, not in the future—but also proved beyond question that their request is more than justified.

Administrative opposition, summed up in a nutshell, revolves almost completely around a proposal to delay action pending completion of a study.

Now I, for one, have had enough of administrative studies. As brought out in our hearings, during the past 10 years some 45 authoritative studies on Federal salary matters have been made. Every single one either reposes in a wastebasket or gathers dust in a forgotten file. There have been no tangible results at all.

And so, I think, may be the case with the study which we are now asked to await before granting salary increases. This study is completely beside the point. Even the proponents of the study acknowledge it will deal only with the higher, or supervisory, salary levels. Only a very small percentage of Federal employees possibly could be concerned in that study. Here, we are concerned with over 1½ million employees to whom the study will have very little significance.

The chief and the strongest opponent of any pay raise has been the Post Office Department. In answer to direct questions, departmental representatives as much as confessed they would not approve a 1 percent or 3 percent pay raise. Now let us see how this Department handles its own responsibilities.

This is the same Department that reported officially on its expenditures to a private management consultant for advice as to how the Department should be managed—that is, advice on how officials of the Department should do their jobs. This is the same Department that paid directors of the private consultant $400 a day for a 4¼-hour day. This is the Department that paid associates of the private consultant as much as $250 a day for a 4¼-hour day. This is the Department that willingly pays out these outlandish benefits to a private contractor to do work which postal officials should do; but will not agree that the letter carriers for example have earned 17 or 18 cents more an hour, as provided in the substitute amendment we will consider later.

This contracting out of administrative and management responsibilities of itself is highly questionable. The people to whom these vast sums are being paid are purported to be geniuses. It would be all right if they knew the answers, but in this instance, at least, the consultants had to go out and hire still other consultants to help them get the answers.

I hope that the Congress will see to it that our loyal and conscientious postal employees are given just a little bit of the fine consideration the Department lavished on these consultants to the consultants to the postal officials.

Mr. MORRISON. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. SANTANGELO].

Mr. SANTANGELO. Mr. Chairman, I rise in support of the committee amendment to H.R. 9883. This bill provides for a 7½ percent increase across the board for all postal employees and makes permanent the 2½ percent temporary increase which the postal employees have been receiving since 1958.

I support this bill because I believe that the greatest force against communism within our borders is a satisfied Government worker who is proud of his employment, satisfied with his salary, and is faithful to his duties. I believe that a Government employee deserves a salary which will permit him to work in dignity, to obtain the basic necessities of life and to maintain his family as a unit. At the present time postal employees are paying this week's bill with next week's check or with borrowed funds. This condition must not be tolerated, it must not be permitted.

Let us examine the status of postal workers. Ninety-five percent of letter carriers are family men. Thirty-one percent must hold down a second job to try to meet their rent, their food expenses and to pay for the education of their children. Forty-three percent of their wives work and when they do their children are to a certain extent neglected. Ninety-three percent of all of the letter carriers operate at a deficit and must borrow funds. The annual deficit of an average letter carrier's family is $903. Credit unions have demonstrated that postal employees must borrow funds in order to meet their expenses.

This bill will cost our Government an additional $680 million. As a member of the Appropriations Committee I have had the privilege of voting to cut requests and to reduce funds of over a billion dollars for wasteful practices in agricultural projects, in military construction projects, and in wasteful foreign handouts. I have fought for economy but not for false economy. These increases are not inflationary nor are they conducive to inflation. These increases are for services and do not produce a product, the price of which is raised. These services will be rewarded by these increases to meet the inflationary spiral brought about by rising steel prices, by rising military purchases and wasteful administrative practices. Too long have Government employees subsidized with their substandard wages the bonanzas and windfalls which banks and financial institutions received by reason of our Government paying a higher rate of interest on Government bonds. Too long have Government employees subsidized warehousemen who are favored by this administration with high rates for storage of our surplus grain, cotton, and wheat. Too long have our Government employees subsidized with their substandard wages the employees of foreign governments and foreign businesses. We must help now.

While the wages of employees of private concerns rise, the wages of Govern-

ment employees have had percentage increases on originally low salaries. We must realize that if we continue to allow the relative position of postal and governmental employees to deteriorate, our postal service will decline.

We in Congress are the advocates of postal workers and governmental employees. They do not have the right to strike, they cannot resort to collective bargaining to correct inequities, they cannot sit down in the face of speedup systems. They can only come to us, to testify as to their needs, to implore their representatives for economic justice and to be treated as family men and Americans. We have heard their pleas and I for one shall not fail them. I trust that this bill will pass.

Mr. OSTERTAG. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. OSTERTAG. Mr. Chairman, I rise in support of H.R. 9883, a bill to provide salary increases for postal and other Federal employees. Frankly, I believe that a pay increase for our Federal employees is in order, it is deserved, and desirable at this time, particularly as it applies to the postal workers.

Although I have consistently favored legislation for this purpose, I do regret that we find ourselves considering this proposal in this manner. I did not sign the petition for several reasons. As a matter of fact, I have never signed a discharge petition. It seems to me that this move to bring the bill, H.R. 9883, to the floor by this method, without giving adequate opportunity to employ the use of a rule, does more harm than good. There are inequities in this bill and the House is foreclosed from making such changes. As I said, I am for a pay raise and a reasonable raise at that. But we can go too far and perhaps destroy our actual objective.

In any event, I shall support this bill today and I am glad that the committee has at least considered giving the House an opportunity to act on a figure which has a more reasonable chance to become a reality. I hope that this issue and this problem can be resolved properly and well because I sincerely want the employees to receive the salary increase they deserve.

Mr. REES of Kansas. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I realize as much as you do the futility of further debating the question involved here. I realize I am not changing any votes.

It seems to me that when we are dealing with legislation to spend well over three-quarters of a billion dollars, the Members of the House should have an opportunity to agree to or disagree with provisions of the bill; however, those who are today the managers of this bill deliberately filed a resolution which was a closed rule—no amendments other than committee amendments could be offered—and then passed it off on the Members of the House whom they urged to sign a discharge petition as the only way they could get a vote for a pay bill. It should be clear that Resolution 537 provided for an open rule and Members of the House could have voted on various provisions of the bill which they felt should be perfected. The petition method boomeranged on the bill sponsors because they themselves found it expedient to amend the bill. To get this done they exercised every pressure and did not give the Members an opportunity for even an overnight reading of the bill before they forced action.

It is most unfortunate, in my judgment, to delude the million and a half employees into believing a pay raise is now assured. If we are to be guided by the testimony before our committee, the President will not approve this bill as presently written.

The experience of Congress thus far with respect to overriding vetoes is that the House and Senate are in favor of supporting the President. It seems to me that it is not proper to make Federal employees believe they are going to get increases that are not yet in sight. This is what I have tried to avoid.

I offered a 6 percent pay raise amendment in committee. I was prepared to do everything I could to convince the President that such an increase might be approved, but I could not, in the face of our testimony, do it for a bill of this sort which would further distort the pay structure by adding extra pay in certain grades.

Let me repeat, I am in favor of fair, adequate, and equitable pay for those who are employed in Government. I do not believe the bill we are voting on today meets these objectives.

Here is an interesting thing. You have been handed a bill that you have not even seen before. It consists of about 20 or 25 pages. You are going to vote on it without even reading it. You have not had a chance to read it. It involves expenditure of $700 million. It affects 2 million people in Government. And yet you are required to vote either for or against the bill without having a chance to offer a single amendment. It is rather a poor way of handling legislation in a representative form of government, as I see it. It sounds a little like a dictatorship, does it not? You can judge for yourself. I could add one more thing. You have not even had a chance to look at the hearings, and the worst of it is the leadership in charge of the bill does not seem too concerned. It would not be so bad if it were not so important.

We should recommit the amended bill. We should send it back to the committee, where it could be promptly and carefully considered.

FEDERAL PAY SYSTEMS CAN NEVER STAY FIXED

Mr. Chairman, I would like to add the following statement:

It has been my privilege to have served on a committee responsible for civil service affairs of Federal employees ever since I came to Congress in 1937. Through these years it has been my experience that it is indeed difficult to develop any one particular pay plan that will adequately serve the more than 2 million Federal employees. After all, our compensation procedures deal with people and, as such, the pay procedures and systems must change with the changing times. It was my privilege to be chairman of the Civil Service Committee in 1948 with the 80th Congress, and at that time a study was begun that eventually became the Classification Act as it is basically written today. It required some 2 years' study and work by the committee and its staff to develop the pay plan found in the Classification Act of 1949. Much has happened since then that would cause us to recognize a new pay program is necessary.

PRESENT PAY SYSTEM NEEDS CORRECTING

What is wrong with the present pay system? In the first place, the present pay procedure is actually no system at all. Several recent studies of our wage and salary procedures have brought out this point.

Another one of the most common objections to the present classified Federal salary system is that it is overrigid. This is reflected in the existence of conditions under which administrative and operating personnel encounter numerous impediments in the effective accomplishment of programs due to specific requirements of the law. The question may be raised, Have we spent too much time on minute details of job descriptions and have not given enough thought to a declaration of congressional policy on pay for Federal employees?

The value and the effect of exceptional or superior performance of individuals in Government civilian positions have been to a large degree overlooked in the Classification Act as it is presently administered. Each position is placed in a class, and each class is placed in a grade, and each grade by law is given a rigid set of salary rates.

It is now recognized that the step increases in the salary plan as provided in the present classified pay system fall short of realizing the full value of such a plan, both as an incentive for the recruitment of personnel or the retention of employees. It is quite possible a broader range within each grade might give more comparability with pay plans in private industry.

A close examination of the between-grade differentials reveals the inadequacies and inconsistencies of our current pay and salary procedures. There is too little difference, salarywise, between a GS–12, for example, and a GS–13. This might very well retard the development of the abilities and qualifications of personnel, as well as the effective utilization of these employees.

Mr. Chairman, I am attempting to emphasize the point that the Classification Act of 1949, of which we were justly proud at the time it was passed, is in imperative need today for revision.

PROPOSED NEW PAY SYSTEM

Last year the Congress made available to the executive branch $500,000 to develop information for a new concept of compensation of Federal employees. We have been advised by the White House that this information will be available by this fall for study and that it will be available for the Congress January 1, 1961. We have proceeded to take the

first and one of the most important steps forward for a new pay plan.

I believe that one of the key principles needed in such a system will be the principle of comparability.

You may ask the question, what is comparability? Over the years we made no attempt to compare the pay of Federal employees with that in private industry—certainly in the classified jobs. During the 1920's and thirties there was a steady employment in the Federal Government which could not be found in any strict comparability with private industry. However, during the past 25 years labor contracts in such industries as steel, automobile, printing, transportation, and communications have featured the concept that those employees last on the job were the first off. This has meant that for the past quarter of a century there has developed in our private economy a concept of steady employment. It is now possible that we can realistically compare the Government worker, with his steady employment, with his counterpart in private industry.

Some of the other features for a new compensation system, being discussed by both legislative and executive people, would include:

First. Establish not only the principle that Federal salaries should be reasonably comparable with salaries paid by private industry for work of similar difficulty and responsibility but also provide the procedures to obtain on a regular annual basis valid salary and wage information for comparative purposes.

Second, Enable an annual review of Federal salaries and make appropriate adjustments on a timely and equitable basis.

Third. Provide for coordination among existing salary systems in the Federal Government, so that the principle of "equal pay for equal work" will have real meaning.

Fourth. Make such necessary reforms in the Classification Act salary structure as to make it a more effective tool of management and a more appropriate pay schedule of the employees.

This type of compensation plan would serve as a landmark in the history of Federal personnel actions, much as the Classification Act of 1949. However, if this Congress proceeds to go down the road of either a 9 percent or a 7½ percent pay raise, it will mean that this Congress has lost an opportunity to proceed with a lasting and equitable pay system for our Federal employees.

SUMMARY

In summary, I am opposed to either a 7½ percent or a 9 percent pay raise at this time. Evidence was not presented to our committee to justify either percentage increase.

An across-the-board pay increase of such size would merely accentuate current inadequacies in our salary and wage procedures. H.R. 9883, as amended, represents a patchwork approach to our compensaton systems when actually we need a new and basic change, as I have indicated earlier.

It has been my honor and privilege to work for almost a quarter of a century in the Congress for the civilian employees of the Federal Government. Over these years I have been impressed by their loyalty, sincerity, and desire to do a good job. The position I take today represents in the long run the constructive and equitable approach for the Federal employee, for the management of our Federal departments and agencies, and for the American taxpayer.

Mr. REES of Kansas. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. BARRY].

Mr. BARRY. Mr. Chairman, it has been my privilege as a new member of the Committee on Post Office and Civil Service to act as one of a group of directors over the largest communications system in the world, namely, the Post Office Department of our Government, which, as you know, represents 50 percent of the postal service of the entire world.

It has also been my privilege to be a member of the Civil Service Committee of the same Committee on Post Office and Civil Service and, as you know, the Civil Service Committee has more to do with the personnel of the largest group of people working for any one instrumentality than any other in the entire world.

Mr. WALTER. Mr. Chairman, will the gentleman yield?

Mr. BARRY. I will be happy to yield to the distinguished gentleman.

Mr. WALTER. As I understand, there is nothing in the legislation under consideration which provides for an increase in the salary of the assistant U.S. attorneys. Now, I think it is indeed unfortunate because here is a class of hard working—and, I mean it, very hard working—dedicated public servants who receive no increase whatsoever. It would seem to me that your committee is overlooking a grave injustice when you report out a bill that does not provide for this group of Federal employees.

Mr. BARRY. I thank the gentleman for his observation.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. MORRISON. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY. Mr. Chairman, I rise in support of this very worthwhile legislation and I commend the distinguished gentleman from Louisiana [Mr. MORRISON], and the other members of the committee for this compromise in an effort to try to avoid a Presidential veto. If a veto should come we should by all means vote to override it.

Mr. Chairman, I introduced a salary increase bill calling for 12½ percent, and I sincerely believe the postal and Government workers are solely in need of that amount if they are to enjoy a decent living; however, the committee has faced the practical reality of trying to pass a bill that reflects a compromise and one that has a chance of being signed by the President or being overridden. For that reason we are supporting the 7½-percent amendment in an effort to take a slice of bread if we cannot have a whole loaf.

Mr. Chairman, we could advance strong arguments for this bill all day long. I have many postal workers in my district who are holding down part-time jobs in an effort to supplement their inadequate postal salaries, because if they did not they would not be be able to provide their families with the bare necessities of life and properly educate their children. In cases such as this the employee and the Government are both being cheated. The Government is being cheated because a man cannot work night and day and give his best to the postal service. The employee is being cheated because he has no time to spend with his family and contribute to his community. Furthermore, the postal worker who holds down two jobs is depriving some unemployed person of the second job that he needs so badly. Mr. Chairman, this is a disgrace to our Federal workers and the Government to force this type of situation upon our postal workers and Federal employees. A 7½-percent raise will not cure all the ills of pay inequity but it will go a long way toward that end. I strongly urge my colleagues to support this much needed legislation because I am confident everyone will benefit.

Mr. MORRISON. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. Moss].

Mr. MOSS. Mr. Chairman, I have listened carefully throughout the debate this afternoon to see if things had changed any in the past 8 years, and they have not. The arguments of those in opposition have been the same; substantively the same. And, what are they? Well, the minority leader tells us it faces a certain veto. That was the same message conveyed by the same gentleman a number of years ago and repeated on each occasion since. No. 2, we were told the department had a deficit. Well, if we apply the same criteria to every department and agency of the Government, each and every one of them has a deficit. Now we are told we cannot afford it. Well, tomorrow we are going to be asked to vote multibillion dollars for the citizens of other lands. If we can afford that, we can afford to deal with equity and justice to those who work for us.

Now, the gentleman from Kansas says—and this is a reversal of his usual argument—that it gives too much to those at the top and too little at the bottom. For 4 years I heard on the committee that we should revise our approach, because we were creating an imbalance in the relationship of Federal employees by raising too much those on the bottom and not enough those on the top. This is a reversal of the gentleman's position. Now, he also said that he was for 6 percent. Well, I remember when he was for 4 percent and the House gave 8 percent. And the need for more is still there because we have never adequately adjusted salaries. We have never once undertaken a salary adjustment that reflected the many, many months of lag time.

We are told it is against the policy of the administration at this time. And yet this is the very administration which undertook to encourage a settlement in the steel strike which inevitably led this body to a consideration of the need for higher salaries in Federal employment if we were to be even half way reasonably competitive. The truth is, Mr.

Chairman, those who oppose are really opposed to a pay raise now as they have repeatedly been in the past. They have not contended the amount proposed to be excessive, they have fallen back on every other type of argument including the charge of steam rollering. Of course, that charge is not true either. The bill arrives on this floor in complete conformity with the rules of the committee and of the House. The legislation has merit, I urge its adoption.

Mr. REES of Kansas. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. RIEHLMAN].

Mr. RIEHLMAN. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RIEHLMAN. Mr. Chairman, although I shall vote for a pay increase bill on final passage today, I should like to register my acute dissatisfaction with the manner in which the leadership has handled this legislation. It is regrettable in the first instance that this legislation was so mishandled as to necessitate the filing of a discharge petition. Nevertheless, a sufficient number of Members saw fit to sign the discharge petition and bring a bill calling for a 9 percent pay increase before the House. Then, on the very day that we are asked to vote on this bill, it is announced that we are to be presented with a substitute version that will not only lower the pay increase to 7½ percent, but will also make other substantive changes in the original text. Now we are to have a bill before us that will be understood by only a handful of Members because no one will have had sufficient time in which to devote the amount of study that a bill of this magnitude demands. No one is absolutely certain as to what will be in the bill and what the effects of the bill will be. I am truly sorry that we must legislate in this fashion. It casts an unfavorable reflection not only on the ability and sincerity of the leadership, but also on the wisdom and deliberativeness of this entire body.

Notwithstanding the highly unorthodox manner in which this legislation has progressed toward final passage, I shall support it because of my sincere belief that the great majority of our Federal employees are conscientious, able, and hard working, and are fully entitled to an increase. My only regret is that we must achieve this worthwhile legislative goal in such an atmosphere of ineptitude.

Mr. REES of Kansas. Mr. Chairman, I yield such time as he may require to the gentleman from Illinois [Mr. DERWINSKI].

Mr. DERWINSKI. Mr. Chairman, in my humble opinion, those Members of Congress who signed the discharge petition on H.R. 9883, the postal pay increase, have really performed a disservice to the postal and Federal employees that they are seeking to aid, for this reason: the bill having reached the floor cannot adequately be amended to a figure consistent with fiscal responsibility.

Representing as I do a metropolitan area district, I sympathize and appreciate the plight of especially the post office employees in providing for their families under their present wage scale; however, the across-the-board increase, without taking into consideration local standards of living, continues to distort the situation.

Rumor has it that the majority party is deliberately appealing to the emotions of Government employees by promising a pay raise that they realize is impractical, using this issue as a means of drawing a Presidential veto in order to make political capital of the entire matter. This may be clever politics, but it is bad government. Certainly the postal employees deserve understanding and an honest attempt to give them the salary increase to which they are entitled.

Mr. REES of Kansas. Mr. Chairman, I yield one-half minute to the gentleman from New York [Mr. BARRY].

Mr. BARRY. Mr. Chairman, I should like to conclude my earlier remarks by saying that never in corporate activity would a responsible management go about getting the kind of bill that is before us today. It would not be done. Management would be turned out of business were it to use the methods that were employed on this day in this House, before this Nation, in order to get the raise that is going to be voted by this Congress. This is said without regard to the merits of the matter.

The post office employees made a strong case for a much-needed increase in salaries. However, no such case was made by other employee groups who constitute approximately 1,500,000 Federal employees.

In fact, there is evidence to substantiate that certain existing inequities have become aggravated rather than cured by the present bill before us.

Until a thorough comprehensive method is evolved to establish Federal wage rates the many loyal Federal employees and the general taxpaying public will have to put up with the clumsy, inefficient, inequitable system in use by the present Congress. Some of us hope for better days.

Mr. MORRISON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the question of study groups came up. I would like to make this point clear, that since 1953, in the last 7 years, it is reliably reported that there have been 45 study groups on the question of Federal workers' salaries. I want to suggest this, that as far as the Government workers are concerned, they want less study groups and more salary.

I should also like to quote this from the committee report:

> The much-publicized steel strike settlement, with the aid of the Vice President of the United States and the Secretary of Labor, improved pay and fringe benefits for steelworkers who already were being paid $3.11 an hour before the strike. The postal clerk and the letter carrier with 20 years of service receives only $3 an hour.

Mr. CARNAHAN. Mr. Chairman, there are at this very moment thousands of dedicated men and women who continue to carry on their daily tasks of helping to provide good government for this Nation in a most exemplary manner in spite of the fact that each of these persons knows that the present wage structure is shot through with inequities. Now in looking for proof of this charge of wage structure inequity I need go no further than to quote the administration's most recent budget message. President Eisenhower told the Congress in his last budget message that—

> Review and coordination of the excessive number of pay plans are the most effective means of removing inequities which adversely affect the Government's ability to recruit and retain qualified personnel.

When Federal employees claim that their wages are substandard, thus inadequate, they need to quote only the Government's own figures. According to the latest published data which I am able to produce, the average median annual wage for the great bulk of Federal employees is $4,875. More significant is the fact that almost one-half of all so-called white-collar workers on the Federal payroll earn less than $4,500 a year.

Last February Secretary of Labor James Mitchell was quoted as saying that the "spendable earnings" of an industrial worker with three dependents has risen to $82 a week. The Postal Establishment offers the same worker approximately $18 a week less take-home pay.

There is ample evidence to show that the present schedule of Federal wages is shamefully inadequate. These standards set by the Federal Government are certainly below the commonly accepted requirement for a healthy and decent standard of living. Wages are below what employees fairly want, what their families need, what the Nation can afford, and what is needed to man our public service with skilled, conscientious, and efficient personnel.

In my 14 years in Congress I have become increasingly impressed with the fact that the civilian employees working for the Federal Government are first and foremost dedicated public servants. These thousands of men and women are daily serving this Nation and giving to the American people the very best kind of government that we can have. And since every laborer is worth his hire this devotion to the common good by these thousands of civilian employees of the Federal Government must be matched with adequate compensation. Living in an era when we are rightly concerned about standards of living in even the remotest corners of the earth and when we justly tax ourselves to provide funds not only for the military defense of the free world but for economic development and for the sharing of our technology and vast natural and material resources, we cannot sit idly by and watch the standard of living creep up among other segments of our economy and at the same time ignore the fact that Federal employees are generally the last to receive needed adjustments in their compensation—oftentimes long after most others in non-Government positions have received their adjustments to meet not only the cost-of-living rise which now seems to occur with almost regularity but also to enjoy an even higher standard of living.

Mr. Chairman, the Federal Government is constantly and rightfully using its power and influence to secure wage adjustments for and to help provide a higher standard of living for workers outside the Federal service. The Congress must not sit idly by and set standards for private industry and fail to meet these same standards when it comes to its own employees. To do so will be courting danger, real and eminent, and will certainly eventually lead to increased inefficiency and lessening of service to the people of all the States. Like wages in private industry, the Federal wage structure must be kept constantly under review so as to reflect sharp increases in the cost of living and so as to provide even more of the comforts and conveniences as well as the necessities for daily living that go to make up every man's life. As we advance technologically and as more products and services are made available to ease man's burden and raise his living standards, we must make certain that Federal workers are able to partake of these blessings.

In his state of the Union message last January the President told this Congress, "1960 promises to be the most prosperous in our history." This means higher production, higher employment, slowly rising prices, about a 2-percent increase in the Consumer's Price Index, a continued rise in profits and dividends, higher wages and salaries. This does add up to more prosperity except for the Federal employees unless the adjustments called for in this bill are enacted into law.

Mr. Chairman, this is worthy legislation, and I urge its approval.

Mr. McGOVERN. Mr. Chairman, it seems that the present administration is more in tune with the interests of the largest banking and industrial groups than it is with the interests of ordinary citizens. The farmers, the small businessman, the aged people all find that either the administration is opposed to the programs which are needed for their welfare, or it has no program whatever.

This same attitude extends to the field of public employment. For a number of years, postal and other Federal employees have been seriously underpaid. Today, I look forward to the opportunity to vote in favor of a long overdue and much needed increase in pay for these loyal public servants.

I am sorry that the bill before us took so long in reaching this stage. It is more than idle rumor to expect that the President will veto the bill we are about to pass, and that accordingly, the bill must be sent to the desk of the President quickly if we are to have a chance to escape a pocket veto.

The certainty of the veto is found in the statements made by official witnesses before the committees holding hearings on pay legislation, and also by the very character of the witnesses who arose in opposition to postal and other Federal employees' pay legislation.

Seasoned observers with long legislative records tell me they have never seen so many officials of Cabinet rank come to Capitol Hill to declare the administration's opposition to any pay adjustment.

The Postmaster General, himself, evaded a direct response to the question about whether he would favor as much as a 1-percent, across-the-board increase. Asked by the ranking majority member of the committee whether he would be in favor of such an increase, the Postmaster General responded:

> You know that is very interesting. I wish you might have asked me some of these questions earlier.

The Federal employees have been asking questions. They have been asking why it is that they, of all people, in the United States, should be singled out to suffer to a greater degree than others the impact of income deficit.

We have heard a great deal about the postal deficit and the way in which the increase before us would add significantly to that deficit.

It is appropriate to turn the question around and to ask, instead, of the administration, whether it has considered the ways in which the hundreds of thousands of Federal employees have suffered their own deficits and are even now unable to compete in the economic marketplace. The grocer does not give a special price to the Federal employee. Nor does the Federal employee live in endowed housing. Similarly he does not enjoy lower doctor bills or any other type of special considerations.

The only consideration upon which the Federal employee may rely is that which is forthcoming from the Congress of the United States. In House Report No. 1636, accompanying the bill before us, it is declared that in just 10 years Federal employees have been pushed 20 percent lower in their standards of living in comparison to their friends and neighbors in private enterprise. The report declares:

> There is only one place that the employees can come with any hope for remedial measures; that is to their Congress.

Today, we are about to undertake to give to the loyal Federal public servants a measure of the economic consideration they so desperately need. I shall be happy to vote for the pay bill, and I hope that it will be sent quickly to the President's desk in order that we may have an opportunity to take final action on the bill before Congress adjourns.

Mr. GOODELL. Mr. Chairman, I support reasonable pay increases this year. It will be sad, indeed, if the insistence on 7½-percent defeats all legislation in this field. The Congress has been irresponsible with the issue by not providing increased revenues to carry the cost of well-deserved pay increases. I am convinced that the President will have to veto an increase as high as 7½ percent and the workers may then end up with nothing at all this year. A 5-percent increase this year, pending a full study of all Federal payrolls next year, is the fairest approach to the problem. I am sorry that political maneuvering has placed our fine postal and classified employees in this kind of a bind, as there is reason to believe that the President could sign a 5-percent bill even under present circumstances.

Mr. ROBISON. Mr. Chairman, it has been no easy task to wade through the confusing and often conflicting statistics that we have had to look at in order to try to determine the justification for any salary increases at the present time. As for myself, I have attempted to supplement the doubtful value of those statistics with information obtained directly from postal workers in my own congressional district.

Some of this information I have acquired through personal interviews with them, and part of it from budget sheets which they have sent to me at my suggestion showing their earnings and normal living expenses. For the great majority of postal families with whom I have had such contact it is readily apparent that they are having a difficult time making ends meet. One of the best yardsticks of this would seem to be the following results of a survey I took of my major post offices in an effort to find out how many employees either had to supplement their Federal wage with outside jobs, or had to send their wives to work.

In Binghamton, N.Y., with 362 employees of which only 303 were checked, 59 men had outside jobs and there were 102 working wives. In Johnson City, N.Y., with 46 employees, there were 12 men with outside jobs and 5 working wives. In Endicott, N.Y., with 82 employees, only 14 of those employees had neither outside jobs or working wives. In Corning, N.Y., where there are 49 employees, 5 had outside jobs and 17 had wives with jobs. In Elmira, N.Y., with 171 employees, 58 had to supplement their wages with outside, after-hours employment, and 60 had wives who were working to add to the family income. In Hornell, N.Y., with 41 employees, 12 had outside jobs and 15 had wives with jobs. Finally, in my own hometown of Owego, N.Y., with 20 employees, 5 men had after-hours work and there were 12 working wives.

And so the pattern went. Even assuming that it is not unusual nowadays for many wives to work, if they are free of confining household tasks, even though their husbands earn an ample wage for the family needs, I was and am convinced that the case of need for a proper salary adjustment, at least in the lower income brackets, had been made. The question remained of how much?

On this point, no matter what we may do we will not and cannot satisfy everyone. We can only use our best judgment. I was of the opinion, and so frankly stated to my postal and Federal employee constituents, that a 9 percent, across-the-board raise at the present time was too much, particularly in high-salaried classifications. Speaking frankly again, I have serious reservations as to the wisdom of as much as 7½ percent, but since at this point that appears to be the only figure that will come before me I shall vote for it with some reluctance. In doing so, I shall also continue to hope for the day when these matters are removed from the political arena.

In this connection, may I remind my colleagues that the President in his budget message to the Congress last January stated:

> Continued patching of individual Federal salary systems is not satisfactory as a sub-

stitute for a comprehensive Federal pay policy, which should be developed either by authorizing a Joint Commission such as I proposed or by some other equally effective means. Pending development and adoption of such a comprehensive policy, a general pay raise would be unwarranted, unfair to the taxpayers of the United States, and inequitable as among employees compensated under different and unrelated pay systems.

That is a strong and realistic statement but there has been no action to establish a Joint Commission.

Neither has there been any serious consideration of the President's postage rate increase proposals which would partially finance a salary increase.

If the fate of this bill is a veto, the failure of the Congress to seek long-range solutions to Federal pay problems and the expedient insistence on patchwork measures in election years will be to blame. The postal and classified employees in the lower pay ranges will be the chief losers, penalized by short-sighted and fiscally irresponsible attitudes in the Congress.

Mr. DONOHUE. Mr. Chairman, following careful examination of the record, which confirms the overwhelming weight of evidence presented in extended committee hearings, I most earnestly hope that prompt approving action will be taken on this measure granting a reasonable cost of living pay adjustment to our postal and Federal employees.

Our Federal employees form a large and important part of our population. The various services they render are fundamental and essential to national progress.

It is only practical common sense and recognition of the facts of life that if our faithful postal workers and Government employees are encouraged, by reasonable cost of living salary adjustments, to meet their family obligations and face the future with a certain confidence, then there will be no doubt about their efficient duty performance, their loyalty as good Americans, and their repudiation of any and all Communist inspired propaganda.

The present bill we are considering can accomplish these good objectives in the national interest while at the same time extending fair and just treatment to Federal employees in comparison with similar responsibilities in private industry.

As you are well aware the salaries of our Government employees are set by law and it requires the action of the Congress to adjust their compensation. Let us fulfill the trust they have demonstrated in the Congress for fair play and fair treatment and let us approve this bill without further delay.

Mr. ASHLEY. Mr. Chairman, I rise in support of H.R. 9883, a bill which I believe to be not only well deserved but long overdue. Although I am not a member of the Committee on Post Office and Civil Service, I do have a large number of classified Federal employees and postal workers in my district and I know how increasingly difficult it has become for them and their families to make ends meet. The committee report, which I hope all Members have had an opportunity to study, makes this abundantly clear—especially the specious arguments against a pay increase set forth in the minority views.

The real fact of the matter, Mr. Chairman, is that the Post Office Department is the biggest business in the world, employing 550,000 people in 42,000 offices. Yet, despite the fact that personnel standards are high, both with respect to intelligence and character, three-quarters of all postal employees must exist on salaries of less than $5,000 and only after 18 years of continuous service can a postal worker receive $5,000 a year, and his maximum compensation after 25 years of service is $5,175 per annum.

Mr. Chairman, the issue before us goes to the very conscience of our Nation. Can we, as the minority report would have us do, view with complacency a Federal personnel policy based upon substandard wages. I think not. I must say it is beyond argument that the present administration's attitude is one of deliberate indifference in which pay increases for Federal workers have been sacrificed on the altar of an anticipated $4 billion budget surplus. Thus, as in so many other areas, it becomes incumbent upon the Congress to assume leadership in this area and to take action which we know to be necessary.

I say necessary, Mr. Chairman, because the average salary of a post office employee is only $4,600—not enough to clothe, feed, and provide shelter for families, let alone educate children and provide a minimum of entertainment and recreation. We must bear in mind, surely, that research studies have shown that an average family enjoying a normal standard of living must have an annual income of $6,600.

Clearly, if there is one group that has been left behind in the parade toward higher income to meet higher costs of living, it is our classified and postal workers. If anyone in this body has any question on this point, I wish they would come with me to Toledo, Ohio, and talk to some of our postal and other Federal employees who are willing to open up their family budgets and show that it simply is not possible for them to pay for needed medicine and other essentials. A college education for children of these families is simply out of the question unless they happen to qualify for a complete scholarship.

Mr. Chairman, all of us look back with shuddering and disgust at the economic exploitation which took place in this country a half a century ago in the meatpacking, coal mining, and other industries. Is the present status of our Federal employees so much worse?

Mr. WOLF. Mr. Chairman, I am happy to lend my support to the passage of H.R. 9883 to provide our postal and other Federal employees a much-needed pay raise. The facts speak for themselves. In a recent issue of Labor Week figures arrived at from basic data of the U.S. Department of Labor, Commerce, and Agriculture, pointed out that the average weekly real income of postal and other Federal workers was down 3.3 percent from last year.

While the increase in salary provided by this bill is modest, it will mean a great deal to a postal employee who is trying to feed, clothe, house and educate a family—in many cases a large family—on a weekly take-home pay of $82 to $87.

Under the present pay scale, the postal employee receives less pay than the unskilled worker. Three Presidential vetoes have put his pay rate several years behind that of his fellow workers in private industry. I hope that this time the President will approve this well-deserved recognition of devoted service.

Mr. JOHNSON of California. Mr. Chairman, I want to rise in support of the proposals set forth by the gentleman from Louisiana [Mr. MORRISON] on behalf of the faithful postal and classified Federal workers who are doing such a wonderful job for our Government despite the fact they are underpaid.

I know the committee in its careful consideration of H.R. 9883 heard many, many instances of how our Federal employees are forced to moonlight and take extra jobs, how their wives are forced to work, and other ways that they are trying to make ends meet.

I think that it is a disgrace that this should have to happen in the postal, and Federal services. We should pay our people a salary which will permit them to live and enjoy the American standard of living. No one should become a second-class citizen, economically, because he is patriotic enough to work for the Government.

I represent the great State of California, and in our State university we have a highly respected and completely independent group of economists, quite generally known as the Heller committee, which was set up for the purpose of research in social economics. The Heller committee operates on the concept that its purpose is to describe and present figures based on salary necessary for an employee to receive in order to live at what is currently recognized as comfortable living. Of course this committee goes beyond the rigid confines of cost-of-living in attempting to describe necessary wages for an employee and his family to have what is considered a comfortable living. They agree, as do I, that there certainly must be more in this life than a bare existence. The Heller committee is receiving and has received more than normal recognition in my State and throughout the United States as the outstanding authority in its field and I feel that its recommendations are of extreme value. Might I point out, Mr. Chairman, that the Heller committee, in its recent report, indicates that an employee with a wife and two children who owns his home, should receive a salary of $6,638 per year. A wage earner who rents his home should receive a salary of $6,271. These salaries are recommended by the Heller committee on the premise that they will meet the American standard of living—a reasonably comfortable living for an employee and his family.

I urge you gentlemen here to provide a decent living wage for our Federal workers. Thank you.

Mr. DOYLE. Mr. Chairman, this important debate has but a few minutes yet to claim the attention of the Members before we are called upon to vote upon the issue of whether or not there

shall be straight across the boards 7½-percent increases for the postal and other Federal employees. And, while it is stated by the committee there will be an amendment offered to reduce the percentage from 9 percent, as previously voted for by the committee, to the 7½ percent this morning voted by the committee, the basic reason justifying any proposed increase is the same. The report by our Post Office and Civil Service Committee, stated it was recommended as a strong and timely affirmation of the historic policy of the Congress that employees of the Government of the United States of America should receive fair compensation for the great public service they perform for the taxpayers of the United States.

Therefore, Mr. Chairman, I conclude that their considered recommendation of the 7½-percent increase straight across the boards for the postal workers and other Federal employees, constitutes a crystal-clear recognition that the historic policy of Congress, should be placed in practical terms and application in accordance with their recommendation that the increase be 7½ percent. They apparently recommend this because it has become apparent that there is no reasonable chance for the White House to approve so much of an increase as 9 percent. This recommendation of reduction to 7½ percent is, therefore, a necessary compromise. I not only respect our committee for making the recommendation to lower to 7½ percent under the circumstances, but I compliment them on doing so. For this 7½-percent recommendation is not one whit inconsistent with the firm policy which I basically believe in, to wit, that our post office and other Federal employees should be accorded salaries substantially in accord with those in private enterprise, for similar and comparable services.

For several years now, I have been pleased to take the time and make the effort of somewhat of a personal study of conditions under which many of the postal employees and their families in my congressional district live. I am frank to say, Mr. Chairman, to my personal knowledge, dozens of these postal workers are engaged in supplementary earning jobs, either before or after their regular post office work is completed. Of necessity, they have to seek supplemental jobs because their postal salary is not adequate and sufficient for them and their growing families to decently get by on. In many cases their wives, the mothers of growing children, necessarily leave the home during hours when they should be home giving supervision to their growing children; to also add to the family income for shoes, bread, and butter, and educational advantages for their children. Many wives leave their children in care of babysitters, or public kindergartens; or day nurseries, and go to work to help out. They have to.

The committee report specifies present earnings and anticipated earnings if this bill passes. It identifies the necessity of this 7½ percent as a minimum. The postal and other Federal workers have no recourse to obtain a decent salary increase excepting by action of Congress. They cannot present their just claims for decent salary increases excepting to committees of Congress and the full membership of Congress. The reasonable and constructive basis of collective bargaining is not available to them.

Mr. Chairman, I surmise that when this bill comes up for final passage, because this 7½ percent increase straight across the boards is recognized as so reasonable and necessary and just, that many Members of this great legislative body who inherently would like to support the position taken by the distinguished minority leader, the gentleman from Indiana [Mr. HALLECK], in opposing this raise proposal, will be found voting "aye." I surely hope so. I am reasonably sure that all the Members of the California delegation on both sides of the political aisle recognize that with the steady and sharp increase in the cost of living in California, the cost of the necessities of life in California, will justify an "aye" vote for this 7½-percent proposal. I shall vote for it even though the distinguished minority leader has stated on this floor, substantially, he did not believe the bill would finally be enacted into law. This would indicate that while he stated it was his own individual opinion, and that the President of the United States had not told him what his opinion was and what he would do, he expects a veto. Nevertheless, I intend to vote for what I conscientiously and firmly believe to be right and just in the premises.

The additional sum of less than $700 million will not increase inflation for it will be expended by these postal and other Federal workers for the necessities of life. It will not unbalance the budget. It will not be unjust or unfair to employees in private industry. It will not set an unreasonable or impractical minimum.

Mr. Chairman, it will give to the employees involved what they deserve and what is right and just for the taxpayers, acting through this great Congress, to extend to their fellow Americans in the postal and other Federal employment.

Mr. LINDSAY. Mr. Chairman, I rise in support of this legislation in its present form to provide salary increases for postal and other Federal employees. I shall vote for the bill.

In the congressional district I represent, the postal and other Federal employees compose one of the groups which suffers most because of the high cost of living. At present rates it is virtually impossible for postal employees to maintain a decent standard of living.

I have had many discussions with groups of postal workers and other Federal employees who live in New York City and I can attest that most of them are forced to take additional employment elsewhere during their off hours. Their wives work in order to meet essential needs. Is it too much to ask that these citizens be adequately compensated?

It is unfortunate that those Federal employees who live in large urban areas should be penalized. I am hopeful that one day we will enact Federal pay legislation that is realistically geared to a cost of living index around the country. What may be fair pay in a small rural community is not fair pay in New York City.

This bill, calling for a 7½-percent across-the-board increase is a fair compromise and I am happy to vote for it.

Mr. METCALF. Mr. Chairman, our Government has a tremendous responsibility today—greater than ever before. The quality of the discharge of this responsibility depends to a very great extent upon the 2,200,000 civilian employees of the Government.

There are a number of ways in which pay scales can affect the quality of the work the Government receives from its civilian employees: First, by attracting more and better qualified candidates for Government service; second, by encouraging experienced employees to remain in Government service; third, by providing incentive and increasing morale. We cannot afford today to have a demoralized civil service.

There has not always been a crisis. We have been fortunate to have employees of quality and dedication. We could have continued to underpay our employees and would still have had many who were dedicated and qualified—and only considerations of the justice of it all would have made us pay them more. But today, we are forced to consider more than justice.

We need to make Government service attractive to young people who will make it their career. Young people today are not so much interested in the things that are going to happen to them in 20 to 30 years from now as they are in the immediate present. They think not in terms of some future date, but in terms of today, in terms of present-day food and clothing and shelter, and education for their children. Unless the wage of postal and Federal employees is made and remains sufficiently attractive, the postal service and the Government generally are going to be unable to attract and, perhaps even more important, retain the best type of young people. Low pay scales force the prospective employee to choose between responsibility to his job interests or his loyalty to his Government and responsibility to the economic well-being of his family.

The "Report on Civilian Compensation in the Executive Branch of the Federal Government," compiled by the steering committee of the Interdepartmental Committee on Civilian Compensation in November 1957, stated in summary:

> Personnel turnover is increasing and quality is decreasing. Many jobs remain unfilled. Quality and quantity of applicants is inadequate.

Why are we failing to attract qualified applicants? Why are dropouts increasing? The committee hearings on Federal and postal pay raise bills are full of figures indicating that pay of Government workers is lagging seriously behind rates for comparable jobs in the private sector of the economy. For example, during the period between July 1951 and November 1959, post office clerks received wage increases averaging 38½ cents per hour, or approximately 20 percent, while production workers in manu-

facturing industries received wage increases averaging 70 cents per hour and in excess of 45 percent. In July of 1951, after the enactment of Public Law 204 of the 82d Congress, the entrance rate for a substitute post office clerk was $1.61½ per hour. This was about 1.8 cents per hour above the industrial average. By November of 1959 the entrance rate for a post office clerk was 27.2 cents per hour short of the industrial average.

The purchasing power of many Government employees today is substantially behind that of 1939. For G–5, G–7, G–9, G–11 and G–13 employees, a percentage wage increase of from 5.2 percent to 20.3 percent would be necessary to give them the purchasing power they had before the war.

A study of pay scales for policemen and firemen in large metropolitan centers, where 40 percent of all postal employees live and work, reveals that the lowest wage in 10 of 17 cities studied was greater than the highest wage which a letter carrier or clerk can receive according to the national postal salary schedule.

The evidence presented to the Committee on Post Office and Civil Service clearly shows, according to indicators such as purchasing power and comparative wages, that our Government and postal employees are underpaid.

A pay raise for Federal employees has been criticized as a contribution to inflation. We do not know if rising wages are a cause of inflation. Even if they were, merely equalizing wages of Federal employees would not push up other wages. Those wage demands which endanger stability are not the ones which equalize, but those which are excessive and unnecessary. It is definitely not excessive and unreasonable to ask that Federal employees be paid at rates "reasonably comparable" to those in private business. The administration cites reasonable comparability as a basis for judgment of Federal wage scales. If this is so, why do they not help us to make the wages comparable?

The administration suggests that we should wait for further studies of comparability. Many of us would like to see a comprehensive plan for coupling Government and postal pay increases to increases in the rest of the economy. But we cannot wait. Should we postpone a raise in salaries, we will have increasing difficulty in finding qualified applicants for Government service, increasing numbers of resignations, and increasing demoralization. Do we have the right to say once again to our Government and postal employees: "Just wait another couple of years and keep up your good spirits. As soon as we finish all our studies of the problem we will all agree on a comprehensive plan to provide regular salary increases. We are sorry, but we just do not know yet how to give you the salaries you deserve."

We need qualified workers in Government service. There, employees are performing functions which are crucial to the national defense, safety, economy, and welfare. Large numbers of them act in direct support of defense activities or in other equally important tasks wherein failure might adversely affect the entire Nation. Not only do we have a responsibility to our present employees, but it is necessary that we have a Government service which is efficient and up to the enormous responsibility which faces it. I would feel responsible to neither my fellow citizens who are Government workers nor to the citizens of the country who demand and deserve good government, if I did not continue to support a just rate of pay for Federal and postal employees. H.R. 9883 will go a long way toward making their salaries what they should be.

Mrs. GRANAHAN. Mr. Chairman, I strongly support and urge favorable action on H.R. 9883, a bill to reaffirm the historic policy of Congress that employees of the Government of the United States shall receive fair compensation for the great public service they perform.

To state the objective differently, the bill recognizes that the high quality of service which is required for the conduct of the Government's business warrants recognition, in terms of salaries and wage rates, at least equal to that which is given to comparable services in private enterprise which is protected and supported by the Government.

As originally reported by the Committee on Post Office and Civil Service, this bill would provide fair and reasonable compensation comparable to that enjoyed by employees in private industry by giving a 9-percent across-the-board pay increase to those categories of Federal employees consistently included in salary legislation. As now amended, it provides a somewhat lesser raise of 7½ percent, which is certainly not excessive in any event and represents a sincere effort to make sure that this legislation does not end in a stalemate between Congress and the Executive. If this bill is vetoed and the veto is not overridden, then it will be obvious to all that no compromise could possibly have been effected, since those of us concerned with this legislation have more than leaned over backward to try to pass a bill which can become law.

The evidence presented during the hearings on H.R. 9883 establishes beyond a doubt that a pay increase is warranted. During its consideration of the various pay bills, the committee was faced with the difficult problem of deciding what rate of increase should be proposed. It is my conviction that this decision should be based on a determination of the amount required to provide Federal employees with pay comparable to that in private enterprise. This view recognizes that all that postal and other Federal employees have ever asked of their Government is fair and timely salary provisions.

My motion in committee to amend H.R. 9883 to provide for a 9-percent across-the-board increase was approved by the committee on a conclusion that this amount of increase would achieve reasonable comparability.

The proposed pay increases would apply to slightly more than 1½ million employees of the Federal Government. The 9-percent raise would have meant an estimated cost of approximately $846 million. The lesser raise will cost about $680 million. It must be recognized that these 1½ million employees are the people responsible for performing the tasks incident to an annual Federal expenditure of well over $70 billion. It seems to me that the estimated cost is a completely reasonable price to pay to assure fair compensation to a group of employees who, in the aggregate, bear so great a responsibility.

The opposition to a pay increase has been based primarily on two arguments, neither of which, to me, is persuasive.

In the first place, the administration has argued that a pay increase at this time would have an unfavorable effect on its anticipated $4.2 billion budget surplus for next year. Certainly, there can be no argument against economical government or against the achievement of a budget surplus by legitimate economies. At the same time, reasonable people will agree, I think, that withholding pay from its work force is too high a price to pay for a budget surplus. This argument against pay increases raises a serious question whether the administration may be seeking to achieve personal objectives and political advantage at the expense of its civilian employees, who are clearly entitled to a salary increase at this time.

The second major argument has been that all efforts to adjust Federal salaries should await the results of a comparative study of Federal and private industry salaries, which has been recently undertaken by the Bureau of Labor Statistics. This argument, it seems to me, is completely specious in the light of the overwhelming evidence which shows that Federal employees generally are now far below the levels of comparable salaries in private enterprise. Administration representatives who now oppose pay increases have themselves consistently maintained that the Government has extreme difficulty in recruiting and retaining competent employees in the Government because of disparities in pay. In this connection, the Chairman of the Civil Service Commission, in testimony before the Subcommittee on Manpower Utilization on December 4, 1959, stated:

> In contrast, statutory increases in the Classification Act pay schedules have been much less frequent and have usually trailed far behind such changes in industry. The result has been an almost continuing unfavorable competitive position in the labor market for the kinds and quality of white collar employees needed to staff the varied and complex activities of our Government.

It is difficult to understand what purpose, other than mere delay, would be accomplished by awaiting the results of the Bureau of Labor Statistics' survey in the face of the clear evidence we have before us.

The evidence presented during the hearings on H.R. 9883 and a number of companion bills establishes without any doubt that immediate and substantial Federal employee salary adjustments are necessary in the interest of efficiency in the Government and fairness to Government employees. The evidence clearly shows that (a) Federal employees are substantially below the level of the national economy; (b) that the salaries paid Federal employees do not compare

favorably to salaries paid for comparable work in private enterprise; and (c) that the rates of salary increases for Federal employees have lagged far behind the rates of increases in private enterprise over a period of years.

The following are only a few of the many comparisons which were presented during the committee hearings and which convince me that pay increases are justified at this time.

The largest single group of employees in the postal service are the clerks and letter carriers. The responsibilities of their jobs have been compared to those of policemen and firemen. Postal clerks and carriers are paid in a salary range of from $4,035 to $4,875 per year. This is generally about $1,000 a year below the pay ranges of policemen and firemen in 60 large metropolitan centers. In one of the largest cities, for example, policemen and firemen are paid in a range of $6,396 to $6,828, roughly $2,000 more per year than postal clerks and carriers.

The average weekly earnings of postal letter carriers is $89.23. A recent Department of Labor publication shows that the average weekly earnings of production workers in various industrial groups ranges from a low of $91.30 to a high of $118.13. In other words, in January 1960 the lowest paid group of industrial workers earned $2 per week more on the average than did the postal employees. The highest paid group of industrial workers earned approximately 30 percent more than the avcrage postal employee.

The same unfavorable comparison is shown between Federal employees in the classified service and employees on comparable jobs in private enterprise. For example, evidence has been presented to show that in 10 selected cities in the country tabulating machine operators earn an average of from $4,487 to $5,321 per year. Federal employees doing the same kind of work are paid $3,814 per year. Draftsmen in private industry earn from $5,686 to $6,443 per annum as compared to Federal pay for the same work of $4,560 per year.

A recent Bureau of Labor Statistics survey shows that guards in private industry in various cities are paid at rates ranging from $1.80 per hour to $2.45 per hour. The entrance pay for guards in the civilian service in the Government is $1.57 per hour and the maximum rate a guard can earn is $1.84 per hour.

I think these few examples of comparable salary rates are sufficient to show without any doubt that the current rates of pay for Federal employees are substantially below those of comparable workers in private enterprise. Equally conclusive evidence has been presented to show that the salaries paid to Federal workers have not kept pace with the increases and cost of living and as a result it is now necessary for far too many Federal employees to accept outside spare time employment in order to provide their families with the necessities of life.

It has also been shown, and this is admitted by administration representatives, that a great deal of the turnover of technical and professional people in the Government results from the Government's inability under existing salary scales to successfully compete with private industry for the services of those capable and well qualified necessary to perform many of the Government's functions.
